THE HUDSON-FULTON CELEBRATION 1909

The Fourth Annual Report of the Hudson-Fulton Celebration Commission to the Legislature of the State of New York • Transmitted to the Legislature May twentieth, nineteen ten

Prepared by EDWARD HAGAMAN HALL, L.H.M., L.H.D.

VOLUME I • PAGES 1 to 714

Printed for the State of New York by
J. B. Lyon Company, State Printers, at Albany, 1910

"It is as pleasant a land as one need tread upon . . . The land is the finest for cultivation that I ever in my life set foot upon."—HENRY HUDSON.

"Industry will give abundance to a virtuous world and call mankind to unbounded feats of harmony and friendship. The liberty of the sea will be the happiness of the earth."—ROBERT FULTON.

"We are not celebrating ourselves . . . We celebrate the immense significance of America to all mankind. May the harmony and fraternity of this festival be an augury for the future. May the blending of races which has made possible all that we now celebrate never be made naught by the conflict of races upon the battlefield. May the spirit of this day persist, grow ever more effective in the mind of men, and this occasion be the precursor of many a festival in the years to come, marking the steady progress of all peoples of the earth who have united to make America what it is, upwards and onward, along the path that leads to perfect peace and justice and liberty."—ELIHU ROOT, Sept. 29, 1909.

"The money that has been spent on this Celebration has not been wasted. We have too few opportunities in this country to come together when there are no partisan questions to be discussed, when there are no individual prejudices to be incurred, when there are no candidacies to be fostered, but we are all united, emphasizing our unity and linking our differences, in order that America may be great because the people are in spirit to justice and to appreciation of the ideals of the great Republic. . . . I say to you, my friends, it has been worth while, and we are altogether in this great State of New York better equipped for our duties as citizens, knowing more of our glorious past, more confident of the future, than we would have been if we had not worked together to give an adequate representation of our joy in our progress."—CHARLES L. HUGHES, Oct. 7, 1910.

NEW YORK, May 19, 1910,

The Hon. JAMES W. WADSWORTH, JR.,

Speaker of the Assembly,

Albany N. Y.

Sir:

I have the honor to transmit herewith to the Legislature of the State of New York the Fourth Annual Report of the Hudson-Fulton Celebration Commission as required by its charter, Chapter 325 of the Laws of 1906.

Yours respectfully,

STEWART L. WOODFORD,

President.

HENRY W. SACKETT, *Secretary.*

INTRODUCTION

FROM Saturday, September 25, to Monday, October 11, 1909, the State of New York commemorated, under the auspices of the Hudson-Fulton Celebration Commission, the 300th anniversary of the discovery of the Hudson River by Henry Hudson in 1609 and the 100th anniversary of the first successful application of steam to navigation upon that River by Robert Fulton in 1807.

As a stimulus to its four years of devoted labor in preparing for the Celebration, the Commission had the inspiration of two eminent events in human history.

The first of these, which brought the Hudson River to the knowledge of Europe and opened the adjacent region to European settlement, was well calculated to appeal to the imagination and arouse popular interest. In contemplating it the mind instinctively compared conditions at the time of Hudson's advent with conditions at present and marveled at the change. Three hundred years ago, when civilization was hoary upon the banks of the Thames, the Rhine, the Seine, the Tiber, the Nile, and the Ganges, the primeval forests of the Hudson River gave shelter to no higher culture than the middle status of barbarism. Here was a virgin soil, seemingly reserved by Destiny in order that Civilization might here plant herself anew, and here cultivate in a freer air the institutions for which she had qualified herself by hard and painful schooling in the Old World. Then came Hudson's little ship and then the magic of three centuries of change. And in the harbor where Hudson saw only the hollow-log canoes of the native Indians, to-day float the treasure-laden argosies of the world; where he saw the rude bark habitations of the abo-

Discov-
ery of the
Hudson

rigines, now rises the second — soon to be the first — city of the world; and upon the banks of the river and in the tributary region where 300 years ago the barest necessities of precarious human existence were the measure of industry and the simplest requirements of personal adornment, the chase, and primitive warfare were the measure of art and science, now dwells a civilization which rivals that of any other part of the world. The contrasts thus presented by conditions at the two extremities of the period and the consciousness of the phenomenal development of our people in the multifarious departments of human activity during the three centuries intervening, could not but arouse civic pride and inspire civic enthusiasm.

Inven-
tion of
Steam
Navi-
gation

In recalling the founding of New York, one is reminded of Sir Francis Bacon's saying that "as in the arts and sciences the first invention is of more consequence than all the improvements afterwards," so "in kingdoms the first foundation or plantation is of more noble dignity and merit than all that followeth." There is, however, no more delicate, difficult and uncertain a task for the historian than that of comparing the relative importance of human events. Certainly, the second event commemorated in the Hudson-Fulton Celebration was one which ranks worthily with the first in its importance to the world. It is, indeed, impossible to measure the far-reaching effect of Robert Fulton's genius, which has narrowed the ocean in point of time to one-sixth its former dreary breadth, has increased the productive power of mankind and multiplied the world's commerce, has given to all the navigable waters of the earth a value which they did not previously possess, and by increasing the neighborliness of nations has promoted, to a degree which cannot well be measured, the brotherhood of mankind. This last aspect of the results of Fulton's genius may well be regarded as its most beneficent. While the material and tangible results of increased commerce due to steam navigation are conspicuous to the senses, it is not

extravagant, perhaps, to say that the increased personal intercourse of nations is having, and is destined yet to have, the greater influence on the history of the world. Buckle, in his profound two-volume "Introduction" to his projected "History of Civilization in England," speaking of the French and English peoples, said that they have "by the mere force of increased contact learned to think more favorably of each other and to discard that foolish contempt in which both nations indulged. In this, as in all cases, the better one civilized nation is acquainted with another, the more it will find to respect and imitate. For of all the causes of national hatred, ignorance is the most powerful. When you increase the contact, you remove the ignorance and thus you diminish the hatred. This is the true bond of charity." He then calls attention to the inefficacy of centuries of moralizing in reducing the frequency of war, and adds: "But it may be said without the slightest exaggeration that every new railroad which is laid down and every fresh steamer which crosses the Channel are additional guarantees for the preservation of . . . peace . . ." In these words the writer uttered a truth which is of universal application and which gives a true measure of the value of Fulton's invention.

Thus the second event commemorated gave a wide range to the thoughts, extended the scope of the Celebration, and emphasized its international significance.

Under these stimuli, the Commission arranged its plans with certain very definite ends in view.

The first was to make the Celebration educational, not commercial. The idea of an Exposition was among the earliest suggestions made to the Commission; but after careful consideration, the proposition was not adopted, and throughout all of the Commission's plans, the most careful pains were taken to avoid anything of a commercial tincture. Nothing of an advertising nature was permitted in the great land parades;

Celebration Educational
Not Commercial

no advertisements were permitted in the official literature; no admittance fee was charged to any function upon which public moneys were expended; and no public moneys were expended upon any personal decorations or souvenirs for the members of the Commission. On the contrary it was designed that every thing should be as educative as possible and that the greatest number of people possible should freely see the public spectacles. It was for this reason that the English plan of historical pageants within an enclosed space to which admission should be charged was deliberately avoided.

Designed
to Create
an His-
torical
Awaken-
ing

In the educational conception of the Celebration, much emphasis was laid on its historical side for the very natural reason that historical events were being commemorated. But there were additional reasons for this emphasis. The State of New York, as compared with her neighbors on the east and south, has heretofore shown questionable modesty in refraining from exploiting her own history. A glance at the book-shelves of any great public library will show how industrious the historians of Massachusetts and Pennsylvania and Virginia have been in recording the annals of which they are justly proud and how comparatively indifferent our own writers have been in this field. And this disparity has resulted in a very general ignorance of the full part played by our Colony and State in our national history. Furthermore, it has led to a positive and unfortunate misconception by many persons of the dignity of our State history. Taine, in his *History of English Literature*, has said, referring to the position of "Don Quixote" in the literature of Spain, that the best known and best loved book in Spanish literature is a satire on Spanish literature. Similarly one might say of New York history, that for many years, the best known — if not the best loved — book of New York history was a satire on New York history. The misfortune of Irving's "Knickerbocker's History of New York" was not so much its satire, which any person with a reasonable sense

of humor can appreciate, as the period at which it appeared — a period barren of any worthy and serious history of New York. The result was that many persons derived their impressions of the character of the founders of New York from Irving's whimsical conceptions. Gen. James Grant Wilson's scholarly four-volume Memorial History of New York has done much to compensate for past deficiencies with respect to the history of the City of New York, but there is yet no monumental history of the State of New York, and it must be confessed that New York is far from the position of historical eminence which she would hold, in the estimation not only of her own people but also of the nation at large, if there were a more popular familiarity with her annals. The second object of the Commission, therefore, was to create an historical awakening throughout the State.

A third object sought to be attained by the educational features was to promote the assimilation of our adopted population. Knowledge of the history of a city, or a state, or a nation conduces to love of country, civic pride and loyalty to established institutions. It serves to bind a people together, make it more homogeneous and give it stability. And it makes the inhabitants better citizens by holding up to their eyes lofty traditions to enlist their affections and inspire their imitation. With over 26 per cent of the population of the State foreign born, and 33 per cent more born here of foreign parents, it was felt that such a Celebration as was planned would result in great and far-reaching good. Still further to emphasize this phase of the Celebration, the people of every nationality were invited to take part in the parades and festivals, and an effort was made to make them feel that the Celebration belonged to them as much as to the older inhabitants; that by adopting our citizenship they adopted our traditions and institutions; and that their pride and loyalty should be as great as those of the descendants of the pioneer settlers.

Assimila-
tion of
Adopted
Popula-
tion

It requires but little reflection to perceive the great value of acquainting our adopted citizens with the fact that we *have* a body of worthy traditions and attaching them to those traditions. The power of tradition has been one of the most fundamental and conservative forces of all peoples of all times. As a body propelled through space tends to travel in a direct line unless diverted by some force other than that which drives it, so a people naturally tends to follow the impulses of the past and to adhere to tradition unless turned therefrom by other influences. Therefore the ingrained history of a nation, which in a broad sense we call tradition, serves as a balance wheel, tending to restrain sudden and spasmodic departures from the normal mode of progress. Historical culture thus materially promotes the welfare of the Commonwealth.

Promo-
tion of
Inter-
national
Friend-
ship

The Celebration also presented to the Commission a fourth opportunity of which it availed itself, namely, to promote international friendship. The events primarily celebrated and the history of our city and State following upon them inevitably suggested the relations which we sustain to the nations of the old world. The Netherlands fitted out the ship which explored our river and planted the first colony here. England furnished the bold navigator who sailed the ship and later she cultivated and developed the seedling colony planted by the Dutch. Italy, the mother of great explorers, 85 years earlier, supplied the navigator who first entered and described the lower harbor of New York; and France, whose friendly troops camped on our soil to help our forefathers win their independence, gave Verrazzano his commission. Irish parents gave birth to the steamboat inventor; and a hundred other ties of historical tradition and blood transfusion were recalled, binding us to every civilized nation on the earth. The occasion was propitious, therefore, for strengthening the ties which happily exist between them and us; and while the Commission never forgot that it represented only the State of New York, yet the

geographical position of the State as the Golden Gate of the east, its representative character as one of the leading States of the Union, the preëminence of the Metropolis in its foreign financial and commercial relations, and its unsurpassed facilities for entertaining foreign visitors on land and water, created exceptionally favorable conditions for impressing visitors from abroad with the best aspects of American life. Therefore every civilized nation with which the United States holds diplomatic relations was invited to send its representatives and every seaboard nation was invited to send in addition one or more vessels of its navy. When these guests arrived, less care was taken to impress them with our material achievement, which was obvious, than to show them the evidences of our culture in the arts and graces of civilization and to acquaint them personally with our best ideals and our noblest institutions. Above all, they were taken as closely to the hearts of our people as the most cordial and unreserved hospitality could make possible and were made to feel both the respect and the affection which we entertain for those many fatherlands from which we have inherited so many of our traditions and from which so large a part of our population has come. Senator Root eloquently summed up this phase of the Celebration when, at the Official Banquet in New York City on September 29, he said to the foreign representatives: "We are not celebrating ourselves. We are not celebrating the greatness and wealth of our city . . . We celebrate in Hudson the great race of men who made the age of discovery . . . We celebrate in Fulton the great race of men whose inventive genius has laid the foundation for a broader, nobler and more permanent civilization the world over . . . Standing at the gateway of the New World, we celebrate the immense significance of America to all mankind . . . You who have come to us from abroad, from whatsoever country you come, find here the children of your own fatherland. In all that you find here that is worthy of admira-

Celebration extended along 200 miles of the Hudson valley, from Staten Island on the south to Troy and Cohoes on the north, and the various local interests of all intermediate communities were represented on the Commission by men chosen for their force of mind and character. In this respect, as in others, the task of the Commission was very unusual, and the felicitous harmony which prevailed was manifestly due to the unselfish spirit of the members of the Commission, who dedicated their labors to the public welfare, who had no personal ends to attain, and whose only recompense for their valuable contributions of time, labor and in many cases money, was to be found in the consciousness of a public duty faithfully discharged and in the satisfaction to be derived from the contemplation of successful celebration. Gen. Woodford, the President of the Commission, who soon after the Celebration started on his mission abroad to present the Gold Medals and messages sent by the Commission to the heads of Governments represented by naval vessels at the festivities, wrote from Italy, in April, 1910: "I have never known a body of men like our Commission — one purpose — one effort — not a personal ambition."

Of the Celebration itself, it may be said that taken as a whole — in character, significance and extent — it was unique. It was not a rejoicing such as those which have greeted the return of troops from victorious wars, when tears of joy were mingled with tears of sorrow. It was not a demonstration of gladness upon the return of a victorious fleet, when the exultation of a grateful people carried with it the inseparable regret of generous victors over vanquished foes. It was not the vaunting demonstration of a political party in the bitter rivalry of a partisan campaign. Such occasions have seen parades greater in length and numbers than those of 1909. The Hudson-Fulton Celebration, on the contrary, was a jubilee of happiness. The Nation was at peace with the world. Civil

A Festival of
Patriotic
Sentiment

concord blessed our people at home. Material prosperity abounded. Even man's evil propensities seemed to be suspended and the best qualities of human nature to come to the surface, for it is a literal fact that during the two weeks of the Celebration in New York City, there were fewer homicides, fewer suicides, and less crime generally than in any other equal period in the year. There were also fewer accidents and a lower general death rate than usual. There was seemingly nothing to alloy the happiness of the occasion and the people practically abandoned themselves for a fortnight to a rational festival of patriotic sentiment.

Value of
Celebration
Incidental

Upon this Celebration a little over a million dollars was expended under the direct auspices of the Commission. Of these funds, the State Government appropriated about 48 per cent and the New York City Government about 24 per cent. The free-will offerings of the inhabitants of New York City furnished about 28 per cent. In addition to these funds, large amounts were raised and expended under private auspices in the various communities throughout the State. No financial aid was received from the Federal Government* or from any other State.†

The question may be asked: "Did it pay?" To the inquirer who calculates results by the gold-measurer's balance, it may be replied that one of the foremost financiers of the country is quoted as saying that our increased commerce, due to more friendly international relations, will more than compensate for every dollar expended. That, however, is an incidental result. Material gain was not the purpose of the Celebration, and it is no more possible to gauge its results by

* As stated in the following chapters, however, the Federal Government cordially lent its invaluable aid in inviting foreign governments, in the presence of the United States Navy and Army, in entertaining the guests from abroad, in issuing a commemorative postage stamp, and in other ways.

† Since the foregoing was written, the New Jersey Committee of the Commission, of which Hon. E. C. Stokes is Chairman, has contributed \$821,271.

the standard of dollars than it is to measure the value of education by the cost of the public schools or the value of civilization by the cost of orderly government. The Hudson-Fulton commemoration was a celebration of sentiment; and sentiment — what people think — is one of the strongest mainsprings of human action. An eminent English jurist says that sentiment is more powerful than law, for law is the expression of sentiment and cannot be enforced without its support. And a distinguished French critic, about to write the history of a national literature, says that the motive forces of history are to be sought in the human sentiments. To cultivate ideals, then, is to advance civilization; and who can measure the elevating influence of the many exhibitions of the arts and sciences throughout the State; of the examples of great men recalled to the rising generation in a thousand public schools; and of the ideals held up by preachers and orators in hundreds of pulpits and on a score of platforms? Many monuments of bronze and stone will record the Hudson-Fulton Celebration, but the most enduring monument is that which has been erected in the minds of our people, a memorial of a brilliant past and an inspiration to a more lustrous future.

CHAPTER I

ORIGIN OF THE HUDSON-FULTON CELEBRATION

THE Hudson-Fulton Celebration in the State of New York in 1909 was the result of two separate but closely related ideas in the Celebration. The first of these ideas sprang from the approach of the 300th anniversary of the third and most famous of Hudson's four historic voyages, the realization of the importance of that voyage as a factor in the opening of the North American Continent to civilization, and the instinctive desire to commemorate the anniversary in a suitable way. In like manner, the second idea sprang from the approach of the 100th anniversary of the first practical application of steam to navigation by Fulton. One anniversary came in 1909, the other in 1907; but as Fulton's demonstration of the practicability of the use of steam as a motive power for boats was made upon the river which Hudson had explored, the close relation of the two anniversaries was quickly perceived and the movements for their independent celebrations were merged in the creation of the Hudson-Fulton Celebration Commission. The course of events leading up to the union of these two movements was as follows:

The earliest suggestion of a Celebration of the Hudson Ter-centenary appears to have been made by the late Rev. J. H. Suydam, of Rhinebeck, N. Y., who, in a letter printed in the New York Tribune July 31, 1893, commenting on the Columbian celebration, proposed the celebration of the 300th anniversary of the discovery of the Hudson River in 1909. He inquired: "Will such organizations as the St. Nicholas Society or the Holland Society of New York deem this of sufficient importance to begin the agitation?"

The records of the Holland Society, eight years later, contain the following minute:

"At a stated meeting of the Trustees of The Holland Society, June 13, 1901, the Secretary (Theodore M. Banta) called attention to the fact that the 300th anniversary of the discovery of the Hudson River by Hendrick Hudson will occur in the year 1909 — and offered the following preamble and resolution which were adopted:

"Whereas the three hundredth anniversary of the discovery of the Hudson River by a Dutch schip under the command of Captain Hendrick Hudson will occur in September, 1909, and it is eminently fitting that the tri-centennial of that momentous event in our history should be celebrated in a suitable manner, therefore

"Resolved, That the President of this Society be requested to appoint a Committee to take into consideration and report as to the best mode of enlisting the sympathy and securing the co-operation of all citizens of the State and of the country in a suitable commemoration of the ter-centenary of the discovery of the Hudson River."

"The President appointed as such a Committee the following gentlemen: Augustus Van Wyck, Warner Van Norden, Theodore M. Banta, Robert B. Roosevelt, Henry Van Dyke."

Hudson
Tri-cen-
tennial
Associa-
tion

In November, 1901, a number of citizens of New York City met with a similar object in view, and on June 3, 1902, formally organized as the Hudson Tri-centennial Association with Mr. Thomas Powell Fowler as President; Messrs. J. P. Morgan, James Stillman and J. Edward Simmons as Vice-Presidents; Mr. Talcott C. Van Santvoord as Treasurer; and Captain George A. White as Secretary. This Association suggested the construction of a Hudson Memorial Bridge from Inwood Hill to Spuyten Duyvil Hill across Spuyten Duyvil Creek near its confluence with the Hudson River. Different projects had been discussed, but the Association finally decided upon the plan for a bridge designed by Mr. A. P. Boller and presented the matter to the Hon. Seth Low, who was Mayor of New York in 1902 and 1903. The members of Mayor Low's administration regarded the idea of a memorial bridge with favor, but no definite action was secured during his incumbency, as the Mayor did not wish to commit his successors to a project the cost of which might exceed the debt

limit. The City did, however, make an appropriation of \$10,000 for the necessary engineering investigations and the Park Department was approached with a view to the provision of sufficient land for the construction of the bridge. Since then the project of the Hudson Memorial Bridge has been accepted by the municipal authorities as an important link in the great Riverside Drive of New York City along the shore of the Hudson, although the financial requirements for other and more immediately necessary public improvements have, as yet, deferred the consummation of the plan.

In 1902 the suggestion for a ter-centenary celebration was renewed in another form by Dr. George Frederick Kunz in an article in the North American Review for September, in which he said: "There should be a World's Fair in 1909 on Manhattan Island in honor of the ter-centenary of Henry Hudson's arrival in the Half Moon, as has been suggested by that able Dutch-American, Jan Theodore van Gestel."

Another important step was taken in the evolution of the organization of the Celebration when, on February 15, 1905, the late Hon. Robert B. Roosevelt, uncle of the then President of the United States and the descendant of one of the old Dutch families of New York, invited to his residence at No. 57 Fifth avenue representatives of the American Scenic and Historic Preservation Society, the Empire State Society of the Sons of the American Revolution, the Holland Society, the Hudson Tri-centennial Association, the Municipal Art Society, the National Arts Club, the New York Society of the Order of the Founders and Patriots of America, and the Saint Nicholas Society, for the purpose of organizing themselves into a Joint or General Committee on the Tri-centennial Celebration of the Discovery of the Hudson River by Henry Hudson. This committee organized with the Hon. Robert B. Roosevelt as President, Mr. Theodore M. Banta as Vice-President, Col.

World's
Fair sug-
gested

Hudson
Ter-cen-
tenary
Joint
Commit-
tee

Henry W. Sackett as Secretary and Mr. Warner Van Norden as Treasurer.

The Committee asked the Hon. George B. McClellan, then Mayor of New York, and the late Hon. Francis W. Higgins, then Governor of the State, officially to name a committee of citizens who should act jointly in arranging for a Hudson celebration; and those officials selected 150 gentlemen to compose the Hudson Ter-centenary Joint Committee.

The first preliminary meeting of this Committee was held in the Governor's room of the City Hall on November 16, 1905, when the Hon. Robert B. Roosevelt was elected Temporary Chairman, and Col. Henry W. Sackett, Temporary Secretary. A second preliminary meeting was held at the same place November 24, 1905. On December 5, 1905, at the same place, a permanent organization was effected by the election of the following officers:

President, Gen. Stewart L. Woodford.

Vice-Presidents, Hon. Robert B. Roosevelt, Mr. Andrew Carnegie, Major-General Frederick D. Grant, U. S. A., Mr. Morris K. Jesup, Hon. Levi P. Morton, Mr. William Rockefeller, Mr. William B. Van Rensselaer and Hon. Andrew D. White.

Treasurer, Mr. J. P. Morgan.

Secretary, Col. Henry W. Sackett.

Assistant Secretary, Mr. Edward Hagaman Hall.

The necessary working committees were also appointed.

Hudson
Tri-centennial
Association
With-
draws

At the meeting of the Hudson Ter-centenary Joint Committee held December 5, 1905, the following letter was received from the Hudson Tri-Centennial Association:

NEW YORK, November 20, 1905.

To the Plan and Scope Committee, Hendrick Hudson Celebration:

GENTLEMEN.—In pursuance of the request of the officially appointed Joint State and City Committee on the Hendrick Hudson Tri-centennial Anniversary, on September 9, 1909, the association which was formed by a few public-

spirited citizens in 1902 to further the creation of an appropriate memorial of the historic event, so fraught with the destiny of the "new world," respectfully begs to report as follows:

First.— That they regarded their organization simply as a preliminary one to incite the public interest for a celebration worthy of the occasion and the city of New York, and to advocate the idea that the occasion was one for a great civic memorial, which should not only add to the adornment of the city, but also be of a utilitarian character in the line of the development of Riverside Drive, the pride of our city and matchless in any city in the world.

Second.— That they have succeeded in creating great public interest, not only for an appropriate celebration, but also for the character of the permanent memorial proposed.

Third.— That they have interested the city authorities in the proposition, which has culminated in an appropriation by the Board of Estimate and Apportionment to have the surveys and preliminary design prepared with cost of construction. This work has been accomplished, and the report of the Commissioner of Bridges is now before the Board of Estimate.

Fourth.— The association, believing that they have gone as far as an informal body could go in furtherance of so important a matter, take pleasure in giving way, for the large work which must now be done, to the officially appointed joint committees of the State and City, trusting that what they have accomplished in a preliminary way will have the approval of their successors, and their active and immediate support before the city authorities in the permanent memorial proposed.

Fifth.— As a matter of record, the association submits herewith a report made to it by a sub-committee, April, 1903, which had its unanimous approval.

Sixth.— While the association regards its organized work as finished, its members will be glad to aid their successors, who have officially taken up this work, in any way in their power.

Respectfully submitted,

T. P. FOWLER,
J. PIERPONT MORGAN,
J. EDWARD SIMMONS,
JAMES STILLMAN.

This courteous letter of withdrawal from an organization which had already done so much for the celebration and had paved the way for a great public improvement was accepted with the Commission's high appreciation.

The next step was to elicit suggestions concerning the form

of the celebration in 1909, and in order that the people might offer their views on the subject, the Hudson Ter-centenary Joint Committee held three public hearings in the Governor's room of the New York City Hall on December 29, 1905, January 19, and January 26, 1906. At these hearings many valuable ideas were offered.

Fulton
Centen-
nial Cele-
bration
Commit-
tee

During the course of these meetings it developed that there was a committee in existence, appointed by the Mayor of New York, to arrange for the celebration of the 100th anniversary of the first practical application of steam to navigation by Robert Fulton. That committee, entitled the Fulton Centennial Celebration Committee, was appointed in response to the request of the New York Board of Trade and Transportation, made through its special committee consisting of Hon. William McCarroll, then President of the New York Board of Trade and Transportation, and now one of the Public Service Commissioners of the Second District; Mr. Frank S. Gardner, Secretary of the Board of Trade, and Mr. Aaron Vanderbilt, Chairman of the Committee on Maritime Affairs. At their suggestion, Mayor McClellan invited a number of gentlemen to meet at his office in the City Hall on July 13, 1905, to concert measures for celebrating in 1907 the centennial anniversary of the first trip of the Clermont on the Hudson River. The Mayor opened the meeting and asked Hon. Oscar S. Straus to act as Temporary Chairman. At the same meeting, Mr. McCarroll was elected Permanent Chairman and Mr. James H. Kennedy Permanent Secretary. The necessary committees were appointed, Mr. Aaron Vanderbilt being Chairman of the Plan and Scope Committee.

Hudson
and Ful-
ton Ideas
united

The Fulton Centennial Celebration Committee went to work actively and was formulating plans for its celebration, when it realized, as did the Hudson Ter-centenary Joint Committee, that two celebrations so closely related in their significance and so near each other in point of time might be combined to the

advantage of both. With this common feeling, the officers of the two organizations conferred informally, and on January 24, 1906, the President of the Hudson Ter-centenary Joint Committee wrote to the Mayor as follows:

The Hon. GEORGE B. McCLELLAN,

Mayor of the City of New York,

City Hall, New York:

DEAR SIR.—We have learned from the Secretary of the Committee appointed by you to arrange for the celebration in 1907 of the Centennial Anniversary of the first steam navigation of the Hudson river by Robert Fulton, that such Committee is to make its report to you on Thursday morning of this week, respecting the form of such celebration.

In discussing the matter with other members of the Hudson Ter-centenary Joint Committee, appointed by you and the Governor of the State of New York, it has occurred to us to suggest to you the propriety of merging these two committees for the purpose of celebrating both events in 1909.

Our reasons for this are briefly these:

These two events in the history of the Hudson River are so intimately related that their commemoration can with great propriety be combined in one celebration. Not only are the two events mutually related by their connection with the Hudson River, but an interesting coincidence of dates adds to the propriety of celebrating in 1909 the centennial of the beginning of steam navigation, for it was in 1809 that the Legislature of the State granted to Fulton the exclusive privilege of navigating the river—out of which action grew the famous case of Gibbons and Ogden, establishing the right of free navigation.

We believe that the union of these two observances will strengthen each. It will not only allow the municipality and the various civic interests concerned to focus their energies on one great observance, but will more effectually concentrate upon itself the public attention of the world.

If the suggestion which we have made meets with your approval, and it should prove acceptable to the members of the Committee appointed by you for the Fulton Celebration, we believe that it would be a conclusion which would not only be cordially received by all the members of the Hudson Ter-centenary Committee, but would serve in every way the best public interests.

Yours truly,

STEWART L. WOODFORD,

President.

HENRY W. SACKETT,

Secretary.

On January 25, 1906, a committee of the Fulton Committee consisting of Mr. McCarroll, Rear Admiral George W. Melville, U. S. N., Mr. Aaron Vanderbilt, Mr. L. T. Romaine, Mr. Colgate Hoyt and Mr. James H. Kennedy called on the Mayor, and made a similar recommendation.

The Mayor approving of the suggestions, steps were at once taken to secure a charter to combine both movements.

These steps were effective in securing the enactment of Chapter 325 of the Laws of 1906 creating the Hudson-Fulton Celebration Commission which became a law by the Governor's signature April 27, 1906. (See next chapter.)

Robert
Fulton
Monu-
ment As-
sociation

In order to prevent a confusion of organizations, it may be added that while the events before recorded were taking place still another body, entitled the Robert Fulton Monument Association, was formed by a number of leading and influential citizens of New York. This association effected a temporary organization in January, 1906, with Major-General Frederick D. Grant, U. S. A., as Temporary President, and in May effected a permanent organization with Mr. Cornelius Vanderbilt as President, the late Samuel L. Clemens ("Mark Twain") as First Vice-President, Mr. Hugh Gordon Miller as Second Vice-President, Mr. Richard Delafield as Treasurer, Mr. W. H. Fletcher as Secretary and Mr. H. W. Dearborn as Assistant Secretary. The specific object for which this Association was formed was the erection of a monument to Robert Fulton, and in 1907 it secured an act of the Legislature (Chap. 676) authorizing the City of New York to enter into an agreement with the Association in reference to the filling in and improvement of the land under water and the upland on the Hudson River opposite Riverside Park, New York, bounded by 116th street, the Hudson River Railroad, 114th street and the pierhead line, "for a water gate and monument to Robert Fulton, the inventor of steam navigation." The four grandchildren of Robert Fulton gave their consent to the removal of the inventor's

body from Trinity Churchyard to the proposed monument and the Association planned to lay the corner-stone of the monument in 1907. In the expectation that the monument would be ready in 1909 and therefore an object of great interest in the Hudson-Fulton Celebration, the Hudson-Fulton Celebration Commission appointed a committee with Mr. Charles R. Lamb as Chairman to confer with the Robert Fulton Monument Association with a view to friendly cooperation and to giving the Robert Fulton Monument suitable prominence in the ceremonies of 1909. On February 15, 1908, the President of this Commission addressed a communication to Mr. Robert Fulton Cutting of the Fulton Association, asking him to outline how that Association felt about participating with this Commission in the ceremonies in 1909, and received from Mr. Vanderbilt, President of that Association, under date of March 2, 1908, a reply in which the latter said in part:

"As you know, it will be necessary for us to eventually apply to the public for the funds necessary to erect the same" — (the water gate and tomb). "We feel that as the purposes of the two Associations are so different in character that it would be well to keep them distinct so that there may be no confusion on the part of the public at large in making their contributions. . . . You will readily appreciate that in a public matter of this kind where no personal interests are involved, that it is both the intention and desire of all to act in the most perfect harmony and accord, but as you request in your letter a candid expression as to the relation of the two Associations, we, after careful consideration, feel that because of the different methods proposed of honoring the memory of Robert Fulton and the uncertainty as to just when we can carry out what we have undertaken to accomplish, that it would be better for the two Associations to act independently of each other."

In deference to the foregoing expression, there was no further effort on the part of this Commission to coordinate its program with that of the Robert Fulton Monument Association.

CHAPTER II

INCORPORATION, LEGISLATION AND LEGAL MATTERS

Law and
Legisla-
tion
Commit-
tee

THE legislative matters of the Hudson-Fulton Celebration Commission were in charge of the Committee of Law and Legislation, of which the Hon. William Winton Goodrich, Presiding Justice of the Appellate Division of the Supreme Court for the Second Department of the State of New York, was Chairman up to the time of his death November 21, 1906, and of which Mr. Francis Lynde Stetson has been Chairman since that date. The first task of this Committee was the drafting of the Charter of the Commission.

On Friday, February 16, 1906, Gen. Stewart L. Woodford, President of the Hudson Ter-centenary Joint Committee, Judge Goodrich, the Hon. Charles S. Francis, the Hon. James M. Beck and Mr. Herman Ridder called on Gov. Higgins at Albany and laid before him the proposed Charter and on February 19 the Governor sent it to the Legislature with the following special message:

STATE OF NEW YORK,
EXECUTIVE CHAMBER,

ALBANY, *February 19, 1906.*

To the Legislature:

Gov. Hig-
gins'
Message
to the
Legisla-
ture

During the past year historical societies and public-spirited citizens have been looking forward to some action on the part of the State and City of New York for the appropriate celebration of the three hundredth anniversary of the discovery of the Hudson River by Henry Hudson in the year 1609 and of the centennial anniversary of the first use of steam in the navigation of the Hudson River by Robert Fulton in the year 1807. These two events in the history of the Hudson River are of such interest to the State of New York, and to the United States, that it seems fitting that proper celebration of each should be had.

Having in view such official action, I acceded to the request of many gentlemen interested in the plan to name a Committee of distinguished citizens, with whom a Committee named by the Mayor of the City of New York should co-operate to formulate plans for a celebration of the Ter-centenary of the discovery of the Hudson.

It has been suggested by this Committee, after long and careful consideration, that both events might, with propriety, be celebrated together in the year 1909, and that the union of these two observances would strengthen each and would more effectually concentrate upon the affair the attention of the world.

The Committee now acting has no official status and is wholly an informal and unofficial body. In order to give it official standing and to provide it with sufficient funds for preliminary expenses, I recommend to the Legislature the consideration of a bill entitled, "An Act to establish the Hudson-Fulton Celebration Commission, and to prescribe the powers and duties thereof, and making an appropriation therefor," a copy of which is herewith transmitted for your consideration.

FRANK W. HIGGINS.

Upon the receipt of the message, the Hon. John Raines introduced the bill in the Senate and the Hon. Sherman Moreland in the Assembly.

In due time the bill was enacted and became Chapter 325 of the Laws of 1906 by the Governor's signature on April 27. It reads as follows:

Charter
of the
Commis-
sion

AN ACT

To establish the Hudson-Fulton Celebration Commission and to prescribe the powers and duties thereof and making an appropriation therefor.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. Grover Cleveland, Levi P. Morton, David B. Hill, Frank S. Black, Benjamin B. Odell, Junior, Stewart L. Woodford, Robert B. Roosevelt, Andrew Carnegie, Frederick D. Grant, Morris K. Jesup, William Rockefeller, William B. Van Rensselaer, Andrew D. White, J. Pierpont Morgan, Henry W. Sackett, Edward Hagaman Hall, Herbert Adams, R. B. Aldcroft, Junior, John G. Agar, B. Altman, Louis Annin Ames, John E. Andrus, James K. Apgar, John D. Archbold, John Jacob Astor, Theodore M. Banta, Franklin Bartlett, James C. Bayles, James M. Beck, August Belmont, William Berri, Cornelius N. Bliss, E. W. Bloomingdale, Reginald Pelham Bolton, Thomas W. Bradley, George V. Brower, E. Parmly Brown, Henry K. Bush-Brown, William

L. Bull, E. H. Butler, Nicholas Murray Butler, J. Rider Cady, J. H. Callanan, Henry W. Cannon, Joseph H. Choate, Caspar Purdon Clarke, George C. Clausen, A. T. Clearwater, Thomas Clyde, E. C. Converse, Walter Cook, John H. Coyne, E. D. Cummings, William J. Curtis, Paul D. Cravath, Charles de Kay, James de la Montayne, Chauncey M. Depew, Edward DeWitt, William Draper, Charles A. DuBois, John C. Eames, George Ehret, Smith Ely, Arthur English, John M. Farley, J. Sloat Fassett, Barr Ferree, Stuyvesant Fish, Theodore Fitch, Winchester Fitch, J. J. Fitzgerald, Thomas Powell Fowler, Austen G. Fox, Charles S. Francis, Henry C. Frick, Frank S. Gardner, Garret J. Garretson, Theodore P. Gilman, Robert Walton Goelet, William W. Goodrich, George J. Gould, George F. Gregory, Henry E. Gregory, W. L. Guillaudeau, Abner S. Haight, Benjamin F. Hamilton, William S. Hawk, James A. Hearn, Peter Cooper Hewitt, Warren Higley, Michael H. Schwab, Isaac N. Seligman, Louis Seligsburg, Joseph H. Senger, Frederick W. Seward, George F. Seward, William F. Sheehan, J. Edward Simmons, John W. Simpson, E. V. Skinner, Charles Stewart Smith, Nelson S. Spencer, John H. Starin, Isaac Stern, Louis Stern, Francis Lynde Stetson, Louis Stewart, James Stillman, Oscar S. Straus, Theodore Sutro, Henry R. Towne, Irving Townsend, Spencer Trask, C. Y. Turner, Albert Ulmann, Aaron Vanderbilt, Alfred G. Vanderbilt, Cornelius Vanderbilt, Henry Van Dyke, Warner Van Norden, Mistress Anson P. Atterbury, Miss A. T. Van Santvoord, J. Leonard Varick, E. B. Vreeland, Charles G. F. Wahle, Samuel B. Ward, W. L. Ward, William C. Warren, Edward Wells, Junior,

Charles W. Wetmore, Edmund Wetmore, J. Du Pratt White, Fred C. Whitney, William R. Willcox, James Grant Wilson, Charles B. Wolfram, Timothy L. Woodruff, W. E. Woolley, and James A. Wright, who were named by the Governor of the State of New York, or by the Mayor of the City of New York as members of the Hudson Ter-centenary Joint Committee and of the Fulton Centennial Committee, and all such persons as are or may hereafter be associated with them, by the appointment of the Governor or of the said Mayor, shall be and are hereby constituted a body politic and corporate by the name of the Hudson-Fulton Celebration Commission, which corporation shall be a public corporation, with all the powers specified in the eleventh section of the general corporation law, except as otherwise provided by this act. It shall have no capital stock.

§ 2. The object of said corporation shall be the public celebration or commemoration of the ter-centenary of the discovery of the Hudson river by Henry Hudson in the year sixteen hundred and nine, and of the first use of steam in the navigation of said river by Robert Fulton in the year eighteen hundred and seven, in such manner and form, either permanent or temporary, as may be found appropriate by said Commission.

§ 3. The said Commission shall have power to acquire, hold and possess for the purposes of its incorporation real or personal estate within the State of New York in fee or for a term of years or any easement therein, by gift, devise, bequest, grant, lease or purchase; and in case such Commission should be unable to agree with the owners thereof for the purchase or lease of any real estate required for the purposes of its incorporation, it shall have the right to acquire the same, by condemnation, in the manner provided by the condemnation law, being chapter twenty-three of the code of civil procedure; provided, however, that no real property shall be acquired by condemnation within the city of New York until after the approval of the board of estimate and apportionment of that city.

§ 4. The affairs and business of said Commission shall be conducted by a board of not less than twenty-five nor more than one hundred trustees, a quorum of whom for the transaction of business shall be fixed by the by-laws. The trustees for the first year shall be Grover Cleveland, Levi P. Morton, David B. Hill, Frank S. Black, Benjamin B. Odell, Junior, Stewart L. Woodford, Robert B. Roosevelt, Andrew Carnegie, Frederick D. Grant, Morris K. Jesup, William Rockefeller, William B. Van Rensselaer, Andrew D. White, J. Pierpont Morgan, Henry W. Sackett, Edward Hagaman Hall, John G. Agar, James M. Beck, J. Rider Cady, Henry W. Cannon, Joseph H. Choate, Paul D. Cravath, William J. Curtis, J. Sloat Fassett, Stuyvesant Fish, Theodore Fitch, Thomas Powell Fowler, Charles S. Francis, William W. Goodrich, George J. Gould, Warren Higley, August F. Jaccaci, William Jay, James H.

Kennedy, Horatio C. King, George Frederick Kunz, John LaFarge, Henry M. Leipziger, Seth Low, William McCarroll, William J. McKay, John G. Milburn, Frank D. Millet, Ogden Mills, Eben E. Olcott, John E. Parsons, Sereno E. Payne, Bayard L. Peck, N. Taylor Phillips, Eugene H. Porter, Horace Porter, Cornelius A. Pugsley, Louis C. Raegener, Herman Ridder, Jacob Gould Schurman, Isaac N. Seligman, Frederick W. Seward, J. Edward Simmons, Charles Stewart Smith, Nelson S. Spencer, Francis Lynde Stetson, James Stillman, Oscar S. Straus, Spencer Trask, A. G. Vanderbilt, Cornelius Vanderbilt, Henry Van Dyke, Samuel B. Ward, and James Grant Wilson. Such trustees shall make the by-laws of the commission providing among other things for the election of their successors within thirteen months from the passage of this act, and for the election of officers, as therein specified, to hold office until the succeeding annual election of trustees, and until their successors are elected, and for the filling of vacancies in any office. They shall continue to hold office until the succeeding election of trustees to the number and in the manner provided by the said by-laws.

§ 5. None of the trustees or members of said Commission, except one or more assistants to the Secretary, shall receive any compensation for services, nor shall any of them be pecuniarily interested directly or indirectly in any contract relating to the affairs of said Commission; nor shall said Commission make any dividend or division of its property among its members, managers or officers; nor shall any member of the Commission nor any trustee be liable individually for any of its debts or liabilities.

§ 6. Said Commission shall annually make to the Legislature a statement of its affairs, and from time to time report to the Legislature such recommendations as are pertinent to the objects for which it is created, and may act jointly or otherwise with any persons appointed by any other State for purposes similar to those intended to be accomplished by this act.

§ 7. Whenever the Commission shall report to the Legislature that the purposes for which the Commission is created have been attained and all its debts and obligations have been paid, its remaining real and personal property shall be disposed of as the Legislature may direct.

§ 8. The Commission shall have power to receive subscriptions from parties who may desire to contribute to the object of the said Commission.

§ 9. The sum of twenty-five thousand dollars, or so much thereof as may be necessary, is hereby appropriated out of any moneys in the treasury, not otherwise appropriated, for the purposes of this act. Such money shall be paid by the Treasurer on the warrant of the Comptroller issued upon a requisition signed by the President and Secretary of the Commission, accompanied by an estimate of the expenses for the payment of which money so drawn is to be applied. No indebtedness nor obligation shall be incurred under this act in

excess of the appropriations herein or hereafter made, and such sums as may be provided for said Commission by the city of New York for the purposes of this act. The Commission shall, as requested by the Governor, from time to time render to him reports of its proceedings.

§ 10. The city of New York may provide for the said Commission such sums of money as the city shall deem expedient and in such manner as it shall deem proper for the purpose of carrying out the objects of the Commission.

§ 11. The duration of the corporation shall be ten years.

§ 12. This act shall take effect immediately.

The next legislation was sought with a view to giving effect to the policy of the Commission to make the Celebration one of statewide participation and particularly to enlist the interest of the communities along the whole Hudson river valley. With this end in view, Chapter 217 of the Laws of 1908, which became a law May 6, was enacted. It reads as follows:

AN ACT

To increase the number of members and Trustees of the Hudson-Fulton Celebration Commission.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. The members and Trustees of the Hudson-Fulton Celebration Commission, as designated by chapter three hundred and twenty-five of the laws of nineteen hundred and six, are increased in number by adding to and including as such members and Trustees by virtue of their office the persons severally and respectively, who from time to time and for the time being, shall hold municipal office as follows in the following cities of the state, and in the following villages upon the Hudson river: The Mayors of the cities of Albany, Amsterdam, Auburn, Binghamton, Buffalo, Cohoes, Corning, Cortland, Dunkirk, Elmira, Fulton, Geneva, Glens Falls, Gloversville, Hornell, Hudson, Ithaca, Jamestown, Johnstown, Kingston, Little Falls, Lockport, Middletown, Mount Vernon, Newburgh, New Rochelle, New York, Niagara Falls, North Tonawanda, Ogdensburg, Olean, Oneida, Oswego, Plattsburg, Poughkeepsie, Rensselaer, Rochester, Rome, Schenectady, Syracuse, Tonawanda, Troy, Utica, Watertown, Watervliet, Yonkers, and of any city which may hereafter be incorporated, all of whom shall be members and Trustees of the Commission, and also the Presidents of the villages of Athens, Castleton, Catskill,

Cold Spring, Corinth, Cornwall, Coxsackie, Croton-on-Hudson, Dobbs Ferry, Fishkill, Fishkill Landing, Fort Edward, Green Island, Hastings-on-Hudson, Haverstraw, Irvington, Matteawan, Mechanicville, North Tarrytown, Nyack, Ossining, Peekskill, Piermont, Red Hook, Rhinebeck, Sandy Hill, Saugerties, Schuylerville, South Glens Falls, South Nyack, Stillwater, Tarrytown, Tivoli, Upper Nyack, Victory Mills, Wappingers Falls, Waterford, and West Haverstraw, who shall be members of the Commission.

§ 2. This act shall take effect immediately.

Appropriation
by the
State in
1908

During the first two years of its existence, the Commission used but half of the \$25,000 appropriated in 1906 for preliminary expenses. The Commission therefore asked the Legislature of 1908 to re-appropriate the unexpended \$12,500 and to appropriate \$150,000 more in order that it might begin the physical preparations for the Celebration. The Legislature responded by embodying in the act known as the "Supply Bill," but formally entitled "An act making appropriations for certain expenses of government and supplying deficiencies in former appropriations," which became Chapter 466 of the Laws of 1908 by the Governor's signature May 22, the following appropriation:

"The sum of twelve thousand five hundred dollars (re. \$12,500) being the unexpended balance of an appropriation made by chapter three hundred and twenty-five of the laws of 1906 for the Hudson-Fulton Celebration Commission is hereby reappropriated for the same purpose, and the further sum of one hundred thousand dollars (\$100,000) is hereby appropriated and made immediately available for the same purpose and the further sum of fifty thousand dollars (\$50,000) which is hereby appropriated and made available on and after January 1st, 1909."

Board of
Trustees
Enlarged

At the beginning of 1909 it appeared desirable to add to the Board of Trustees without displacing any of those whose services had been so valuable in the past, a number of gentlemen whose counsel and cooperation were greatly desired. It was also desired to add to the Commission certain members of the Legislature who could not be appointed by the Governor or Mayor on account of section 7 of article III of the Constitution which forbids any member of the Legislature to receive

any civil appointment within the State from the Governor or from any City Government during the time for which he shall have been elected. To meet these requirements the Legislature enacted Chapter 277 of the Laws of 1909 which became a law May 3 and which reads as follows:

AN ACT

To increase the number of the members and Trustees of the Hudson-Fulton Celebration Commission.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. The members and Trustees of the Hudson-Fulton Celebration Commission as designated by the acts, chapter three hundred and twenty-five of the laws of nineteen hundred and six, and chapter two hundred and seventeen of the laws of nineteen hundred and eight, are and shall be increased in number by adding to and including as such members and Trustees, such persons, not exceeding fifty in all, as from time to time shall be elected by the Trustees of such Commission at any regular or special meeting of such Trustees.

§ 2. This act shall take effect immediately.

The next act of the Legislature in regard to the Commission was Chapter 448 of the Laws of 1909, which became a law May 22, appropriating \$300,000 more for the Celebration. The act reads as follows:

Appropriation
by the
State in
1909

AN ACT

To amend an act, entitled "An act to establish the Hudson-Fulton Celebration Commission, and to prescribe the powers and duties thereof, and making an appropriation therefor," which became a law April twenty-seven, nineteen hundred and six, being chapter three hundred and twenty-five of the laws of nineteen hundred and six.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. Section nine of the act, entitled "An act to establish the Hudson-Fulton Celebration Commission, and to prescribe the powers and duties thereof, and making an appropriation therefor," being chapter three hundred and twenty-five of the laws of nineteen hundred and six, is hereby amended so as to read as follows.

§ 9. The sum of three hundred thousand dollars (\$300,000) in addition to the moneys heretofore appropriated to said Commission, or so much thereof as may be necessary, is hereby appropriated out of any moneys in the treasury, not otherwise appropriated, for the purposes of this act. Such money shall be paid by the Treasurer on the warrant of the Comptroller issued upon a requisition signed by the President and Secretary of the Commission, accompanied by an estimate of the expenses for the payment of which money so drawn is to be applied, of which appropriation one hundred thousand dollars (\$100,000) is to be appropriated and expended by the Commission for the purposes of the celebration upon the Hudson river at and northerly of the city of Newburgh. No portion of the foregoing appropriation nor of the sums heretofore appropriated which shall be allocated by the Commission to any locality shall be by said locality expended for the purpose of a permanent local monument or memorial to commemorate said anniversary, but all moneys remaining unexpended in the hands of the local committee at the conclusion of the celebration, shall be paid over to the Treasurer of the Commission, and the total amount remaining unexpended in the treasury of the Commission shall be applied to such permanent monument or memorial, subject to the approval of the Legislature, as said Commission shall recommend to the Legislature of nineteen hundred and ten, and of the foregoing sum above appropriated, twenty-five thousand dollars (\$25,000) shall be reserved and expended by the Commission upon plans and also through vouchers to be approved by the President pro tempore of the Senate and the Speaker of the Assembly for such of the expenses, exclusive of traveling expenses, as shall be necessarily incurred in the participation by the Governor, his staff, the elective state officers and the members of the Legislature, in their attendance upon the invitation of the Commission at said celebration, and the exercises connected therewith. No indebtedness nor obligation shall be incurred under this act in excess of the appropriations herein or hereafter made, and such sums as may be provided for said Commission by the city of New York, for the purposes of this act. The Commission shall as requested by the Governor, from time to time render him reports of its proceedings.

§ 2. This act shall take effect immediately.

Appropriation
by the
State in
1910

In the Supply Bill now before the Legislature of 1910,* there are the following items:

* This bill became a law by the Governor's signature June 18, 1910, as Chapter 513 of the Laws of 1910.

"For the Hudson-Fulton Celebration Commission, the sum of twenty-five thousand dollars (\$25,000), in addition to the moneys heretofore appropriated to the Hudson-Fulton Celebration Commission, established by and under the act, chapter three hundred twenty-five of the laws of nineteen hundred six, or so much thereof as may be necessary, for the purpose of defraying the expenses and discharging the existing indebtedness of the Hudson-Fulton Commission. Such money shall be paid by the Treasurer on the warrant of the Comptroller, issued upon requisition signed by the President or the Acting President and the Secretary of the Commission, accompanied by a statement of the expenses for the payment of which the money so drawn is to be applied."

The same bill also makes provision, under the head of "Legislative and department printing," "for printing 7,000 additional copies of the final report of the Hudson-Fulton Celebration Commission, ordered by concurrent resolution April twenty-second, 1910."

The foregoing comprises all the State Legislation bearing on the Celebration.

An important act of the government of the City of New York was the resolution adopted by the Board of Estimate and Apportionment on April 2, 1909, as follows:

"Resolved, that the resolution adopted by the Board of Aldermen, March 9, 1909, requesting an issue of \$300,000 Special Revenue Bonds, the proceeds whereof to be used by and expended under the direction of his Honor, the Mayor, and such Committees of the Board of Aldermen as may be appointed in the premises, for the purpose of meeting the expense contingent to the part that the City of New York may take in the Hudson-Fulton Celebration, to begin on Saturday, September 25, 1909, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment to the extent of two hundred and fifty thousand dollars (\$250,000), and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue Special Revenue Bonds of the City of New York, to an amount not exceeding two hundred and fifty thousand dollars (\$250,000), redeemable from the tax levy of the year succeeding the year of their issue; the proceeds of said issue of Special Revenue Bonds to be disbursed only upon claims duly audited in the Department of Finance of the City of New York."

Appropriation
by New
York City
in 1909

Another part of the legal business of the Commission was performed by the Committee on Contracts, of which the Hon. Committee on Contracts

M. Linn Bruce, formerly Lieutenant-Governor of the State of New York and later Justice of the Supreme Court of the First District of New York, is Chairman. The order of procedure followed in making the more important contracts of the Commission was for the various Committees to make the preliminary business arrangements for the undertakings committed to their charge and to report to the Contract Committee forms of contracts or the substance of contracts covering those arrangements. The Contract Committee then passed upon the forms of contracts submitted or the necessary contracts were drafted. The contracts, having been made in due form, were then executed in behalf of the Commission by the Executive Officers.

Work of
Legal
Counsel

A third phase of the legal work of the Commission was the adjustment of claims against the Commission presented after the Celebration. These claims were of two classes: One class was for accidents, of which there was the remarkably small number of three. One of these accidents was the destruction of an instrument belonging to a musician from the United States Navy by an uncontrollable horse ridden by one of the aides during a parade in the Bronx. Another was for injury due to falling from a float during a parade in Brooklyn. A third claim by a spectator for alleged damage to clothing from a torch was not satisfactorily proven and was not allowed. The other class of claims involved questions of moneys alleged to be due for materials furnished or services rendered about which there were differences of opinion between the Commission and the claimants. All of this difficult legal work was performed gratuitously for the Commission by the firm of Messrs Amend & Amend, Counsellors at Law, of No. 119 Nassau street, New York City. In recognition of this service, the Trustees, on May 4, 1910, adopted a resolution formally thanking Messrs. Amend & Amend for their public spirit and their generous contribution of time and professional skill. It was also voted to present silver medals to the members of the firm.

CHAPTER III

ORGANIZATION AND SYSTEM OF THE COMMISSION

THE first formal meeting of the Trustees named in the Adoption of By-laws Charter of the Hudson-Fulton Celebration Commission was held in the Governors' Room of the City Hall, in New York, on May 4, 1906, when an organization was effected by the adoption of the By-laws. The By-laws, as amended by the insertion of article V on June 27, 1906, and the changing of section 2 of article I on May 4, 1910, are as follows:

BY-LAWS OF THE HUDSON-FULTON CELEBRATION COMMISSION.

Article I.

Section 1. *Office.* The office and place of business of the Hudson-Fulton Celebration Commission shall be in the City of New York, where all meetings shall be held unless otherwise ordered by the Trustees.

§ 2. *Trustees' Meetings.* After May 4, 1910, there shall be a meeting of the Board of Trustees in the month of May each year after the Annual Meeting of the Commission at a time and place to be fixed by the President or Board of Trustees.

(The foregoing section originally provided for regular monthly meetings of the Trustees on the fourth Wednesday of each month, except that when that date fell on a holiday, the meeting was to be held on the following day. On May 4, 1910, when the need for monthly meetings was passed, the section was modified so as to read as above.)

§ 3. *Annual Meeting.* The Annual Meeting of the members of the Commission for the election of Trustees and for the transaction of such other business as may come before it shall be held on the first Wednesday after the first Monday of May, each year, at 3 P. M.

§ 4. *Other Meetings.* Other meetings of the Trustees or Commission may be held upon the call of the President, and must be called by him upon the written request of ten Trustees.

§ 5. *Quorum.* At meetings of the Trustees fifteen shall constitute a quorum, and at meetings of the Commission, the members who are present shall constitute a quorum.

§ 6. *Notices.* Notices of meetings of the Trustees shall be sent to each Trustee at least two days before the time of meeting.

Article II.

Section 1. *Officers.* The officers of the Commission shall be a President, fifteen Vice-Presidents, a Secretary and a Treasurer, all of whom shall be Trustees, and shall be elected annually at the meeting of the Trustees in May, and shall hold office for one year, and until others are elected in their stead. There may be one or more Assistant Secretaries who shall be appointed by and hold office at the pleasure of the Trustees.

§ 2. *Trustees.* The number of Trustees shall be 100, who shall be elected annually by the persons named and designated in the first section of the Charter. The Trustees named in the Charter may appoint additional Trustees to hold office until the election in 1907, but the whole number of Trustees shall not at any time exceed 100.

§ 3. *Vacancies.* Vacancies in the Board of Trustees or Officers may be filled for the unexpired term by a majority vote of the Trustees present at any duly called meeting. When a Trustee shall have absented himself from three successive meetings, the Trustees may, in their discretion, declare the office vacant, and elect a Trustee for the unexpired term.

§ 4. *President.* The President shall preside at all meetings of the Trustees and of the Commission; he shall appoint all committees; and be Chairman of the Executive Committee and ex-officio a member of all standing committees except when otherwise expressly relieved from such service, and he shall have a general supervision of the affairs of the Commission.

§ 5. *Vice-Presidents.* In the absence of the President or his inability to act, one of the Vice-Presidents, to be designated by him in writing, shall perform his duties and possess his powers. If he make no designation, it shall be made by the Trustees.

§ 6. *Treasurer.* The Treasurer shall receive, collect and hold subject to the order of the Board of Trustees all moneys, securities and deeds belonging or due to the Commission, pay all bills when approved by the Trustees or the Executive Committee, deposit all money of the Commission in some depository to be approved by the Trustees, and render a report of the finances at each meeting of the Board of Trustees and at the Annual Meeting of the Commission. Money shall be drawn only on the check of the Treasurer, countersigned by the President or Secretary.

§ 7. *Secretary.* The Secretary shall keep the records of the Commission, of the Board of Trustees and of Committees, issue all notices, and perform the other duties ordinarily incident to that office, and when directed by the Trustees, affix the seal of the Commission.

§ 8. *Assistant Secretaries.* The Assistant Secretaries shall perform such duties as may be assigned to them.

Article III.

Section 1. *Order of Business.* The order of business of meetings of the Commission shall be as follows, unless otherwise ordered: 1, Roll call; 2, Reading of minutes of the meetings not previously read; 3, Election of Trustees; 4, Report of Treasurer; 5, Reports of Committees; 6, Communications; 7, Miscellaneous business.

§ 2. *Reports, Resolutions and Votes.* At meetings of the Commission and Board of Trustees reports and resolutions shall be in writing. The yeas and nays shall be called on all resolutions authorizing the expenditure of money, and on all other questions, when requested by one member.

Article IV.

Executive Committee. There shall be an Executive Committee which shall consist of the Officers of the Commission and twenty-five other Trustees. It shall have general management of the affairs of the Commission, subject to the approval of the Trustees, and shall meet at least once a month. Seven of its number shall constitute a quorum. It shall elect one of its number as Vice-Chairman who shall preside in the absence of the Chairman, and who shall perform such other duties as may be conferred upon him by such Committee, not inconsistent with these By-Laws. It shall appoint such sub-committees and confer such powers thereon as it may deem advisable. A special meeting of the Executive Committee must be called by the Chairman upon the written request of five members, the purpose of such meeting to be stated in the call.

Article V.

Seal. The Seal of the Commission shall be circular in form, two and one-fourth inches in diameter. Its design shall be as follows: In the foreground, a classical, draped, female figure symbolizing the genius of the Hudson River, standing upon the prow of a boat, supporting under her right hand a shield bearing the name and date "Henry Hudson, 1609," and under her left hand a similar shield bearing the name and date "Robert Fulton, 1807;" upon the prow of the boat the date "1909;" in the middle distance the Hudson River, and upon it, above the respective shields, Hudson's ship the Half Moon and Fulton's steamboat the Clermont; in the background, the Palisades; and in the border surrounding the whole, the words and date: "Seal of the Hudson-Fulton Celebration Commission, 1906."

Article VI.

Amendments. Amendments to these By-laws may be proposed in writing at any meeting of the Trustees. If twenty-five of the Trustees be present any amendment may be adopted by unanimous consent; otherwise it shall be postponed until a subsequent meeting, in which case the Secretary shall, with the notice of the next meeting, send a copy of the proposed amendment, stating that it will be brought up for action at such meeting, when it may be passed by a majority vote.

Election
of Off-
cers

At the same meeting, May 4, 1906, the following officers were elected:

President: Gen. Stewart L. Woodford.

Vice-Presidents: Hon. Robert B. Roosevelt, Mr. Andrew Carnegie, Major-Gen. Frederick D. Grant, U. S. A., Mr. Morris K. Jesup, Hon. Levi P. Morton, Mr. William Rockefeller, Mr. William B. Van Rensselaer, Hon. Andrew D. White (to whom were added May 23, 1906) Hon. Grover Cleveland, Gen. Horace Porter, Hon. Joseph H. Choate, Mr. J. P. Morgan, Hon. Oscar S. Straus, Hon. Seth Low, and Mr. Herman Ridder.

Secretary: Col. Henry W. Sackett.

Assistant Secretary: Mr. Edward Hagaman Hall.

On May 23, Mr. Isaac N. Seligman was elected Treasurer.

With the exception of changes among the Vice-Presidents, due to two declinations and six deaths, the official personnel of the Commission has remained unchanged. Mr. Rockefeller being unable to accept his election, the Hon. William W. Goodrich was chosen in his place, and after the death of Judge Goodrich, November 21, 1906, Mr. Francis Lynde Stetson was chosen to fill the vacancy. The Hon. Frederick W. Seward succeeded Mr. Roosevelt who died June 14, 1906; Mr. John F. Parsons succeeded Mr. Jesup who died January 22, 1908; Rear Admiral Joseph B. Coghlan, U. S. N., succeeded Mr. Cleveland who died June 25, 1908, and upon his own death, December 5, 1908, was succeeded by Gen. James Grant Wilson; the Hon. Alton

B. Parker succeeded Mr. White who resigned in February, 1909; and the Hon. Morgan J. O'Brien succeeded Mr. Van Rensselaer who died September 25, 1909.

Mr. Ridder was the Presiding Vice-President and Acting President during Gen. Woodford's absences abroad; and since the departure of Mr. Ridder for Europe, May 10, 1910, Gen. Wilson has been Acting President. The present official list will be found in Chapter LXII following.

At the close of the Celebration, the Commission expressed by resolution their high appreciation of Gen. Woodford's services as President of the Commission and further honored him by delegating him to present the official gold medals and accompanying messages to the heads of the Governments represented at the Celebration by naval vessels. A full account of these proceedings will be found in Chapter LXI following.

The duties of Mr. Ridder as Acting President during Gen. Woodford's absences, as Chairman of the Finance Committee and as Chairman of the Historical and Carnival Parades Committees; and those of Col. Henry W. Sackett as Secretary of the Commission were particularly arduous. In recognition of their services, a voluntary committee of the Trustees, consisting of the Hon. Seth Low, Chairman, the Hon. William Berri, Dr. George F. Kunz, Mr. John E. Parsons, and Mr. Francis Lynde Stetson, with the cooperation of seventy-five others, had gold medals, three inches in diameter, struck from dies especially made for the purpose from the designs for the medallion of the official badge, and presented to Mr. Ridder and Col. Sackett on March 11, 1910. In their letter accompanying the medal to Mr. Ridder, the Committee said that they hoped he would accept it, "not only as a souvenir of the Celebration, but as an evidence of their high appreciation of the great service rendered by you to the Commission . . . It is clear that your long and public-spirited labor of love for the City of New York in helping so superbly, as Acting-President of the Hudson-Fulton

Services
of Gen

ford,
Mr. Rid-
der and
Col.
Sackett
Recogn-
ized

Celebration Commission, to carry to success that Celebration, has won for you a host of friends, whose admiration for your courage, your energy, your enthusiasm and your faith in the success of the enterprise, is only second to their high personal regard for you as a man." In their letter to Col. Sackett they repeated the wish that he accept the medal "not only as a souvenir of the Celebration, but as an evidence of their high appreciation of the great service rendered by you to the Commission," and added: "Your long and public-spirited labor of love for the City of New York in helping to carry to success the Hudson-Fulton Celebration has won for you a host of friends. Your associates of the Commission fully appreciate the unique contribution which you made to the success of the Celebration. They understand, in an imperfect way, what it means to give, as you have given, many months of your time to the patient handling of one perplexing question after another. It has been to them at all times a source of satisfaction to know that the work of the Secretary of the Commission has been in hands so entirely competent and safe; and most of them are your debtors for much personal courtesy and consideration." On May 4, 1910, the Board of Trustees formally endorsed the sentiments of the Committee as expressing those of the Commission and the proceedings attending the presentation of the testimonials were ordered to be embodied in the Official Minutes.

Membership of the Commission Beginning with 212 Charter members, the membership of the Commission was increased to 805 at the time of the Celebration. With the exception of the ex-officio members created by Chapter 217 of the Laws of 1908 (see page 30 preceding), the election of 50 members by the Trustees pursuant to Chapter 277 of the Laws of 1909 (see page 32 preceding) and a few appointments made voluntarily by the Governor and Mayor of New York, additions to the Commission were made by the Governor and Mayor upon recommendations made to them by

formal resolutions adopted by the Trustees. Nominations for this purpose were presented to the Trustees through the Committee on Nominations, of which Mr. Theodore Fitch is Chairman. Generally the Governor appointed those who lived outside of New York City and the Mayor those who lived within the city limits, although this distinction was not always made.

The Commission also had the cooperation of a large number of coadjutors who were not members of the Commission but whose assistance was invaluable in carrying out the plans for the Celebration. Prominent among them may be mentioned the five Foreign Correspondent Councillors elected May 27, 1908, and the thirty or more Honorary Foreign Councillors elected June 23, 1909, all of whom were residents of The Netherlands. The former were elected in recognition of their services and research in connection with the designing and building of the Half Moon (see Chapter VII). The latter, headed by His Royal Highness, Prince Henry of the Netherlands, constituted the Netherlands Hudson-Fulton Celebration Commission, which, under Royal auspices, built and presented the Half Moon to the Hudson-Fulton Celebration Commission of the State of New York. (For the names of these Councillors see Chapter LXII. For further particulars in regard to the Half Moon, see Chapter XIV.)

In New York City, the direct and active interest of about three thousand citizens was enlisted by the appointment of Borough Citizens' Committees by the Mayor. On April 13, 1909, the Mayor appointed the Brooklyn Citizens' Committee of which Col. Willis L. Ogden is Chairman; on April 16 the Manhattan Citizens' Committee of which the Hon. Joseph H. Choate is Chairman; on May 19, the Richmond Citizens' Committee of which Mr. Eugene Lamb Richards, Jr., is Chairman; on June 11, the Bronx Citizens' Committee, of which Hon. John J. Brady is Chairman; and on August 6, the

Queens Citizens' Committee, of which Mr. Louis Windmuller is Chairman.

A Citizens' Committee in every city and principal village along the Hudson river north of New York also rendered valuable assistance.

Cooperation of
Hotels,
Railroads
and
Others

Besides the cooperation of these organized citizens' Committees, the Commission had the moral and material support of a large number of public-spirited individuals and business men. Among the latter, the hotel men of New York City and the representatives of the railroads tributary to New York and the Hudson River are entitled to our particular gratitude. Further reference is made in Chapter XII to the collaboration of the New York hotels. The response of the railroads to the Commission's requests and needs was equally cordial and generous. In reducing their rates, in arranging special train service, in distributing our posters and information booklets, and in other evidences of their interest given through Hon. George W. Perkins, they manifested an earnest desire to serve the public and to aid this Commission which is most heartily appreciated.

Appointment of
Committees

When the Commission first organized, only a few committees, and those composed chiefly of members of the Board of Trustees, were formed, to carry on the necessary preliminary work. As soon, however, as the main outlines of the plan of the Celebration were definitely decided upon, as described in Chapter V following, a complete system of 51 committees, covering every phase of the Celebration and enlisting the active assistance of every member of the Commission as it was then constituted, was formed. These committees were announced at a meeting of the full Commission held at the City Hall of New York on November 30, 1908. From that date onward, the work of preparing for the Celebration was prosecuted with the utmost vigor.

Headquarters
and Assistants

The Headquarters of the Commission from the organization of the Hudson Ter-centenary Joint Committee to the present time have been in the Tribune Building, No. 154 Nassau street,

New York City. So long as it was possible the executive business was transacted in the offices of the Secretary and Assistant Secretary which were placed at the disposal of the Commission gratuitously, and a meeting-room for the Trustees adjoining thereto rented by the city pursuant to resolution of the Sinking Fund Commissioners adopted June 20, 1906. Meetings of the full Commission were held in the City Hall. During the few months immediately preceding the Celebration, six additional offices were taken, one after another, as the pressure of work increased, for the accommodation of the bureau of information, accountants, assistants to the Secretary, and stenographers. At the height of the work in the last month of preparation, the Headquarters staff, besides the Secretary and Assistant Secretary, consisted of Mr. A. H. Stoddard, Captain of Pageantry; Mr. George N. Moran, Assistant to the Secretary for publicity; Dr. Edmund B. Taber, Assistant to the Secretary for publicity; Mr. David T. Wells, Assistant to the Secretary for parade arrangements; and Mr. Chester DeWitt Pugsley, volunteer Assistant to the Secretary; two accountants, two information clerks, twelve stenographers, six office boys and one telephone girl. Mr. John B. Creighton, Assistant to the Secretary for Brooklyn affairs; Mr. Clarence E. Leonard, Assistant to the Secretary for the Lower Hudson affairs; and Mr. William Wortman, Assistant to the Secretary for Upper Hudson affairs, had their offices in Brooklyn, Yonkers and Hudson, respectively. On December 1, 1908, when the Commission had under consideration the proposition to have a pageant on the English plan, Mr. William Parry, who had assisted Mr. Frank Lascelles in the recent Quebec pageants, was retained as General Executive Assistant, and so continued until the plan was finally abandoned.

The small office accommodations at Headquarters were made possible by the fact that many of the Chairmen of Committees conducted their business in their private offices, while others

engaged offices more conveniently located for their respective affairs; and the small Headquarters staff was made possible by the fact that the Chairmen of many committees were so fortunate as to have the assistance of volunteer Secretaries and aides. Where such volunteer assistance has been reported to the Secretary's office the names of these generous helpers will be mentioned in the following chapters. It is a matter of much regret, however, that the names of many are not recorded in the archives of the Secretary.

Publicity
and Unani-
mity

As stated in the Introduction, a remarkable unanimity prevailed in the councils of the Commission. This was partly due to the studied openness with which the business was transacted. From the beginning of the Commission, full minutes of all transactions of the six meetings of the full Commission and of the 56 meetings of the Trustees were printed and sent to every member of the Commission and to the principal public libraries. These official minutes, which now number nearly 1,800 pages, contain not only a record of all formal actions, but also a succinct paraphrase of all important discussions and full reports of all financial receipts and disbursements. The work of the Commission was further unified by the practice of the principal Executive Officers and some Committee Chairmen of interchanging copies of their more important correspondence. Newspaper reporters were also admitted to the meetings of the Commission and the public was taken fully into its confidence.

CHAPTER IV

FINANCIAL SYSTEM AND STATEMENT

THE financial affairs of the Commission were under the immediate care of the Ways and Means Committee and the Auditing Committee.

The chief responsibility of the Ways and Means Committee, of which Mr. Herman Ridder is Chairman, was the raising of funds. The moneys of the Commission were derived from three sources — appropriations by the State of New York, an appropriation by the City of New York, and voluntary subscriptions, the amounts of which will appear in the tabulated statements following.

An interesting fact concerning the Subscription Fund, amounting to more than a quarter of a million dollars, was that it was formed entirely by voluntary contributions. No solicitors or agents were employed to raise this fund and no commissions or percentages were paid in any form, direct or indirect. The contributions, about 1,800 in number and ranging in amounts from two cents to \$10,000, were evoked chiefly by letters appealing to the civic pride and patriotism of those to whom the letters were addressed. The generous response to these appeals was one of the finest evidences of public spirit and the genuine popular interest in the Celebration that the commemoration afforded. These subscriptions are acknowledged individually on pages 1680-1692 of the Official Minutes.

The system of disbursements, accounting and audit was as through as could be arranged in view of the temporary character of the corporation. The order of procedure in general was as follows: First, the Chairmen made estimates of the moneys required for the parts of the celebration committed to their respective committees, and in Trustees' meeting asked for the

necessary appropriations. When obligations were contracted, the bills were first approved by the Chairman of the Committee incurring them and forwarded to headquarters. There they received a preliminary examination by the Assistant Secretary and then were forwarded to the accountants. By the latter, the bills were copied upon voucher forms. They were then examined and signed by each member of the Auditing Committee, consisting of the Hon. N. Taylor Phillips, Chairman, Hon. Warren Higley and Hon. William McCarroll; and later by the President and the Secretary of the Commission. Prior to the Celebration, all accounts except certain weekly payrolls for construction of the floats for the parades were presented at the monthly Trustees' meetings for approval before payment, and the weekly payrolls were submitted at the next ensuing Trustees' meeting. After the Celebration, when a great mass of bills from all sources was presented almost simultaneously, they were paid, by authority of a special resolution, as fast as they could be audited in the manner before described and were submitted to the Trustees afterwards. Approved accounts payable from State and Subscription funds were paid by checks signed by the Treasurer, Mr. Isaac N. Seligman, and countersigned by the President or Acting President. Approved accounts payable from the City Fund were forwarded to the Department of Finance of the City of New York and paid direct by the warrant of the City Comptroller. All accounts were printed in the Official Minutes of the Commission.

Services
of Mr.
Seligman
Recognized

The financial transactions of the Commission were greatly facilitated by the accommodation extended to it by the banking house of J. & W. Seligman & Co. of which the Treasurer of the Commission, Mr. Isaac N. Seligman, is a member. By their courtesy, accounts were paid as soon as approved; and later, accounts payable from State funds were collated from time to time and forwarded to the State Comptroller at Albany,

with a requisition for reimbursement signed by the President and Secretary of the Commission.

At the meeting of the Trustees on December 8, 1909, the President of the Commission said with reference to Mr. Seligman: "To Mr. Seligman, our Treasurer, we owe a large debt of appreciation and gratitude. He accepted the great responsibility of the Treasurership with the same generous spirit with which he has cooperated in other public affairs of a public and philanthropic nature and his reputation in the financial world has been a source of strength to the Commission. His firm, in advancing large sums of money for the immediate requirements of the Commission, has been of inestimable help in facilitating the transaction of the Commission's business affairs."

On February 2, 1910, the Trustees authorized the Auditing Committee to select an Auditing Company, subject to the approval of the Governor of the State representing the State Funds, the Mayor of New York representing the City Fund, and Mr. J. P. Morgan representing the Subscription Fund, to make the final audit of the accounts of the Commission; and with the approval of Governor Hughes, Mayor Gaynor and Mr. Morgan the Audit Company of New York was chosen. Their report, as of April 30, 1910, is given on the following pages. In Exhibits A to F, both inclusive, it will be noticed that certain transfers of funds from one account to another are recorded. Thus, in Exhibit A, a balance of \$148.73 which the Hudson Ter-centenary Joint Committee had on hand at the time of the incorporation of the Hudson-Fulton Celebration Commission, was transferred to the State Fund account next following. This amount therefore appears in the receipts and disbursements of both accounts. Similarly, in the receipts mentioned in Exhibit D appears \$42,530.58 "transferred from Subscription Fund." This is due to the fact that in the book-

keeping, accounts were temporarily classified under Chapter 448 of the Laws of 1909 amounting to more than the appropriation made by that law. Later a selection of accounts coming within the appropriation was forwarded to the State Comptroller for reimbursement and the excess over the appropriation was paid from the Subscription Fund account. In the disbursements under Exhibit E is an item of \$114,522.75 transferred from the City Fund to Subscription Fund. This item represents accounts temporarily paid out of the Subscription Fund and reimbursed by the City. As these transfers, in all amounting to \$157,202.06, appear on both sides of the accounts, the net results will be found in the Recapitulation in Exhibit G in which the transfers are deducted.

The following report of the Audit Company shows an excess of disbursements over receipts amounting to \$21,576.15, which amount has been advanced by the Commission's bankers. In addition to this liability, the Commission, according to a statement made by Mr. Ridder to the Trustees on May 4, 1910, has unpaid accounts amounting to from \$30,000 to \$35,000. The Commission has on hand some assets in the shape of parade paraphernalia but its merchantable value is problematical.

Following is the official audit of accounts of the Hudson Tercentenary Joint Committee and its successor the Hudson-Fulton Celebration Commission, from December 5, 1905, to April 30, 1910, as made by the Audit Company of New York.

Report
of Audit

THE AUDIT COMPANY OF NEW YORK
165 Broadway

Company The Hudson-Fulton Celebration Commission,
154 Nassau Street,
New York City:

Dear Sirs:

Agreeably to your request, we have made an examination of the books and accounts of THE HUDSON-FULTON CELEBRATION COMMISSION, for the period from December 5, 1905, to April 30, 1910.

The results of this examination are presented, attached hereto, in seven Exhibits, as follows:

Exhibit "A"—Summary of receipts and disbursements, Hudson Ter-centenary Joint Committee, as of April 30, 1910.

Exhibit "B"—Summary of receipts and disbursements of the State Fund (Chapter 325 of the Laws of 1906) as of April 30, 1910.

Exhibit "C"—Summary of receipts and disbursements of the State Fund (Chapter 466 of the Laws of 1908) as of April 30, 1910.

Exhibit "D"—Summary of receipts and disbursements of the State Fund (Chapter 448 of the Laws of 1909) as of April 30, 1910.

Exhibit "E"—Summary of receipts and disbursements of the City Fund as of April 30, 1910.

Exhibit "F"—Summary of the receipts and disbursements of the Subscription Fund as of April 30, 1910.

Exhibit "G"—Recapitulation of receipts and disbursements of all funds as of April 30, 1910.

We found receipted vouchers and canceled checks for disbursements, as shown by the books, from the three State Funds and the Subscription Fund. The disbursements from the City Fund were made by the City and reported to the Committee. The unexpended balance in this Fund, as shown by the books, is in agreement with the City's records. The Hudson Ter-centenary Joint Committee Fund is shown as reported to you by that Committee.

The account with J. & W. Seligman, as shown by the books, has been reconciled with the statement received from that depository.

Very truly yours,

A. W. Dunning

President.

NEW YORK, May 9, 1910.

THE AUDIT COMPANY OF NEW YORK

G. H. Bowers

Secretary.

CHAPTER V

EVOLUTION OF PLAN OF CELEBRATION

Public
Hearings
Held

THE first question which arose in the formal deliberations concerning the Celebration was as to the form which the Celebration should take. At the first meeting of the Executive Committee of the Hudson Ter-centenary Joint Committee, held December 16, 1905, after a preliminary discussion of various ideas, it was decided to hold public hearings with a view to eliciting public opinion on the subject. Such hearings were therefore held in the City Hall, New York, on December 29, 1905, January 19, and January 26, 1906. At these hearings the plan of a World's Fair had its earnest advocates, but the suggestion elicited no public enthusiasm in the City of New York, in or near which the exposition would naturally be held; and the Commission felt that however excellent the reasons might have been for holding the long series of notable expositions by which the great historical anniversaries of the country had been commemorated in other cities since 1876, and however valuable those expositions might have been to the communities in which they were held and to the country at large, the form of a celebration in or near New York must be shaped by powerful local considerations. One of those considerations was that the Metropolis of the country was in itself a vast exposition. In it was concentrated the best of everything that the country could produce; and these products could be seen to better advantage in the shops of the manufacturers and dealers than in a conventional exposition. In the next place, the transportation facilities of the city at that time, with only two bridges across the East River, no tunnels under either the East or North Rivers, and only a single subway line, were so inadequate that it was thought to be very injudicious to attract

hither a large concourse of people who could not be accommodated for any protracted period with convenience and safety either to the visitors or the visited.

By the time of the incorporation of the Hudson-Fulton Celebration Commission, therefore, the idea of a World's Fair ^{World's Fair Idea} had definitely been eliminated, and with the appointment of ^{Elimi-} the Plan and Scope Committee on May 17, 1906, the ground ^{nated} was cleared for the formulation of a plan on original lines. The Chairman of the Plan and Scope Committee is the Hon. Frederick W. Seward, whose wide experience as Assistant Secretary of State and Acting Secretary of State in the administrations of Presidents Lincoln, Johnson and Hayes, in various diplomatic missions, in the New York Legislature and on the Yorktown Centennial Commission, was reflected in the broad conception of the plan of celebration finally adopted. The fundamental idea of this plan, as already stated in the Introduction to this Report, was that of a great non-commercial and educational commemoration, designed to instruct our own people in their history and to increase their civic pride; and also to cement more firmly our friendly international relations. An outline of this plan was presented in the preliminary report of the Plan and Scope Committee, June 13, 1906. The report closed with the announcement that the Committee by no means desired to have it considered final or ~~exhaustive~~, but would gladly welcome and consider any suggestion that might be offered for its modification or improvement. In response to this invitation, many suggestions were received from other committees and members of the Commission, as well as from different organizations and public spirited private citizens. All these were carefully considered and discussed by the Plan and Scope Committee and the Trustees. Several proved valuable and useful. While preserving the main outline of plan, there were yet many details involving questions of feasibility and cost, as well as of taste and propriety. In the debates over

them, some differences of opinion were revealed; but the general desire for success and harmony speedily reconciled them all; so that during the ensuing months the plan was gradually perfected and its scope widely enlarged, until it ultimately took the shape in which it was finally adopted. It then received the approval and cordial co-operation of the State, National and City Governments.

A Two
Weeks'
Celebra-
tion

The plan as first submitted in June, 1906, contemplated a Celebration extending, in time, over a period of one week, and in geographical extent, throughout the Hudson Valley. It was thought at first that the naval vessels could go north only as far as Haverstraw Bay, but it was recommended that the replicas of the Half Moon and Clermont, with an escorting fleet, "proceed up the river as far as Albany, stopping opposite the riverside villages and cities and forming the center of local demonstrations. This," continued the report, "will permit not only the population bordering the historic river, but also our fellow citizens residing in the adjacent inland towns, to participate in the commemoration."

During the following year it was found that some of the naval vessels could navigate as far as Newburgh, and the report of the Plan and Scope Committee of June 26, 1907, was modified accordingly. The report also provided for commemorative exercises "in all the universities, colleges, and institutions of learning throughout the State of New York."

As public interest in the Celebration increased and the details of the plan developed, it became apparent that the concentration of the whole celebration into one week would seriously interfere with its success, particularly in the places north of New York City; for the events in New York would draw many residents of the State to that city and would prevent as full a participation in local celebrations elsewhere as might otherwise be possible. At the request, therefore, of the representatives of the Upper Hudson communities, the period of

the Celebration was extended to two weeks, the second week being devoted chiefly but not exclusively to celebrations north of New York City. The details of the events at and north of Newburgh were developed by the Upper Hudson Committee, whose work will be more particularly described in Chapters LI to LIX following.

It was first intended to have the Celebration begin on Monday September 20, 1909. This would have brought a celebration of one or two weeks' duration wholly within the ter-centenary of the period of Hudson's presence in New York waters, which extended from September 2 to October 4, 1609. In arriving at this date the Commission had the assurance of Forecaster Emery of the United States Weather Bureau of New York to the effect that, contrary to popular belief, the records for a number of years showed that rain had been less frequent during equinoctial week than during the week before, and that there had been even less rain in the week following the equinox. After conference, however, with those conversant with the currents of summer travel, it was decided to commence the Celebration on Saturday, September 25, with a view to accommodating those returning from their summer outings. The weather of the week following the equinox fully justified Mr. Emery's record of previous years, for, with the exception of a rainstorm Monday, September 27, and early on the morning of Tuesday, September 28, which delayed the starting of the Historical Parade in New York, the weather was delightful.

The program of the Celebration in its final shape was as follows:

CALENDAR OF EVENTS.

Saturday, September 25, 1909.

Naval Rendezvous. Formal recognition of the presence of American and Foreign Naval Vessels and Official Guests.

Inaugural Naval Parade. 10:30 A. M., formation of Escort Squadron with Half Moon and Clermont in Kill van Kull; naval parade to Stapleton, S. I.;

Outline
of Daily
Events

**Outline
of Daily
Events**

interchange of civilities between fleet afloat and Richmond Borough Citizens' Committee; 11 A. M., naval parade to point off the Bay Ridge shore, Brooklyn; exchange of civilities with Brooklyn Citizens' Committee; naval parade to point off Governor's Island; 1 P. M., parade of Escort Fleet and merchant fleet up the Hudson River encircling the fleet of war vessels; and passing in review before the Water Gate at 110th street.

Official Reception of Half Moon and Clermont. Formal reception of the replicas of the Half Moon and Clermont at the Water Gate at 110th street upon their arrival about 4 P. M.

Evening Naval Parade. In evening, repetition of the Inaugural Naval Parade.

Illuminations. In evening, illumination of the warfleet; illumination, lasting two weeks, of public buildings of New York; the great East River bridges, the line of march for the land parades, the most notable public monuments, private buildings, club houses, etc.; illumination of Grant's Tomb by search-lights; chromatic illuminations on river bank near 155th street.

Religious Observances. Religious observances by those accustomed to worship on the seventh day of the week.

Sunday, September 26.

Religious Observances. Religious observances by those accustomed to worship on the first day of the week.

Concerts. 4 P. M., organ recital in Great Hall of the College of the City of New York; 8.15 P. M., concert by Irish citizens in Carnegie Hall, New York; concert in Hippodrome by United German Singers of New York.

Monday, September 27.

Decorations. General decorations of public and private buildings.

Exhibitions. See pages 69-71.

Aeronautics. Beginning of aeronautical exhibitions by Wilbur Wright and Glenn H. Curtiss.

Dedications. Dedication Interstate Palisades Park at 11 A. M., at Alpine Landing, N. J.; dedication of monument to Henry Hudson on Spuyten Duyvil Hill in Bronx Borough at 2 P. M.

Governor's Island Reception. From 4 to 6 P. M., reception of official guests at the Headquarters of the Department of the East of the United States Army on Governor's Island.

Official Reception. At 8.30 P. M., official reception and literary exercises at the Metropolitan Opera House for the Delegates from Foreign Governments,

the Diplomatic Corps and the representatives of the United States Government. Music by the New York Banks Glee Club.

Music Festivals. In the evening, music festivals as follows: In Brooklyn Borough, at the Thirteenth Regiment Armory by the United German Singers, and in the Academy of Music a special concert by the Apollo Club; in Queens Borough, at the Astoria Scheutzen Park by the United German Singers of Long Island; in Richmond Borough, at the Happy Land Park, South Beach, by the United German Singers of Staten Island; and in Bronx Borough, at Crotona Park by the German Singing Societies and a chorus of school children.

Richmond Borough. On Staten Island an historical parade at Stony Brook, and ceremonies on the site of the first church on Staten Island founded by the Waldensians commemorating the first permanent settlement of the Island.

Tuesday, September 28.

Historical Pageant. Starting at 1 P. M., great historical pageant in New York City, forming at Central Park West and 110th street, and proceeding down Central Park West to 59th street, thence to Fifth avenue, and thence to Washington Square, passing in review at the Court of Honor on Fifth avenue between 40th and 42d streets.

Music Festivals. Music festivals in the Metropolitan Opera House by the German Liederkrantz, and at Carnegie Hall by the Arion Society at 8.15 P. M.

Brooklyn Literary Exercises. In evening, literary exercises in Brooklyn Borough in the Brooklyn Academy of Music.

Bronx Borough Banquet. In the Bronx in the evening a banquet to the guests of the Borough.

Wednesday, September 29.

General Commemorative Exercises. Commemorative exercises by universities, colleges, schools, museums and learned and patriotic societies throughout the whole State; in New York City, under the auspices of the Board of Education, special exercises in every elementary school, and in the evening illustrated lectures in 70 centers; similar observances in the Parochial, Settlement, Corporation, and private schools throughout the city; exercises in Albany in the Assembly Chamber of the Capitol at 8 P. M.

Dedications. Dedications of monuments, tablets, parks, and other memorials throughout the State. (For certain dedications in New York City and elsewhere, see pages 72-73.)

Aquatic Sports. On the river opposite New York, pulling races between the crews of foreign and American warships, and interstate contests between Naval Reserve crews. At Yonkers on the same day, motor boat races for classes 32 feet and under.

**Outline
of Daily
Events**

Bronx Borough Day. In the Borough of the Bronx military, civic and historical parade with floats and moving tableaux representing the principal events in the history of the City and the Borough. Route of parade along Washington Avenue from East 163d street to East 187th street.

Children's Festivals in Richmond Borough. Children's festivals in various parts of the Borough of Richmond. In the evening illustrated lectures in Tottenville, Stapleton, New Brighton, Port Richmond and other localities.

West Point Reception. Reception of official guests at the West Point Military Academy. Luncheon in the Memorial Hall, inspection of buildings and review of Cadet Corps.

Official Banquet. In the evening, official banquet in the new Banquet Hall of the Hotel Astor, New York City.

Half Moon and Clermont. The Half Moon and Clermont, accompanied by an Honorary Escort Squadron, proceed to Yonkers, and leave Yonkers at 6 P. M. for Tarrytown.

Thursday, September 30.

Military Parade. In Manhattan Borough, 1 P. M., military parade participated in by the Federal Troops of the Department of the East, the National Guard of the State of New York within the limits of New York City, the United States Navy and Marine Corps, the Naval Reserve, the veteran organizations, and the marines and sailors from foreign warships. Route the same as that given for the historical parade of Tuesday, September 28.

Aquatic Sports. At New York, motor boat races in five classes, one special and four 37-foot and under.

Richmond Borough Banquet. In the evening, banquet in the Ferry Terminal Building at St. George, Staten Island.

Brooklyn Borough Reception. In Brooklyn, international reception and ball in the Academy of Music.

Half Moon and Clermont. Arrival of these vessels with their escort at Ossining at 6 A. M.; departure about 4 P. M., proceeding along the west shore near Haverstraw, and thence to Peekskill.

Cornwall. Commemorative exercises in the public schools of Cornwall.

Friday, October 1.

Naval Parade. Naval parade from New York to Newburgh starting between 7.30 A. M. and 9.30 A. M., the slower squadrons starting first, so that all might arrive together at Newburgh at about 12.30 P. M. The Half Moon and Clermont, and escort, leaving Peekskill at 7 A. M. and proceeding to Cornwall, joining the Naval Parade upon arrival in Newburgh Bay.

Brooklyn Historical Pageant. Historical pageant of 54 floats in Brooklyn, proceeding from the Memorial Arch at the entrance to Prospect Park by way of the Eastern Parkway to Buffalo avenue. Outline
of Daily
Events

Cornwall. Ceremonies at Cornwall; arrival of the Half Moon and Clermont; civic and historical parade with floats representing the progress of the Hudson; an Indian camp on the shore; musical salute to Naval Parade; children's festival in Palmer's Park with tableaux, etc.; day fireworks and night fireworks.

Newburgh Ceremonies. Reception of fleet in Newburgh Bay with salute; ceremonies near Ramsdell Dock; landing of sailors and marines at southern end of city; parade to reviewing stand at the Court House; reception and luncheon to official guests; complimentary "shore dinner" for 5,000 paraders. In evening, illumination of city and vessels in the bay, and fireworks displays.

Saturday, October 2.

Children's Festivals. Children's day in public parks of Greater New York; children's pageants and festivals, consisting of historical plays, folk-dances and various other forms of instructive amusements in costume to the accompaniment of appropriate music.

Bronx Borough. In the afternoon, an athletic meet at Crotona Park Athletic Field.

Carnival Parade. In Manhattan Borough, in the evening, great carnival parade over the same route as that followed by the historical parade of September 28 and the military parade of September 30.

Richmond Borough Pageant. On Staten Island, a pageant, including 25 of the floats which took part in the Manhattan historical parade and about 5,000 persons. Line of march, Morning Star road to Innes street, thence by way of Nicholas avenue, Harrison avenue, Post avenue, Richmond avenue, Carey avenue, Bement avenue, Hyatt street, Central avenue, Arrietta street, Griffen street, and Bay street to Stapleton Park or Vanderbilt avenue.

Yonkers. Amateur rowing and canoe races beginning at 1 P. M.

Stony Point. Formal exercises at the Stony Point Battlefield State Reservation at 12.15 P. M., with the cooperation of the American Scenic and Historic Preservation Society, official custodian, participated in by the Governor, prominent citizens, and military and civic organizations; dedication of the Memorial Arch erected by the Daughters of the Revolution.

Newburgh. In the morning the farewell to the fleet, a portion returning to New York and as many as practicable accompanying the Half Moon and Clermont, proceeding to Poughkeepsie. Thereafter races for motor boats in four classes.

Outline of Daily Events *Poughkeepsie.* Reception of the fleet escorting the Half Moon and Clermont; regatta and aquatic sports; illuminations and fireworks.

Sunday, October 3.

New York. At 8.15 P. M., sacred concert in Carnegie Hall by the People's Choral Union and instrumentalists from Walter Damrosch's New York Symphony Society under the leadership of Frank Damrosch.

Yonkers. Special religious services in all the churches.

Poughkeepsie. In the morning special religious services in all the churches; in the afternoon, joint services in Eastman Park, with male chorus of 500 voices.

Kingston. Religious services in all the churches in the morning, and in the Sunday schools in the afternoon.

Catskill. Religious services in Catskill and throughout Greene County, with special observances and Autumn decorations.

Hudson. Religious ceremonies.

Monday, October 4.

Yonkers. Parade of historical floats and military and civic organizations of Mount Vernon, New Rochelle and Yonkers, together with firemen and local industries of Yonkers, reviewed by Governor Hughes. Reception to former residents and visitors in the evening.

Poughkeepsie. Great military, civic, industrial and historical parade, including twenty beautiful floats. In the evening, banquet and reception in honor of Governor Hughes.

Kingston. Exercises in the public schools and entertainment of the guests of the city.

Catskill. Special exercises in East Side Public School, with distribution of medals.

Hudson. Children's festivals.

Tuesday, October 5.

Lower Hudson. In Yonkers in the evening an automobile parade. During the day, parade of the floats from Hastings through Dobbs Ferry and Irvington to Tarrytown and North Tarrytown, accompanied by local organizations and fire companies.

Poughkeepsie. Farewell to the fleet. In Poughkeepsie the whole week devoted to Old Home Week reunions.

Kingston. 8 A. M., arrival of naval squadron with Half Moon, Clermont and historical floats; 9 A. M., reception of naval visitors; 11 A. M., parade of local and visiting military and civic organizations from Ulster, Delaware,

Ortsego and Sullivan Counties; 12 M., address by Governor Hughes; 1 P. M., luncheon to city guests; 4 P. M., unveiling of monument to Sir Thomas Chambers, Lord of the Manor of Fox Hall and one of the founders of Kingston; 5 P. M., unveiling of tablet in the Industrial Home; 8 P. M., pyrotechnic or electrical display; 9 P. M., reception to Governor Hughes and distinguished guests.

Catskill. Special exercises in West Side Public School, followed by outdoor tableaux.

Hudson. Children's festival continued.

Wednesday, October 6.

Queens Borough Day. Ceremonies in Queens Borough with music and fireworks in all five wards.

Lower Hudson. In Yonkers, in the afternoon a parade participated in by all the departments of the city government, and in the evening the official banquet of the Yonkers Committee with invited guests. On the west side of the Lower Hudson a parade of the floats at Nyack, joined in by participants from Piermont, Grand View, South and Upper Nyack, accompanied by local organizations, fire companies and schools.

Catskill. 9 A. M., arrival of Half Moon and Clermont with naval escort; reception by official committee, also by delegation of Red Men in canoes, bearing gifts of corn, etc.; 9.30-11, band concerts; 10.30, reception of naval visitors by Catskill Committee; 12 M., address by Governor Hughes; 1 P. M., luncheon to guests; 2 P. M., parade of local and visiting military, fire, fraternal and other civic organizations; 3.30, special excursion for officers and men of Half Moon to haunts of Rip Van Winkle in Catskill Mountains, under auspices of Holland Society; 4-5, band concerts; 8 P. M.; fireworks and electrical display; 9.30 P. M., reception to Governor and guests.

Hudson. Children's festivals in daytime and fireworks in evening.

Thursday, October 7.

Lower Hudson. At Yonkers, in the evening, concerts by singing societies and bands. During the forenoon a parade at Ossining, commencing at Scarborough, and joined in by participants from Briar Cliff and Croton-on-Hudson, with civic organizations, fire companies, etc.; in the afternoon, a water parade of the floats, manned by participants from Haverstraw, West Haverstraw and Stony Point off Haverstraw within a short distance of the shore. Also a land parade at Haverstraw, participated in by organizations from Haverstraw, West Haverstraw, Stony Point, Tuxedo, Ramapo, Sloatsburg, Suffern, Spring Valley, Nanuet and Pearl River.

**Outline
of Daily
Events**

Hudson. 9 A. M., departure of Committee to meet flotilla; 10 A. M., reception of flotilla at city, with salutes, etc.; 11 A. M., land parade followed by luncheon to official guests; 4 P. M., unveiling of fountain; 7 P. M., official banquet at Hudson Theatre; illumination of fleet. During afternoon and evening reception in D. A. R. Chapter House.

Albany. 10 A. M., school children's festival and exercises; 2 P. M., aquatic sports on Hudson River in front of city; 3 P. M., grand decorated automobile parade on streets of the city; 8 P. M., "Fraternal Night," with an illuminated night parade, participated in by the various fraternal organizations of Albany with visiting organizations from other cities. During the week a military tournament participated in by all branches of the service in the United States army.

Friday, October 8.

Lower Hudson. In Yonkers, in the afternoon, literary competitions for prizes in the schools, and in the evening a great parade of labor organizations. During the day, parade of the floats at Peckskill, with industrial and other organizations, fire companies, schools, etc., joined in by Montrose, Crugers and nearby villages.

Hudson. 9 A. M., departure of flotilla. Old home reunions throughout county.

Albany. 9 A. M., naval parade to receive the Half Moon and Clermont; formal welcome at Riverside Park by Governor Hughes, Mayor Snyder and other officials; 1 P. M., Hudson-Fulton welcome parade; 8 P. M., display of fireworks in Beaver Park.

Saturday, October 9.

Brooklyn Carnival Parade. Close of festivities in Brooklyn Borough by grand carnival parade of the German, Austrian and Swiss Societies on the Eastern Parkway in the evening.

Lower Hudson. At Yonkers, aquatic and field sports during the day, and in the evening a carnival ending with fireworks. Water parade of the floats at Cold Spring with local participants, joined in by representatives from Brewster, Carmel and other villages, including participants from Garrisons, Highland Falls and West Point.

Albany. 8 A. M., naval parade to escort the Half Moon and Clermont leaving the city for Troy; 8 to 11 P. M., pyrotechnics at Grand View to denote the end of the celebration as a whole.

Troy. Arrival of the fleet from Albany, being met by the entire flotilla of the city of Troy; saluted by the Federal authorities at the Watervliet Arsenal. In Troy an elaborate land parade.

Sunday, October 10.

Albany. Hudson-Fulton Sunday with religious services in all churches.

Outline
of Daily
Events

Cohoes. 10.30 A. M., special services in all churches; 12.30 P. M., great outdoor meeting for children on Canvass street, with addresses by noted speakers, songs, etc.; 7.30 P. M., union historical service in the Reformed Dutch Church on Mohawk street.

Monday, October 11.

Cohoes. 2 P. M., arrival of fleet from Troy; general review of the boats; 8 P. M., military and historical parade with floats representing the Half Moon, the Clermont and an Indian wigwam and an old Dutch homestead; 9.30 P. M., illuminated parade on the Hudson River with display of fireworks.

EXHIBITIONS.

Exhibitions, either arranged with the direct cooperation and financial assistance of the Hudson-Fulton Celebration Commission or having received its official sanction. Admission free except when otherwise stated.

Art, His-
torical
and
Scientific
Exhibi-
tions

American Geographical Society. 15 West 81st street. Special exhibition of books and maps relating to Henry Hudson and Robert Fulton. Open from September 25 to October 9, from 9 A. M. to 5 P. M.

American Museum of Natural History. Located in the blocks bounded by Central Park West, Columbus avenue, 77th street and 81st street. A special exhibit representing the Indians of New York, also an ethnological exhibit mainly devoted to the Iroquois Indians of New York State; on week days from 9 A. M. to 5 P. M.; on Sundays from 1 to 5 P. M.; from September 25 until December 1.

American Society of Mechanical Engineers. Located at No. 29 West 39th street. Special exhibition relating to Fulton and steam navigation; from 9 A. M. to 5.30 P. M. every day except Sundays and holidays.

Brooklyn Institute of Arts and Sciences. Situated on the Eastern Parkway, Brooklyn, near the north entrance to Prospect Park. Special exhibition relating to past and present life of Indians on Long Island, from September 1 to December 31.

Brooklyn Institute of Arts and Sciences, Children's Museum. Situated in Bedford Park, Brooklyn avenue. Special exhibition illustrative of the fauna of Long Island.

Brooklyn Parks. Labeling of the different species of trees native of the Hudson River Valley in Prospect Park, from the Plaza to the Willink entrance; in Bedford Park; in Highland Park, and in Tompkins Park.

City History Club of New York. Headquarters at No. 23 West 44th street.

Art, Historical and Scientific Exhibitions—Exhibition of pictures, maps, and drawings illustrating the early history of New York.

College of the City of New York. Situated at St. Nicholas avenue and 139th street. Exhibition of charts, views, manuscripts and relics representing old New York.

Fraunce's Tavern. Located at the corner of Pearl and Broad streets, New York City. Exhibition by the Sons of the Revolution of portraits, historical relics and other objects covering the period of the American Revolution.

Long Island Historical Society. Corner of Pierrepont and Clinton streets, Brooklyn. Exhibition of books, manuscripts, maps and relics of the periods of Hudson and Fulton.

Metropolitan Museum of Art. Located in Central Park at Fifth avenue and 82d street. Loan exhibition of paintings by Dutch artists, contemporaries of Hudson; also of paintings, furniture, silver, pewter, pottery and glass made in this country or used here from about 1625 to 1815, the year of Fulton's death. Exhibition for two months beginning September 20. Open on Saturday from 10 A. M. to 10 P. M.; Sunday from 1 P. M. to 5 P. M.; other days from 10 A. M. to 5 P. M.; free every day except on Monday and Friday.

National Arts Club. Located at No. 15 Gramercy Park. Exhibition under the joint auspices of the National Arts Club and the American Scenic and Historic Preservation Society, comprising paintings, drawings, early engravings, or other pictorial or art objects illustrating Aboriginal, Colonial, Revolutionary, Nineteenth Century, and Twentieth Century New York. Open one month from September 20.

New York Aquarium. Located in Battery Park. The largest aquarium in the world. Tanks containing fish indigenous to the Hudson River so marked.

New York Botanical Garden. Located in Bronx Park. Native trees of the Hudson Valley growing within the Botanical Garden labeled with the letter "H," standing for Hudson.

New York Genealogical and Biographical Society. Located at No. 226 West 58th street. Exhibition of books, manuscripts and paintings.

New York Historical Society. Located at No. 170 Central Park West. Official Robert Fulton Exhibition of the Celebration, consisting of portraits, miniatures, manuscripts and relics relating particularly to Robert Fulton.

New York Public Library. At Lenox branch, Fifth avenue and 70th street. An exhibition of views, prints, maps, books, manuscripts and other objects of interest relating to the Hudson River and Valley and to early steam navigation on the river. At each of the forty-one circulation branches throughout the city, exhibitions of pictures and views of appropriate interest. Lists of books in each particular branch that are of interest in this connection, and books likely to be called for by readers who are interested in this subject.

New York Zoological Park. Situated in Bronx Park. Mammals, birds and reptiles most prominent in the valley of the Hudson in 1600 specially indicated by the official flag of the Commission. Park open daily from 9 until half an hour before sunset. Admission fee of 25 cents on Mondays and Thursdays. Band concerts on Sunday afternoons.

Art, Historical and Scientific Exhibitions

Reformed Dutch Church. Exhibition in chapel of the Reformed Protestant Dutch Church of St. Nicholas, at Fifth avenue and 48th street, comprising articles connected with the long history of the church which was organized in 1628.

Van Cortlandt Mansion. Located in Van Cortlandt Park. Exhibition of portraits, autographs, maps and relics illustrating the colonial and early American periods of American history, under auspices of the Colonial Dames of the State of New York. Open on week days from 10 A. M. to 5 P. M., and on Sundays from 2 P. M. to 5 P. M.

Washington's Headquarters. Located at 160th street and Edgecomb avenue, New York. Special loan collection of Colonial and other relics under the auspices of the Daughters of the American Revolution of the State of New York and the Washington's Headquarters Association.

COMMEMORATIVE EXERCISES.

Special religious, patriotic and literary exercises with the official recognition of the Commission as follows:

Commemorative Exercises

Brooklyn Institute of Arts and Sciences. At Brooklyn Academy of Music, Friday evening, September 24. Literary exercises and music.

At the Central Museum, Tuesday evening, September 28, illustrated lecture on the "Hudson-Fulton Anniversary."

City Hall, New York. On Wednesday afternoon, September 29, at 2.30 o'clock, patriotic exercises under the auspices of the National Society of Patriotic Women of America and the State Committee of the Daughters of the American Revolution of the Hudson-Fulton Celebration.

College of the City of New York. Wednesday, September 29, papers on Hudson's discovery, early cartography and steam navigation; presentation of bronze bust of Fulton; students' procession through the historically named gates of the campus, followed by speeches; special literary and musical exercises in the Great Hall.

Columbia University. Sunday, September 26, 4 P. M., religious ceremonies in St. Paul's Chapel. Wednesday, September 29, 8 P. M., lectures. Thursday, September 30, in the afternoon, students' games. Sunday, October 3, at 4.30 P. M. final exercises.

Cooper Union. (New York.) Wednesday, September 29, 4 P. M., illustrated lecture on Robert Fulton and his achievements.

Com-
memo-
rative
Exercises

Cornell University. (Ithaca.) Tuesday, September 28, addresses on geographic conceptions of America in 1609, and the economic and political conditions of Europe at the same period. Wednesday, September 29, address on Hudson's discovery. Thursday, September 30, address on steam navigation. Exhibitions of maps, models, pictures, etc., relating to Hudson and Fulton periods.

Fishkill-on-Hudson. Tuesday, October 5, ceremonies by the Rombout-Brett Association, commemorating the discovery of the Hudson River in 1609, and the building of the Roger Brett and Catharyna Rombout Manor House in 1709.

Hobart College. (Geneva.) Tuesday, September 28, addresses on industrial inventions, etc. Thursday, September 30, address on the relation of mechanical inventions to democracy.

New York Public Schools. Wednesday, September 29, under the auspices of the Board of Education, special exercises in every elementary public school in New York City. In the evening free public lectures at 70 different centers.

New York University. Wednesday, September 29, lectures on the literature of the first two centuries of New York; conditions determining New York's greatness; political and educational history of New York; Fulton and steam navigation; the physiography of the Hudson Valley, etc. Dedication of a bust of Robert Fulton in the Hall of Fame. Also exercises in connection with the University schools in Washington Square.

Reformed Dutch Church. (New York.) Special commemorative services at 11 A. M. and 8 P. M., on Sunday, September 26, in its churches at Second avenue and 7th street, Fifth avenue and 29th street, Fifth avenue and 48th street and West End avenue and 77th street.

Union Theological Seminary. (New York.) Special exercises on Wednesday, September 29, in the Adams Chapel.

West Point. Commencing about a week before the Celebration, commemorative exercises in the Children's School with exhibition of Indian and Dutch relics and illustrative material. On Wednesday, September 29, reception to official Guests of the Commission. Exhibition of historic maps, books, prints, etc., in the Library. Dress parade in the afternoon. Friday, October 1, artillery salutes to Naval Parade. Flags displayed from Fort Putnam and Constitution Island. Small flags on West Point and Constitution Island to indicate where famous Revolutionary chain was fastened.

Dedica-
tions of
Memori-
als

DEDICATIONS.

The dedication of the following parks and memorials with the official recognition of the Commission.

Cornwall. On Wednesday, September 29, a playground.

Hudson. On Thursday, October 7, a fountain.

Kingston. On Tuesday, October 5, a monument to Sir Thomas Chambers, Lord of the Manor of Fox Hall, and one of the founders of Kingston, and a tablet in the Industrial Home.

Newburgh. On September 29, replica of an equestrian statue of Gen. Anthony Wayne.

New York: City Wall Bastion Tablet. On Wednesday, September 29, by the Society of Colonial Wars in the State of New York, a tablet at No. 48 Wall street, New York, marking the site of a bastion in the old city wall.

New York: Fort Amsterdam Tablet. On Wednesday, September 29, by the New York Society of the Order of the Founders and Patriots of America, a tablet on the United States Custom House, marking the site of Fort Amsterdam and its successors.

New York: Fort Tryon Tablet. On Wednesday, September 29, by the American Scenic and Historic Preservation Society, a monument erected through the generosity of Mr. Cornelius K. G. Billings on the site of Fort Tryon, on Fort Washington avenue.

New York: Hudson Monument. On Monday, September 27, at 2 P. M., the Henry Hudson Monument, erected by private subscriptions on Spuyten Duyvil Hill.

New York: Verrazzano Bust. On Wednesday, October 6, by the Verrazzano Monument Committee, a bust of Verrazzano, the Italian navigator, in Battery Park.

New York: Washington Heights Tablet. On Wednesday, September 29, by the Washington Heights Chapter, D. A. R., a tablet at 147th street and Broadway, marking the site of the "first line of defense" on Washington Heights in 1776.

New York: Washington Heights Tablet. On Wednesday, September 29, by the Mary Washington Colonial Chapter, D. A. R., a tablet at Broadway and 157th street, marking the site of "the second line of defense" on Washington Heights in 1776.

Palisades Interstate Park. On Monday, September 27, dedication of the Palisades Interstate Park, by the Commissioners of the Park, at Alpine Landing, New Jersey.

Stony Point Arch. On Saturday, October 2, during the ceremonies at Stony Point Battlefield State Reservation, the Memorial Arch erected by the New York State Society of the Daughters of the Revolution.

SOCIAL AFFAIRS.

Social
Affairs

The following events accorded official recognition by the Commission:

Explorers' Club Dinner. On Thursday evening, September 30, the Explorers' Club dinner at the Hotel Astor.

German-American Banquet. German-American banquet, at Waldorf-Astoria Hotel, Thursday evening, October 7.

Harlem Banquet. Tuesday, September 28, commemorative banquet by Harlemites in Harlem Casino, 8 P. M.

Holland Society Banquet. September 22, at Waldorf-Astoria Hotel, banquet by the Holland Society.

Metropolitan Museum of Art Reception. Reception at the opening of the Exhibition of the Metropolitan Museum of Art, on Monday, September 20.

Naval Reception at Columbia University. On Saturday afternoon, October 2, fête champêtre in honor of the Naval Guests of the Commission on the grounds of Columbia University.

Netherlands Banquet. Banquet of the Netherlands Chamber of Commerce in America and the Netherland Club of New York, at Hotel St. Regis, Thursday evening, September 23.

Pilgrim Society Banquet. October 4 at Waldorf-Astoria Hotel, banquet by the Pilgrims.

CHAPTER VI

OFFICIAL INSIGNIA AND PUBLICATIONS

THE principal official insignia and publications of the Commission were the Official Seal, Official Medal, Official Badge, Official Flag, Official Poster, Official Program (general), Official Souvenir Program of Historical Parade, Official Souvenir Program of Carnival Parade, Official Souvenir Postal Cards, and the elaborate and very valuable catalogues issued by the museums in connection with the art, historical and scientific exhibitions. The postage stamp issued by the United States Government at the solicitation of the Commission, and the lithographic reproductions in colors of Köhler's watercolor drawing of the Half Moon, given to the Commission by distinguished Hollanders for presentation to the public schools, may also be mentioned among these memorials of permanent educational value.

The Official Seal, used only by the Commission to attest official documents, is circular in form, two and one-fourth ^{Official Seal} inches in diameter. In the foreground is a classical, draped female figure, symbolizing the genius of the Hudson River, standing upon the prow of a boat supporting under her right hand a shield bearing the name and date "Henry Hudson, 1609," and under her left hand a similar shield bearing the name and date "Robert Fulton, 1807." Upon the prow of the boat is the date "1909." In the middle distance is the Hudson River, and upon it, above the respective shields, Hudson's ship, the Half Moon, and Fulton's steamboat, the Clermont. In the background are the Palisades of the Hudson River. And in the border surrounding the whole are the words and date: "Seal of the Hudson-Fulton Celebration Commission 1906."

The Official Medal of the Commission was issued under the ^{Official Medal} supervision of the Medal Committee of which Mr. Henry W.

Official
Medal

Cannon is Chairman, and Edward D. Adams, LL.D., is Vice-Chairman. During the temporary absence of both Mr. Cannon and Dr. Adams, Mr. Archer M. Huntington was Vice-Chairman. In publishing the Medal, the Commission had the valuable cooperation of the American Numismatic Society, whose official imprint the Medal bears. Studies for this medal were begun by the Numismatic Society's Committee on Publication of Medals in the spring of 1908 and the essential elements of the design were then submitted to Mr. Emil Fuchs* of London who undertook the composition and sculpture. When completed, Mr. Fuchs' design was submitted to the Commission, and adopted as the official commemorative Medal of the Celebration. For the following description of the Medal we are indebted to Dr. Adams:

The Hudson design represents Henry Hudson and a group of sailors on the "Half Moon," watching the hoisting of some heavy article from outside the ship. As the log of the vessel refers to sending for fresh water and the return of a boat with an abundance of fresh fish, the incident may well have occasioned the interest portrayed on the medal. In the background is a faint suggestion of the high banks of the Hudson River. In a panel at the bottom is seen the vessel with her Dutch name,

* Emil Fuchs, the sculptor, painter and medallist, of Austrian birth, a resident of London during the past ten years, and a visitor to New York during the past three winter seasons, has received the highest recognition for his various productions.

As a medallist he has been best known in this country by the two medals he modeled for the Hispanic Society of America, and by the medal made by him for the American Numismatic Society to commemorate its Fiftieth Anniversary. His exquisite marble, in low relief, entitled "Chansons Religieuses," was much admired when exhibited in New York three years ago.

In England he has designed, by royal command, the portrait medals known by the following titles: Queen Victoria, King Edward VII, Queen Alexandra, Prince and Princess of Wales, Princess Henry of Battenberg; also the Coronation Medal (a popular edition, in several sizes, which reached an issue of 980,000), Science, Art and Music Medal, and the South African War Medal.

By similar direction he designed the portrait of King Edward VII, now in use on the postage stamps of Great Britain.

Mr. Fuchs has also designed and executed, among other works, the portrait medals of Field Marshal Lord Roberts, Admiral Lord Charles Beresford, Governor-General of Canada, Earl Grey, Field Marshal Sir George White (defender of Ladysmith).

HALVE MAENE. Encircling the upper margin is the legend, ^{Official Medal} DISCOVERY OF O HUDSON RIVER BY O HENRY HUDSON O A. D. MDCIX. In the circles dividing the legend, are an astrolabe, jack-staff and sextant. On the lower left, THE AMERICAN | NUMISMATIC SOCIETY, below a circle bearing the seal of that Society; and on the right, below a similar circle containing the seal of the Commission, HUDSON-FULTON | CELEBRATION COMM: The artist's name, E. Fuchs, is inscribed below the coil of rope.

The Fulton design is classical in its characteristic features. It shows a parapet extending across the field from which rise two columns with fluted bases; from each end of the parapet sculptured bands follow the curve of the rim until they join the columns; in the opening at the left is a view of New York as seen from the Hudson in 1807, and at the right the sky-line of the city as seen to-day from the Jersey shore. Between the columns hangs a portrait of the inventor, below which ROBERT FULTON | 1765 1815 — the dates of his birth and death. Seated in front of the columns are three draped figures; that in the center, facing, represents the genius of Steam Navigation, and holds in her lap a model of the "Clermont." At the right is the figure of History, with a scroll across her lap and in her right hand a pen. At the left is that of Commerce, resting her right hand on an anchor. In exergue in three lines, FIRST USE OF STEAM IN NAVIGATION | ON THE HUDSON RIVER | 1807. The name of the artist, E. Fuchs, appears on the step below the feet of History.

To give variety to the design, one side of the medal, the Fulton, was treated in a classical manner befitting the education and character of the engineer, while the other side was given an aspect of dramatic action, as appropriate to the daring navigator and discoverer whose career ended in a tragedy of mutiny and mysterious death.

The details of the design required great care to assure historical accuracy. Eminent astronomers were consulted, col-

Official
Medal

lections of instruments used in navigation were examined, and the identification of those in use three hundred years ago was verified by approved records and authorities. The artist made several visits to Holland and obtained official sanction for his representation of the "Half Moon" and the costumes of her navigator and sailors. Engravings and paintings of about 1609 were studied, and a copy made of the form and rigging of the vessel selected as the type of the original "Half Moon" as now reproduced. A plaster model of the interior of the vessel was obtained from the marine architect who designed the replica now afloat on the great river.

The spelling of the names as they were written in 1609 was a detail requiring much investigation.

Heinrick was replaced by Henry, on the evidence that Captain Hudson was an Englishman, that his name was written Henry three times in the contract for his employment by the Dutch East India Company, and was similarly signed to that paper, notwithstanding the facts that the document was prepared by a Dutch lawyer, written in the Dutch language, and executed in Amsterdam.

The proper spelling of the name of the vessel was not so readily determined. The publications of Holland spelled the name "Halve Maen," but it was admitted that the ancient form and that undoubtedly used when Captain Hudson sailed from Amsterdam was "Halve Maene." Having the highest naval authority for this latter form of spelling, the dies for the medal were prepared accordingly. When about to strike the first medals, papers were received from Holland illustrating the floating of the new "Half Moon" in Amsterdam, and describing the details of her construction and shipment to New York. In all these accounts her name was spelled "Halve Maen." Although in great haste to make a timely issue, the striking of the medals was immediately stopped, awaiting a cable answer to the inquiry as to how the name was spelled upon

the ship sent here. The cable answer from the Dutch authority was reassuring, as he not only reasserted his previous statement in favor of the final "e" as the form prevailing in 1609, but gave the information that the name would not be upon the ship at all. Upon the arrival of the "Half Moon" a careful inspection was made and it was found, as is sometimes done in other departments of human activities, that the old adage "When in doubt, do nothing" had apparently been availed of, as, sure enough, the stern was decorated with a design of a new or crescent moon, but without any text in ancient or modern form to assure us, notwithstanding any possible doubts, that the design really represented the "Half Moon."

There were likewise difficulties in representing accurately the shape of the "Clermont." The best evidence was obtained from the pictures of the port of New York of one hundred years ago, available in various museums; and an important print of that period was used in making the design for the medal. The Clermont Committee of the Hudson-Fulton Celebration Commission had much difficulty in determining the appearance and mechanical details of the successful "Clermont." Research among old records brought to light from time to time unexpected information, so that several changes were made in the location of the paddle-wheel, the smoke-stack and the number of masts and their rigging. The plaster design of the medal, even after its delivery to the die-makers was twice altered as changes were successively made by the Committee in charge of the construction of the replica of the "Clermont."

In portraiture the medal is limited to the bust of Robert Fulton, reproduced by the kind permission of his grandson, from the painting by the American artist, Benjamin West, now in the possession of Robert Fulton Ludlow.

In the case of Henry Hudson it was concluded after most diligent search and inquiry at the British Museum and at the

Official
Medal

**Official
Medal**

museums of Holland, as well as, of course, at the offices of the English Muscovy Company and of the Dutch East India Company, former employers of Hudson, that no authentic portrait of Henry Hudson exists. While it would have been easy to appropriate a type of an English seaman of that date for an imaginative portrait, it was thought best, in the interest of permanent historical records, as such a medal must necessarily be, not to introduce into the design anything that required the explanation that it really was not what it pretended to be. The absence of any portrait of Hudson is undoubtedly due to the tragedy of his last voyage and the long concealment of his death.

The physical features of the Hudson River, probably nearly as they were when viewed by the explorers, are outlined in the background of the "Half Moon" as now seen looking up the river from the vicinity of Grant's Tomb.

The Fulton design includes the sky-line of New York as recently seen from the Jersey side of the river, and a view of lower Manhattan island from the river, taken from a print of about 1807.

The Medal Committee of the Commission was appointed to arrange for the striking of the official commemorative medal, to arrange for the presentation of such copies as are to be given to distinguished rulers, and to attend to the sale of copies to be otherwise disposed of to the members of the Commission or the public.

By official announcement regarding its Official Medal the Commission authorized the issue of nine varieties of this medal, all from the same design, but intended by their size and metal for various purposes. The most important in artistic and intrinsic value were limited in issue, and designed for presentation to the distinguished guests of the Commission; others were limited in edition and issue to the members of the Commission and Citizens' Committees upon their individual subscription therefor. Souvenir medals of different sizes and metals were provided for the Official Aides, the guests at the

official banquet, the sailors of all the visiting fleets, and as prizes for school children and sporting events. Official Medal

Other issues were prepared for public sale, subject to a royalty to the Commission; one, the four-inch bronze medal, selling at \$2 each, was deemed entitled to appreciation as a work of art, of historical interest, and a worthy and enduring souvenir of an occasion of unusual importance. The other issues to the public were designed as pocket pieces or for personal decoration, and to be sold at 25 cents and 10 cents each. The official schedule of these issues as finally made, and all of the same design, is as follows:

SIZE	GOLD	SOLID SILVER	SILVER PLATED HARD METAL	BRONZE	ALUMINUM
4 inches.....		Commission and Principal Guests.		Public Sale.	
3 inches.....	Heads of Nations and the American Num. Soc. (2).	The American Numismatic Society.			
2½ inches.....		Citizen's Committees and Official Aides.		Official Ban- quet and Aquatic Games.	
2 inches.....		Other Guests and Aquatic Games.			Public Sale.
1½ inches.....		Aquatic Games.	Awards of Merit for Public Schools.	Aquatic Games.	
1¼ inches.....		Aquatic Games.	Visiting Sailors and Public Sale.		

Under the terms of the agreement with the Commission, the Numismatic Society prepared the original dies, three inches in

**Official
Medal**

diameter, and struck therefrom for the members of that Society only, two examples in native gold from California, and one hundred examples in solid sterling silver numbered from one upwards. The dies were then delivered to the Commission to be used only for striking such medals in native Alaskan gold as might be required for presentation to the head of each nation represented in the Hudson-Fulton Celebration by one or more of its naval vessels. After such use these dies are to be deposited in the Museum of the Numismatic Society.

The one hundred numbered silver medals from these three-inch dies were offered by circular of July 27, 1909, to the members of the Society and were promptly taken.

To protect the design from infringement, and thereby to enhance the value of the medals and augment the royalty on its sale accruing to the Commission, application was made for a patent under the laws of the United States, which was duly issued, September 7, 1909, and all the rights thereunder were vested in the Hudson-Fulton Celebration Commission.

By reason of the importance and distinctive character of each design, neither supplementing the other, and because the events commemorated occurred two hundred years apart, the faces of the medal do not properly come under the customary designation of obverse and reverse. There is no reverse to describe or illustrate the obverse; each side is complete by itself. Chronologically the Hudson side would be the obverse and the Fulton side the reverse. Practically this technical relation will change according to the artistic tastes or sympathies of the observer. In order to facilitate the exhibition and examination of each side, from time to time, as may be desired, some of the cases prepared by the Commission for the presentation examples have been made to hang or stand, so that the medal may be reversed in position.

The medallion art is as old as that of Numismatics, and the examples that have been preserved, in gold, silver, bronze and iron, equal, if they do not excel in artistic value, the best speci-

mens of ancient coinage with which the world is familiar. As ^{Official Medal} in sculpture and painting, there have been periods of decadence and renaissance. Its finest examples have been produced under the fostering care and generous encouragement of patrons of art in those countries where the fine arts have been most developed. As a record of important events in all branches of human endeavor, the medal, because of its enduring materials, the difficulties of its execution, and the convenience of its preservation, has been recognized as one of the most reliable records of historical interests, and one of the favorite forms of expression of public sentiment.

This medal, like the famous Waterloo* medal in England, prepared by the Royal Mint, but never struck, marks a development of the medallie art in this country that by the accuracy of its historical detail, the balance and grace of its composition, and the delicate refinement of its low relief, establishes an example highly creditable to the efforts of the American Numismatic Society for a better and wider appreciation of the glyptic art in its application to coinage and medals.

To the foregoing description by Dr. Adams may be added the statement that all the medals except those struck in gold for presentation to the heads of governments were made by the Whitehead & Hoag Company of New York City and Newark, N. J. The gold medals presented to the heads of Governments which sent naval vessels to the Celebration were executed by Tiffany & Co. of New York City. The Board of Trustees on October 13, 1909, directed that all the dies for the medals should be deposited in the Museum of the American Numismatic Society. Sets of the Medals were presented to the American Numismatic Society, New York; British Museum, London, England; Brooklyn Institute of Arts and Sciences, New York; Congressional Library, Washington, D. C.; Met-

* By Pistrucci, the Italian designer of the St. George and dragon gold coins of Great Britain.

ropolitan Museum of Art, New York; New York Historical Society, New York; New York Public Library, New York; New York State Library, Albany; Rijks Museum, Amsterdam, The Netherlands; Smithsonian Institution, Washington, D. C.; United States Military Academy, West Point; United States Mint, Philadelphia, Pa., and United States Naval Academy, Annapolis, Md.

Official
Badge

Matters relating to the Official Badge, Official Flag and Official Poster were in the hands of the Committee on Badges, Flag and Poster, of which Mr. August F. Jaccaci is Chairman and Mr. Louis Annin Ames is Vice-Chairman.

The Official Badge was designed by Mr. Chester Beach of New York and was issued with variations as to metal and ribbon to distinguish its use by Commissioners, Official Guests, Official Aides and Members of Citizens' Committees.

The Commissioners' Badge consisted of a solid sterling silver medallion, about one and a half inches in diameter, suspended from an orange, white and blue ribbon (the colors under which Hudson sailed), which in turn was suspended from a silver bar bearing the word "Commissioner," and all of which was backed by a broad blue ribbon about six inches long. The medallion represented on the obverse profile portraits of Hudson and Fulton, surrounded by the legend: "Henry Hudson. 1609. Robert Fulton. 1807," and the date of the Celebration, "1909." The portrait of Hudson was, of course, imaginary, as no actual portrait of the explorer is known to exist. Upon the reverse of the medallion was represented a standing, draped, female figure, wearing a winged cap, and holding in her extended right hand a model of the Half Moon ship, while in her extended left hand she held a model of the Clermont steamboat. This figure represented the Spirit of Progress and was modeled after the central figure in Mr. Blashfield's design for the Official Poster, mentioned hereafter. In the background were represented some of the buildings of New York City. Surrounding all were the words: "Hudson-

Fulton Celebration. N. Y." When in action as a Committee-Official man, the wearer removed the blue back ribbon and substituted ^{Badge} a white ribbon, indicating that for the time being he was acting authoritatively as a member of a committee. The title of his Committee was indicated by a celluloid button bearing its name. A Chairman was indicated by gold fringe on his white and blue back ribbons. This badge, including both the white and the blue back ribbons, enclosed in a leather pocket case stamped in gold "Hudson-Fulton Celebration Commission. Commissioner," was furnished to Commissioners at a cost of \$2.75 each, sent by registered mail. The Committee button cost 10 cents additional.

The Badge of the Official Guests was identical with the Commissioners' Badge, except that upon the bar was the word "Guest," and the back ribbon was of a golden yellow color instead of blue. These badges were furnished to the Official Guests gratuitously.

The medallion and bar of the Badge for Official Aides was of solid green bronze and upon the bar was the word "Aide." The orange, white and blue front ribbon was the same as on the Commissioners' Badge, but there was no back ribbon. The case was stamped in gold "Hudson-Fulton Celebration Commission. Aide." This badge was sent to Aides by registered mail, in leather case, at a cost of \$1.60, or in leatherette case at a cost of \$1.35.

The medallion and bar of the Badge for Citizens' Committees were of solid, government finish, bronze. Upon the bar were the words "Citizens' Committee." The orange, white and blue front ribbon was the same as on the Commissioners' Badge, but there was no back ribbon. The case was stamped in gold "Hudson-Fulton Celebration Commission. Citizens' Committee." This badge, in leatherette case, was sent by registered mail at a cost of \$1.30. The badges were manufactured by the Medallie Art Company, of New York, and were protected by copyright.

**Official
Badge**

In accordance with a resolution of the Trustees, Commission badges were sent to the five Foreign Correspondent Councillors of the Commission, namely, Dr. A. Bredius, Director of the Mauritshuys Museum, The Hague; Hon. C. G. Hooft, Director of the Fodor Museum, Amsterdam; Hon. D. Hudig, Assistant in Naval Drawings, etc., Rotterdam; Dr. W. Martin, Professor at the University, Leiden; and Dr. E. W. Moes, Curator of Prints at the Rijks Museum, Amsterdam. Two badges each were sent to the Worcester, Mass., Museum, the Chicago Art Institute, the Smithsonian Institution, the Brooklyn Institute of Arts and Sciences, and the Boston Museum of Fine Arts. One set of dies was sent to the American Numismatic Society, one set to the Metropolitan Museum of Art, and one set to the New York Historical Society, all of New York City.

**Official
Flag**

The Official Flag was designed by Mr. Frank D. Millet and Mr. C. Y. Turner, with the collaboration of Mr. Jaccaci and Mr. Ames, Chairman and Vice-Chairman respectively of the Committee on Badges, Flag and Poster. It consisted of a horizontal tricolor of orange, white and light blue (reading from the top downward) — the colors being those of the Dutch flag in 1609. In the center of the white stripe were the plain red initials H. F., standing for Hudson and Fulton, surrounded by a green wreath. The design was protected by patent, but any reputable manufacturer who would agree to comply with the specifications prepared by the Committee, prescribing the design, colors, grade of materials and retail price, was permitted without charge to make and sell the flag. It is estimated that between 4,000,000 and 5,000,000 flags of this design were sold by the entire trade.

The Official Colors — orange, white and light blue — were also used extensively and gave the keynote to the color schemes of the Celebration generally.

**Official
Poster**

The Official Poster was designed by Mr. E. H. Blashfield. It was 19 by 26 inches in size and was copyrighted. It repre-

sented in the center the personification of the Spirit of Progress ^{Official} — a draped, standing, female figure, wearing a winged hat ^{Poster} and holding in her right hand a model of the Half Moon and in her left hand a model of the Clermont. At her right stands an ideal figure of Henry Hudson, holding a globe in his right hand, while his left hand, holding his hat, rests on the hilt of his sword. From his belt protrude the butts of two pistols. On the opposite side stands a figure representing Robert Fulton, whose crossed hands, one of which holds his beaver hat, rest on the head of a cane. Above the figures is the legend: "Hudson-Fulton Celebration. 1609, 1807," the dates being above the figures of Hudson and Fulton respectively. At the bottom are the dates of the Celebration: "September 25 to October 9, 1909."

These posters, to the number of 77,814, were printed and distributed free. Of these, 66,494 were furnished with paste-board tubes for protection. The railroads received 52,896. Of the remainder, Mr. Ames distributed 3,338; Mr. Simon Brentano, of Brentano's, 2,000; and Mr. P. T. Wall, of the Shippers and Travelers' Exchange, 1,000. Every request for one poster or more was acted upon and all details of the distribution were attended to by Mr. Jaccaci. The correspondence involved reached many thousands of letters received and as many sent, and about 4,000 postal cards. Four thousand five hundred posters were mailed from Mr. Jaccaci's office. After the 77,814 copies had been distributed hundreds of requests for posters were received from schools, colleges, libraries, etc., but on account of the cost and difficulty of distribution no more were printed.

In the summer of 1909 an arrangement was made with the Sackett & Wilhelms Company, of No. 73 Fifth avenue, New York, to print the poster design in reduced form on envelopes for public sale at the rate of \$3 per thousand, the printers to pay the Commission a royalty of 10 per cent; also to reproduce the design in colors, 2 by 2 $\frac{3}{4}$ inches in size, upon pasters and

tags, and in black halftone process on blotters, pasters and tags, for public sale, paying to the Commission a similar royalty on all sales.

Official
Pro-
grams

Pursuant to resolution of the Board of Trustees, the Committee on Memorials, of which Mr. Tunis G. Bergen is Chairman, made arrangements in the summer of 1909 with Redfield Brothers, Inc., No. 311 West Forty-third street, New York, for the printing and public sale of Official Programs and Souvenirs as follows:

Official Program: $9\frac{1}{4}$ by 12 inches in size, 32 pages and cover, illustrated; retail price, 25 cents; royalty to the Commission, $3\frac{1}{2}$ cents a copy on all copies sold over 30,000 in number.

Historical Pageant Souvenir: 7 by 10 inches in size, 64 pages and cover, printed in colors, illustrating the 54 floats of the Historical Parade with an historical sketch of each incident portrayed; cover inlaid with pictures of Half Moon in colors, and embossed; bound with silk cord; retail price, 50 cents a copy; royalty to Commission, $6\frac{1}{2}$ cents a copy on all copies sold over 26,000 in number.

Carnival Pageant Souvenir: $4\frac{1}{2}$ by $6\frac{1}{2}$ inches in size, 64 pages illustrating the 50 floats in the Carnival Parade with a description of each subject portrayed; retail price, 10 cents a copy; royalty to Commission, 1 cent a copy on all copies sold over 55,000 in number.

Souvenir Post-cards: 72 in number, representing the Historical and Carnival floats, Henry Hudson, the Half Moon, Robert Fulton, the Clermont and the official poster design; printed in 10 colors; price \$25 a thousand; royalty to Commission \$1.75 a thousand on all cards sold over 150,000 in number.

These publications were edited by the Secretary and Assistant Secretary of the Commission and were copyrighted. Advertisements in them were expressly prohibited. The sale of these publications was a great disappointment and after the Celebration the publisher asked to be relieved from paying any royalties

to the Commission, with the result that the Commission compromised by accepting \$2,000.

In response to representations made to the Postmaster-General of the United States, the Hon. Frank H. Hitchcock, by the Hon. William S. Bennett, the Hon. Herbert Parsons, and the Hon. J. Van Vechten Olcott, Members of Congress from the State of New York, in behalf of the Commission, the United States Government issued a commemorative postage stamp of the denomination of two cents. The design, executed by the artists of the Bureau of Engraving and Printing, was based upon suggestions made, upon invitation of the Postmaster-General, by Dr. George Frederick Kunz and the Assistant Secretary of the Commission. The stamp was oblong in shape, and seven-eighths of an inch by one and three-fourths inches in size, being one of the largest postage stamps ever issued by the Government. In the border at the top of the design were the words "Hudson-Fulton Celebration" with the dates "1609" and "1909." Below this inscription in a curved line appeared the words "U. S. Postage." At the bottom on each side was a prominent Arabic numeral "2" with the words "Two cents" in a panel between the figures. In the center was engraved a picture showing the Palisades of the Hudson River in the background, with the Half Moon sailing up the river and the Clermont steaming in the opposite direction. In the foreground was an Indian in a canoe, and in the distance, just discernible, a canoe with four other Indians. In its entirety, the design commemorated the Hudson River and the three stages of the science of navigation — aboriginal navigation, sail navigation ushered in by Hudson and steam navigation ushered in by Fulton. At the Postoffice Department in Washington the stamp was regarded as one of the most artistic ever issued by the Government. Fifty millions of stamps were printed, and the sale began on the opening day of the Celebration, Saturday, September 25, 1909.

Half
Moon
Pictures

Among the conspicuous manifestations of the generous interest taken by Hollanders in the Celebration was the presentation of a thousand beautiful colored pictures of the Half Moon to the Commission by Messrs. J. T. Cremer, J. P. Van Eeghen and R. Van Rees, as indicated in the following letter:

“AMSTERDAM, 6th September, 1909.

“To the Hudson-Fulton Celebration Commission, New York:

“The undersigned have the honor to inform your Committee that they intend, through your kind intermission, to present to the schools of New York:

“One thousand reproductions of a water color drawing representing the ‘Halve Maen’ sailing up the Hudson River.

“As citizens of Amsterdam and Honorary Foreign Councillors of your Commission, they wish herewith to assist in keeping before the coming generations of Americans, the memorable fact that your glorious river was discovered and New Amsterdam founded by men bent on discovery, who hailed from Amsterdam and sailed under the colors of Amsterdam, of the Orange ‘Prinsenvlag,’ of the Netherlands tri-color with the badge of the Amsterdam Chamber of the ‘Oost Indische Compagnie’ and with the ‘Geus’ on the jackstaff.

“They kindly request you to distribute for them these reproductions, which they intend bringing along with them on the ‘Nieuw Amsterdam,’ leaving Rotterdam on the 11th inst. The original was handed by the editor to the member of your Commission, Mr. Tunis G. Bergen, who was so kind as to visit us

“We are gentlemen,

“Yours very sincerely,

“J. T. CREMER,

“Representative of the government of the Netherlands
at the Hudson-Fulton Celebration; Vice-President of
the Netherlands Hudson-Fulton Commission.

“J. P. VAN EEGHEN,

“Chairman of the Amsterdam Chamber of Commerce;
Vice-President of the Netherlands Hudson-Fulton
Commission.

“R. VAN REES,

“Treasurer of the Netherlands Hudson-Fulton Com-
mission.”

These pictures, 19 by 26 inches in size, were reproductions of a water color painting by Mr. H. J. Köhler of The Netherlands, the original of which was presented to the Commission as stated in the above letter. In accordance with a resolution of the Trustees adopted May 3, 1910, the pictures were sent by the Commission on May 17, 1910, for distribution among the public schools of the following named cities and villages along the Hudson River:

Cities: Albany, Cohoes, Glens Falls, Hudson, Kingston, Newburgh, New York, Poughkeepsie, Rensselaer, Troy, Watervliet and Yonkers.

Villages: Athens, Castleton, Catskill, Cold Spring, Corinth, Cornwall, Coxsackie, Croton-on-Hudson, Dobbs Ferry, Fishkill, Fishkill Landing, Fort Edward, Green Island, Hastings-on-Hudson, Haverstraw, Hudson Falls, Irvington, Matteawan, Mechanicville, North Tarrytown, Nyack, Ossining, Peekskill, Piermont, Red Hook, Rhinebeck, Saugerties, Schuylerville, South Glens Falls, South Nyack, Stillwater, Tarrytown, Tivoli, Upper Nyack, Victory Mills, Wappingers Falls, Waterford and West Haverstraw.

The pictures for the schools in the City of New York were sent direct to the headquarters of the Board of Education. Those for other cities and for villages were sent to a representative of the Commission in each place.

Moon
Pictures

CHAPTER VII

THE BUILDING OF THE HALF MOON

AMONG the active preparations in the year before the Celebration, none involved objects of greater popular interest than the building of the facsimiles of Hudson's ship, the Half Moon, and Fulton's steamboat, the Clermont.

Contem-
plated
from the
first

The building of the Half Moon, either in Holland or America, was contemplated from the very outset, as appears from the minutes of the first meeting of the Executive Committee of the Hudson Tercentenary Joint Committee on December 16, 1905, at which it was "recommended as an instructive and picturesque feature of the water celebration that a facsimile of the Half Moon be built, in Holland if possible, otherwise in America, and that it should arrive in the harbor and proceed up to Albany and return, duplicating the anchorages of the original ship, with local demonstrations en route." In the summer of 1906, the Assistant Secretary of the Commission, by whom the foregoing recommendation was made, visited Holland and made researches in the museums and libraries with a view to preparing authentic data for the construction of the vessel if it should be determined upon. On November 26, 1906, the late Rear Admiral Joseph B. Coghlan, U. S. N., then Chairman of the Naval Parade Committee, recommended that plans be secured for building the Half Moon and Clermont so as to permit estimates to be made of the time and cost of construction, but the preparations for building the Half Moon on the American side of the ocean were eventually discontinued as the result of the very agreeable intimation that the people of Holland would like to contribute the Half Moon to the Celebration.

On January 17, 1908, Jonkheer R. de Marees van Swinderen, ^{Interest of Hol-landers} then Envoy Extraordinary and Minister Plenipotentiary of the Netherlands to the United States, called in his personal capacity at the office of the Secretary of the Commission in order to express the great interest which the people of Holland took in the approaching Commemoration and to inform himself concerning the plans of the Commission before returning to his own country. The Minister was given very full information concerning the Commission's plans and in the informal discussion which ensued and in which, it was inferred, he desired to elicit some suggestion as to an acceptable form of participation, the building of the Half Moon was suggested and met with his favor. A few weeks later, Jonkheer van Swinderen returned to the Netherlands and became Her Majesty's Secretary of State for Foreign Affairs, in which official position, the event showed, he forwarded the plan for building the Half Moon in Holland and presenting it to the Hudson-Fulton Celebration Commission.

Meanwhile, on January 22, 1908, Mr. Tunis G. Bergen, with a view to fostering the feeling of international good will and promoting cooperation, proposed the election of five distinguished Hollanders as Foreign Correspondent Councillors, and on May 27 they were elected. (For their names, see Chapter LXII.) This cooperation was further promoted by Mr. Bergen and Mr. August F. Jaccaci, members of the Commission, by correspondence and personal visits to Holland.

The interest of the Hollanders crystallized into definite form at a meeting of a small number of prominent citizens held in the Hague, April 11, 1908, upon the invitation of Vice Admiral A. G. Ellis, Adjutant Extraordinary of Her Majesty the Queen, Baron Æ. Mackay, Minister of State, and the Hon. J. C. de Marez Oyens, ex-Minister of Water Department, Commerce and Industry. The result of this meeting was the formation of the Netherlands Hudson-Fulton Celebration Commission with His Royal Highness, the Prince of the Nether-

Dutch
Offer
Half
Moon

lands, Duke of Mecklenburg, as Patron, and the decision to build the Half Moon. (The members of this Commission, whose names are given in Chapter LXII following, were elected Honorary Foreign Councillors of the New York State Commission on June 23, 1909.)

The generous purpose of the Netherlands Commission was communicated to the New York Commission in the following letters:

THE HAGUE, *April the 18th, 1908.*

To Mr. EDWARD HAGAMAN HALL, *Assistant Secretary to the Hudson-Fulton Celebration Committee:*

DEAR SIR.—As you may know there is a Committee in formation in Holland, whose object is to make their countrymen participate in the Hudson-Fulton Celebration next year, by presenting a model of the "Halve Maan" (the vessel used by Hudson in 1609) to the American Central Committee. As you may know there is no model of that ship existing and now the Dutch should very much like to have a drawing representing the idea your Committee has formed of what the "Halve Maan" has been and some information thereabout.

We should be very well able to carry out our own idea of the vessel by constructing a ship of 80 tons burden after another model of the period, but we are afraid that in doing so we might disappoint the American people, who, no doubt, have formed an idea of their own as to what the Hudson vessel was like. Therefore we should be very much indebted to you if you would be so kind as to send us the desired information to my address, being as follows:

Jonkheer Roell, Vice Admiral Retired of the Royal Dutch Navy, A. d. C. to Her Majesty the Queen of the Netherlands, 3 Bosch street, The Hague, Holland.

Believe me truly yours,
J. E. ROELL.

THE HAGUE, *April 23, 1908.*

EDWARD HAGAMAN HALL, Esq., *Assistant Secretary of the Hudson-Fulton Celebration Commission, New York City:*

DEAR SIR.—Since my visit at your office in January last, great changes took place with me and instead of returning to Washington as Her Majesty's Minister Plenipotentiary, I stay in my own country as its Minister of Foreign Affairs. In that way I will only be able to show from this side of the water my great

interest in the coming celebration, the preparations of which have been trusted to you. As I told you, I had every reason to believe that a participation in those festivities would meet amongst the Holland people with great enthusiasm, and I now am glad to tell you that a Committee has been formed and that the construction of the Half Moon is intended to be executed on one of our wharves. You will soon get an official notice from that Committee but I thought it better to anticipate on that, in order to prevent that your own Committee may take the building of the old "dreadnought" in hands on the American side.

Believe me, sir, sincerely yours,

R. DE MAREES VAN SWINDEREN.

As stated in Admiral Röell's letter, no contemporaneous ^{Research} picture or model of the Half Moon was known to exist, but ^{Concern-} the researches made in behalf of the New York Commission ^{ing} had prepared it to give a satisfactory reply to the Admiral's ^{Vessel} inquiry. A careful analysis of Juet's Journal of Hudson's voyage supplied sufficient data to determine the Half Moon's mastng, rigging, draft and certain other details, some of which were different from those erroneously given by Murphy in his monograph on "Henry Hudson in Holland" and commonly accepted. Her tonnage was ascertained from the archives of the Amsterdam and Zealand Chambers of the Dutch East India Company; and her type having been determined, vignettes of vessels of the same type on maps of contemporary voyages suggested many exterior details. Capt. John Smith's Sea Grammar suggested some details of the interior. The substance of these researches, having been approved by Naval Constructor William J. Baxter, U. S. N., and by Admiral Coghlan, were communicated by the latter to Admiral Röell under date of May 12, 1908.

Meanwhile the Hollanders had been making independent researches of their own, in the course of which they found the complete plans of the Half Moon's sister ship, the Hope, which was built by the Dutch East India Company, and which was rigged, fitted, inventoried and cost the same as the Half Moon. They also found a unique engraving made by J. San-

redam and published in Amsterdam in 1606 by Willem Jansz' Blaeu, representing the water front of Amsterdam with many ships of different types, including the type of the Half Moon; and they found guidance in Nicholas Witsen's "Present and Past Day Shipbuilding," published in Amsterdam in 1671. From these data, together with some models of old ships found in a private collection in Amsterdam, particulars gained from the East India Company's papers, and doubtless other aids of which we have not been advised, the Hollanders formed their own conception of the Half Moon.

Happily, the results of these two independent investigations agreed, and on June 1, 1908, Admiral Röell wrote to Admiral Coghlan: "I was pleased to see that the information you gave coincides with our own investigations about said vessel. We are now ready to fulfill our plan of constructing a ship entirely similar to the Half Moon."

Building
the Half
Moon

From the data thus gathered, the plans of the Half Moon were prepared by the late Mr. C. L. Loder, Director of Shipbuilding of the Netherlands Navy Department, and from these plans the replica was built at the Royal Ship Yards at Amsterdam, under the general direction of Admiral Röell, Chairman of the Technical Committee for Building the Half Moon, and under the immediate supervision of Assistant Engineer of the Navy E. J. Benthien. For material, the Dutch Government gave the Committee some great balks of oak timber which had lain submerged in water in the wet dock at the Navy Yard for over a hundred years. The dates were stamped on them. These were dried and sawed up to make the timbers. The knees are natural knees. Her planking is about four inches thick on the sides, and she has 36 tons of ballast in her. She cost \$40,000. The keel was laid October 29, 1908, and the ship was launched April 15, 1909. She was taken by water to Rotterdam and there placed on board the Holland-America Line steamship Soestdyk, by which she was brought to New York, arriving July 22, 1909. The Soestdyk proceeded to the

Navy Yard in Brooklyn, where the Half Moon was hoisted from her cradle and was placed in her native element again July 23. As the Half Moon was built of selected oak and was a real vessel in every respect, she could have sailed the seas as well as her prototype, but she was brought over on the deck of a modern steamship as a matter of convenience.

In anticipation of the arrival of the Half Moon, the Hon. A. M. Beauprè, American Ambassador to the Netherlands, wrote to the Secretary of State at Washington, under date of June 2, 1908, communicating the request of Admiral Röell that the Half Moon and her furnishings be exempted from the United States customs duties; and on June 24 the Federal authorities very courteously instructed the Collector of Customs at New York to admit the vessel duty free.

Upon her arrival the Half Moon became the special charge of the Commission's Half Moon Committee, of which Capt. Herbert L. Satterlee, formerly Assistant Secretary of the Navy, is Chairman; and by the courtesy of Rear Admiral (then Captain) J. B. Murdock, U. S. N., Commandant of the Navy Yard, and with the invaluable personal attention of Naval Constructor Baxter, she was cared for at the Navy Yard until put into commission for the celebration. On August 30, Shipwright Benthem arrived, and during the next three weeks supervised the rigging of the vessel and otherwise completing her preparation for the Celebration. A few days before the Celebration opened, the warship Utrecht, of the Royal Netherlands Navy, arrived and supplied the crew for the Half Moon, Lieutenant-Commander W. Lam personifying Henry Hudson, and Lieutenant A. de Bruijne taking the character of Hudson's Mate. The crew of 20 men were dressed in costumes of the period of Hudson's voyage.

We may now describe the Half Moon as she set forth from the Navy Yard on Saturday, September 25, 1909, to take part in the opening ceremonies of the Celebration, reserving to future

chapters an account of the ceremonies attending her formal presentation and subsequent movements.

Description of
Half
Moon

The principal dimensions of the Half Moon are as follows:

	Old Amsterdam measure		Metric measure	English measure	
	<i>Feet</i>	<i>Inches</i>	<i>Meters</i>	<i>Feet</i>	<i>Inches</i>
Length from stem to stern (betwen perpendiculars)	63	0	17.832	58	6
Greatest breadth of beam.....	17	5	4.940	16	2.5
Depth of hold from upper side of clamps to right line of tween-deck.....	6	4	1.801	5	10.9
Draft forward.....	6	2	1.749	5	8.8
Draft aft.....	7	6	2.135	7	0
Displacement* about.....	4,230 cubic ft.		95.9 cu. M.	3,586.8 cu. ft.	

The hull of the new Half Moon is tarred below the water line and has a uniform brownish color above with the exceptions noted hereafter. In general form, the hull has a full round bow and a full broad bottom. From the bow projects an ornamental galleon or beakhead. At the forward extremity of the beakhead is the figure-head — a red lion with golden mane. The bow of the ship is painted green with red and yellow ornaments in the shape of little sailors' heads. Three anchors are hauled up to the channels, two on one side and one on the other. The sides of the ship fall in rapidly above a line about midway between the upper and lower decks, giving her cross-section a pear-shape. The high forecastle at the bow and the high poop aft further add to her quaint appearance. The sides of the poop are painted sky blue with white clouds. The high pear-shaped stern is beautifully carved and decorated. In the uppermost panel of the stern upon a blue background studded with yellow stars, is a yellow crescent moon with the profile of the "Man in the moon" in the concavity of the crescent. In the panel below this, above the windows of the

* The tonnage of the Half Moon was stated in the records of the Amsterdam Chamber of the Dutch East India Company to have been 40 lasts, equal to about 80 tons.

Captain's cabin, are the arms of Amsterdam with its three crosses, the arms of the Seven Provinces (the red lion on a gold background) and the monogram of the Amsterdam Chamber of the Dutch East India Company. The latter consists of the initials "V. O. C.," standing for "Vereenigde Oost-Indische Compagnie" (United East India Company), surmounted by the initial "A" standing for Amsterdam. The five knees supporting the transom are carved to represent human heads and painted yellow. Above the stern is an ornate lantern.

The vessel has a bowsprit bearing a "blinder" or water-sail, ^{Masts,} called in Hudson's Journal a sprit sail — a square sail attached ^{Sails and} to a yard hung under the bowsprit, but no headsails; a fore- ^{Flags} mast bearing a square foresail; a foretopmast bearing a foretopsail; a mainmast bearing a mainsail; a maintopmast carrying a maintopsail; and a mizzen-mast carrying a mizzen-sail. The mizzen-sail, unlike the other sails, is lateen rigged — that is to say, it is a triangular sail attached to a long yard slung diagonally across the mizzen-mast. The latter has no topmast. The foremast rakes forward, while the mainmast rakes backward, the object of this divergence being to give more distance between the topsails and allow more vent for the full sail. She also has a complement of bonnets — additional strips of sail-cloth designed to be attached to the mainsail and foresail to enlarge their area. At the tops of the foremast and the mainmast are crow-nests.

Upon the bowsprit is a staff carrying a jack — a small flag of orange, white and blue, the colors being arranged alternately and radiating from the center. At the foretop is the flag of Amsterdam — a tri-color of red, white and black with the arms of Amsterdam in the white field. At the maintop is the flag of the United Seven Provinces — upon a gold field, a red lion rampant, bearing in one forepaw a sword and in the other seven arrows. The mizzen-mast is surmounted by a small vane. From a staff at the stern floats the flag of the East India

Company. This is the national tri-color of orange, white and light blue (reading downward). In the center of the white stripe is the monogram of the Amsterdam Chamber of the East India Company before described.

Half
Moon's
Decks

The ship has two full decks and a poop-deck. The uppermost of the two full decks is called the upper-deck and beneath it is the "tusschendeck," or 'tween-deck. Below the 'tween-deck is the hold. We will describe the interior beginning at the bottom:

The hold, 5 feet 10.9 inches deep, just allows a man of average height to stand erect on the bottom of the ship without striking his head on the timbers of the deck above. It is open from stern to stern without compartments, and, being mostly below the water line, has no ports, the only access and ventilation being through the fore and main hatches.

The 'tween-deck space is very cramped, as there is scarcely four feet space between the deck and the planking of the upper deck. At the forward end are the hawse-holes for the anchors. Upon this deck are the two "heavy guns" of the little craft projecting from portholes on either side of the ship, about midway between the foremast and mainmast. These pieces are of 800 pounds each and about 8 centimeters calibre. On the walls are rammers, sponges, gunners' ladles, match-tricks, ball extractor, lanterns and pikes. Nearly opposite the mainmast on either side is another porthole. Against the mast is stowed one of the water casks. Just abaft the mainmast on the starboard side is a little pantry, the berth of the steward and a closet. In the corresponding position on the port side is a kitchen or galley. This latter contains a tiled fireplace with brass-topped andirons, a pair of iron tongs and a poker. A brass fire-chain suspended from the top of the fireplace holds the pots and kettles over the fire. Outside the fireplace on a shelf, are a brass skimmer, a brass snuffer, and various kitchen utensils. Under the shelf are peat and wood for fuel. On the wall is a sulphur-stick box. Back of the galley is the

berth of the cook and another closet. Aft of the latter is a ^{Half} sailroom. Between the mainmast and mizzen-mast is the spindle of the windlass which comes down through the upper deck. Just abaft the mizzen-mast the after part of the ship is divided off by a bulkhead. On the starboard side within this compartment is the powder magazine containing the gunner's necessities; and opposite to it on the portside is the iron-plated breadroom for foodstuffs. In the space between the magazine and breadroom plays the tiller of the rudder. At the forward end of the tiller is fastened a whipstaff or jack-tiller, a sort of wooden handle or lever which goes up vertically through the upper deck just abaft the mizzen-mast and by which the ship is steered from the upper deck. In the stern, on either side of the sternpost, is a porthole.

At the forward end of the upper deck is the forecabin, the sleeping-place of the crew, containing five berths. Each berth can hold two men if necessary. In the forecabin, after the manner of the ancient time, there are three brass tablets bearing inscriptions, which, translated, read as follows: "Honor thy father and thy mother," "Do not fight without cause," and "Good advice makes the wheels run smoothly." Between the forecabin and the mainmast is stowed the ship's boat—a chunky little rowboat with half round ends, about 12 feet long and 5 feet wide. Near the rail are two swivel-guns, pieces of 100 pounds each with a calibre of 3.2 millimeters. Just back of the mainmast is a great wooden post or bitt, carved in the shape of the head and bust of a man and fitted with a block or pulley through which pass some of the halyards used to hoist the yards. This block was variously called the "big man-servant," the "silent servant," and the "knight"—"fright-head" in English. Through the deck on the port side over the galley on the deck below issues the smokestack of the fireplace, which can be unshipped at will. About midway between the mainmast and mizzen-mast is the windlass.

Captain's
Cabin

Just back of the latter is the ship's pump. Directly abaft the mizzen-mast, where the whipstaff connecting with the tiller comes up through the deck, and, protected by a little roof or hood, is the standing-place of the steersman. Before him is the binnacle, containing the compass; and above him, within his reach, is the ship's bell. Immediately behind the steersman's platform is the Captain's cabin -- an apartment about 5 feet 3 inches high, lighted by four windows, two in the stern and one on each side. This compartment is provided with a berth, two or three closets, a table with a movable top, and a bench divided by four little partitions into four seats. In the overhang of the stern is a conveniency. In that cabin are the following articles:*

One antique iron-bound treasure chest, with key; 1 antique medicine chest; 2 large pewter tankards; 2 large pewter plates; 5 small pewter plates; 3 large pewter mugs; 5 small dram cups (pewter); 1 pewter inkwell and sandbox, oak stand; 2 goose-quill pens; 11 pewter spoons; 1 brass astrolabe; 1 brass sundial; 1 hour glass in wooden frame; 2 single candlesticks; 2 brass candle snuffers; 1 brass hanging lamp and bracket; 1 brass firebox, with flint, steel and tinder; 2 ball padlocks; 1 pair steel dividers; 1 leather case, containing five navigating implements; 1 cross-staff; 1 mortar and pestle; 1 small earthenware jug; 1 globe; 1 leather case containing silver combination compass and sun-dial; 1 chart of the world, 1584; 1 facsimile copy on vellum of contract between Henry Hudson and East India Company; 1 volume bound in vellum, psalms and catechism, dated 1571; 1 Bible bound in vellum, dated 1563; 1 volume itinerary of Jan Van Linschoten, dated 1596; 1 vellum-bound volume, "H. Bullinger, Huysboec," dated 1563; 1 volume Asher's "Henry Hudson the Navigator," published by the Hakluyt Society; and 1 small sand-glass in wooden frame.

* Subsequently deposited with the New York Historical Society.

Above the Captain's cabin is the poopdeck, the after portion of which is occupied by the cabin of the Mate — a smaller and simpler apartment than the Captain's cabin. It is lighted by a small window on either side and contains a berth and cupboard. This cabin is painted green.

Such was the appearance of the strange little craft, as, with billowing sails and fluttering colors, she sailed from the Navy Yard on Saturday, September 25, past the masterpieces of modern naval architecture, to take her place in the triumphal procession which was to celebrate the famous voyage of her prototype — a gracious testimonial of the affection of the Dutch motherland for the great State which has grown from her infant colony, and a powerful object lesson of the hardihood of the navigators and pioneers who broke the wilderness 300 years ago.

The Half Moon returned from her voyage up the river and anchored at the Water Gate off 110th street, New York City, on Monday, October 11. On the same day the Dutch crew were relieved from duty and returned to the Utrecht, which sailed immediately for the West Indies. In the afternoon Capt. Satterlee obtained a tug from the Navy Yard and towed the Half Moon down to the Harbor, where she was tried under sail in a puffy southerly breeze, to test her on all points. It was found that she would sail to within about ten points of the wind. As the helm has only four points play to starboard or port, it was impossible to put her about with the helm, and she was put about in the manner in which ships of her period were handled; that is, the braces were slacked away and the lateen sail set and her stern swung off so that her head came around, when the lateen sail was hiked up and the braces tightened. As she has very little keel and no center-board, she makes a great deal of leeway, and her best point of sailing is down the wind, where she can make about seven knots. Capt. Satterlee is of the opinion that she cannot make over

Half
Moon's
Sailing
Qualities

four knots on the wind, and she probably sails just as well as the original did.

After the foregoing experiment, the Half Moon was placed in temporary winter quarters in the New York Navy Yard, the canvas and bunting being stowed in the hold, the archaeological objects being placed in the New York Historical Society, and other loose articles being stored in a fireproof warehouse. At the present writing (May, 1910) the vessel is carefully protected at the Navy Yard, her final disposition not having yet been determined.* (For an account of the formal presentation of the Half Moon to the Commission and the naming of the donors, see the chapter on the Inaugural Naval Parade.)

Final
Disposi-
tion of
Half
Moon.

* At a meeting of the Executive Committee of the Commission held June 10, 1910, the following resolution and resolutions were adopted:

WHEREAS, it is the desire of the Hudson-Fulton Celebration Commission to insure the end permanent provision for the preservation and care of the replica of the Half Moon, not only as a highly prized testimonial of the skill and generosity of the people of the Netherlands for the people of the State of New York, but also as an object lesson in the history of the State and the science of navigation;

WHEREAS, the corporate body of the Hudson-Fulton Celebration Commission is limited by its charter to a period of ten years for the state of its incorporation and

WHEREAS, the Commissioners of the Palisades Interstate Park, New York Commission, in a perpetual corporation created by the State of New York, having by law jurisdiction over the lands at Fort Mifflin and the river occupied by Henry Hudson in the original Half Moon and possessing ample financial resources, has fervently requested the honor of acting as the permanent official custodian of the Half Moon, therefore be it

Resolved, that the Chairman of the Half Moon Committee do and he hereby doth, defend and directed, on the passage of a Concurrent Resolution by the Commission of the Palisades Interstate Park, New York Commission, accepting the terms of the resolution to deliver the Half Moon to said Commission of the Palisades Interstate Park, New York Commission, as perpetual trust for the people of the State of New York, up in the following resolution:

1st, That the Half Moon shall ordinarily be kept floating upon the Hudson River in the State of New York;

2d, That the Curator General of the Palisades Interstate Park, New York Commission, shall keep in repair, protect and preserve the vessel with the utmost possible care;

3d, That the public shall be permitted to visit and inspect the vessel under suitable regulations, and

4th, That with the approval of the Governor of the State of New York the vessel be permitted to take part in public ceremonies relating to the science of navigation or to the Hudson River in the State of New York.

The conditions of the foregoing resolution having been formally accepted by the Palisades Interstate Park Commission, the Half Moon was delivered to that Commission on Friday, July 15, 1910, and was anchored in the Hudson River.

CHAPTER VIII

THE BUILDING OF THE CLERMONT

IMMEDIATELY upon the merging of the Hudson ter-centenary and the Fulton centenary movements, as recorded in Chapter I, the building of a facsimile of Fulton's pioneer steamboat, the *Clermont*, became a part of the Commission's plans as naturally as had that of the *Half Moon*. This task fell to the Naval Parade Committee, of which Rear Admiral Joseph B. Coghlan, U. S. N., was Chairman until his death, December 5, 1908, and of which Capt. Jacob W. Miller has been Chairman since. After her construction, the new *Clermont* became the charge of the *Clermont* Committee, of which Mr. Eben E. Olcott is Chairman. The researches in regard to the *Clermont* were conducted chiefly by Admiral Coghlan, Naval Constructor Wm. J. Baxter, U. S. N., Capt. Miller, Mr. Olcott, Mr. Frank E. Kirby and Mr. J. W. Millard. Messrs. Kirby and Millard, naval architects and engineers, drew the working plans, and Mr. Millard was the Commission's Inspector of Construction. The vessel was built at Mariners Harbor, Staten Island, by the Staten Island Shipbuilding Company.

It is a curious fact that the Naval Parade Committee had greater difficulty in determining the appearance of the *Clermont*, which was built in 1807, than in determining the appearance of Henry Hudson's *Half Moon*, which entered the river in 1609. There is no contemporary picture or drawing to be found in Europe or America of either the *Half Moon* or the *Clermont*, but, as intimated in the preceding chapter, there are so many references to the masting, rigging and draught of the *Half Moon* in Juet's Journal of Hudson's voyage, that with the aid of contemporary pictures of the harbor of Amsterdam and its shipping, the *Half Moon* could be accurately

Research Concerning the Clermont reconstructed. But in making the facsimile of the Clermont not only did the Committee lack contemporaneous pictures of the vessel, but authentic descriptions of its details were also almost entirely lacking; and still further, the Clermont being a pioneer vessel, it was not one of a type and no aid could be drawn from the appearance of other vessels of that period. The anomaly was thus presented of a greater difficulty in reconstructing a vessel 100 years old than in reconstructing a vessel 300 years old. The plan adopted by the Commission, being the product of the most critical and painstaking technical and historical research, is, therefore, of great interest not only to persons interested in marine matters but also to historians and the public generally.

In pursuing their researches, the Committee found a great many persons who offered information about what they believed to have been the original Clermont, but this information was generally found to apply to the boat after she was remodeled, and as the Celebration was designed to commemorate the beginning of steam navigation, the Committee determined to arrive as nearly as possible at the appearance of the pioneer vessel.

A document bearing on the original size of the Clermont was a letter written by Fulton three months after her first trip, in which letter he suggested how she should be altered. This highly interesting document reads as follows:

WASHINGTON November the 22th 1807

Dear Sir:

I have received your letter of the 12th inst. after all accidents and delays our boat has cleared 5 per cent on the capital expended and as the people are not discouraged but continue to go in her at all times, and even increase in numbers I think with you that one which should be complete would produce us from 8 to 10,000 dollars a year or perhaps more and that another boat which will cost 15,000 dollars will also produce us 10,000 dollars a year therefore as this is the only method which I know of gaining 50 or 75 per cent I am on my part determined not to dispose of any portion of my Interest on the North river but I will sell so much of my funds as will pay my part of rendering this boat

complete and for establishing another so that one will depart from Albany Research and one from New York every other day and carry all the passengers. It is now necessary to consider how to put our first boat in a complete state for 8 or 10 years — and when I reflect that the present one is so weak that she must have additional knees and timbers, new side timbers deck beams and deck, new windows and cabins altered, that she perhaps must be sheathed, her boiler taken out and a new one put in her axels forged and Iron work strengthened with all this work the saving of the present hull is of little consequence particularly as many of her Knees Bolts timbers and planks could enter into the construction of a new boat, my present opinion therefore is that we should build a new hull her knees and floor timbers to be of oak her bottom planks of 2 Inch oak her side plank two Inch oak for 3 feet high She to be 16 feet wide 150 feet long this will make her near twice as stiff as at present and enable us to carry a much greater quantity of sail, the 4 feet additional width will require 1146 lbs additional purchase at the engine moving 2 feet a second or 15 double strokes a minute this will be gained by raising the steam 5 lb to the inch as 24 Inches the diameter of the cylinder gives 570 total Inches at 3 lb to the inch = 1710 lb purchase gained to accomplish this with a good boiler and a commodious boat running our present speed, of a voyage in 30 hours I think better and more productive to us than to gain one mile on the present boat.

The new boat Cabins and all complete including our materials will cost perhaps.....	2000\$
Boiler.....	800
Iron work in the best manner and mens wages during the winter...	1200
	<hr/>
	4, 000
To meet this I find that our copper boiler weighs 3230 lb which at 40 cents all the price paid by government will produce.....	1570\$
Profits of this year.....	1000
	<hr/>
	2570

So that we shall have to provide about 1,500\$ added to 3,000 Bills against us in the Bank with this arrangement we shall have one Boat in complete play producing about 10,000 dollars a year to enable us to proceed with the second to come out in the spring of 1800, and then our receipts will be about 20,000 dollars a year.

Please to think of this and if you like it to try to contract with the carpenter at Hudson for the hull and let him immediately prepare his timbers, knees and planks —

She should be almost wall sided if 16 feet at bottom she need not be more than 18 on deck Straight Sides will be strong it fits the mill work and prevents motion in the waves — thus

It is now time to lay her up for the winter nothing should be risked from bad weather — the gain will be trifling the risque great.

I cannot be with you before the first week of January

Compliments to all friends write me again

Yours truly

Do not risque the engine in the winds and Waves of this Season.

Dimen-
sions of
Original
Clermont

From the foregoing, it would appear that the original Clermont was 150 feet long and 12 feet wide, as with 16 feet beam she had "4 feet additional width;" but from Fulton's statement concerning his first boat in the specifications upon which he obtained his second patent October 2, 1810, which may be found in "A Sketch of the Origin and Progress of Steam Navigation" by Prof. Benner Woodcroft, a distinguished authority on patents, printed in London in 1848, Fulton says that his first boat was 13 feet wide. His statement is as follows:

"My first steamboat on the Hudson's River was 150 ft. long, 13 ft. wide, drawing 2 ft. of water, bow and stern 60 degrees; she displaced 36.40 cubic ft., equal 100 tons of water; her bow presented 26 ft. to the water, plus and minus resistance of 1 ft.; running 4 miles an hour.

12.57 lbs. multiplied by 26, the bow of the boat	321 lbs.
Friction on 2,380 superficial ft. of bottom and sides, at 7.50 lbs. for 50 superficial ft.	352
<hr/>	
Total resistance of the boat, running 4 miles an hour	673
A like power for the propellers.	673
<hr/>	
Total power felt at the propellers.	1346
The boat running 4 miles an hour is 6 ft. a second; this is three times faster than the piston, hence multiplied by	3
<hr/>	
Necessary power of the engine, the piston running 2 ft. a second ..	4,038 lbs."

In the foregoing, Fulton says that his first boat was 150 feet long and 13 feet wide, drawing two feet of water, and all his calculations of displacement, immersed surface and resistance correspond with a boat of those dimensions. The Committee felt further assured that the calculation referred to the first boat because from it Fulton determined the size of his engine, and there was no doubt whatever about the engine. They also knew that the statement could not refer to the boat after she was enlarged because the official papers of her registry after her alteration showed that she was then 18 feet wide.

The facts concerning the registry of the original Clermont are briefly these: The Clermont was not enrolled at the time, of her initial trip on August 17, 1807, but on August 29, 1807, Fulton wrote to Chancellor Livingston a letter in which he said among other things, "I will have her registered and everything done which I can recollect." Five days later, that is, on September 3, 1807, he had her registered. This original enrollment cannot be found, but on May 14, 1808, Fulton enrolled the enlarged boat, and in that enrollment reference is made to that of September 3, 1807. The enrollment of May 14, 1808, in the New York Custom House, reads as follows:

"No. 108. Enrollment in conformity to an Act of Congress of the United States of America entitled 'An act for enrolling and licensing ships or vessels to be employed in the coasting trade and fisheries, and for regulating the same,

Registry
of First
Clermont

"Robert R. Livingston, of Clermont,

"Columbia County, State of New York.

"having taken and subscribed to the oath required by the said Act and having sworn that he, together with Robert Fulton of the City of New York, are citizens of the United States, and sole owners of the ship or vessel called the North River Steamboat of Clermont, whereof Samuel Wiswall is at present master, and as he hath sworn he is a citizen of the United States, and that the said ship or vessel was built in the City of New York, in the year 1807, as per enrollment 173 issued at this port on the 3rd day of September 1807, now given up. And Peter A. Schenck, Surveyor of the Port, having certified that the vessel being enlarged, the said ship or vessel has one deck, and two masts, and that her length is 149 feet; breadth 17 ft. 11 in. depth 7 ft. and that she measures 182 48-65 tons. That she is a square-sterned boat, has square ruck; no quarter galleries and no figurehead. Hands and Seals May 14, 1828."

The importance of the foregoing is that it shows that the boat was 149 feet long and 17 feet 11 inches wide after she was enlarged. Nothing is said about lengthening, but she was "enlarged," from which statement and from previous evidence, of her length it was concluded that she was widened and had a poopdeck and other work added. The widening, as intimated in Fulton's letter of Nov. 20, 1807, was necessary to give her greater stiffness, her original beam of 12 or 13 feet being too narrow for stability. As to the differences between 12 and 13 feet beam and 149 and 150 feet length in the statements concerning the original boat, they are accounted for by the fact that the measurements probably referred to different points on the hull. For instance, the Custom House measurement in those days was from the fore side of the stem to the afterside of the stern post at the upper deck; and as all of Fulton's boats appear to have had a raking bow and stern, the lines of rake carried up to the rail would make the Clermont 150 feet long.

Building
the New
Clermont

The Committee at length arrived at the conclusion that the original Clermont was 150 feet long and 13 feet wide, with 7 feet depth of hold; but owing to the dangers attending a boat of such narrow beam, it was determined to build the replica

16 feet wide on the bottom and about 18 feet wide at the deck. With that exception, the final plans were drawn exactly as the Clermont was ascertained to have appeared on her first trip. The actual dimensions of the replica, therefore, were as follows:

	Feet	Inches
Length over all.....	150	0
Length from fore-side of stem to after-side of stem post at upper deck.....	149	0
Breadth over wales at upper deck.....	17	11
Breadth over plank at bottom.....	16	0
Depth from top of beam to top of ceiling to hold.....	7	0
Crown of deck beam.....	...	3

The keel of the Clermont was laid May 14 and she was launched on Saturday, July 10, 1909, the officers of the Commission, its guests, and the launching party embarking at Pier A, Manhattan, for the scene of the ceremony at Mariners Harbor, Staten Island. The U. S. S. Wasp officered and manned by the Naval Militia of New York preceded the flotilla and anchored in the Kill von Kull near the shipyard, while the gunboat Aileen followed with the officers of the Commission, the launching party and a detachment of the Naval Militia from the Second Battalion of Brooklyn. The latter, upon landing, acted as a guard of honor and patrolled the grounds around the ways. The navy tug Powhatan, the Supervisor of the Port's tug Cerberus, the Dock Department tug Manhattan, the United States Revenue tender Guide, and Launch A of the Department of Docks and Ferries carried guests. Many private yachts and launchers, all as gay with colors as the official boats, either accompanied the latter or assembled in the waters near the shipyard. Mr. W. J. Davidson, President of the Staten Island Shipbuilding Company, received the official party at the landing and escorted them to the small launching platform erected at the bow of the Clermont. The party upon the platform included several descendants of Robert Fulton and Chancellor Livingston. The sponsor for the new Clermont was Mrs. Arthur Taylor Sutcliffe (born Alice Cray), a great-granddaughter of the inventor of the first Clermont; and her

Launching
the
Clermont

maids of honor were Miss Dorothy Camp, Miss Evelyn Knox, and Miss Katherine L. Olcott. They carried mountain laurel brought from the Catskill Mountains. A conspicuous object of historic interest upon the rail of the platform was the bell of the original Clermont.

The ceremonies attending the launching were very brief. Capt. Jacob W. Miller, Chairman of the Naval Parade Committee, presided, and spoke upon the subject "Time and Tide, Wind and Wave;" the Rev. Charles A. Cassidy offered prayer; and Mr. Davidson of the shipbuilding company, and Gen. Stewart L. Woodford, President of the Commission, made brief remarks. The following original ode was then read by Mr. Robert Underwood Johnson, editor of the Century Magazine:

THE ODE OF EDITION

Rise of the Day and the Peace of God —
Of all the streams, the clearest, use the fact —
By the rule of life, our newsworthy duty tread —
(Effect of all our will the fact to press)
Rejoice, O Power of the Heart,
To be in human glory, such a part!

From out the heights of the Winter air
Unto the land the new year will call;
Labor is Happiness and Health and Power;
Tread the no-fringe path that leads to glory;
Of Power, how fast I wish the wheels to
Roll on with him, God's Plenty and His Peace.

Mr. Eben E. Olcott, Chairman of the Clermont Committee, then said:

"GEN. WOODFORD, JAMES AND GEN. TRUMAN.—It is interesting that, on this auspicious day, we have as a part of the old original Clermont, the bell, which was used before the rings of the steam whistle to call tardy passengers to the landings. It is my great pleasure to present this bell for the occasion. May it ring out a message as clear and true, both for this and future generations, as the inventor's own words, when, in speaking of the Mississippi and the great North West, he said, 'Although the prospect of personal enrichment has been some inducement to me, Yet I feel infinitely more pleasure in reflecting on the numerous advantages that my country will derive from this invention.'"

While Capt. Miller's daughter, Mrs. R. B. Bowler, rang the old bell, the final strokes of the operation of "sawing-off" the king-planks of the cradle were executed and the Clermont began to slide down the ways into the water amid strains of music by the band, the blowing of steam whistles, the firing of salutes from the gunboats, and the cheers of the multitude. At the first movement of the vessel, Mrs. Sutcliffe broke upon the bow a bottle beautifully ornamented with silver filagree work and filled with water * from the old Livingston well at Clermont-on-the-Hudson, at the same time naming the vessel in these words:

"I name thee Clermont, and again auspiciously proclaim to the American people the sentiments of Robert Fulton as expressed in an essay to the Friends of Mankind, 'Industry will give abundance to a virtuous world and call mankind to unbounded fears of harmony and friendship. The liberty of the seas will be the happiness of the earth.'"

A picturesque incident of the launching, after a Japanese custom, was the release of a dozen carrier pigeons from a basket on the bow of the boat as she glided down the ways. Each of these aerial messengers bore a ribbon upon which were printed the dedicatory words of Mrs. Sutcliffe. One of the pigeons, released at 2.35 p. m., reached No. 342 West Eleventh street, New York, in fifteen minutes, having traversed a distance of ten miles at the rate of a mile in 90 seconds.

The new Clermont, as she took her place in the great naval ^{Appearance of the Clermont} parade of September 25, to begin her voyage over the route first traversed by steam by her namesake 102 years before, was a quaint looking craft in the midst of a fleet of gigantic

* The use of water instead of champagne in naming the Clermont was a delicate tribute to Fulton's well-known temperance principles as expressed in a letter which he wrote from London, October 20, 1805, and in which he said: "If there is intemperance in any one — I cannot be that person's friend, for I feel a kind of contempt for the being who is so imprudent as to extinguish the little sense which falls to the lot of man, in the poisonous fumes of ardent liquors: such a person has not sense to be his own friend and does not merit the friendship of others."

Appearance of the Clermont modern steamships. She was an almost wall-sided craft with parallel sides, and painted a quaker drab color. Her bow and the under body of her transom stern were wedge-shaped. Her bottom was flat. She had two masts, the foremast carrying a square sail and the aftermast a fore-and-aft sail. She had no bowsprit or figurehead. There were two cabins, one forward and one aft. A plain open railing surrounded the deck. Inboard over the stern projected the rillet of the big rudder. The boiler, smokestack and the green-colored upper works of her single-cylinder engine, the latter an exact facsimile of the original engine made by Bolton and Watts, were in plain view amidships, while the fly-wheels were outside of the hull and in front of the uncovered bright vermilion paddle-wheels. Upon her stern were painted the words "Clermont, New York."

Passenger of the Clermont To add to the picturesqueness of her appearance, she carried as passengers several descendants of Robert Fulton and Chancellor Livingston, and many of these were dressed in the quaint and variegated costumes of a century ago. Upon the day when she entered Newburgh Bay there were on board all the then living grandchildren of the Inventor, the Rev. Robert Fulton Crary, D.D. (?), Mr. C. Franklin Crary (?), Mrs. Hermann H. Cammann, nee Ella C. Crary (?); and Mr. Robert Fulton Ludlow (?); also the great-grandson of Chancellor Livingston Mr. John Henry Livingston (?), the owner by inheritance of the Chancellor's famous country seat, "Clermont." Robert Fulton was impersonated by the Rev. C. Seymour Bullock; and Fulton's fiancée at the time of the trip of the original Clermont, Miss Harriet Livingston, was impersonated by Mr. Bullock's daughter, Miss Evelyn Livingston Bullock. The character of Chancellor Livingston was taken by Mr. Robert Reginald Livingston (?). Others in the party either throughout the whole trip of the Clermont or for a part of the time were: Governor Charles E. Hughes and staff; General Stewart L. Woodford, President of the Commission; Mr. Eben E. Olcott, Chairman of the Clermont Committee; Prof. Granville Barnum,

Capt. A. Bedell Benjamin, Rev. and Mrs. Chas. E. Berg, Capt. John Birmingham, Dr. J. N. Bishop, Mrs. Robert Fulton Blight (1), Miss Florence Brownne (1), Miss Bull, Mrs. C. Seymour Bullock, Mrs. Edward L. Bullock and children, Mr. (1) and Mrs. (1) Edward Crary Cammann, Mr. and Mrs. (1) Hermann H. Cammann, Mr. H. Schuyler Cammann (1), Miss Dorothy H. Camp, Mr. Robert S. Clarkson (2), Mr. Charles Franklin Crary (1), Miss Amy Crary (1), Miss Cornelia Fulton Crary (1), Rev. (1) and Mrs. Robert Fulton Crary, Mr. Robert Fulton Crary, Jr. (1), Miss Mary Livingston Delafield (2), Mr. Joseph Devlin (1), Mr. Francis Lewis Gould, Capt. Ira Harris, Rev. Sanford Culver Hearn, Mrs. Charles E. Hughes and party, Mr. Richard Hunt (2), Mr. Frank E. Kirby, Mr. Russell Kirby, Mr. (2) and Mrs. John Henry Livingston, Mr. and Mrs. (2) Frederick W. Longfellow, Mr. and Mrs. James B. Ludlow, Master Richard Morris Ludlow, Mr. (1) and Mrs. Robert Fulton Ludlow, Mr. Alfred R. Mandeville (1), Mr. Harry Marvel, Miss Merritt, Mr. J. W. Millard, Prof. Otis Montrose, Miss Katherine L. Olcott, Rev. Angelo Osterander, Mrs. Henry Parish (1), Mr. Henry G. Pickering, Mrs. Herbert Pinkham and daughter, Rev. George Ramsay, Mr. and Mrs. (2) Charles Mandeville Reynolds, Miss Katherine North Sague, Miss Georgiana Schuyler, Miss Louisa Lee Schuyler, Miss Ania Merle Smith, Hon. William Smith, Rev. Wilton Merle Smith, Mr. and Mrs. (1) Arthur Taylor Sudcliffe, Miss Almira Livingston Troy, Miss Name Troy, Miss Anna T. Van Santvoord, Supervising Inspector General George H. Uhler, Mrs. Weaver, Miss Beatrice Weaver, Mr. Joseph F. Webber, Mr. James F. Winans (1), Mrs. Joseph E. Winters, Miss Mary Ray Winters.

(1) Descendants of Robert Fulton.

(2) Descendants of Christopher Livingston.

(3) Widow of a grandson of Robert Fulton.

(4) Descendants of Charles Brownne, who built the original Clermont.

(5) Descendant of pilots of the original Clermont.

CHAPTER IX

REVIEWING STANDS AND DECORATIONS

A few weeks before the Celebration opened, physical preparations were made on an elaborate scale for the erection of official reviewing stands, the public decorations, and the illuminations. These preparations within the limits of New York City were made under the direction of the Committee on Reviewing Stands and Decorations of which Mr. Charles R. Lamb is Chairman, the Naval Parade Committee of which Capt. Jacob W. Miller is Chairman, and the Committee on Illuminations of which Hon. William Berri is Chairman.

Official
Review-
ing
Stands

The line of march for the three great land parades in Manhattan Borough — the Historical Parade on Tuesday, September 28, the Military Parade on Thursday, September 30, and the Carnival Parade on the night of Saturday, October 2 — was from Central Park West and 110th street, down Central Park West to Central Park South (or 59th street), thence to Fifth avenue, and thence down Fifth avenue to Washington Square; and the Official Reviewing Stands for these parades were erected on this route at the following points: The Court of Honor was located on Fifth avenue between 40th and 42d streets, with seats and boxes for 6,600 persons on the west side of the avenue in front of the New York Public Library and boxes for 300 persons on the east side of the avenue on the sidewalk between the columns of the Colonnade. Stands for contributors to the Subscription Fund of the Commission were located on the east side of Central Park West between 60th and 63d streets, accommodating 6,000 persons, and on the west side between 60th and 61st streets accommodating 2,000 persons. An overflow stand for the Commission, seating 2,000 persons, was located on Central Park South immediately west

of Fifth avenue. The stand for the Members of the Legislature was on Central Park South between Seventh and Eighth avenues; and stands for the Board of Aldermen were located at Madison Square, and on Central Park West between 63d and 66th streets. The tickets to the seats at the Court of Honor, the Contributors' stands on Central Park West, and the overflow stand on Central Park South were distributed directly by the Presiding Vice-President of the Commission to the Members of the Commission, the Contributors and those who helped the Commission in other ways, and to the representatives of the press; and through the Chairman of the Reception Committee to the Official Guests. Tickets to the Legislative stand were distributed by the Legislative Committee and those to the Aldermanic stands by the Aldermanic Committee. These tickets were all issued gratuitously, the Commission erecting no stands to which an admission fee was charged.

The Court of Honor at which the officers of the Commission and the Official Guests reviewed the pageants, consisted first of 36 detached columns arranged in a double colonnade, 18 on each side of Fifth avenue, along the curb lines from 40th street to 42d street. The white columns were in the modified Roman style, to harmonize with the columns of the New York Public Library, and each was surmounted by a gilded sphere, making the total height of each column about 60 feet. From capital to capital — along the curb lines, across the avenue, and diagonally — were festoons of laurel and smilax, intermingled with electric lights. At the curb line, in front of the seats on each side, was a border screen of California privet, interspersed with flowering plants. This screen was not only intended for ornamentation, but was purposely used instead of a substantial fence or railing in order that it might easily be broken through in case of a panic — an event which happily did not occur. Above the rising tiers of seats on the west side of the avenue, supported by standards surmounted by the

Court of
Honor

official flags of the Commission, wide breadths of awning stained with the official colors of the Celebration—orange, white and blue—were hung after the manner of the royal canopies at the Roman games and triumphs. In the midst of the seats on the west side rose a tower containing a set of tubular chimes upon which were played the airs of all nations. At the top of the rear tier of seats was another border of California privet, which was bespangled at night with electric lights. The whole effect was very dignified, impressive and beautiful.

Scheme
of Dec-
orations

The plan of the other stands was very simple and effective. In front of the lowest and foremost tier of seats was a railing three feet high, divided by equidistant posts into squares, and each square was crossed by two diagonal bars, a vertical bar and a horizontal bar, intersecting and producing a conventional classical design. At intervals of about 20 feet along the railing were flagpoles, displaying the official Hudson-Fulton Celebration flags. Each pole was surmounted by a silver half moon, and upon each pole, just below the flag, was firmly fastened a shield bearing, upon alternate poles, a representation of the Half Moon ship and a representation of the Clermont steamboat, executed in orange, white and blue. Where draperies were possible the official colors were also used.

The public authorities, in granting permits to private parties to erect reviewing stands required them, at the request of the Commission, to conform to the foregoing design, and plans were furnished gratuitously by the Commission to contractors for private stands in order that there might be harmony of design.

The Court of Honor and the general plan above described were designed by Mr. Charles R. Lamb.

Reviewing stands were also erected at convenient places in the other Boroughs under the auspices of the Borough Committees for reviewing the local parades.

In addition to the official stands, every available space on the line of march in Manhattan was occupied by the stands of

societies or private parties, so that the avenues through which the parades passed were gay with decorations and animated by the presence of hundreds of thousands of spectators.

For the reviewing of the naval parades of Saturday, September 25, the official reception of the Half Moon and Clermont, and the landing of the officers from the fleet during the Celebration, an official stand in the nature of a Water Gate was erected on the river front in Riverside Park, opposite 110th street, under the direction of the Naval Parade Committee. This Water Gate, designed by Mr. Henry F. Hornbostel and Mr. J. Otis Post, was approached from the landward side by a footbridge of 60-feet span crossing over the tracks of the New York Central and Hudson River Railroad and leading from the elevated ground of Riverside Park to the head of the broad staircase leading down to the platform near the water level. The staircase was flanked by two pylons, 90 feet high, consisting of clustered columns of the Doric order, each pylon being surmounted by a globe. Upon the platform, which was 200 by 70 feet in area, were arranged about 500 seats for the officials and the official guests of the Commission. At each end of the platform, a breakwater extended out into the river 150 feet, enclosing a harbor about 180 feet wide. Within the harbor were three landing floats connected by movable bridges with the official platform. Under the main staircase were toilet rooms, and a telegraph and telephone booth. Festoons of electric lights and bunting adorned the pylons and platform, the latter also being embellished with flagpoles bearing flags and escutcheons. At the outer end of each breakwater was a flagpole for signalling purposes. The color scheme was orange, white and blue — the platform and bridge being painted orange, the plaster work of the pylons white, and the draperies blue. The Water Gate was not only artistic in itself but it was also admirably adapted to the purpose for which it was built, and its use effectively demonstrated the desirability of a permanent ceremonial portal at the water side of this maritime metropolis.

CHAPTER X

ILLUMINATIONS AND PYROTECHNICS

THE combined official and unofficial electric illuminations in New York City during the Celebration were on a scale never before paralleled and were generally conceded to have marked an era in spectacular lighting. Those under the direction of the Committee on Illuminations of the Commission of which Hon. William Berri is Chairman, were executed under a joint contract by the New York Edison Company, the United Electric Light and Power Company, the Edison Electric Illuminating Company of Brooklyn, the New York and Queens Electric Light and Power Company and the Richmond Light and Railroad Company, the equipment in all the boroughs being erected by the Tucker Electric Construction Company.

The general plan of the Committee was to illuminate the City Hall in Manhattan and the Borough Halls in Brooklyn, Queens, the Bronx and Richmond as civic centers, with additional embellishments upon the five principal bridges and some of the principal public monuments. The apportionment of lights was about as follows:

<i>Manhattan Borough.</i>		<i>Lights.</i>
City Hall.....		3,500
Line of March on Central Park West, from 146th Street to Central Park South, thence to Fifth Avenue and thence to Washington Square.....		25,500
Statue of Liberty.....	Searchlights	
Grant's Tomb.....	Searchlights	
Soldiers and Sailors' Monument.....		1,500
Washington Arch.....		1,500
Riverside Drive Viaduct.....		5,000
<i>East River Bridges.</i>		
Brooklyn Bridge.....		13,000
Manhattan Bridge.....		11,000
Williamsburgh Bridge.....		11,000
Queensborough Bridge.....		14,000

Brooklyn Borough.

Borough Hall.....	3,600
Soldiers and Sailors' Monument.....	1,500
Brooklyn Institute of Arts and Sciences.....	7,200
Water Tower, Prospect Park.....	650

Queens Borough.

Borough Hall.....	1,200
Jamaica Town Hall.....	900
Flushing Town Hall.....	900

Bronx Borough.

Borough Hall.....	2,500
-------------------	-------

Richmond Borough.

Borough Hall.....	2,640
	<hr/>
	157,152
	<hr/>

In addition to the official illuminations above named, there were, of course, the usual brilliant illuminations of the city, and elaborate private illuminations by the owners of large office buildings, stores and dwelling houses — all combining to convert the city into a veritable City of Light.

In working out the plans for the official illuminations, photographs of all the buildings, monuments and bridges which it was proposed to decorate by illumination were first secured and upon these photographs were painted the outlines of the electric lights. These photographs, after approval by the Illuminations Committee, were submitted to the Chairman of the Committee on Decorations as to form and then to the Department of Water, Gas and Electricity for the approval of Chief Engineer Chas. F. La Combe in charge to secure necessary permits from the city. When possible, the designs were also submitted to the architects of the various structures. The result was an electrical display of great variety and wonderful beauty which excited the admiration of every one and made a spectacle which had never been presented in New York before on so grand a

scale. The route of march, illuminated for a distance of six miles on each side by continuous lines of electric lights sustained on iron poles especially erected for the purpose, was as bright as day, and the Court of Honor, with its glistening columns and its sparkling canopy, looked like a scene in fairy-land. Across the East River and the Manhattan Hollow Way, the great bridges appeared suspended in midair like vast festoons of sparkling gems, supported at their ends on pillars of lights. And the public buildings and monuments stood out in glowing outlines like the creations of fancy rather than the substantial masses that they really were. These illuminations were not for a night only, but continued throughout the two weeks of the Celebration.

Chromatic
Scintillations

At 155th street and Riverside Drive, a spectacular exhibition of chromatic illumination was given nightly under the auspices of the Commission by the so-called Ryan Scintillator. The equipment for this display consisted first of a row of about 20 powerful search-lights, furnished with glasses of different colors. In front of these projectors were several perforated steam pipes, both vertical and horizontal, some 100 feet high, supplied with steam from a 200-horse power boiler. The steam, expelled through the apertures in the pipes, made a diffusing screen of vapor upon which the colored rays from the search-lights were projected, producing all the colors of the rainbow combined with the fantastic effects of the aurora borealis. Occasionally the steam curtain was reinforced by the explosion of smoke-producing bombs. A regular program of exhibition taking about an hour was given twice every night during the Celebration. The effects produced were very beautiful.

Illumination
of the
Fleet

To these illuminations were added under naval auspices on Saturday evening, September 25, a never-to-be-forgotten spectacle upon the Hudson River opposite Riverside Park. Here in midstream, for a distance of nearly ten miles, from 42d street

on the south to Spuyten Duyvil Creek on the north, the dusk of early evening shrouded the great international fleet of war vessels — the largest war fleet with one exception ever gathered together in one place — their presence being revealed only by their faintly silhouetted forms, the few lights necessary for their safety, and the occasional signals sounded or flashed from ship to ship. Then by prearrangement, at eight bells, the whole fleet burst into outlines of light, as if suddenly touched with the propitious augury of St. Elmo's fire — the masts, decks, water lines and other chief features glowing with thousands of sparkling electric globes. And for hours these ponderous, death-dealing machines, lying peacefully on the bosom of the Hudson in friendly association, scintillated like the airy fabrics of a magician or the unsubstantial dreams of an oriental fairy tale. It was a scene of exquisite beauty which will never be forgotten by the millions of people who thronged to the river side to see it. The illumination of the fleet was repeated the following Saturday night, October 2.

On Saturday night, September 25, brilliancy was added to the scene on the river at New York by an elaborate display of fireworks under the auspices of the Commission. In order that these might be seen to the best advantage by the throngs assembled on the sloping banks of Riverside Park, and at the other points along the water front, it was arranged that the fireworks should be discharged from four floats anchored at intervals of 1,000 feet along the opposite New Jersey shore. The pyrotechnics themselves were very brilliant, but were somewhat disarranged by an extraordinary and unforeseen occurrence. On that night there was a remarkable "magnetic storm" — by which term is to be understood a disturbance of the magnetic equilibrium of the earth which affects telegraphic communications but has no apparent effect upon the weather. One of the telegraph companies, attributing the disturbance of its wires to the floats anchored near a telegraphic cable crossing

the Hudson River, cut the floats from their moorings and left them to drift helplessly down the river. This episode served only to dislocate but not to diminish the volume of fireworks discharged.

Signal
fires a
Disap-
point-
ment

Another feature of the Commission's plans for illuminations had a less fortunate issue. The Board of Trustees of the Commission in October, 1908, designated by resolution a certain fireworks company as "official pyrotechnists" of the Celebration and not only patronized them for the fireworks in New York City but also commended them to the communities along the river to the northward. The Commission had two well-intentioned objects in view in doing this: One was to guarantee to the cities and villages along the river certain standard programs of pyrotechnics at reasonable and fixed prices. The other was to secure concerted action in the burning of a chain of signal fires from the mountain tops and promontories along the river from Staten Island to Troy on the night of Saturday, October 9, to close the Celebration. Much sentiment had been aroused by the plan for the beacons; for signal fires had flashed along the coast when Henry Hudson navigated American waters in 1609; and in the days of the American Revolution bonfires on the mountain-tops of the Highlands had given warning of the approach of the enemy and called patriots to the defense of their country. Furthermore, great expectations had been aroused by the descriptions given by the pyrotechnists of these beacon fires, which were not to be bonfires of ordinary combustibles, but were to be made of imported peat and scientifically prepared materials, which would burn according to price from two to four hours even in a rain storm and would "closely resemble the Pillars of Fire of Bible times." In several of these fires, however, the pyrotechnists used American peat which was so wet that it would not burn, and in those cases in which the combustibles did burn the beacons did not equal the expectations. In the communities along the Upper

Hudson, particularly, the failure of the beacon fires was a great disappointment.

As a whole, however, the decorations and illuminations were the most notable of their kind ever seen in this country -- a characterization which applies not only to New York City but also to the cities to the northward in which the displays, in their proportionate scales, were as elaborate and brilliant as those in the Metropolis.

CHAPTER XI

INVITATIONS TO OFFICIAL GUESTS

Cooperation of
Federal
Government

DURING President Roosevelt's administration, the President of this Commission conferred informally with him concerning the cooperation of the United States Government in the Celebration, but while Mr. Roosevelt, as President, as a New Yorker, and a descendant of Dutch ancestors, expressed his cordial sympathy with the commemoration, the uncertainty concerning the Commission's financial resources at that time precluded any definite arrangements for Federal cooperation. Soon after President Taft's inauguration in March, 1909, however, the appropriations by the New York State and New York City governments together with other resources had guaranteed the necessary financial support, and Mr. Taft assured the President of the Commission and those who accompanied him to the White House, that he would direct the various departments of the Federal Government to cooperate with the Commission in the fullest measure possible. The response to these instructions by the members of the Cabinet was most hearty and cordial. To the cooperation of the Department of State was largely due the standing which the Celebration was given in the eyes of foreign governments and the consequent attendance of foreign representatives.

The official invitation list of the Commission was not large, and included only the following:

Official
Guests

Federal Officials.

The President of the United States.
The members of the President's Cabinet.
The Vice-President of the United States.
The Speaker of the House of Representatives.
The Justices of the United States Supreme Court.
The Surgeon-General of the United States Navy.

- The Hon. Truman H. Newberry, Ex-Secretary of the Navy.
 Major-General Leonard Wood, U. S. A., Commanding the Department of the East.
 Major-General Frederick D. Grant, U. S. A., Commanding the Department of the Lake.
 Col. Hugh L. Scott, U. S. A., Superintendent of the West Point Military Academy.
 Hon. William Phillips, Third Assistant Secretary of State.
 Capt. J. B. Murdock, U. S. N., Commandant of New York Navy Yard.
 Capt. Commander Worth G. Ross, United States Revenue Cutter service.
 Hon. William Loeb, Jr., Collector of the Port of New York.
 The Hon. Whitlaw Reid, American Ambassador to Great Britain, home on leave of absence.
 The Hon. Charles S. Francis, American Ambassador to Austria, home on leave of absence.

Foreign Officials.

- The diplomatic representatives of every foreign government accredited to the government of the United States at Washington.
 Special delegates from every foreign government so accredited.
 Naval representation from the maritime nations so accredited.
 The consular representatives of foreign governments in New York.
 All the members of the Netherlands Hudson-Fulton Celebration Commission.
 The Governor-General of the Dominion of Canada.
 The Premier of the Dominion of Canada.

New York State Officials.

- The Governor of the State.
 The Lieutenant-Governor of the State.
 The Secretary of State.
 The State Comptroller.
 The State Treasurer.
 The Attorney-General.
 The State Engineer and Surveyor.
 The members of the Legislature.
 The members of the Lake Champlain Tercentenary Commission.

New York City Officials.

- The Mayor of the City of New York.
 The Borough Presidents.

The members of the Board of Aldermen.
The Comptroller.

Special Guests.

The Governor of the State of New Jersey, the only other State bordering on the Hudson River.

The Governor of the State of Pennsylvania, in which Robert Fulton was born.
Mrs. Joseph B. Cogdlan, widow of the late Rear-Admiral Joseph B. Cogdlan,
U. S. N.

Mrs. Julia Ward Howe, poetess at the official reception.

*Form of
Official
Invitation*

The official invitations, executed by Quayle & Son of Albany for the State Printers, the J. B. Lyon Co., were 9 by 12 inches in size, and consisted of a two-leaved invitation bound in a bristol-board cover. On the front page of the cover was the seal of the Commission reproduced in gold, over a half-wreath of laurel.

The first page of the invitation was headed by the coat-of-arms of the State of New York under which was engraved in plain script a form with appropriate blank spaces which, when filled in and signed, read as follows, in the invitation to the British Ambassador for instance:

The Hudson-Fulton
Celebration Commission
of the
State of New York
has the honor to invite
His Excellency
The Right Honorable JAMES F. B. O.M.
Ambassador Extraordinary and Plenipotentiary of Great Britain
to attend the Tercentenary of
the Discovery of the Hudson River by
Henry Hudson in 1609
and the Centenary of his
First Successful Navigation by Steam by
Robert Fulton in 1807
which will be celebrated in New York
from September 25th to October 9th, 1909

STEWART L. WOODFORD,

President.

HENRY W. SACKETT,
Secretary.

JOSEPH H. CHOATE,
Chairman of Invitations Committee.

The second page was blank. At the top of the third page was the heading:

THE HUDSON-FULTON CELEBRATION COMMISSION

HEADQUARTERS: THE TRINITY BUILDING, NEW YORK CITY, N. Y., U. S. A.

under which were the names of the President, Vice-Presidents, Treasurer, Secretary, Assistant Secretary, and members of the Invitations Committee of the Commission. The fourth page was blank.

On May 6, 1909, the invitations to the foreign governments and to the foreign diplomats accredited to the United States Government were delivered to the Department of State which had very courteously consented to transmit them to their destinations. They were accompanied by an eight-page circular of information, 9 by 12 inches in size, printed on hand-made paper, briefly describing the Commission and the purpose of the Celebration, emphasizing the international significance of the Celebration, and giving an outline of the program. In the following paragraphs, an intimation was given that the entertainment of the foreign guests would be without expense to the visitors:

"In view of the extraordinary significance of the events to be commemorated, the Hudson-Fulton Celebration Commission, by authority of the Government of the State of New York and the Government of the City of New York, and with the official countenance of the United States Government, has invited all Foreign Governments accredited to the United States to participate in the ceremonies of the Celebration by the presence of official representatives and vessels of their navies. The Naval, Diplomatic and other official representatives of Foreign Nations, as well as the official representatives of the Federal and State Governments, will be Guests of Honor of the Commission, and will be accorded hospitality, both of a public and private character, from the time of their formal reception on Saturday, September 25th, 1909, until the close of the Celebration.

"The Celebration, with respect to the ceremonies and the magnitude of the population in whose presence they will be enacted, will be the most brilliant of its kind that has ever been held in America. The City of New York alone

will furnish an attendance of over 4,000,000 persons, and it is expected that from one to two millions more will attend from other parts of the country.

"For the Naval parade, participated in by both Foreign and American vessels, and for the aquatic sports designed for the crews of all the ships, the Harbor of New York and the Hudson River offer a superb theatre. Prior to the Naval parade on Friday, October 1st, the combined fleets will lie at anchor in the Hudson River opposite Riverside Park and the Mausoleum of General Grant, in New York City, and will be the focus of public attention on the river."

State
Depart-
ment
Letters

The invitations to the foreign governments were forwarded by the United States Secretary of State with the following letter of instruction:

"HUDSON-FULTON CELEBRATION.

Department of State,
WASHINGTON, May 13, 1909.

"To the Diplomatic Officers of the United States:

"GENTLEMEN:—You will address the Minister for Foreign Affairs of the Government to which you are respectively accredited as follows:

"From Saturday, September 25th, to Saturday, October 9th, 1909, there will be celebrated at the City of New York and along the Hudson River the three-hundredth anniversary of the discovery of the river by Henry Hudson in 1609, and the one-hundredth anniversary of the first successful application of steam to the navigation of the river by Robert Fulton in 1807.

"The Celebration will be in charge of a Commission consisting of four hundred prominent citizens appointed by the Governor of New York. The officers of this Commission, comprising twenty-one of the leading citizens of New York City, have sent to my Government, with a request that it be delivered through the diplomatic channel, an invitation addressed to the Government of ———— to be represented at the celebration 'by its official representative and a vessel of its navy.'

"Under the instructions of my Government, I have the honor to transmit the invitation to you with the expression of my Government's hope that the Government of ———— may find it convenient to accept it. I am to explain to Your Excellency that by the expression 'its official representative' is meant the sending of an official representative from ———— and not the designation of its diplomatic representative at Washington, to whom a separate invitation has been extended.

“Accompanying the invitation, Your Excellency will find a printed program containing full information regarding the Celebration and the exercises set apart for each day.

“I am also to say that the State of New York has appropriated \$100,000, and the City of New York \$200,000, to defray the expenses of this Celebration, and that the diplomatic, naval, and other official representatives of foreign nations will be guests of honor of the Commission, and will be accorded hospitality, both of a public and private character, from the time of their formal reception on Saturday, September 25th, until the close of the celebration.”

“The invitation and program are enclosed herewith.

“I am, Gentlemen, your obedient servant,

P. C. KNOX.

“Enclosures as above.”

The Executive Officers of the Commission, the Committee on Invitations and the Committee on Reception arranged a system as nearly perfect as possible by means of which, upon the receipt of acceptance, the Reception Committee was promptly notified and immediately assumed the responsibility of arranging for the proper reception of the arriving guests and their subsequent entertainment. The operation of this system will be more fully described in the following chapter.

CHAPTER XII

ENTERTAINMENT OF OFFICIAL GUESTS

UPON no committee devolved duties of a nature more delicate and responsible than those of the Reception Committee, of which the Hon. Seth Low, former Mayor of the City of New York and former President of Columbia University, was Chairman: for upon the attentions of this Committee largely depended the character of the impressions of the Celebration and of New York hospitality which the representatives of the foreign governments would carry away with them.

Work at
Com-
mittee
Head-
quarters

The headquarters of the Committee were established in the Hotel Astor, where, with the purpose of conserving the financial resources of the Commission, as few rooms were taken and as few clerks were engaged as were possible. It may be stated here, however, for the benefit of the Commission's successors in any kindred undertaking, that the experience of its Reception Committee demonstrated with great force the necessity of having enough room space and enough personal help to carry on simultaneously all of the different functions described hereafter. As it was, our Committee had so little room and was so short-handed that all the active members of the Committee and the entire clerical force were overworked for substantially six weeks. Mr. Low himself worked every night until midnight or later, from the beginning of September until the Celebration opened, and on one evening twenty members of the Reception Committee staff were at their headquarters until half-past two o'clock in the morning. With any less willing and efficient helpers than the Committee was able to command the work could not have been done at all; but by dint of indefatigable work, the responsible duties of the Committee were

discharged to the evident satisfaction of the guests. The Commission is particularly indebted to Mr. William J. Moran, the Secretary of the Reception Committee, whose personal qualifications, reinforced by his experience as Secretary to Mr. Low when the latter was Mayor of New York, made him a most efficient coadjutor of the Chairman.

The work of the Reception Committee divided itself into six parts:

1. The ascertainment of the names of the coming guests;
2. The meeting of the arriving guests and their assignment to hotels;
3. The furnishing of instructions, badges, medals, cards, etc., to the guests;
4. Arrangements for the transportation of guests to the various functions;
5. The provision of aides to escort the guests to the official functions; and
6. Arrangements for formal receptions by the Commission and by Federal, State and City officials.

The first function of the Committee was to ascertain and make a careful record of the names of the expected guests. Acceptances received by the Committee on Invitations were promptly forwarded to the Reception Committee, but it required no little correspondence to learn just who were coming. This, however, was accomplished through the cooperation of the United States Department of State, so that by the first week in September the Committee was pretty well advised as to what guests had to be provided for, although new guests were reported almost up to the opening of the Celebration, and the Moorish and Italian delegates arrived after the Celebration began.

The names of the guests, as soon as learned, were systematically entered in a multiple card catalogue, the several sets of

Bureau
of
Records

cards, by cross-references, indicating at a glance the names and formal titles of the guests, the governments which they represented, the hotels at which they were lodged, their escorts, and many other details of the attentions to be paid to them.

Meeting
Arriving
Guests

Warned by the experiences of public celebrants in other cities, the Reception Committee took especial pains to see that every guest was suitably received by a special representative of the Committee upon arrival in the city and escorted to his hotel. Every official delegate except two or three was thus met. Those who came by sea — with the single exception of the Special Delegate from Haiti who arrived without the Committee's being able to learn how he was coming—were met down the bay. Through the courtesy of the Collector of Customs, the "privileges of the Port" were offered to all guests arriving from foreign countries and in no case, so far as the Commission has knowledge, were any guests delayed by Custom House formalities. The Diplomatic guests were brought from Washington by a special car to Jersey City where they were met by the Commission's special representatives. Thence they were taken under the river in special cars to 23d street, New York City, and thence in taxicabs to their hotels.

An interesting incident of the coming of foreign guests was the arrival of the Moorish delegation. A few days before the Celebration opened, the Commission was advised by the Department of State that the Special Delegate of the Sultan of Morocco with three Secretaries and four servants, would arrive by steamship in Boston, and that on account of their unfamiliarity with the language and customs of this country it would be advisable to meet them in Boston. The delegates were therefore met at Boston, and upon landing they presented the following letter of introduction from the American Minister at Tangier.

TANGIER, September 16th, 1909.

Meeting
Arriving
Guests*To the President of the Hudson-Fulton Celebration Commission, New York:*

SIR.--I have the honor to inform you that the Bearers hereof, Sid Laarbi Zenhashi, private secretary of His Shereefian Majesty, and Sid Mohamed ben Abdelam Ben Jelul, one of the chief notables of the city of Fez, have been nominated by His Majesty the Sultan of Morocco, to represent him at the Hudson-Fulton Celebration. These gentlemen are accompanied by Dr. Holzmann, one of His Shereefian Majesty's physicians, in the capacity of Interpreter, and are attended by several servants. These Representatives are being sent to the Celebration by His Majesty the Sultan, as a proof of his high regard for the American people. I have not failed to inform these Delegates of our high appreciation of this honor and of the pleasure with which their visit will be welcomed by the Commission, under your Presidency.

I have the honor to be, Sir

Your obedient servant,

H. PERCIVAL DODGE,
American Minister.

{ Seal of
American Legation }
{ Tangier. }

The members of the Moorish party were taken to Harvard University and around Boston before being brought to New York. From New York, the Delegates who were charged with a message from the Sultan to the President of the United States, were taken to Washington, and, after the discharge of their mission, brought back to New York.

The foregoing is cited as an example of the efforts made by the Committee in behalf of the Commission to show every attention to arriving guests.

Upon arrival, the guests were assigned to quarters in the principal hotels of the city. This was a work of great difficulty and delicacy, but was accomplished to the very general satisfaction of all concerned. In this part of its hospitality, the Commission had the very public-spirited cooperation of the hotel proprietors, who, notwithstanding the extraordinary demands which they well knew in advance would be made

upon their accommodations by the paying public, most generously offered to entertain the official guests of the Commission without charge as their contribution to the success of the Celebration. The hotels thus cooperating were the Hotel Astor, Hotel Belmont, Hotel Brevoort, Holland House, Hotel Imperial, Hotel Knickerbocker, Hotel Manhattan, Murray Hill Hotel, Hotel Netherland, Park Avenue Hotel, The Plaza, Hotel Saint Regis, Hotel Savoy, Hotel Walcott and Hotel Waldorf-Astoria. At the meeting of the Trustees of the Commission on October 13, 1909, the Chairman of the Reception Committee publicly stated that all the guests were entertained acceptably at the hotels and nothing but satisfaction had been heard from the guests as to their treatment. The action of the hotels, he said, had been very public-spirited and he wished to bear testimony to the fact that they had carried out their generous offer of hospitality according to the highest interpretation of its spirit. As a slight recognition of their very valuable services, an official silver medal, four inches in diameter, was presented to each hotel.

Instruc-
tions,
Badges,
Cards,
etc.

The guests having arrived and having been duly installed in their hotels, the next duty of the Reception Committee was to give them the necessary instructions for their movements, furnish them with their official badges and passport cards, their official programs, official medals and the like. The amount of detail involved in this branch of the work was enormous, but was accomplished with only an occasional failure.

Among the documents placed in the hands of each guest was a leaflet of "Information for the Official Guests of the Hudson-Fulton Celebration Commission," which divided the functions of the Celebration into four groups.

Func-
tions Di-
vided in-
to Four
Groups

Group A consisted of "Official Functions," which the guests were definitely expected to attend, namely: The paying of their respects to the Vice-President of the United States, the Governor of New York State, the Mayor of New York City,

and the President of the Commission at the Waldorf-Astoria Hotel at 10 A. M., Saturday, September 25; the review of the naval parade and the presentation of the Half Moon and Cleopatra, at the Water Gate at 110th street and Riverside Park at 2 P. M., September 25; the Official Reception and Welcome to the Guests of the Commission at the Metropolitan Opera House on Monday evening, September 27, at 8.30 o'clock; and the Official Banquet to the guests at the Hotel Astor on the evening of Wednesday, September 29. The guests were informed that for these functions escorts would be provided for the Vice-President; the Governor of New York; the Mayor of the City; Mr. Justice Brewer of the Supreme Court of the United States; the Attorney-General of the United States; the Secretary of the Navy; the Secretary of Commerce and Labor; the Governors of New Jersey and Pennsylvania; and for the Special National Delegates, the Diplomatic Guests, and the Flag and Ranking Officers of the Visiting Fleets.

Group B comprised "Official Entertainments" which, it was stated, had been provided for the pleasure of the guests and which it was hoped that they would find it agreeable to attend; but attendance on these was not *de rigueur*. These entertainments included the concerts by the United Irish Societies in Carnegie Hall and the United German Societies in the Hippodrome on Sunday evening, September 26, the Historical Pageant of Tuesday afternoon, September 28, the Liederkrantz Concert at the Metropolitan Opera House Tuesday evening, the Military Parade of Thursday, September 30, the Naval Parade to Newburgh on Friday, October 1, and the Carnival Parade on Saturday, October 2.

Group C consisted of "Entertainments on Invitation," and included invitations for a limited number of guests to a reception by Major-General Leonard Wood, U. S. A., on Governor's Island, Monday, September 27; a reception by Col. Hugh L. Scott, U. S. A., at the West Point Military Academy on Wed-

Functions
Divided
into Four
Groups

Functions
Divided
into Four
Groups Tuesday, September 29; a reception and ball in the Brooklyn Academy of Music on invitation of the Brooklyn Citizens' Committee on Thursday evening, September 30; and a garden fête at Columbia University on the invitation of the Alumni Association of the United States Military Academy Saturday afternoon, October 2.

Group D embraced "Unofficial Entertainments." Under this head the leaflet said: "These are found described in the Official Program, and may be participated in at the pleasure of the guests, as they find it convenient. Methods of reaching many of these entertainments are indicated in the Booklet issued by the Public Health and Convenience Committee of the Hudson-Fulton Celebration Commission. Accompanying this is the Official Program and the Booklet of the Public Health and Convenience Committee."

The primary object in thus dividing the various features of the Celebration into groups, indicating those which were *de rigueur* and those which were entirely optional with the guests, was to make the program, with respect to the guests, as flexible as possible and allow them the largest freedom of movement. It also relieved the guests from the possible embarrassment of constant attendance by the escorts of the Commission, and, on the other hand, greatly simplified the escort work of the Reception Committee. There were also several incidental advantages from this various classification, as, for instance, it permitted any foreign delegate, without violation of proprieties, to absent himself from the Historical Parade, if, upon examination of the Official Program which was given to him in advance, he felt that his susceptibilities would be affected by any of the subjects portrayed in the pageant.

Every guest was furnished with an official badge of the character described in Chapter VI. A four-inch silver medal, as described in the same chapter, was given to every Admiral and

raking officer, special delegate, diplomat and consul; and a two-inch medal was given to every naval officer below the grade of Admiral or ranking officer. Every guest was given a passport card admitting him to the official functions, and he was also given a series of official pamphlets apprising him fully of the details of the various features of the Celebration.

The Reception Committee made arrangements for the transportation of guests, so that all could attend the various functions in a becoming manner. This task was made especially difficult by the fact that the men-of-war, when anchored in the river, stretched over a distance of about ten miles from 42d street to beyond Spuyten Duyvil Creek. It thus became necessary to make suitable arrangements for the transportation of the Admirals and other officers in command, for the large number of junior officers and for the men, although the arrangements for the men were made by the Naval Committee. An automobile was placed at the exclusive service of each Admiral and ranking officer, and subsequently the Chairman of the Reception Committee received the assurance from almost all of them that it had added greatly to their pleasure. Floats were provided by the Naval Committee at different points on the riverside, and from several of these floats to the nearest subway station a so-called "ferry service" was established, by which an omnibus ran every fifteen minutes from the landing stage to the subway station, and another omnibus from the subway station to the landing stage. At 155th street, for example, the distance so covered was a mile and a half, and the number of passengers carried reached into the thousands. Mr. John Naughton deserves special mention for the great ability with which he organized and carried on this service. Some of the specially distinguished guests who were on shore were also furnished with automobiles. For the ordinary transportation, arrangements were made with the various taxicab companies serving the hotels at which the guests stayed, to

Trans-
portation
Arrange-
ments

issue coupon tickets, to be redeemed by the Committee after the Celebration at 10 per cent discount. These coupons were printed in books of the value of \$20, which were furnished to every guest, and, in case of need, the supply was replenished. Out of the total outlay made by the Reception Committee, probably more than \$25,000 was for transportation, but no single feature of the work of the Committee did more to make the entertainment a success than the admirable transportation system which was devised. The work done by an association of taxicab operators acting under the direction of the Committee was most efficiently and conscientiously done. At the Trustees' meeting on October 13, 1909, the Chairman of the Reception Committee quoted Rear Admiral Schroeder, commanding the American fleet, as saying that he had never been so well cared for in any part of the world; and similar intimations were given by representatives of other navies.

Official
Escorts
for
Guests

As already indicated, an important branch of the Committee's duties was the provision of Aides as escorts for the guests upon arrival in New York, to conduct them to their hotels, and during the Celebration to escort the guests to and from the official functions. This work was made practicable when the Trustees, by resolution adopted September 15, 1909, divided the various events of the Celebration into the four groups before mentioned and cut down the official functions to four in number. It proved entirely practicable to provide Aides for this small group, when it would have been entirely impracticable to provide escorts for a week at a time. It is believed that all the guests appreciated the freedom which the flexibility of the arrangements permitted.

The services of the many gentlemen who consented to act as Aides to the Reception Committee were invaluable, and the Commission is under great obligation to them for the fidelity and good judgment with which they performed the duties assigned to them.

A few of the guests, the date of whose arrival was unknown to the Commission, or who arrived privately some days in advance of the Celebration, paid their devotions to the Commission by calling in uniform at the Headquarters of the Commission, and later, in compliance with their instructions from home, paid their respects to the chief civil magistrate and chief military authority within this jurisdiction. As soon, however, as any of the guests made their arrival known, they were acquainted with the arrangements already made both for their receiving the respects of the officials here and for their paying theirs in return. These arrangements constituted the sixth department of the Reception Committee's duties.

On the arrival of the guests at their hotels, the cards of the Governor of the State, the Mayor of the City, the President of the Commission, and the Chairman of the Reception Committee were immediately left for them, and they were invited to attend a reception at the Waldorf-Astoria Hotel, at 10 o'clock Saturday morning, September 25, when Governor Hughes, Mayor McClellan, General Woodford and Mr. Low were present to receive their return calls. The Vice-President of the United States, Mr. Sherman, was also present at this time in another room, so that the guests had the opportunity, first of all, to pay their compliments to the representative of the United States.*

It also fell to the Reception Committee to make the details of the arrangements for the Official Reception in the Metropolitan Opera House on Monday evening, September 27, and

* Much to the regret of the Commission, the President of the United States, was unable to attend the Hobson-Tuloua Celebration. To the representatives of the Commission who conveyed the invitation to him in Washington soon after his inauguration, he expressed the deepest interest in the commemoration, but said that for reasons of public policy he had made preparation for an extended journey through the States to the Pacific coast immediately after the adjournment of Congress, and that it would be impossible for him to change them. As a testimony of his sympathy, however, he directed the heads of the various Federal departments to cooperate with the Commission to the fullest extent possible.

Cere-
monial
Recep-
tions

for the Receptions at Governor's Island on Monday afternoon, and at West Point on Wednesday afternoon.* This involved preparing and distributing invitations, and seeing to it that vehicles were at command to serve the guests both in going and coming. The Committee was greatly helped in the matter of the Reception at Governor's Island by the courtesy of Admiral Mordock, of the Navy Yard, in placing a tug at the Committee's disposal to transport the guests to and from the Island, from the foot of West 40th street. It is pleasant to relate that when this boat returned, and again when the train arrived from West Point on Wednesday evening, so many taxicabs were available for returning guests that no one was obliged to wait more than three minutes.

In assigning seats to the guests on the stage at the great function at the Metropolitan Opera House, and in innumerable other matters involving delicate questions of diplomatic etiquette, the Committee had the invaluable aid of the Hon. William Phillips, then Third Assistant Secretary of State of the United States, who, upon the request of the Commission, was sent to New York to lend his cooperation in person.

Following is a list of the Official Guests whom the Commission had the honor of entertaining, together with their addresses while in New York:

List of
Official
GuestsREPRESENTATIVES OF THE EXECUTIVES OF THE UNITED STATES, THE STATE
OF NEW YORK AND THE CITY OF NEW YORK

Appreciation
 of the
 Guests

At the close of the Celebration the official guests were very punctilious in calling *pour prendre congé*, either in person or by card. In one way or another all expressed themselves highly pleased with their entertainment. Many of them also wrote letters. Want of space prevents the reproduction of all of these very courteous communications, but the following examples suffice to indicate the general sentiment of the guests.

From the
 Belgian
 Minister

Belgium's Envoy Extraordinary and Minister Plenipotentiary, M. le Comte Conrad de Buisseret, wrote:

LEGATION DE BELGIQUE

(coat of arms)

A Washington

WASHINGTON, D. C., October 12, 1909.

SIR.—Allow me to express to you, as President of the Commission of the Hudson-Fulton Celebration, my heartfelt gratitude for the kindness & courtesy shown to me & my Legation during the three days which we spent in New York.

I have not failed to inform my Government of the lavish hospitality extended to us, & which, I have no doubt, will be a source of gratification to them. We shall ever preserve a vivid remembrance of those beautiful festivities.

With kind regards, I beg to remain, dear Sir,

Your obedient Servant

Cte. CONRAD DE BUISSERET.

To the Honorable General STEWART L. WOODFORD,

President of the Commission of the Hudson-Fulton Celebration.

From
 Brazil's
 Delegates

Lieutenant Commander D. Marques de Azevedo wrote as follows in behalf of the Brazilian representatives:

NAVAL ATTACHE

to the

BRAZILIAN EMBASSY

NEW YORK, October 6th, 1909

DEAR SIR.—Before leaving New York, where I had the honor of being entertained so delightfully during the Hudson-Fulton Celebration, I desire

to express to you in the name of His Excellency the Brazilian Ambassador, and on my own behalf, my deep sense of appreciation for the courtesy and kindness shown me. I thank you for the opportunity afforded me as a Representative of Brazil to participate in the Celebration and to view its grandeur while enjoying the hospitality of your City. The elaborate care and great solicitude shown for me as a guest of your Commission will never be forgotten by me, and as I leave your City I do so carrying with me memories which ever endear New York to me.

Please, dear Sir, believe me,

Yours very sincerely,

D. MARQUES DE AZEVEDO.

To the Honorable General STEWART WOODFORD,

President of the Hudson-Fulton Committee.

Colombia's Special Delegate, Hon. Eduardo Pombo, wrote: From

LEGATION DE COLOMBIA

Washington, D. C.

Colom-
bia's
Delegates

Eduardo Pombo, Special Delegate from Colombia, presents his respects to General Stewart L. Woodford, and before leaving New York, wishes to extend to him and through his respectable organ to the Honorable Hudson-Fulton Celebration Commission, his heartfelt thanks and sentiments of appreciation for the many courtesies and hospitality he received during his sojourn in the City.

NEW YORK, October 5, 1909.

Mr. Pombo's colleague, Hon. Francisco A. Gutierrez, left a similar expression.

Denmark's Envoy Extraordinary and Minister Plenipotentiary, Count Moltke, wrote: From the

THE DANISH LEGATION

Washington, D. C.

Danish
Minister

October 6th, 1909.

SIR.—At the conclusion of the Hudson-Fulton Celebration, I have at heart to address to you as President of the Celebration Commission the following remarks:

The privilege of attending the memorable festivities, which now belong to the already glorious annals of the history of the State and City of New York, was great in itself, and no visitor will ever forget the grandeur of the task which

the metropolis had taken on her shoulders in carrying out the elaborate celebration program, neither the unique success which crowned it in every detail.

But, if this is so generally speaking, those who had the benefit of special facilities extended to them with the utmost courtesy for every one of the numerous, equally delightful and impressive ceremonies and exercises, sheltered by a hospitality of a rarely generous and lavish character, have a particular reason to express their gratitude.

I have the greatest pleasure then, my dear General, to say that, proud as I was to be appointed the special delegate of His Danish Majesty's Government to witness the glorification of your wonderful metropolis in its magnificent perpetuation of discovery and inventive genius, I must thank you from the bottom of my heart for the rare chivalry with which you have honored my country and my nation in the reception granted me as their official representative.

The welfare of the American people and of its greatest port and city is followed with warm sympathy and cordial friendliness by the Danish Nation, and it is our sincere hope that the recollection of these bright days of rejoicing and legitimate pride will be passed by you to posterity without ever being clouded by any future event.

Respectfully requesting that you will kindly interpret these feelings to the honorable members of your Commission,

I have the honor to be, Sir,

Very respectfully yours,

T. MOLTÆR,

Danish Minister.

Hon. General STEWART L. WOODFORD,

President of the Hudson-Fulton Celebration Commission,

Room 120, Waldorf-Astoria, New York City.

The Dominican Republic's Chargé d'Affaires, the Hon. Arturo L. Fiallo, and her Special Delegate, Hon. F. B. Jennings, wrote:

LEGACION

de la

REPUBLICA DOMINICANA

Washington, D. C.

October 6, 1909.

SIR.—On my return to Washington I take pleasure in offering to you and the members of the Hudson Fulton Celebration Commission the assurances of

my highest appreciation for the many courtesies extended to me during my stay in New York as a guest of the Commission. Your generous hospitality on this occasion will always remain for me as a source of delightful recollection.

I avail myself of this opportunity to tender to you, Mr. President, the expression of my profound respect and highest esteem.

ARTURO L. FIALLO,
Chargé d'Affaires ad interim.

MILLS BUILDING,
15 Broad Street,
New York

October 12, 1909.

Hon. STEWART L. WOODFORD,
President of Hudson-Fulton Commission:

DEAR SIR.—On this "Columbus Day" it is especially appropriate that, as the representative of the first country settled by Columbus in the Western Hemisphere, I should extend to you and the Commission hearty congratulations upon the magnificent celebration which has just been brought successfully to a close. It was in every respect worthy of the great events which it signalized, and on behalf of the President and People of the Dominican Republic I wish to thank you for your kind invitation to participate in the celebration and for the generous hospitality shown to the representatives of the Republic in common with the other guests of the Association.

Yours very sincerely,
F. B. JENNINGS,
Special Representative of the Dominican Republic.

Senor Don Esteban Carbo, Special Delegate from Ecuador, From
wrote: Ecu-
ador's
Delegate
LEGACION DEL ECUADOR
Washington, D. C.

October 6, 1909.

SIR.—I have the honor to extend my sincere thanks to you and to the members of the Hudson-Fulton Commission. I cannot tell you, Mr. President, how much I have enjoyed the brilliant splendor of these festivities. As a guest of the Commission I must say that I have never before received such unparalleled hospitality, and I am deeply grateful. I am sending a full description of the Celebration to my country in order that it may be kept in the archives of the government. My earnest wish is that Ecuador

may be fortunate enough to some day have as guests some of the members of the Commission. It is with a feeling of deep regret that I bid farewell. The events of this Celebration I will keep indelibly in my memory.

In the name of the Ecuadorian Government and in my own, I thank you. With sentiments of high appreciation and esteem, I am, Sir,

Respectfully,

E. F. CARBO.

General STEWART L. WOODFORD,

President Hudson-Fulton Celebration Commission, New York, N. Y.

From the
French
Delegate

France's Special Delegate, M. Jean Gaston Darboux, communicated his compliments through the French Ambassador at Washington and the Department of State in a note of which the following is a translation:

EMBASSY OF THE FRENCH REPUBLIC
TO THE UNITED STATES,
Washington

October 30, 1909.

MR. SECRETARY OF STATE.—Mr. Darboux, member of the Institute and Permanent Secretary of the Academy of Moral and Political Sciences, has acquainted the Government of the Republic with the excellent reception given to the French Delegation sent to the United States on the occasion of the Hudson-Fulton Celebration.

Pursuant to your instructions I have just received, I venture to have recourse to your Excellency's good office to have my Government's thanks transmitted, in this connection, to the State and City of New York.

Be pleased to accept, Mr. Secretary of State, the assurance of my high consideration.

JUSSELAND.

From the
German
Delegate

Grossadmiral Von Koester, Germany's Special Delegate, wrote:

October 9, 1909.

MY DEAR GENERAL WOODFORD.—Before I leave New York to-morrow I wish to thank you and the Hudson-Fulton Celebration Commission once again very sincerely for the most splendid and very friendly reception, which we have found here; I do so not only for myself, but also on behalf of the captains, officers and men, of the German warships, who had the privilege of partaking

in the celebrations and of whom the Commission has taken care in so kind a way.

Personally I wish to express my thanks for having been the guest of the city and of the Commission at the Astor Hotel, the management of which Hotel has given me every comfort possible, facilitating thereby the fulfillment of my numerous social obligations.

Furthermore I have to thank you for the automobile of the Mason-Seaman Transportation Company, which has been placed at my service. The service it has done me was satisfactory in every respect and it has been, as well by its material quality as by the ability of the chauffeur, of great value to me.

I am fully aware of the extraordinary efficiency shown by the Commission in arranging all the numerous facilities we have enjoyed; without them I would not have been able to fulfill my mission in that way, which was possible only by your kind help.

With renewed assurances of my high esteem I beg to remain,

Yours very sincerely,

VON KOESER,

Grossadmiral.

From the
Moroccan
Delegates

October 8th, 1909.

Hon. General STEWART L. WOODFORD,

President of the Hudson-Fulton Celebration Commission,

Hotel Astor, New York City:

HONORABLE SIR.—On the eve of our departure we have in our hearts to express to you the great joy which we have had, and the gratification we have felt on the occasion of our presence during the Hudson-Fulton Celebration. We are particularly gratified with the extreme consideration which we have received, and we interpret this all as a marked sign of esteem and respect for his Shahean Majesty, The Prince of the Believers, Mulay Abdul Hafid, Sultan of Morocco, and we beg of you to kindly communicate these our feelings to the gentlemen of the Commission—Mr. Ridder, Mr. Seth Low, Mr. Seligman, Colonel Sackett, Dr. Hall, Mr. W. J. Moran and Prof. Sinkhovitch, who all have assisted you in this unparalleled celebration.

Please believe us that we will dutifully and uprightly bring all of our good impressions to the Steps of the Shahean Throne. Allow us please to ask you to transmit our deep gratitude for all the kindness and magnificent hospitality which we have received during our visit, to all the members of the Commission to the authorities of the City of New York, and to all the citizens of this incomparable commercial and industrial commonwealth.

Shereefian Delegates in the United States, as well as our thanks to those notables who conducted the Celebration, and especially to its Honorable Chief.

In Peace.

NEW YORK HARBOR, *October 12th, 1909.*

MY DEAR MR. LOW.—On the eve of our departure from the hospitable waters of New York I wish to endeavor to express to you as chairman of the Reception Committee of the Hudson-Fulton Celebration Commission my most grateful thanks for the many and varied courtesies received at your hands.

We have been so lavished with hospitality and thoughtful attentions that it is quite impossible to allude to them all; yet I feel that I cannot depart without thanking you particularly for the automobile placed at my service during our stay here. The pleasure and convenience attending the use of this automobile have been very much appreciated, and it has certainly furnished a most delightful means of seeing your wonderful city. Also the book of taxicab coupons are a great convenience, and the identification card on several occasions assisted me greatly.

In every way, I feel that you and your Committee left nothing undone to make our stay agreeable, comfortable, convenient and interesting. The prominent place assigned to the "Utrecht" and the Netherlands Navy in the various official functions and parades has been observed with the greatest pride and satisfaction, and it will be a most agreeable duty for me to allude to all these matters in my report to the authorities at The Hague, concerning the wonderful reception and entertainment received by the "Utrecht" at the Hudson-Fulton Celebration. This Celebration has certainly been a most unqualified success, and is thus more than ever typical of the brilliant success of the City of New York and of the men who perfected its wonderful organization.

In closing, my dear Mr. Low, I beg you to accept from me and in the name of the officers and men under my command, our most grateful and

From the Netherlands Delegates
 heartfelt thanks for the innumerable courtesies received at the hands of the Reception Committee, of which you are the distinguished Chairman.
 With expressions of the highest respect and esteem

CHAPTER XIII

ART, HISTORICAL AND SCIENTIFIC EXHIBITIONS

Opening
of the
Exhi-
bitons

THE first event of the Celebration in chronological order was the opening of the great art, historical and scientific exhibitions on the morning of Saturday, September 25, 1900. In fact, so forehanded had been the preparations for these remarkable exhibitions that some of them, notably that at the Metropolitan Museum of Art, were actually opened several days in advance of the formal opening of the Celebration, and all of them were in perfect order and ready to receive the throngs of visitors when the doors and gates of the various institutions were thrown open on the morning of the 25th.

These exhibitions — of which it may be said that taken collectively, and in some cases individually, they have never been paralleled — were under the direction of the Committee on Art and Historical Exhibits of which J. Pierpont Morgan, LL.D., President of the Metropolitan Museum of Art, is Chairman. The exhibitions were divided into two general groups, the art exhibits being under the immediate direction of the sub-committee on Art Exhibits, of which Robert W. de Forest, LL.D., President of the Municipal Art Commission of the City of New York and Secretary of the Metropolitan Museum of Art, is Chairman, and the historical exhibits (including scientific) being under the direction of the sub-committee on Historical Exhibits, of which George F. Kunz, Ph.D., Sc.D., Honorary Curator of Precious Stones of the American Museum of Natural History, is Chairman.

The following description of the art, historical and scientific exhibitions is kindly furnished by Dr. Kunz:

Existing
Museums
Utilized

At every world's fair that has taken place in the past it has been customary to erect museum buildings for the exhibition

of objects of historical, archæological or art significance, the latter consisting principally of paintings. During 1907, when the project of the great Hudson-Fulton Celebration was under consideration, it was suggested* that it would be much better to utilize the twenty-five or more museums in Greater New York than to erect any new buildings. The plan was carefully considered by the Commission, with the result that two committees were formed: one for art exhibits at the Metropolitan Museum of Art and the other for historical exhibits. Of the twenty-five museums, twenty-two took part. The total cost to the Commission amounted to \$22,000, the balance of the expense being assumed by the institutions themselves. The result was that the authorities of the museums, as well as those of the Botanical Garden and the Zoological Park, and also the Department of Parks, were induced to further the great exhibits and to make them accessible to all who were in the city or were likely to visit it during the three months from the end of September to the end of December.

The success was unparalleled, and as a suggestion for other cities, it is thought well to give a brief description of the exhibits, their locations, the hours of opening and the moral effect of these displays upon the public. Those who had charge of the special exhibitions of the different museums, institutions, and societies have kindly communicated many important details as to the space occupied, the number of visitors, etc. In several instances the museums have received immediate encouragement in the form of gifts and donations. They were popularized to a greater extent than ever before, and are better understood by many thousands of citizens who had never been in certain ones of them before the Hudson-Fulton Celebration occurred.

The popularity of any exhibition that makes a direct appeal to the public was shown in the case of the Tuberculosis Exhibition.

Force of
a Direct
Appeal

* The suggestion was made by Dr. Kunz.— Editor.

tion, held in the American Museum of Natural History, in December, 1908. During this month 487,107 visitors came to the Museum, over 400,000 more than the monthly average. Here public interest was easily aroused in an important, though painful subject, and there can be little doubt that a similar interest can be created in exhibitions of objects possessing historic or artistic value, if they are presented in the proper way, and if they are made popular in the best sense of the term.

Other
Exhibitions

Since the London Exhibition of 1851 and the first Paris Exposition of 1855, there have been probably one hundred expositions in various parts of the world. Generally they have been held in commemoration of some historic event or anniversary, and each one, large or small, has usually had some special distinctive feature. The great exposition at Chicago had its White City and its illuminations; the Buffalo Exposition had its architecture, its illuminations and the added advantage of its striking environment; and the various French expositions have each possessed peculiar points to mark their individuality. All of them have been held for six months or more, but in a great many cases from one-third to one-half of that time elapsed before all the departments were completed and opened to the public. In this way public interest was checked at the beginning, and when the exposition was finally completed, a good part of the allotted time had passed, and the enthusiasm always excited by these affairs had begun to flag.

New
York
Itself
a Great
Exhibition

New York in itself is not only the greatest exposition, perhaps, in the world, because of its geographic features and its wonderful resources, but its various lines of transit — surface cars, elevated railways and subways — facilitate the handling of great crowds. In addition to this New York lies between two rivers, and is as easily reached by boat as by rail, to say nothing of the attractive physical advantages which this location gives it.

Although not so named, this Hudson-Fulton Celebration

really offered the features of a great exposition and no exposition ever organized on this continent ever possessed a greater variety of interest than this one when all the resources of New York were presented and given such a brilliant and attractive setting. To apply the standard of monetary value may seem a trifle vulgar when we are treating of the triumphs of art in all its forms, and yet this standard merely expresses the worth of antiquities and artistic creations in a more exact way than by using superlatives of speech. A reasonable estimate of the value of the attractions which New York City offers to its visitors would be rather in excess of \$2,000,000,000 than below that figure, and yet, where the great expositions of the past have cost from \$10,000,000 to \$20,000,000 or more for their organization, all the treasures and beauties of New York can be displayed at an expense of only \$1,000,000. A single building, the Metropolitan Museum of Art, with the objects it holds, would not be overvalued at from \$30,000,000 to \$40,000,000.

The Celebration was designed to cover a very wide field, and the aim of the Commission was not confined to honoring the explorer of the Hudson River and the man who made steam navigation a permanent success; in addition to this the occasion was utilized to illustrate and emphasize the development and greatness of New York City, the Metropolis of the western hemisphere. Those who can understand the true significance of this Celebration, and who are able to forecast the future, will see the vision of a still greater and more magnificent city, worthy of being called a world metropolis.

Of the special exhibitions which were organized by the Art and Historical Exhibits Committee, the most important was the magnificent exhibition of masterpieces by Dutch painters from the finest private collections in the United States, which was seen in the Metropolitan Museum of Art, at Fifth avenue and Eighty-second street. This exhibition was divided into two sections: (1) Dutch paintings of the period of Hudson,

Metro-
politan

Metropolitan
Museum
of Art

together with Dutch furniture and objects of art of the time; and (2) examples of the American industrial arts dating from about 1625 to 1825, and paintings by American artists of Fulton's time.

For reasons that are self-evident, it was felt that the exhibition in the Metropolitan Museum should be purely artistic in character, rather than historical, and there being few works of art associated with the life or personality of Henry Hudson himself, for this part of the commemoration it was determined to attempt to bring together a loan collection of Dutch art of his time, that is, roughly speaking, the first half of the seventeenth century, the period when Dutch painting was at the height of its development. With liberal cooperation on the part of private collectors it was believed that such an exhibition could be made worthy of the occasion, the Dutch school being the only one of the great schools of the past which can be said to be well represented among the collections of America. Never before had so many splendid examples of Dutch art been gathered together in the United States; indeed, the exhibition as a whole has never been rivaled even in Europe. It was remarkable not only for what it contained, but also as an index of the art culture of the United States, for three large private collections made no contributions to the exhibition, and from others only a part of their wealth of examples could be chosen. The exhibition, which represented only a portion of the art treasures of the United States, was therefore a significant indication of the development of art taste in the United States. That it was possible to assemble in New York 145 paintings of the first importance, including 34 Rembrandts*—a larger number of Rembrandts than exist in any permanent collection except that of the Hermitage in St. Petersburg—was a fact well calculated to excite surprise in European art circles. Then there were twenty portraits by Frans Hals, who

* Less than one-half of the seventy Rembrandts in America.

is only inferior to Rembrandt among the Dutch portraitists; and five specimens of the work of Vermeer van Delft, whose pictures are extremely rare, there being only 30 authentic examples extant. Besides the works of these artists there were fine and characteristic pictures by other artists who were contemporaries of Henry Hudson. The number of examples of each artist was as follows: Nicolaes Berchem, 1; Abraham van Beyeren, 1; Ferdinand Bol, 1; Jan van de Capelle, 2; Aelbert Cuyp, 11; Jan van Goyen, 3; Dirk Hals, 2; Frans Hals, 20; Bartolomaeus van der Helst, 2; Jan van der Heyden, 2; Meindert Hobbema, 7; Pieter de Hooch, 5; Willem Kalf, 1; Philips Koninck, 1; Judith Leyster, 1; Nicolaes Maes, 2; Gabriel Metsu, 2; Aert van der Neer, 3; Adriaen van Ostade, 2; Isack van Ostade, 2; Paulus Potter, 2; Rembrandt Harmensz van Rijn, 34; Jacob van Ruysdael, 11; Salomon van Ruysdael, 4; Jan Steen, 5; Gerard Terborch, 4; Adriaen van de Velde, 1; Willem van de Velde, 2; Johannes Vermeer, 5; Jan Cornelisz Verspronck, 1; Simon de Vlieger, 1; Philip Wouwerman, 2.

Many years will pass before an equally favorable opportunity will be afforded for the study of Dutch pictorial art.

The contributors to this section of the exhibition were as follows:

Chicago, Ill.: The Art Institute, Mr. Charles L. Hutchinson and Mr. Frank G. Logan.

Montreal, Canada: Sir William van Horne and Mr. James Ross.

Newport, R. I.: Mr. Theodore M. Davis.

New York: Mr. Thatcher M. Adams, Mr. Benjamin Altman, Mr. William T. Blodgett, Mr. M. C. D. Borden, Mr. Charles E. Bushnell, Hon. W. A. Clark, Mr. Theodore M. Davis, Mr. W. B. Dickerman, Hon. Robert W. de Forest, Mr. Henry C. Frick, Mr. Wilhelm Funk, Mr. George J. Gould, Mrs. H. O. Havemeyer, Mr. Ferdinand Hermann, Mr. Leon Hirsch, New York Historical Society, Mrs. C. P. Huntington,

The American section of the exhibition at the Metropolitan Museum of Art embraced examples of the American Industrial Arts dating from the earliest Colonial times in New England and New Amsterdam to 1825, and paintings by American artists of Fulton's time. The latter were limited to artists born before 1800. In the collection of these objects, the aim was to show by means of the most noteworthy examples the development of artistic expression in the more important handicrafts. In the exhibition of these, care was taken to give them the best possible chance to be seen to advantage in a consequential arrangement. It being the first time such an exhibition has been made, it was hoped that a new emphasis might be given to the importance of our early workmen. The most important group shown was the furniture. In the early Colonial days almost all of the furniture was brought by the settlers from England or from Holland. Later much of the household furnishing was imported, but craftsmen early began to ply their trades, using as models what had been brought out from the mother countries.

Little seventeenth century furniture now exists, and it was only through the courtesy of Mr. Eugene H. Bolles, of Boston, who lent examples of oak chests, chests of drawers, "turned chairs," "wainscot chairs," etc., from his extensive and remarkable collection, that the Committee was enabled to make a noteworthy display in this direction.

Previous to the beginning of the eighteenth century, oak was the wood most used by cabinet-makers; with the introduction of mahogany about 1720, a new era began. Of this period the exhibition showed all of the variations in style worked out in this wood, and well-known by the names of the English cabinet-makers — Chippendale, Sheraton, Hepplewhite, Adam, etc. Of these styles the exhibition contained examples brought from England through the ordinary channels of trade and copies produced in this country. Many excellent and important specimens were secured through the kindness of several collectors of note, among them Mr. George S. Palmer of New London, Conn., Mr. Dwight Blaney and Mr. F. H. Bigelow of Boston. Of special interest to New Yorkers were the examples of furniture of Fulton's own period, made by a cabinet-maker of New York, Duncan Phyfe, and generously lent by Mr. R. T. Haines Halsey. Phyfe was strongly influenced by the immediate followers of the French Empire style, but he brought to his work an individuality in his motives and an excellence of technique which raised him above the other workmen of his time and allow us with reason to claim for him the place of New York's great cabinet-maker.

Accessory to the furniture were collections of American-made silverware, showing specimens of the handicraft of the comparatively speaking large body of silversmiths in New England and New Amsterdam and including a number of the very rare pieces by Paul Revere, better known as a soldier than a silversmith, also pewter, glass and pottery. For the silver the Committee was indebted chiefly to Mr. R. T. Haines Halsey and Mr. George S. Palmer, who placed the whole of their collections at the disposal of the Committee.

As with the silver, so with the pewter, glass and pottery, most of which came from the collections of Mr. Alexander W. Drake of New York City and Mr. Edwin A. Barber of Philadelphia. The arrangement brought out the story of the

Metro-
politan
Museum
of Art

development of the industrial arts in this country before 1815.

Only a few American paintings were brought together, the Museum's own examples of the work of our early American artists being deemed sufficient to show their art, but enough pictures by Snybert, Copley, etc., were obtained to give additional character to the rooms in which the industrial arts were shown—enough to show the degree of the taste for the arts in the colonies as expressed in all its branches.

The contributors to this section were Mrs. W. H. Adams, Mrs. Chester Bidwell Albree, Mr. D. Maitland Armstrong, Mrs. Anson P. Atterbury, Mr. Samuel P. Avery, Dr. Edwin A. Barber, Judge Peter T. Barlow, Mr. F. H. Bigelow, Mr. Dwight Blaney, Mr. H. E. Bolles, Mr. Richard Canfield, Mrs. Elihu Chauncey, Judge A. T. Clearwater, Mrs. George H. Clements, Mrs. Wilmot Townsend Cox, Mrs. Robert W. de Forest, Mrs. F. J. de Peyster, Mr. Alexander W. Drake, Mr. Herbert Dupuy, Mrs. Richard S. Ely, Mr. G. G. Ernst, Mr. John Erving, Mr. Sherman Evarts, Mrs. Hamilton R. Fairfax, Mr. William B. Osgood Field, Mr. Harry Harkness Flagler, Mrs. Robert Ludlow Fowler, Mr. Hollis French, Dr. Horace S. Fuller, Mr. R. T. Haines Halsey, Miss Nannie Randolph Heth, Mrs. Edward Holbrook, Mrs. William H. Howard, Mr. W. M. Grinnell, Mr. Ernst F. Hagen, Miss Sarah L. Huntington, Estate of Rev. Wm. R. Huntington, Mr. J. Herbert Johnson, Miss Dorothea Keep, Mr. Thomas H. Kelly, Dr. George F. Kunz, Mrs. Wm. Camp Lanman, Mrs. Abraham Lansing, Mr. Wilford R. Lawshe, Mr. Luke Vincent Lockwood, Mr. Robert Fulton Ludlow, Dr. J. P. Lyon, Mrs. Pierce Macdonald, Mrs. Richard Worsam Meade, Dr. Lewis Morris, Miss Frances C. Morse, Miss Mulford, Mrs. Alfred Nelson, Mr. George S. Palmer, Mrs. Marsden J. Perry, Misses Philipse, Mr. F. O. Pierce, Mr. Albert Hastings Pitkin, Mrs. W. A. Putnam, Mr. T. M. Oakley Rhineland, Mrs. Roger

M. Sherman, Mr. George H. Story, Mrs. Alice Crary Sutcliffe, Trinity Church Corporation, Judge Charles H. Truax, Mr. Charles M. Van Kleeck, Mrs. Wm. E. Verplanck, Wadsworth Athenaeum, Dr. Faneuil D. Weiss, Mrs. Wm. H. Wentworth, Mrs. Henry Wharton and Mr. Everett P. Wheeler.

The area devoted to the special exhibition in the Metropolitan Museum of Art was 9,070 square feet. It was open daily from September 30 to November 30, 1909, the hours being from 10 A. M. to 6 P. M. on week days and from 1 to 6 P. M. on Sundays; on Saturdays the building was open until 10 P. M. During this period 300,775 persons visited the Museum. All appreciative visitors, as well as the writers for the press, recognized that the exhibition possessed the very highest value for all students of one of the great schools of painting. When we bear in mind the fact that most of the visitors took advantage of the opportunity to view the other splendid treasures of various kinds brought together in the Museum, we can hardly err in believing that the educational result was commensurate with that attained by the Philadelphia Centennial, the Chicago, or the St. Louis expositions.

The Museum issued a two-volume catalogue of the dual-exhibition — Volume I of 204 pages being devoted to the Dutch masters, and volume II, of 178 pages, containing the list and description of American paintings, furniture, silver, etc. These volumes were printed in two styles, one being in paper covers for popular sale, and one being an edition de luxe, cloth bound and superbly illustrated.

We have all read of the Indians who were settled on Manhattan Island before the arrival of Henry Hudson, but few realize how many relics of these aborigines have been found here, especially at the upper end of the island. A large and valuable collection of these relics was shown in the American Museum of Natural History, at Central Park West and Seventy-seventh street. This exhibition, which will be permanent, was opened

can
Museum
of Natural
History

September 15, a considerable part of the Plains Hall on the ground floor being devoted to it. It was open on week days from 9 A. M. to 5 P. M.; on Sundays from 1 to 5 P. M. The general interest excited in these relics of the past was demonstrated by the fact that many school teachers brought entire classes to the Museum to see the exhibits, which were also made the basis for lectures delivered under the auspices of the Board of Education. Photographs were supplied for slides to serve as illustrations for these lectures. It is announced on behalf of Dr. H. C. Bumpus, Director of the Museum, that this special collection will be elaborated from time to time. From September 15 to October 15, the exhibition was seen by 73,714 persons. The large increase in the number of visitors during the months of September, October and November, 1909, over the number admitted in the same months of the previous year, testifies to the interesting character of this exhibition. The figures for these three months in 1908 are 155,433, and in 1909, 221,587, an increase of 76,154. There was issued a classic monograph by Dr. Clark Wissler describing the Indian relics of the time of the discovery, acquisition and colonization of Manhattan Island. Besides this a pamphlet on the same subject, entitled: "The Indians of Manhattan Island and Vicinity," comprising 54 pages and illustrated with 20 figures, was prepared by Mr. Alanson Skinner, of the Department of Anthropology of the Museum.

graphical
Society

The area covered by the exhibition in the rooms of the American Geographical Society, 15 West Eighty-first street, was about 1,572 square feet, and the very important collection assembled here, consisting of rare books, maps, etc., relating to Henry Hudson, Robert Fulton, and their times, was shown for thirty days, from 9 P. M. to 5 P. M. Undoubtedly a much larger number would have been attracted, had there not been some misunderstanding as to admission. The librarian, Mr. F. S. Dellenbaugh, states that all visitors expressed great

appreciation, and that there was general regret that the exhibits could not be retained longer. A catalogue was issued, covering 41 pages and giving a detailed description of the different objects, with four full-page reproductions of the title-pages of rare books, and a folding plate, reproducing the title-leaf of the 1625 edition of "Purchase His Pilgrimes." This catalogue may be had free on application to the librarian of the Society.

The participation of the American Society of Mechanical Engineers (Engineering Building, 29 West Thirty-ninth street) in the Celebration took the form of an exhibition of models of the first vessels to which steam was applied for navigation, and models of the latest steamships, thus illustrating the immense changes which have taken place in one century, and enabling visitors to mark the difference between the early and modern types. Drawings and documents relating to Fulton's early work served as a further illustration of the means employed to solve the problem of steam navigation. A very interesting contribution to this exhibition was a portrait of Fulton by himself. The greater part of the exhibits were placed in the Council Room of the Society, and about 700 square feet of floor space was occupied by them. According to Mr. Calvin W. Rice, Secretary of the Society, the number of visitors from the middle of September to the middle of October, during which time the exhibition was open from 9 A. M. to 5.30 P. M., was about 500. Those who came displayed great interest, and the names of many important people appear on the register. No doubt there would have been a larger number of visitors had the real value of the exhibits been generally known.

At the Brooklyn Institute Museum, situated on Eastern Parkway, the special exhibition was open from 9 A. M. to 6 P. M. on week days, from 2 to 6 P. M. on Sundays, and on Thursday evenings from 7.30 to 9.30. Here were shown representations of the animals of Long Island and implements used by the Long Island Indians. These objects, which can

Brooklyn
Institute still be seen in the Museum, are placed in two halls having about 2,000 square feet of floor space. During the months of September and October 50,000 visitors came to the Museum; Mr. F. A. Lucas, Curator-in-Chief of the Museum, reports that general interest was excited regarding the lives of Hudson and Fulton, and also in the history of the Hudson River Valley. This interest led to general reading on these subjects, and to a better understanding of what the work of Hudson and Fulton meant for the prosperity of our land. The exhibition, as such, was removed on December 15, 1909, but much of the material assembled will form a part of the permanent Historical Collection of the Museum. The exhibit in the Children's Museum occupied about 150 square feet. Miss Gallup states that it was viewed by nearly 20,000 persons, between the first of September and the middle of December. The children who took part in the Celebration appeared to be much interested in the objects shown.

One of the most noteworthy of the printed documents referring to the Revolution exhibited in the Brooklyn Institute was an old "Broadside" printed in New York, March 25, 1783. This was loaned by Col. Henry T. Chapman. We are here given a vivid idea of the time required for the transmission of news in that day, for this sheet tells us that the first news of the signing of the preliminaries to the treaty of peace at Paris on January 20, 1783, reached Philadelphia, by way of Cadiz, Spain, on the 27th of March.

Fraunces'
Tavern Fraunces' Tavern, 54 Pearl street, under the care of the Sons of the Revolution, attracted daily, for the two or three weeks of the Celebration, as many as 150 visitors. This building, originally erected in 1719, and the scene of Washington's farewell to his officers on December 4, 1783, was restored in 1907 by the New York Society of the Sons of the Revolution. During the Celebration it was open daily, except Sundays, from 9 A. M. to 6 P. M. The permanent exhibition

of Revolutionary relics, occupying one of the large rooms, was increased during this time by loans and donations, many of which still remain in the building. The objects shown here gained in interest from being placed in surroundings which recalled the past, and the impression made upon the visitors was correspondingly enhanced.

The special exhibition of the City History Club, 21 West City Forty-fourth street, was on view through the month of October. It occupied about 300 square feet of floor space and embraced illustrations, photographs, maps and plans relating to the history of the City of New York; it was seen by over 150 persons. Miss Frances Fuller, Secretary *pro tem.* of the Club, informs us that this exhibition served to create interest in the Historical Guide Book of the City of New York, published by the Club, and also in its other work.

The College of the City of New York, at St. Nicholas avenue and 139th street, exhibited in the historical museum of the institution for several weeks during and after the Hudson-Fulton Celebration, a collection of charts, views, manuscripts, and relics representing Old New York. Among these objects were original prints of New Netherland and New Amsterdam, by Nicholas J. Visscher, about 1650, and by N. Visscher, 1690; Lotter's "New Jorek," 1720; contemporary plans and views of the Revolution period, showing the movements of Washington and Howe in this vicinity during the campaign of 1776; Revolutionary battle relics; portraits, pictures of residences and letters of old New Yorkers; bronze busts of Washington, Lincoln and Fulton by Houdon and Volk; and other material suggested by the Celebration.

It need scarcely surprise us that when so much was to be seen and such manifold claims were made upon the attention of both strangers and residents, the modest but interesting exhibition of the Long Island Historical Society, corner of Pierrepont and Clinton streets, Brooklyn, should have been

comparatively neglected; nevertheless, the librarian, Miss Emma Toedteberg, announces that a limited number of appreciative visitors, about 50, were attracted. The exhibition was open daily, except Sundays, from 8.30 A. M. to 6 P. M., the most interesting object being an original manuscript volume of Danker's and Sluyter's "Journal of a Voyage to New York in 1679-80."

National
Arts
Club

The building of the National Arts Club is situated on Twentieth street facing Gramercy Park, and was formerly the residence of Governor Samuel J. Tilden. Here was given an exhibition of pictures and historical objects covering the history of "Three Centuries of New York" under the joint auspices of the National Arts Club and the American Scenic and Historic Preservation Society. Mr. Frederick S. Lamb and Mr. Reginald P. Bolton were the Chairmen of the Committees of the respective organizations. The galleries devoted to this were about 138 feet long and 28 feet wide, having an area of nearly 3,900 square feet. The exhibition, which was open daily for six weeks, between the hours of 10 A. M. and 6 P. M., was visited by at least 10,000 persons. It consisted of paintings, photographs, drawings and other interesting material, illustrating the growth and progress of New York from the time of Henry Hudson to the present day. The chairman of the Art Committee of the Club, Mr. Frederick S. Lamb, writes that this unique exhibition was greatly appreciated, being pronounced by many to be the most noteworthy of its kind ever held. By the kind permission of the owners photographic slides of many rare prints were taken, to be used for educational purposes.

N. Y.
Genea-
logical
and Bio-
graphical
Society

In the rooms of the New York Genealogical and Biographical Society, 226 West Fifty-eighth street, between Broadway and Seventh avenue, there was a special exhibition of old deeds, manuscripts, books, portraits, etc., relating to the history of the United States, up to and including the War of 1812. It was open daily, except Sundays, from 10 A. M. to 5 P. M., and con-

tinued from the latter part of September to the first of November. A catalogue was issued containing descriptions of the various objects of interest.

The exhibition in the building of the New York Historical Society, 170 Central Park West, was the official *Fulton* exhibition of the Celebration. It was open from September 27 to October 30, 1909, including Sundays, from 9 A. M. to 5 P. M., and was shown in the Henry Dexter Hall, occupying an extent of nearly 3,000 square feet. The number of visitors was 2,936. The catalogue of this exhibition, which was undertaken in cooperation with the Colonial Dames of New York, forms an octavo of 60 pages, embracing 354 items, and embellished with a handsome colored plate of the fine portrait of Robert Fulton by Thomas Sully. A special feature of the exhibition was the collection of portraits of Robert Fulton and of portraits, miniatures, manuscripts and other objects of historical interest relating to his life and times. The grouping together of so many objects illustrating the individuality and career of this distinguished man, served to impress those who saw them with his historic significance, and for this result we are greatly indebted to the efforts of Mr. Samuel Verplanck Hoffman, the President of the Society.

The portrait of Fulton by Benjamin West, shown in the Historical Society's exhibit, is justly regarded as one of the best works of our American painter, who became president of the Royal Academy in London. Fulton himself was an artist of considerable ability, and pursued his art studies in London under West's direction. Among his works is a most interesting portrait of himself, which was shown in the exhibition of the American Society of Mechanical Engineers. Although this does not equal West's portrait in artistic merit, like other attempts of artists to portray their own features it gives us something not to be found in other portraits, namely, the idea, or perhaps we should rather say the ideal, the artist has formed of himself.

**New
York
Public
Library**

The special exhibition in the Lenox Branch of the New York Public Library was open during the months of September, October and November, 1909, daily, except Sundays, from 9 A. M. to 6 P. M., and occupied 3,612 square feet of space. The number of visitors was about 5,000. Dr. John S. Billings, Director of the New York Public Library, writes that the great interest aroused by the exhibits has been since shown by the numerous inquiries in regard to single pieces or general groups displayed at that time; and the management has done everything possible to satisfy those interested in the matter. The material is always accessible for reference and can easily be traced by consulting the catalogue of 86 pages issued for this occasion, and entitled: "List of the Prints, Books, Manuscripts, etc., relating to Henry Hudson, the Hudson River, Robert Fulton, and Steam Navigation." This gives, in 745 entries, a description of the material shown in the exhibition.

**The
Aquarium**

The special exhibition in the Aquarium Building, in Battery Park, was open for fifteen days, from September 25 to October 9, inclusive; and during this time the building was open daily, including Sundays, from 9 A. M. to 5 P. M. The Director, Mr. C. H. Townsend, states that there were 369,887 visitors, a daily average of 24,659. On September 26 the number of persons admitted to the building was 64,795, the greatest number that ever entered the Aquarium in a single day. It was quite evident that the visitors, who filled the house to the doors all through the day, fully appreciated the interest and importance of this display of our native fish. A special effort was made before the Celebration began to fill the tanks and pools with the greatest number and variety of aquatic forms ever crowded into the tanks. Those containing the various species present in the Hudson River at the time of its discovery by Henry Hudson were marked by cards in the colors of the Hudson-Fulton flag. During the Celebration eleven Hudson-Fulton flags were displayed on the roof of the building, which

possesses in itself considerable historic interest. Erected in 1807 by the United States Government as a fort, it was, after the War of 1812, called Fort Clinton; later, as Castle Garden, it was the scene of Jenny Lind's triumphs. From 1855 to 1890 it served as the portal to the New World for 7,690,606 immigrants.

It is estimated that about 150,000 visitors profited by the New York Botanical Garden, in Bronx Park, so ably managed by the Director, Dr. Nathaniel E. Britton. This continued from the first of September to the middle of December, and extended over 200 acres. The museums were open daily, including Sundays, from 10 A. M. to 5 P. M., and the conservatories from 10 A. M. to 4 P. M.; the grounds were always open. In the grounds and conservatories were exhibits of plants, shrubs, trees and natural woodland; in the museums were shown plant-products utilized in the arts, sciences and industries. All trees growing on Manhattan Island and in the Hudson River Valley at the time of Hudson's arrival were marked with the letter H. The effect of this exhibition upon the visitors was to arouse their curiosity as to the characteristics of our native trees, and many purchased the special descriptive list of the native trees of the Hudson River Valley, by Mr. Norman Taylor, prepared for use during the Celebration, and included in the reprint of Bulletin 29 of the New York Botanical Garden. This also comprises a descriptive guide to the grounds and collections, and forms an octavo of 166 pages, with 40 plates, many of which represent typical specimens of various species of trees.

The tree labels placed on the trees in many parks of Brooklyn and Queens boroughs by the Department of Parks have served, in the opinion of the Arboriculturist, Mr. J. J. Levison, to disseminate among millions of people a knowledge of their native trees, and in this way an appreciation of the arboreal wealth of our land has been fostered. An additional small

enameled sign was hung on those labeled trees that were indigenous to the Hudson River Valley in 1609. This special label read: "This species is a native of the Hudson River Valley." It requires an occasion like this to bring about such a good result; and as the labels will be left on the trees for a year, the educational effect will be still more widespread. Mr. Levison believes that similar work in other localities may have been stimulated, and states that the school teachers and other visitors made their appreciation noticeable by their remarks.

New
York
Zoolog-
ical
Park

The various species of birds and mammals native to Manhattan Island and its immediate neighborhood, to be seen in the New York Zoological Park, were scattered through the northwestern quarters of the Park, which was open daily, including Sundays, from 9 A. M. until an hour before sunset. From September 25 to October 9 the number of visitors was 76,036; and the Director, Dr. William T. Hornaday, remarks as a noteworthy fact that a relatively small proportion of these were residents of this city. The greater number of the birds and mammals were to be seen in the Small Mammal House, the Large Bird House, and the Aquatic Bird House, where 150 species of mammals and birds were prominently indicated to visitors. Some of the reptiles in the Reptile House were also indicated, as was the American bison, for this species inhabited the southwestern part of New York State at the time of Hudson's coming. The special guide-book, written by Dr. Hornaday, consists of 46 pages and contains 71 illustrations. It is entitled: "The Wild Animals of Hudson's Day and the Zoological Park of our Day," and embraces a general view of the scope and character of zoological parks in our time. Dr. Hornaday believes that we can scarcely overestimate the moral effect of the diversion created by the Hudson-Fulton Celebration from the consideration of the material things of to-day to the interesting facts of history; for, in the pursuit of wealth and pleasure, the lessons of history are apt to be neg-

lected and forgotten. Thus, "any influence which causes the on-rushing multitude of the City and State of New York to pause and look backward upon the great events of the Past, exercises a wholesome and beneficent influence upon the people."

The Reformed Protestant Dutch Church of the City of New York made an exhibition of relics connected with the long ^{Re-}formed Dutch ^{Church} history of the Church, which was founded in 1628 and represents the earliest religious organization in New York. These objects were shown in the Chapel of St. Nicholas, corner of Fifth avenue and Forty-eighth street, and the exhibition was open to the public from 9 A. M. to 5 P. M. daily, during the period of the Celebration.

In Richmond Borough, a collection of Indian implements, ^{Staten} weapons, etc., from various parts of ^{Island} Staten Island, was shown by the Staten Island Association of Arts and Sciences, in the Borough Hall, New Brighton, Staten Island. It was open every afternoon from 1 to 5 P. M., except Sundays, Mondays and holidays; on Saturdays it was open from 10 A. M. to 5 P. M. The Curator-in-Chief, Mr. Charles Louis Pollard, reports that the extent covered was 1,875 square feet and that there were 1,511 visitors from September 4 to November 1, the duration of the exhibition. In view of the small population of the borough, this signified that the interest in the subject illustrated was quite general. The educational value of this exhibition was especially marked in the case of many children, too poor to make the trip to New York, since, by means of the models in the collections, they were shown how the Indians built their wigwams, what kind of furniture was used by the Dutch settlers, and what were the distinctive features of their houses. The collection of Indian relics remains as a permanent exhibit and the model of the Billopp House will be set up again and put on view later. A brief but satisfactory notice of the objects shown was issued as Bulletin No. 14 of the Museum.

Van
Cort-
landt
House

The special exhibition in the Van Cortlandt House, in Van Cortlandt Park, lasted from June until November, and attracted as many as 3,000 persons in a single day. It was open daily from 9 A. M. to 5 P. M. This fine Colonial mansion, built in 1748, and containing furniture of the period, is one of the oldest houses within the area of Greater New York. The exhibition was under the patronage of the Colonial Dames of the State of New York, who are custodians of the building, and Mrs. Alice Greenough Townsend, Recording Secretary of the Society, notes that the Colonial Dames contributed thirteen of the portraits loaned to the Metropolitan Museum for their splendid collection; one of these, that of Lady Scott by Blackburn, was given the place of honor in the illustrated catalogue. Many fine specimens of Colonial silver were also loaned to the Museum by members of the Society. In the Van Cortlandt House were shown Wedgwood medallion portraits and mezzotints of illustrious personages who lived prior to the Revolution; cartoons and caricatures of political events, etc. This old house with its Colonial furnishings, gave to those who came here a better idea of the surroundings in which the founders of our country lived, moved and had their being, than could be acquired by long study of printed records. There have been nearly 300,000 visitors during the past year.

Wash-
ington's
Head-
quarters

During the month of October, it is estimated that about 3,600 persons visited Washington's Headquarters, the old Jumel Mansion, situated in Roger Morris Park, Edgecomb Road and 162d street, and erected about 1763. This building is in the custody of the Washington Headquarters Association, under the Department of Parks, and was open to the public daily, including Sundays, from 9 A. M. to 5 P. M. As no special exhibition had been arranged, the collection embraced only those objects always to be seen in the building, special features of which are the specimens of Colonial furnishings, pictures, etc., and also the Bolton Collection of war relics of the Revo-

lution. Here, as in the other old houses of Colonial times, the atmosphere of the past exercises its subtle charm, and helped to conjure up a picture of the home life of long ago.

The various exhibitions aroused in the minds of the beholders a more lively understanding of the history and development of our city, and while delighting the eye, conveyed an important lesson in the very best and most effective way — that is, unconsciously. A population like ours is greatly in need of some powerful stimulation of this kind to weld together all of its heterogeneous elements.

Following is a summary of special Hudson-Fulton exhibitions in the City of New York:

INSTITUTIONS	Dates	Square feet	Summary of Exhibitions
			Attendance
American Geographical Society.....	About 30 days...	1,572	1,000
American Museum of Natural History.....	Sept. 15-Oct. 15...	450	73,714

Society. 8vo. 47 pp., 71 plates.

CHAPTER XIV

INAUGURAL NAVAL PARADE

THE outdoor ceremonies of the Celebration began with the inaugural naval parade on Saturday, September 25, 1909.

Before describing the parade itself, and in order that some idea may be had of the diverse responsibilities and great labors of the Naval Parade Committee, it is necessary briefly to review the work of that Committee. The first Chairman of the Committee was the late Rear Admiral Joseph B. Coghlan, U. S. N., with Captain Jacob W. Miller as Vice Chairman. Upon Admiral Coghlan's death December 5, 1908, Captain Miller succeeded to the Chairmanship and upon him devolved the principal labor of working out the details of great naval parades.

Report of
Naval
Parade
Com-
mittee

In his final report to the President of the Commission, dated December 7, 1909, Captain Miller says:

"It is interesting to note that at the first meeting of the Hudson Ter-centenary Joint Committee held on December 16, 1905, three distinct aims were advocated as worthy of serious attention:

"*First*, that a permanent memorial should remain after the Celebration;

"*Second*, that a naval parade should be one of the prominent features; and

"*Third*, that the keynote of the festivities should be marine in its nature.

"The evolution of the Commission has been generally along these lines, although it still seems doubtful if sufficient permanent memorials worthy of the anniversaries are assured. Beginning with the sole object of doing honor to Hudson, our horizon was enlarged, and through successive municipal,

state and indirect governmental supervision, resulted in a Celebration of international importance.

"This broadening development naturally left its impress upon your Committee. Starting as a body with jurisdiction over one day's parade, its duties were enlarged to include all those upon the water; the responsibility of building the Clermont, and the official pier. As time went on, its breadth of activity embraced correspondence and arrangements with our own and foreign fleets; their anchorage sites; the entertainment of their crews; the placing of buoys from New York to Newburgh; the building of suitable floats as landing places; the policing, hospital protection, and management of those floats; the securing of free transportation through Greater New York for our naval guests, and many other minor but important marine duties."

Referring to the first idea above mentioned, namely, that a permanent memorial should remain after the Celebration, Capt. Miller says:

"Through the untiring efforts of another committee, a monument to Hudson is assured; but the Commission, acting as such, has not made certain that a proper memorial of Fulton be built. It has, however, endeavored to restrict a spot upon the water-front which should be dedicated to his memory."

The report then recalls the facts attending the union of the Hudson Ter-centenary Joint Committee and the Fulton Centennial Celebration Committee; and also the unavailing efforts to secure cooperation between the Hudson-Fulton Celebration Commission and the Robert Fulton Monument Association, which are more fully described in Chapter I. It then continues:

"From that date your Committee has ever been of the opinion that the shoals within the pier-head line, along Riverside Drive, should be devoted to the uses proposed by Mr. Vanderbilt's Association, Columbia University, the Naval Militia of the State, and various other marine interests, which

Gate

Water
Gate

since the Spanish-American War have been active in that good cause. This Committee, as well as they, have always appreciated the advisability of segregating, at that locality, a proper landing place for our own and foreign navies, surrounded by other marine, educational and public structures, all planned on a comprehensive and artistic scale; to be built as money could be provided by the city, State or private subscriptions — in short, to retain the Hudson shore between 97th and 129th streets for the benefit of the Navy, the State, the city and the people, at a point where all could ever have access to the river.

“With that general end in view, and in order to give an object lesson of the possibilities of the neighborhood, your Committee obtained permission to build a temporary reviewing stand and landing place at 116th street, but objection having been made by the Department of Parks, it was subsequently placed at 110th street. Lack of funds prevented us from carrying out in full the artistic designs of the Committee’s architects, Messrs. Henry Hornbostel and J. Otis Post, although the structure has been justly admired. It served the purpose for which it was erected, and proved its capability for landing over 6,000 men from the United States Atlantic Fleet on the morning of Thursday, September 30th, a feat which otherwise could not have been accomplished. Even it, however, was inadequate to give proper accommodations to the 32,000 officers and men afloat on the warships between September 24th and October 9th; therefore eighteen other stations, including floats, telegraph, telephone and express offices, were constructed. The temporary water-front accommodations represented an expense of over \$70,000, an amount which would go far toward erecting durable buildings. Economy, as well as civic pride, are both forceful arguments why all should unite in urging the need of permanent facilities, where visiting foreign marine guests can be received with dignity by the

municipal authorities. I, therefore, refer again to the fact that one of the original ideas of this Commission was to leave a definite impress of its existence upon New York, and no better one can be advocated than the improvement of the flats off Riverside Drive, opposite the point where the navies anchor, and where Nature lends itself so easily to artistic improvement, on the river discovered by Hudson, and rendered further famous by Fulton."

Referring to the idea of naval parades as a prominent feature of the Celebration, Capt. Miller says:

Two
Naval
Parades

"As above stated, it was the original intention in December, 1905, to have one naval parade from New York to Newburgh and return, as a convoy to the Half Moon and Clermont. Subsequently on March 24, 1909, it was finally determined to initiate the Celebration on Saturday, September 25th, with a water pageant in New York Harbor. The reasons for this were twofold:

"*First.* That the keynote of the Celebration being maritime, the first day should be devoted to a proper reception of the Half Moon and Clermont and the visiting men-of-war.

"*Second.* That the different speeds and types of vessels prevented a proper spectacular trip over a route as long as that from New York to Newburgh; and that the effect at Newburgh—the spot where the Lower Hudson Committee was to turn over the Half Moon and Clermont to the Upper Hudson Committee—would be heightened by arranging to have all the different subdivisions of the fleet arrive there at a given time on October 1st. I have to thank the gentlemen of Newburgh for their loyal cooperation with this Committee during the long correspondence, and the arrangements of executive detail, which resulted in the great success of the pageant from New York to that city."

Concerning the building of the Clermont, Capt. Miller's report says:

Building
of the
Cler-
mont

"During the spring of 1908, Rear Admiral J. B. Coghlan, U. S. N., as Chairman of the Naval Parade Committee, began correspondence with Mr. Robert Fulton Ludlow, with a view of obtaining data concerning the original Clermont, and on October 14th of that year he made a report to the Trustees regarding the progress of his investigations. He continued with much energy his laudable efforts until his death, which occurred on December 5, 1908. On December 23d the Commission passed a resolution eulogistic of this distinguished and much beloved officer. At a meeting on December 23d it was decided that the Clermont should be built as an exact reproduction of the original vessel, and with steam power. On January 27, 1909, the cost of building the Clermont was estimated at \$40,000; but having been elected on May 5, 1909, Chairman of the Naval Parade Committee, I sent out bids, and was enabled to close the contract for the building of the vessel with the Staten Island Shipbuilding Company for \$14,150. The Clermont was finally completed, including all expenses and extras, at a cost of \$15,865.15."

The report gives certain details concerning the building of the Clermont which are more fully given in Chapter VIII, and then continues as follows:

Coop-
era-
tion
Acknowl-
edged

"It is impossible within the limits of a report such as this to give details of all the work accomplished. It embraced cooperation with the yacht clubs, Naval Militia, Reception Committee, and many other organizations and individuals, and a long correspondence with the Rear Admiral commanding the United States Atlantic Fleet, in which I was ably assisted by Captain Harry George, U. S. N., Retired, who volunteered to take up this important work. The Naval Reserve Association, under the leadership of Mr. J. P. O'Shea, relieved this Committee of all details in obtaining the Hippodrome for the entertainment of the men-of-war-men on September 27th. The performance was attended by over 5,000 men from the visiting ships.

"The generosity of Columbia University in providing its grounds for the Garden Party, and for the entertainment to the sailors on Saturday, October 2d, should not be forgotten.

"The civic pride of the transportation companies of the city of New York which furnished free passes to the officers and men of our own and foreign navies should always be held in remembrance. The cooperation of Mr. A. N. Spooner, Commissioner of the Department of Docks and Ferries, in all matters pertaining to the establishment of landing places, was the subject of a special letter to him from the Commanding Officer of the United States Atlantic Fleet. To those gentlemen who kindly loaned their vessels for patrol, scout and escort duty, thanks are rendered.

"As the date of the Celebration approached, the labors of the Committee, Staff, Aids, Flag Officers, and Chiefs-of-Divisions became excessive. They sacrificed their personal business to the public service, and I have to thank them all for duty well and loyally performed.

"To the officers and men of the Navy and Naval Militia — to both of which Services I have had the honor to belong — I desire to express my great appreciation of their cordial cooperation during the Celebration.

"Finally, for the benefit of similar ceremonies, experience has proved that, in future water parades of large extent, more attention should be given to the comparative steam power of vessels; that nothing below nine knots should be allowed in the formation, and that yachts should be placed ahead of the steamboat squadron.

"In public functions of the magnitude of the recent Celebration, the arrangement of many important details are often left to the last moment. This was especially noticeable at the reviewing stand at 110th street, where on Saturday, September 25th, certain of our distinguished guests were submitted to much inconvenience on account of not having tickets for

Lessons
from
Experi-
ence

numbered seats. No hospitality is more appreciated at a public gathering than a ticket entitling a person to a definite place."

Remark-
able
fact
and
Crowds

In order to understand the magnificence of the naval ceremonies on the Hudson River and in New York Harbor on Saturday, September 25, it should be stated first, that for several days prior to the 25th vessels of the United States Navy and of foreign governments had been steaming into the harbor and anchoring in the river, at a distance of about 400 yards from bow to bow, until on the morning of the 25th there was a column of war ships ten miles long, reaching from 42d street to Spuyten Duyvil Creek. This is believed to have been, with one exception, the largest modern war fleet numerically ever assembled, and the largest fleet of war vessels of different nations without exception ever gathered in one place.

Early in the day, spectators began to assemble on both banks of the Hudson River, the greatest numbers being massed from 72d street northward. The sloping banks of Riverside Park, from 72d street to the Claremont Viaduct, presented a natural amphitheater unequalled in the world for beholding a spectacle such as was to be presented, and it is doubtful if ever such a mass of humanity was ever gathered together in one place as was assembled in Riverside Park. The estimates of the number of spectators between 72d street and 130th street ranged from 750,000 to 1,000,000; but, while this probably represented the majority of spectators, it did not by any means represent the whole number of those who occupied coigns of vantage in office buildings, on roof-tops, on piers, streets, lawns, parks, and the heights of the Palisades, from the Battery to Spuyten Duyvil on one side of the river, and from Jersey City to Fort Lee on the other. If the parade itself was memorable, the vast multitude of spectators who witnessed it was equally so.

The vessels participating in the parade were divided into squadrons as follows:

Scout Squadron.....	8
Escort Squadron.....	—
Naval Militia vessels, State of New York.....	2
Torpedo boats.....	8
Submarines.....	6
Half Moon.....	1

Assistant	William Lee, Jr.
Assistant	William F. Wendell

Compo-
sition of
Naval
Parade

The vessels comprising the Fifth Squadron numbered 658, and were assigned anchorages along both the New York and the New Jersey sides of the Hudson River, respectively, from 80th street, New York, to Fort Washington Point, and from Guttenberg, New Jersey, to Fort Lee—an extent of seven miles.

After the anchorage lists were closed on the afternoon of September 24th, various yacht clubs along the Hudson River requested anchorage assignments in a body for the various craft belonging to their respective clubs, and they were granted; but it was too late to issue individual permits, consequently the names of such pleasure vessels do not appear, and are not counted in the following report.

Also, on the morning of the parade, September 25th, numerous excursion steamers, yachts, barges, and other vessels requested berths for anchorage, which were also granted; and the total number of such craft, not shown by name and character on the report of the Fifth Squadron, is over 150, which would make the total number of vessels anchored along the line of the parade fully 800. In the following are shown the types and names of the vessels making up the several divisions of the Fifth Squadron:

Fifth Division

Chief of Division	J. Charles A. Starbuck.	
First Captain	H. A. Sayre, M. C. S.

At 10.30 A. M. several divisions of parade assembled with the Half Moon and Clermont in the Kill van Kull off Constable Point, N. J., and during the morning and early afternoon hours manoeuvred along the northern shore of Staten Island and the Bay Ridge shore of Long Island, in order to give the citizens of Richmond and Brooklyn Boroughs a sight of the reproductions of the two famous vessels.

Soon after the Half Moon and Clermont left their anchorages to join the squadron, the former moving under her own sails and the latter propelled by her own steam power, the engine of the Clermont slipped a set-screw in a cam on the valve-gear rock-shaft, and came to a stop to make repairs. While thus lying-to near Tompkinsville, about 10.45 A. M., the Half Moon bore down on the Clermont's port quarter, and, unable to avoid her, rammed her just abaft the boiler, breaking the rail, tearing away a stanchion, and staying in a plank below the wearing piece. The Half Moon carried away her own figurehead and some of her stays. For a while the Half Moon was locked into the Clermont's sail with her anchor, but presently the vessels were separated. Meanwhile, the tug Dabelline, while assisting in clearing away the Half Moon, collided with the main boom of the Half Moon and carried it

away at the sheet. The collision of the Half Moon and Clermont caused more amusement than damage, suggesting the idea that the spirit of the old Half Moon rather resented the new-fangled idea represented by the Clermont and was gently hinting to the latter to "clear the track" so that the ship could show what she was capable of doing. The slight repair, having quickly been made, the vessels proceeded on their way, from the very start the objects of continuous gun salutes and cheering, to which the Half Moon responded with the firing of her guns.

Cercarionies at Staten Island

As the Half Moon drew near Stapleton, S. I., the Hon. George Cromwell, President of the Borough of Richmond, Mr. Eugene Lamb Richards, Jr., Chairman of the Richmond Committee of the Commission, and a delegation of the Richmond Citizens' Committee put off in a launch to greet her. Arriving at the Half Moon, Mr. Richards said to Lieutenant-Commander Lang, impersonating Henry Hudson:

"Henry Hudson, when you came to our shore three hundred years ago we met you with poisoned arrows. To-day we greet you and grant you full freedom of our shores."

President Cromwell also offered his felicitations. "Henry Hudson" made appropriate reply, and the crew of the Half Moon at his order gave "three American cheers."

Similar greetings at this point were planned for the Clermont, but she lay disabled at a distance, and when her repairs were completed she proceeded directly to Bay Ridge, Brooklyn.

Meanwhile, the Richmond Committee returned to the Municipal Dock at Stapleton, where a stand had been erected for further ceremonies. Mr. Richards, who presided, spoke as follows:

"Fellow-Citizens of Richmond, Ladies and Gentlemen: Richmond Borough has been given the honor of opening the official ceremonies of this Celebration. This is appropriate, for here on our shores it was that Hudson first landed.

"But we are here to pay tribute to more than either Hudson or Fulton. We are here to pay tribute to the spirit of progress, the spirit of endeavor, a spirit which comes from three things which are at least worth while, and in which we Americans lead the world — perseverance, courage and love of country.

"These events and these ceremonies are big enough for all. All nations, creeds and conditions are represented here to-day, and all will do their share to encourage progress, and to acclaim the man of endeavor who through untold hardships and obstacles reaches the reward of his own conscience and the approval of his fellow-men.

"Fellow-Citizens, Ladies and Gentlemen: We will now be favored with addresses by representatives of the Holland Society and of the other patriotic societies on the Island."

Addresses were then delivered by Hon. George Cromwell, Hon. Calvin D. Van Name, Mr. Ira K. Morris, Hon. Howard K. Bayne, and Mr. Charles Barton.

Staten Island's participation in the Naval Parade was in charge of Messrs. Lewis Nixon, William Horn, Pliny E. Davis, William J. Davidson, and Thomas A. Fulton.

The Half Moon and escorting vessels then proceeded across the head of the Narrows to the Brooklyn shore. Here, for miles, every pier, bulkhead and other advantageous place was thronged with spectators. On the Shore Drive and in the grounds of the Crescent Athletic Club at Bay Ridge, in which latter the local ceremonies took place, the throngs were particularly dense.

When the boats came in view of the Athletic Club grounds, the Third Battery, which was stationed there, fired a salute of 21 guns, and a chorus led the multitude in singing the Star Spangled Banner and other patriotic airs. In the intervals there was enthusiastic cheering. When the Half Moon and Clermont reached a point opposite the Club House, Hon. Bird S. Coler, Borough President; Col. Willis L. Ogden, Chairman of the Brooklyn Committee; Col. William Hester,

Commander Herbert L. Bridgman, Dr. N. S. Boynton, and other prominent citizens put off in a launch to the two historic replicas, at which President Coler and Chairman Ogden made brief speeches of compliment.

Squad-
rons Fall-
ing into
Line

While the foregoing manoeuvres of the Half Moon, the Clermont and escorting vessels and the ceremonies attending them were taking place, the First Squadron assembled in column heading southward, the leading vessel being at bell-buoy No. 12 $\frac{1}{2}$, in mid-stream between St. George, S. I., and Bay Ridge, Brooklyn, and the remaining vessels to the northward along the westerly line of the General Eastern Anchorage of the Upper Bay; the Second Squadron, on the same line to the rear of the First Squadron; the Third and Fourth Squadrons in and near the Southeastern Triangle of the General Eastern Anchorage Grounds; and the Fifth Squadron to the eastward of the westerly line of the General Eastern Anchorage Grounds. The Police and Public Safety, Patrol and Scout Squadrons, except such vessels as were detailed elsewhere on special duty, assembled northward of red buoys No. 14 and S. "A."

About 1.15 P. M. the leading vessel of the First Squadron turned with port helm and proceeded up the bay, every other vessel of this squadron and of the Second Squadron turning in like manner and falling into line when passed by its predecessors. By other manoeuvres the vessels of the Third, Fourth and Fifth Squadrons successively took their positions in the moving column.

While these operations were taking place, the Scout and Escort Squadrons accompanying the Half Moon and Clermont proceeded northward along the Brooklyn shore and through the Red Hook channel, and passing Governor's Island took their places at the head of the procession. The Patrol Squadron and the Police and Public Safety Squadron were disposed where necessity required.

The whole procession, presenting an impressive spectacle, then steamed up the river at the rate of about eight miles an hour until it reached the southernmost of the anchored men-of-war, and thence the speed was about five miles an hour. Upon reaching the men-of-war, the Scout Squadron and the Escort Squadron turned to the eastward of the men-of-war and steamed to the vicinity of the Official Landing at 110th street, the men-of-war successively saluting the Half Moon and Clermont with 21 guns. The Half Moon anchored near the northern pier of the Official Landing and the Clermont near the southern pier, amid the cheers of hundreds of thousands of throats, the booming of cannon, and the music of the band at the reviewing stand.

Meanwhile, the Squadrons which had followed the Escort Squadron as far as the southern end of the war fleet, at that point turned to the westward and steamed northward between the war-ships and the New Jersey shore. Upon reaching the northern end of the war fleet, they turned eastward and southward and passed in stately procession before the officials on the stand at the Official Landing and the crowds gathered in Riverside Park.

Before the arrival of the Half Moon and Clermont at the Official Landing, the Commanding Officer of the Naval Parade and his staff landed and announced the approach of the Half Moon and Clermont, and soon thereafter the formal reception of the two vessels took place.

First, the quaint little ship's-boat of the Half Moon, pulled by lusty Dutch sailors, brought ashore "Henry Hudson" and his mate, dressed, as were all the crew, in the picturesque costumes of the period which they represented. In a similar manner other representatives of the Netherlands were brought to the landing, the President of the Commission, General Woodford, descending from his seat and greeting them on the pier.

"Captain Hudson" then said:

"I have the honor to report my arrival to the gentlemen of the Netherlands Commission, who built the Half Moon."

Thereupon, the Hon. S. P. van Eeghen, President of the Amsterdam Chamber of Commerce and President of the Netherlands Hudson-Fulton Commission, addressing General Woodford, said:

"Mr. President and Members of the Hudson-Fulton Celebration Commission: The President and the members of the Netherlands Hudson-Fulton Commission have honored me by appointing me to be their representative, and in this capacity I have much pleasure in addressing myself to-day to the Hudson-Fulton Celebration Commission."

Dec-
ment
Confirm-
ing Gift
of Half
Moon

Mr. van Eeghen then continued in the words of the engrossed address which he subsequently delivered and which is given hereafter, adding:

"I herewith have the honor in the name of the Netherlands Hudson-Fulton Commission to present you with a document confirming the donation of the replica of the Half Moon and beg you to accept it, together with this book, containing the names of those who contributed in the gift."

"The Linschoten Society, whose members have given themselves the task of collecting the old journals of our brave sea-fathers and publishing them in book form, has requested me to present the Hudson-Fulton Celebration Commission with the first volume of their work. This volume contains the journal of Jan Cornelis May, who in 1611 made a voyage to the American shores as Hudson had done two years previously. I now have the honor of fulfilling their commission and beg your acceptance of their work."

Mr. van Eeghen thereupon delivered to General Woodford a superbly engrossed and illuminated address, enclosed in a gilt frame and measuring 26 by 38 inches inside the frame.

Surrounding three sides of the text is an elaborate oak-leaf border in which at intervals are depicted the following devices:

In the upper left-hand corner is the seal of the East India

Company, Amsterdam Chamber, with the legend: "Segel van d'Oost-Indische Compagnie tot Amsterdam. 1602." Document
Confirm.
ing Gift
of Half
Moon

In the center of the top border is a device copied from a silver coin which in olden times was presented by the States General to foreign ambassadors. It bears the coat of arms of the United Netherlands, with the motto: "Concordia res parvae crescent."

In the upper right-hand corner is a design copied from a silver coin of the early 17th century, representing a ship of the type of the Half Moon, surrounded by the motto: "Nova aequora ventis turbida." In the midst of the motto is the coat of arms of Amsterdam.

In the middle of the left-hand border is a device taken from a silver coin — the Holland guilder, or three guilder coin — representing the figure of the Netherlands Virgin. She holds in her right hand a spear surmounted by a liberty cap, and with her left arm leans on a Bible, indicated by the word "Biblia." Surrounding the figure is the motto: "Hanc memur hae nitimur."

In the middle of the right-hand border is a design copied from a bronze counter coin of 1603 commemorating the unity of the states of Friesland. It represents two clasped hands holding a bundle of arrows and surrounded by the motto: "Concordia Fries libertas."

In the lower left-hand corner is the coat of arms of New Amsterdam, surmounted by a beaver and supported on the dexter side by a lion with a sword, and on the sinister side by a lion with a bundle of arrows. Above all are the initials of the Incorporated West India Company, "G. W. C." (Geoe-troyd West-Indische Compagnie).

The coin designs are copied from originals in the Royal Cabinet of Medals at the Hague.

Occupying the bottom quarter of the memorial is a picture of "Nieuw Amsterdam, 1640," made from a water-color

Docu-
ment

Pound

drawing of about that date at present in the archives of State, completed according to old pictures. The view, from the direction of Governor's Island, shows the water and ships in the foreground. On the southern point of the Island are the scaffold and crane. Farther back, the walls of Fort Amsterdam appear above the roofs of the surrounding houses. Above the walls of the fort are depicted the flagstaff, the roof of the Governor's house, and, by artistic license, the roof of the church which was erected in the fort in 1642. Above the southwest bastion appears the windmill which stood north of the Fort in what is now Battery Place.

Enclosed within these elaborate embellishments is the text, engrossed in parallel columns in Dutch and English, reading as follows:

MDC15

Defining γ by $\gamma = \gamma_1 + \gamma_2$, we find that

MCMIX

The following is a summary of

PURPOSES

The 11th Division, who, in the service of the Daimyo at Ichikawa, Oosagami, now three hundred years old, told the last history of his knowledge of that part of the world, where the heart of the United States beats so long, have recorded his lively letters in the Japanese of the 17th and 18th.

The National people have made up their minds to the murder of the late chief justice of the former old Republic of the United Netherlands who played a prominent part in the establishment of the Netherlands in New York, are known as the Americans. They have forgotten those rights which were made to render them poor and miserable in the conflict for freedom and independence of the restored Republic of the United States of America, there were the descendants of many Dutch families who at the present day very many of Holland's sons and daughters, who have crossed the ocean and now reside a loyal citizen of that Republic, maintain the lively relations, which exist between the Netherlands and the United States of America.

in one bond of fellow feeling in respect to Docu-
Religion and Political Liberty, Commerce and ment
Industry, Science and Art. Confir

In order to give expression to the sentiments of the people of the United States, the President has caused to be struck a gold coin, under the patronage of his Royal Highness, Prince Hendrik of the Netherlands, a Hudson-Fulton Celebration Committee, with the object of sending to the

at New York, as faithful as possible a reproduction of the "H. and M." which, now three centuries ago, sailed from Amsterdam, crossed the Ocean and conveyed Hudson up the river, that I might possess it.

May the preservation of a remnant of that little vessel, then a little hull, whose arrival in the water has been of such vital importance to the development of the United States of America, be a tribute to the Republic of Chile. — Cecil De La Cruz, an indication of the friendship of the kindly and nobility of the vessels which have ever held a and still hold the Netherlands and the United States of America in a goodly bond.

Abstract

John Heldring

The book which Mr. van Hugen delivered to President Woodford measures 11 by 13½ inches in size, is bound in white russia leather and is stamped in gold. On the front cover is

Book of a figure of the Half Moon and the dates 1609 and 1909. The
 Donors of book contains 43 heavy leaves, beautifully engrossed in black
 and red, on the right-hand page only. The title-page reads:

THE NETHERLANDS
 HUDSON-FULTON CELEBRATION COMMITTEE
 PATRON
 HIS ROYAL HIGHNESS
 PRINCE HENRY OF THE NETHERLANDS
 DUC OF MECKLENBURG

The succeeding pages contain the following names suitably displayed:

OFFICERS OF THE COMMITTEE

Accept-
ance of
it, if
Moon

In receiving these testimonials, General Woodford said:

"Gentlemen: The Hudson-Fulton Celebration Commission of New York appreciates all that our friends and kindfolk in Holland have done to help us keep this three-hundredth birthday of our city, and it is with the feelings of profoundest gratitude that I accept the Half Moon and these other testimonials of your generosity and good will toward the State which, like a great and strong oak tree, has grown from the acorn which your forefathers planted here. We welcome you to our hearts and our homes and hope that you will be pleased with our city and the sister communities along the Hudson Valley, who are anxiously awaiting the opportunity to entertain you. We greet you with affectionate friendship. In behalf of all New York, I bid God speed to Holland, and may the richest blessings of Heaven forever rest upon the brow of your fair young Queen."

Then turning to the Commander of the Half Moon, General Woodford said:

"Monsieur le Capitaine: There has been and always will be, when the fleets of nations meet, some question as to precedence. But to-day Captain Henry Hudson, who has come from the grave to bid us welcome, is the first among our naval guests."

Recep-
tion of
the Cler-
mont

Following the presentation of the Half Moon, Captain Miller, as Chairman of the Naval Parade Committee, under whose direction the Clermont was built, addressed General Woodford and formally announced the arrival of the Clermont, at the same time presenting to him the Rev. C. S. Bullock, who impersonated Robert Fulton, and Miss Evelyn Bullock, who took the character of Miss Harriet Livingston, Fulton's fiancée. General Woodford said:

"Ladies and Gentlemen: Since I welcomed Henry Hudson, taken from his grave, two hundred years have passed and now Robert Fulton with Miss Livingston, bid to their fortunate marriage, comes to bid New York gooding. The grave has seldom returned fairer and braver representatives of a bygone generation, and I bid you and your fellow passengers hearty welcome."

"Captain Miller, in behalf of the Hudson-Fulton Celebration Commission, I accept the Clermont from the Naval Parade Com-

mittee and commit it to the care of the Clermont Committee; and I congratulate you and your collaborators on the success of your difficult undertaking in repurchasing this famous vessel."

Dr. Jōkichi Takamine, representing the Japanese residents of New York, then addressed General Woodford as follows:

"Gentlemen and Members of the Hud-on-Pelton Celebration Commission: Your honorable Commission and the government of your great city have graciously signified to the undersigned committee of Japanese residents their pleasure in permitting, or to take part in the momentous Hud-on-Pelton Celebration by accepting our offering of 2,100 cherry trees from Japan, to be planted along your beautiful and unique Riverside Drive. We beg hereby to tender them to you in the fullest and warmest spirit of affection, gratitude and good will."

"What the cherry tree is to Japan we most fervently wish it to symbolize to you—the ever-living spirit of the land, beginning with every spring a world of blossom and joy. Along the banks of the mighty stream whose discoverer and first steam navigator we celebrate to-day, and around the tomb of General Chen, whose memory we of Japan hold dear, may the river of Japanese bloom flow year after year a flowering witness to all time of our affection for New York and the United States."

"We thank you and the municipal authorities for the precious privilege of taking this humble part in the great and historic celebration, and feelingly subscribe ourselves:

DR. JOKICHI TAKAMINE,
KOMORI AKATSUGO,
ROICHIRŌ ARAI,
KITUSABURŌ FUREI,
DAIJIRO SHIKURA,

"Committee of Japanese Residents of New York."

General Woodford replied:

"Dr. Takamine, and Gentlemen: To-day is doubly—triple—Zorro fortunate for New York. To-day we keep the three-hundredth birthday of our city. To-day we keep the hundredth anniversary of the application of steam to navigation upon these waters, and

Pre-sen-ta-tion of
Jap-ane-se
Cherry
Trees

tan-ces of
Cherry
Trees

to-day we count ourselves fortunate, that as the founders of our city came from across the Atlantic, our friends who bring this greeting come from across the Pacific. New York welcomes you as she welcomes them. We understand that the cherry tree and blossoms in your beautiful land of Japan are symbols of truth, purity and honor. We understand that the cherry tree lives from 250 to about 300 years of age; and we sincerely trust that when the six-hundredth birthday of our city comes, still by the banks of the Hudson and in our parks there will be, if not your trees, at least their scions and descendants; and that truth, purity and honor may still find a flowering spot here as they find a flowering spot in your beautiful land across the sea.

"Now, Ladies and Gentlemen, in behalf of the Commission, I wish to thank Mayor McClellan, who has honored us with his presence; the Governor of our State, who has also done such great work, and all of your representatives of foreign countries and citizens of our own. We bid you thanks for coming to our birthday, and give you greetings and good wishes."

During these ceremonies at the Official Landing, the scene presented by the American and Foreign officials resplendent in their military, naval and diplomatic uniforms, the Half Moon representatives in their quaint attire of 300 years ago, and the group of passengers from the *Clermont* in their many hued costumes of a century ago, was brilliant and picturesque in the extreme.

Evening
Naval
Parade

In the evening the naval parade, with the exception of the *Scout* and *Escon* Squadrons, was substantially repeated, the procession forming in the upper bay, sailing up the river and circumnavigating the war fleet in the afternoon. The effect of the evening parade was heightened by the illumination of the war fleet and the fireworks, described in Chapter X.

Speaking of these parades, Captain Miller says: "The parade of Saturday, September 25, has never been equalled, in numbers or extent, either upon the waters of this country or perhaps those of the world. The scene and ceremonies of the morning as the *Half Moon* and *Clermont* started from Staten

Island, receiving an ovation at Tompkinsville and Bay Ridge, was most impressive; while the formation of the various squadrons and divisions in the lower bay presented a fine marine picture. The head of the fleet, led by revenue cutters, torpedo boats, submarines, the Gloucester, and other craft, acting as an escorting squadron to the Half Moon and Clermont, from the Battery to 110th street, was started on time. The ten miles of men-of-war extending from Spuyten Duyvil to 42d street; the 800 anchored vessels on either shore; the millions of people on the water front; the moving panorama of 742 merchant ships, yachts and motor boats, navigating by the Government ships, and passing in review at 110th street, furnished a pageant never to be forgotten—unless it were excelled by the repetition of the moving parade in the evening, past the illuminated ships, amidst the brilliancy of pyrotechnics and searchlights in unsurpassable effects on a perfect night. To the men who assisted the Naval Parade Committee in rendering such a success without injury to person or property too much credit cannot be given.” *

* On September 13, 1912, the Executive Committee of the Commission voted to call the Final Contract to the Hudson River Day Line in consideration of a cash payment and reports to Dispositio the vessel equivalent to \$1,000,000, and in making consideration of the company's agreement of to maintain, one for exhibit, and, when possible, open the Clermont and other Clermonts. Then in the course of steam navigation. The final position of the Half Moon is recorded on page 143.

CHAPTER XV

RELIGIOUS SERVICES

SATURDAY, September 25, and Sunday, September 26, were especially designated for religious services by those accustomed to worship on the seventh and first days of the week.

In February, 1900, the Committee on Religious Services, of which Hon. John G. Agar is Chairman, sent out to several hundred clergymen of all denominations a circular letter which called attention to the approaching Celebration of the discovery of the Hudson River and the invention of the steamboat and continued as follows:

Circular
Letter to
Clergy

"This Commission, in acknowledgment of the Divine guidance in these two great events, has set apart the first two days of the celebration, namely, Saturday, September 25, and Sunday, September 26, for religious observance by those accustomed to worship on the seventh and first days of the week respectively.

"We therefore invite you to call the attention of your people to the approach of this important celebration and also to deliver a special sermon or address on this occasion, and to arrange such other services suitable to your form of worship as will permit your people to make due acknowledgment in prayer of God's wisdom in directing the events commemorated; one opened up our State and gave birth to our Commonwealth; the other laid the foundation of the water-borne commerce upon which the prosperity of the State and City so largely depends, and both combined to extend the blessings of civilization throughout our country.

"It is the earnest wish of this Commission that, in the midst of the abounding prosperity of the times, this Celebration shall not be too largely of a material quality. Therefore, the universities, colleges, schools and learned societies throughout the State will be requested to hold commemorative exercises suited to such institutions; but to the spiritual advisers we look for those ceremonious observances

which will inspire our people with the spirit of gratitude for their legacy from the past, of happiness and contentment in the blessings of the present, and of their duty to transmit this heritage unimpaired to the future."

The clergy of the State responded sympathetically to this General appeal and generally took cognizance of the Celebration, not only on the two days especially mentioned in the letter, but ^{Religious} ^{Observance} also on other religious days during the following fortnight. The Most Reverend John M. Farley, Roman Catholic Archbishop of New York, and the Right Reverend David H. Greer, Bishop of the Protestant Episcopal Diocese of New York, authorized certain special prayers for the occasion.

The Reformed Protestant Dutch Church of the City of New York, organized in 1614, two years after the first permanent settlement of Manhattan Island by the Dutch, took especial interest in the Celebration as the oldest Church organization in the Metropolis, and held commemorative services on Sunday morning and evening, September 26, in its churches at Second avenue and 7th street, Fifth avenue and 29th street, Fifth avenue and 48th street, and West End avenue and 77th street.

Services were also held very generally throughout the State, more particular references to some of which will be found in the accounts of the local celebrations north of New York City.

CHAPTER XVI

OFFICIAL RECEPTION OF FOREIGN GUESTS

THE public Official Reception of the foreign guests was held at the Metropolitan Opera House, in New York City, on the evening of Monday, September 27, 1909, beginning at 8.30 o'clock.

Literary
Exercises
Intelliga

In its original plan, the Commission had intended to devote one evening of the Celebration exclusively to literary exercises, and some of the arrangements for such a meeting had been made by the Committee on Official Literary Exercises, of which Gen. James Grant Wilson was Chairman. Later, however, it was deemed advisable in view of the numerous literary features of other parts of the Celebration and the close crowding of events, to dispense with the special literary evening as such, and in connection with the Official Reception, to avail the Commission of such arrangements as already had been made by General Wilson's Committee. This being done, the detailed arrangements for the public Official Reception of foreign representatives were made by the Reception Committee, of which the Hon. Seth Low is Chairman.

Admission to the Opera House was by ticket, and a cordon of police and Naval Reserve men -- the latter under command of Capt. Jacob W. Miller -- surrounded the building and permitted only authorized persons to enter.

The interior of the auditorium was simply but tastefully adorned with wreaths and garlands of laurel and the official colors of the Celebration -- orange, white and blue. The stage, which was open to its full extent, was also garnished with masses of laurel, streamers of incandescents lights, and two panels, one representing the Half Moon and one the Clermont. The scene upon the stage, which was occupied by

the foreign representatives in their various uniforms, was very brilliant.

Franko's orchestra rendered instrumental music, and the New York Parks Glee Club, occupying the front rows of the orchestra seats, kindly gave their services in rendering vocal music.

After an overture by the orchestra, General Woodford, Mayor President of the Commission, presented in the following words the Mayor of the City of New York as the presiding officer of the evening: Mayor McClellan Presided

"Ladies and Gentlemen: On behalf of the Hudson-Fulton Celebration Commission, it is my pleasure, as it is my privilege, to present the presiding officer of the evening, His Honor, George B. McClellan, the Mayor of the City of New York. It is my double pleasure, for memory awakes to-night, to present to you the son and the namesake of my old Commander in the Army of the Potomac, George B. McClellan."

Mayor McClellan then assumed the Chair, and the proceedings continued in the following order:

MAYOR McCLELLAN: "Invocation will be offered by the Right Reverend David H. Greer, D.D., Bishop of New York."

BISHOP GREER: "Almighty God, our Heavenly Father, in whom we live and move and have our being, and by whose might Thy pioneers in the wilderness didst lead the way of empire; we humbly approach Thee with praise and thanksgiving for all that Thine hand hath done for the children of men. Especially do we thank Thee for the gifts vouchsafed to that discoverer and that inventor whose achievements we are moved at this time to commemorate." Invocation by Bishop Greer

"And while we meditate in grateful homage on our debt to Thee through these, Thy servants, who by their brave persistence in venturing all things did so extend to us the benefits of navigation, we pray that Thou wilt give us the understanding heart to know that Thine is the power which makes and moves the wheels of progress. Prosper all research that delves more and more deeply into the mine of knowledge and strengthen our grasp of the truth that without Thee, our labor is but lost. Bless our land with honorable

industry, sound learning and pure manners. Fashion into one happy people the multitude brought hither out of many kindreds and tongues. Endue with the spirit of wisdom those whom we crown in Thy name with the authority of governance, that all things may be so ordered and settled by their endeavors upon the best and truest foundations that peace and happiness, truth and justice, religion and piety, may be established among us all for all generations.

"Bind the nations of the earth in the bonds of Brotherhood and Peace; make wars to cease and righteousness to reign. In the time of prosperity, fill our hearts with thankfulness; and in the day of trouble, suffer not our trust in Thee to fall. All which we ask for His sake, Who has taught us to pray:

"Our Father, who art in Heaven, hallowed be Thy name; Thy Kingdom come, Thy will be done on earth as it is in heaven. Give us this day our daily bread, and forgive us our trespasss, as we forgive them who trespass against us; and lead us not into temptation, but deliver us from evil, for Thine is the Kingdom and the power and the glory, for ever and ever. Amen."

MAYOR McCLELLAN: "The New York Banks Glee Club will now sing 'Excelsior'."

The Glee Club sang "Excelsior" to the words of Longfellow's poem of that title.

Address
by Mayor
McClel-
lan

MAYOR McCLELLAN: "It may be possible that Hudson was not the first European to enter New York Harbor and that Fulton was not the first to utilize the steam engine in navigation. Yet for all practical purposes, Hudson did discover the river which bears his name, and Fulton was the first to make steam navigation a commercial success. And so, to Hudson we owe the possibility of the existence of our City, and to Fulton we owe the possibility of her prosperity.

"When Hudson sailed through the Narrows he must have realized that the Island of Manhattan, which faced him, was destined some day, because of his discovery, to be the site of a great city. He could not know, as he steered past the west end of Long Island, that he beheld the site of another great city, now part of our town and destined to be the home of the men who should, three hundred years after his time, perform a deed of exploration, fraught with more hardships and daring than his own. The discovery of the North

Pole does not give to the world what Hudson gave it, yet we all feel proud to claim for New York a feat which has been essayed in vain by daring men from almost every great nation.

Address
by Mayor
McClure
Jan

"When Fulton launched the *Clippers*, he must have realized that the New York he knew was destined to be, because of his invention, to grow into a mighty capital. And because of the discovery of the one and the invention of the other, New York has become the City she is to-day.

"I like to think that the spirits of Hudson and of Fulton have watched the progress from small beginnings to great realizations of the harbor and the town of the long ago. I like to think that in life they had some anticipation of the forces and the progress they were setting in motion, and that now they appreciate their own achievements.

"Then they saw through a glass, partly now they know. I like to think that they are content with the child they knew, in the full development of her maturity. For the New York of to-day, our New York, is a wonderful place. She is rich and strong and mighty among all the cities of the earth. She is the center of wealth, and art, and thought, and power upon the western continent. Those who do not know her say that she is inhospitable, cold and selfish.

"We, who are her children, know that she has a heart, and that it beats strong and true. If a city she has, but not as other cities, for hers is a barbaric and a lawless beauty that is all in all her own. It has been the confusion of artists and the despair of critics. It is a beauty that knows neither rules nor laws, for it violates every rule of architecture and every canon of art. Those who have made art their life's work have exclaimed in horror when first they have seen her skyscrapers and her sky line. Those who know nothing of art, who never heard of Scamozzi or of Palladio, who cannot distinguish between the Romanesque and the Renaissance, have none the less proclaimed her as an ugly city.

"But once the first surprise is over, artist and Philistine alike have found themselves, shamefacedly perhaps, confessing that New York is beautiful with a beauty unlike that of any other city in the world. For, as Venice is the queen of the Renaissance, alone and splendid and Oriental, so New York is the queen of the Twentieth Century, alone and splendid in her architectural barbarism of to-day.

Address
by Mayor
McClellan.

"There are comparatively few buildings in New York City which, when taken by themselves, are not architecturally interesting; there are only a few buildings that even by a stretch of the imagination can of themselves be called beautiful. But, take the city altogether, the general effect of the city as a whole, the contrast of its blotches of vivid color, with the bright blue of the sky in the background, and of the waters of the harbor in the foreground, the huge masses of its office buildings, towering peak on peak and pinnacle above pinnacle to the sky, making of lower Manhattan, to the eye, at least, a city that is set on a hill, and New York does possess a beauty of her own, a beauty that is indescribable, that seizes one's sense of imagination and holds one in its grip in a way as does that of no other city.

"And there is a charm about New York which is as compelling as her beauty. The City possesses the mysterious power of the magnet to draw to herself all sorts and conditions of men, the force of the whirlpool to gather them to her bottom and to hold them there. Men have left New York and have been unable to stray away, for the lure of the town has called them back, and they have returned, some for good and some for ill. Men and women have lived and worked and died for New York, some have found Heaven through her, and some have deserved Hell because of her.

"Is it surprising that her children take pride in this wonder city and delight to serve her? Is it surprising that she is well served — that merchant, financier, lawyer, physician, clergyman, official, from highest to lowest, all honor and love her? The service of such a city either in private or public life is well worth while and well worth the cost, no matter what the cost may be. And as the years go by, and the days of our service reach their term, even if the cost of service has been youth and health and life itself, hopes disappointed, ambition crushed, worldly prospect brought to naught, the consciousness of our service well performed is of itself worth while — the memories of our youth and of our strength, of which no man can deprive us and which will endure always.

"Let me assure you, our guests, that we are very proud that you should have come, representing almost every country on earth, to join with us in this tribute of affection to our mother city. I sincerely trust that the impression made upon you by this assemblage will help the nations of the world to a more perfect understanding of

the real hopes and aspirations of the American people. For, as we believe that the chief end of life is the attainment of happiness, so we know that happiness in this world can only be achieved through peace on earth and good will toward men. And as we respect ourselves and expect others to respect us, so we earnestly strive to respect the rights of the sister peoples of the earth.

"On behalf of the people of the City of New York, I, the Mayor, bid you welcome. It is our most earnest hope that you also may fall under the spell of our City's charm, so that at the end of this celebration, if you must leave us, you will not fail, some day, to return."

After a selection of music by the Glee Club Mayor McClellon said:

"We have now reached a very interesting number upon our program. Mrs. Julia Ward Howe, who needs no introduction in this country, and scarcely in any part of the world, will read a poem she has prepared specially for this occasion. Mrs. Julia Ward Howe."

Thereupon the entire gathering stood while Mrs. Howe read the following original poem:

FOREWORD

A new flag, long and a new,
Crowned with a mountain of glory,
Invites our unaccustomed feet
To bechillish, sloping, barren
A path whose end is unknown,
Must have its early pioneers,
"My link keeps the whole world vast,
How shall I prepare to occupy it?"

Repon for to his cry appear
A vision, your duty to
Come, a new world, your duty to
Then, the path, your duty to
"Where are and where do you stand,
There find a servant and a friend."

Yet now a more, more, and more,
With deeper, more, and more, of pain,
Pleading a monarch's court, more,
Shrewd, peace, more, more, more,
Ex, on the other side shall that,
Swifter than the light, young, full, of's boat.

Address
by Mayor
McClellon

Pos.
by Mrs.
Howe

Poem
by Mrs.
Howe

And not alone for Hudson's stream
Awaits the magic power of steam,
Blessings of union best worth
Its speed than e'er to sail the earth;
Knowledge shall o'er its portals fly,
Not but to make good men strong;
Commerce shall flourish, shall reach him
To meet an unimagined time,
And Wealth and Wealthy, on golden clouds,
Shall closely clasp the poorer folk,
With masses of the many people
The holy brotherhood of man.

Red, Yellow, or Black, or none of them,
Be kind and loving, true and brave;
Thy mother's love is every one,
Herald of brotherhood,
So early in our world reborn,
The unity of men and of his fate,
For Peace and Duty shall be true
And Liberty shall be the law.

And, as ever we shall compare all
That shall be, with what is best,
Our father's words shall light
The road of this world to light,
So shall all be as good as truth,
For Freedom, Justice, and Good will.

The New York Banks Club then sang Mrs. Howe's "Battle Hymn of the Republic," after which Mayor McClellan said:

MAYOR MCCLELLAN: "The address of welcome on behalf of the Commissioners will be delivered by General Stewart L. Woodford."

Welcome
by Gen.
Wood-
ford

GENERAL STUART L. WOODFORD: "Mr. Chairman, I should guess my words shall be very few. We have asked the nations of the world to come here and keep our birthday with us, and we are gratefully glad that you are here. In the western parlance, the latch string is yours; our hearts are in our hands; we want you to have the best of good times while you are here, to carry back some pleasant memory of the old Holland city, and if, by the gathering of the fleets of all the world in the river that bears Hudson's name, we shall contribute somewhat, no matter how little, to the brotherhood of all nations, we shall be glad that you have come."

"As Daniel Webster said upon another occasion: 'Light the beacons, kindle the bonfires, let music ring out' - and for one week let New York be glad and proud altogether and when the week is over, let us go back to our daily work, the better for having had a good family festival, with bright thought of what New York should be."

"Let us make New York better and worthier of the greeting that the world gives it. We have been given great opportunity. A better harbor there is not on our coast. For communication up the Hudson and throughout the Mohawk Valley and over the great lakes there is not, for industry and commerce. More men of every race have come here than gather in any nation of Christendom. Great is our opportunity, great is our responsibility. And, in the glory of all the friends to-night, the sons across the sea, a warning from the men whose language we speak—'Lest we forget, lest we forget.'"

"The dust of ages gathers on human tombs. The story of what has been replaces the dream of what is. Shall New York be great only as New York is dest? As New York is law-abiding, as New York strives the ideals that are forever before us, God grant that our New York, the New York we love, may be not merely the New York of commercial stress, not merely the New York of industrial endeavor, but the New York of human brotherhood, the New York of human aspiration, the New York that shall prove in the distant centuries that cities like nations, and nations like men, are only rich as their ideals are high."

MAYOR McCLELLAN: "We are greatly honored that twenty-seven of the nations of the earth should be represented here to-night. Responses to the address of welcome will be made by the Special Delegates representing the nations."

"I have the honor to introduce to you the Special Delegate of the Argentine Republic, *Argentine*
time
to leave Senor Don Julio Carric."

As Senor Carric was introduced, he stepped forward and in turn bowed to Mayor McClellan, General Woodward and the audience, being greeted with cordial applause. Similar cere-

* Only the representatives of Latin American nations who were appointed as Special Delegates were called upon to give speeches.

mony was observed and similar applause was given as each delegate was presented. Several of the delegates made no formal reply. Where replies were made, they are given in the following pages. After Senor Carrie had resumed his seat, Mayor McClellan continued the introductions, calling upon the delegates in the alphabetical order of the names of their countries.

Belgian Delegate MAYOR McCLELLAN: "I have the honor to introduce to you the Count deBuisseret, Special Delegate of Belgium."

COUNT DE BUISSERET: "Allow me to express my gratification at having been appointed by His Majesty, the King, to represent Belgium, at this magnificent celebration, so truly American in its greatness."

Chilian Delegate MAYOR McCLELLAN: "I have the honor to introduce to you the Special Delegate from Chili, Senor Don Jose Francisco Vergara."

Senor Vergara bowed his acknowledgements.

Colombian Delegate MAYOR McCLELLAN: "I have the honor to introduce Special Delegate from the Republic of Colombia, Mr. Eduardo Lombu."

MR. EDUARDO LOMBU: "It is a great honor for me, as the delegate from the Republic of Colombia, to extend to you on this memorable occasion the sincere congratulations of the Colombian Government and people, as well as mine. I beg also to convey through you such congratulations to the State and City of New York."

Costa Rican Delegate MAYOR McCLELLAN: "I have the honor to introduce the Special Delegate from Costa Rica, Dr. Juan J. Ulloa."

DR. JUAN J. ULLOA: "Mr. Chairman, President and Members of the Commission, Fellow Delegates, Ladies and Gentlemen: At this most important gathering of all the nations of the world, come together to greet and to admire this great emporium upon the celebration in honor of two great men, important because of its history, I have the honor to be the official carrier of the greetings of the President and of the people of Costa Rica, who send you through me their good will and their fervent wishes for your welfare, and for the ever-increasing prosperity of New York."

"The tremendous progress achieved by this City demonstrates fully how it has developed to its great advantage the gifts of Hudson and of Fulton, thanks to which the frail Indian child, adopted by

Dutchmen, brought up by England, was crowned when of age the mighty queen of progress and of civilization in the new world.

"The discovery of Hudson of this magnificent highway which has developed New York into the greatest commercial City which time has seen, and the great steam navigation, whose constant whistling has been calling for a hundred years the nations of the world to a life of work and of progress, are indeed the greatest achievements to be commemorated by this most wonderful center of human activity. That the celebration of the anniversary of the great accomplishments of Hudson and Fulton is a great success, nobody doubts, and it could not be otherwise when we consider that New York has the brain to direct, the arm to execute and the means to accomplish."

"Mr. President and Members of the Commission for the Hudson-Fulton Celebration, in the name of Costa Rica, I extend to you my hearty congratulations."

MAYOR McCLELLAN: "I have the honor to introduce the Cuban Special Delegate from Cuba, Brigadier-General Gerardo Machado," Delegate

BRIGADIER-GENERAL GERARDO MACHADO: "Mr. President: By decree of President Gomez, dated the 15th instant, I have had the honor of being appointed delegate of the Republic of Cuba, to attend the festivals in commemoration of the third centenary of the discovery of the Hudson river and the centennial of steam navigation on said river."

"The Cuban people send their most cordial solicitations to the people of the State of New York for the happy idea of celebrating in such a magnificent way these two remarkable events which are profoundly recorded in the history of civilization, and also for the brilliant manner with which all nations have answered the invitations extended to them by the Hudson-Fulton Celebration Commission."

"Cuba, as a sovereign country, joins in this celebration with as much enthusiasm as is felt by any other nation, or any State of the Union, not only on account of its keen interest in the world progress and the advancement of science, but also because of the everlasting friendship and of the close relations which exist between the Island Republic and the United States of America."

MAYOR McCLELLAN: "I have the honor to introduce Count Danish C. Moltke, Special Delegate from Denmark." Delegate

COUNT C. MOLTKE: "Mr. President: In the name of His

Danish
Delegato Danish Majesty's Government I convey to you as President of the Hudson-Fulton Celebration Commission their most cordial greetings and congratulations on the great meeting that you have so successfully convened in commemoration of the great discoverer and great inventor of the present. Denmark have from the earliest periods of exploration and settlement of these shores been under their particular spell, and Danish names figure in the records of this country long before the Federation of States took place. Later years have continued and developed the efforts of the first Danish pioneers into the great Danish speaking population that now-a-days has made its home on this side of the Atlantic and has to no small degree, I dare say, shared your sacrifices in opening up the country to its present state of economic and social conditions.

"It is, therefore, with pride and affectionate admiration that we watch every event that serves to magnify this great Republic and that we rejoice in your continuation of the high traditions established in her already glorious infancy and in your splendid achievements of the present day.

"These are the sentiments which my Government are happy to express to you through my modest voice."

Ecuador
Delegato MAYOR McCLELLAN: "I have the honor to present Señor Don Esteban Carbo, Special Delegate of Ecuador."

SEÑOR DON ESTEBAN CARBO: "His Excellency, Mayor Aliaro, President of the Republic of Ecuador, through your kind offices, sends greetings and good wishes to the gentlemen of the Committee in charge of the Hudson-Fulton Celebration, and heartily joins in the commemoration of events of such transcendent and far-reaching consequences. Ecuador, having been the first country south of the Isthmus of Panama where steam was applied to the propulsion of vessels, considers itself justified in rejoicing and commemorating the wonderful achievement of Robert Fulton (addressing General Woodford.) I assure you it is a great honor for me to have the opportunity to present the assurances of my country and to add my best wishes for the welfare and continued prosperity of New York."

French
Delegato MAYOR McCLELLAN: "I have the honor to present M. Jean Gaston Darboux, Perpetual Secretary of the Academy of Sciences, Special Delegate of France."

M. JEAN GASTON DARBOUX: "To the Governor of the French State of New York, the Mayor and the Members of the Hudson-Fulton Commission, Gentlemen: Of the two men whom you unite in one anniversary, one was a bold navigator, the other a fearless engineer. The discoveries to which they have attached their names seem at first not to be compared, and yet there is really a point common in their destinies. Both have had the merit of reaching definite and lasting achievements, both have had precursors who had prepared the way; both died prematurely without obtaining the reward due to their efforts or to their genius, above all, without seeing their discoveries given some of the result which they had expected.

"Hendrick Hudson, valiant captain, was the first to explore this river which bears his name and the romantic legends of which have been seductive to all those who have been or are to be. If he had a predecessor,—the Florentine Verazzano, who on the ship *La Dauphine*, chartered by our King Francis I, explored in 1524 the Bay of New York, and recognized the mouth of the river,—it is from Hudson, incontestably, that the first occupation of your country by Europeans here dates, so that this region, after being called for a time, short indeed, 'New France,' after having seen the variations of its shores, endowed on the Verrazzanian map with names borrowed from the geography of our country, or that of the old liberhood of Florence, was called successively, New Holland, then New England, has become the Empire State, the heart itself of free and powerful America.

"Robert Fulton, likewise, before launching on the river Hudson the small boat which in honor of his friend Livingston, he called the 'Clement,' and which some of the Libobians of New York had nicknamed 'Fulton's Folly,' Fulton, before inaugurating this steam navigation which was to the nineteenth century the preponderating factor of the progress of civilization, Fulton had also his predecessors in different countries. You may point out more than one in America itself. In France, we would have to recall the names of Denis Papin, the inventor of the steam engine; of the Marquis de Jouffroy d'Abbanet; but to-day we wish particularly to remember that Fulton lived some time among us, that it was in Paris that he gave the primer of his discovery, that it was on the Seine that he

French Delegate appeared for the first time with the steamboat, of which he had drawn the plans, taking care to avoid errors which until then had damaged or rendered useless all previous attempts. The account of the session, held August 8, 1803, by our Academy of Sciences, which was then called the First Class of the Institut, contains the following passage:

"Robert Fulton invites the class to see the experiment of a boat going up the river by means of a steam engine. He joins to his invention several remarks relative to his project. The citizens Bossut, Bougainville, Perier, and Carnot are specially charged to be present at the experiment and to report the same to the class."

"The experiment was held the next day, August 9th; it met with full success. 'At six o'clock in the evening,' tells a visual witness, 'Fulton, aided by only three persons, started his boat and the two others tied behind, and during an hour and a half he gave the sightseers this strange spectacle of a boat moved by wheels like a chariot; these wheels armed with shuttle-cocks and flat blades moved by a fire pump.'

"Among the sightseers, of whom speaks this visual witness, were the delegates of the Academy of Sciences, some of whom had difficulty in following the progress of Fulton's ship. Although the contrary was stated, they took pleasure in ascertaining the success of the American invention. For one month later, on September 12th following, the section of mechanics of the Academy proposed him for a place of correspondent and besides, our great Carnot, the one who, by saving France from invasion, has deserved the beautiful title of 'organizer of victory,' Carnot, who, during his incumbency as Minister of War, had known of the plunging boats of Fulton, wrote to him the following letter:

"If I had still the honor to be Minister of War, I should not hesitate a moment to give you the means of making an attempt, the complete success of which is indubitable and of which I foresee the immense results for the future."

"Unfortunately, at the time when Carnot was writing this prophetic letter, France had a master who was to become for some time the master of Continental Europe. Napoleon, in whom Fulton had first hoped, for genius naturally turns toward genius, had at that time many other anxieties. Besides, as chief of State, he could await

but few immediate results in the gigantic struggle which he was about French
to undertake, from the different discoveries of Fulton. Delegate.

"Moreover, economic reasons, which strike the least in form, explain naturally why the attempt which Fulton made on the Seine, did not find response in our country. It is not upon our peaceful rivers of France, it is not upon our beautiful canals where transportation had been so strongly organized for so long a time, that Fulton's attempt had chance to in pose its If through sheer struggle. He needed a country like yours, almost devoid of roads, possessing immense lakes, the longest and wildest rivers in the world; it was there and there only, that from the first day, victory could attend a method of navigation which can vanquish the violence of the winds, as also that of the tides, and which finds in itself the force necessary, without need of these hauling roads which we have traced at home with such care, and which it would have been impossible for you to establish on the indeterminate shores of your great rivers. It was a miracle, which was naturally called to become the scene where the great discovery of Fulton could give its full measure, where it could develop its full power.

"To-day, the ships with which he has endowed us are met by the thousand, upon all the lakes, upon all the rivers of the old and the new worlds. Surpassing the first hopes of their inventor, they have long since challenged the open sea. Following the expressions which Homer applied to the ship of the Phœnicians, the steam vessels ride with swiftness the waves of the sea, ever enveloped in shade and cloud; they have no fear of meeting any danger or perishing; but they know the thoughts and beliefs of men, and they know the cities and the fertile fields of all the world. The immense sea which was formerly a barrier between the people, has become, thanks to Fulton, the principal organ of their drawing closer.

"If he did not meet with the miserable end of Hudson, abandoned by his crew in James Bay with eight of his companions, Fulton, however, used up by the struggles and toils, died at the age of fifty years without seeing the prodigious extension which the navigation created by him was about to take. Less fortunate than Watt whom he emulated, he could not enjoy in peace the fruits of his work; he did not see the Sirius and the Great Western cross for the first time the Atlantic Ocean.

French
Delegate

"Your City, which, even on his premature death, rendered to him the honor due to great citizens, has wished to show that it has not forgotten him who has so greatly contributed to its marvelous development.

"Gentlemen, I make it heartily with you. She knows that gratitude is the first duty of a democracy. Besides, your homage goes, as should be remarked, to a man who united to the genius of the inventor the highest and most rare moral qualities. He who, before leaving for Europe, sheltered his old mother from need, who caused to be inserted in his agreement with a French Directorate a clause requiring that his inventions of torpedoes and submarines must never be employed against his country, who believed himself to asking that his projects should be realized without stipulating for himself any benefit -- such a man is entitled to the respect of all, and his country must esteem her old fortunate to be able to offer his life, his whole life, as an example to her children.

"Gentlemen, this proud custom which you have taken to honor with all circumstance those of your compatriots who have distinguished themselves by their toils and by their virtues, is beginning to bear results which strike the eyes of all. At the moment when we celebrate with you these glorious anniversaries, others not less glorious are being prepared to-day for your country.

"Fulton was the initiator of navigation over seas; two of your own also, Bushnell and Fulton, have contributed to prepare the means of submarine navigation. To this double conquest, you have wished to join that of the air which surrounds us, and it may be said that the Wright Brothers have become the Fulton of aerial navigation by heavier-than-air machines. Nor is this all. After being discovered, America has wished to discover in her turn and, first among all the nations, she has planted her flag at the point which has been named and defined before being reached the 'North Pole' whose deceiving conquest was the dream and the torment of so many illustrious explorers.

"Water, land and sea do not even suffice you any longer; you wish to know also the universe which surrounds us. Your astronomers do as your houses, they scrap the skies. No aerial body has escaped their investigations or their computations. Using incomparable instruments furnished by generous donors, they announce each day

discoveries which are denied to our feeble efforts. Your surveyors^{French} bring us the most precious information by measuring with an activity^{Bel-gate} which leaves no rest the immense extent of your territory. Of your naturalists no more could be said than that they are of the level of the marvels of all kind which your beautiful country offers them.

"Gentlemen, no nation more than France is happy because of your success. The energy, the perseverance, the breadth of views are made to win us. The names of your learned men are familiar to us. We admire Langley and Newcomb, who, unhappily, are no more; but there remain to you such as Agassiz, Bell, Edison, George Hale, Hill, Pickering, Michaelson, Olden, Losh and many others still, who fortunately are living, and living indeed.

"This admiration, mingled with sympathy which we feel for American science, goes back to a time already distant when your Franklin lived among us and was the object of a veritable cult on the part of Parisians. 'They have multiplied my bust so much,' he wrote to his daughter, with his witty good nature, 'that if a price were set on my head, it would surely be impossible for me to escape.'

"As you see, gentlemen, we still keep fondly the least remembrances of a great period. The recent struggles which we have undertaken with you on the fields of Bethany and Proscia have rendered them still more present and dearer. May we renew often these courageous struggles which have no other object than peaceful progress and the dawn of civilization."

MAYOR McFILLAN: "I have the honor to introduce the German Special Delegate from Germany, Gross-Admiral von Koester."^{Delegate}

GROSSADMIRAL VON KOESTER: "Mr. President and Gentlemen of the Helen Fulton Celebration Commission: As representative of the German Empire, I have the honor of offering to you the congratulations of Germany on the occasion of the memorable celebration of the three-hundredth birthday of the City and State of New York and the first navigation of the Hudson river.

"It is the first time that a celebration of a single city has been made an international festival by the presence of special delegates of all the nations of the world. The enthusiastic reception of your invitations in our country as well as all over the world may show you that we are fully aware of the historical importance of the events you are celebrating. The world knows what an enormous influence the

German
Delegate

discovery of that gigantic stream has exercised on the development of international intercourse by the rise of this mighty emporium for commerce on its banks and by the utilization of steam for navigation. The magnificent development of New York is the most obvious proof of the importance of these facts.

"Nowhere can sympathy for your celebrations be greater than in Germany which is connected with the United States by numerous bonds of friendship, of common descent, of commercial intercourse and common scientific work, and by the cultivation of friendly political relations during more than one hundred years.

"We admire the extraordinary work that has been accomplished in the United States by the irresistible energy and the creative impulse of the American people, and we may be proud of the fact that to a high degree, the sons of our country have had the privilege of partaking in the development of the magnitude of the United States as well as the City and the State of New York.

"We wish that the celebrations which, as a municipal festivity, eclipse by their brilliancy everything of the kind that has been undertaken until now, may take a most harmonious progress.

"We thank you for your splendid hospitality, and we may hope that the present days will continue to live in the memory of our generation and of the following ones as a promise of a happy future for the American nation, and for its center, New York, a future which is based on great times past."

Cre-
ation's
Delegate

MAYOR McCLELLAN: "I have the honor to introduce Admiral of the Fleet Sir Edward Seymour, Special Delegate of His Britannic Majesty's Government."

SIR EDWARD SEYMOUR, G. C. B.: "I am charged by His Majesty's Government to convey to the State and City of New York the cordial greetings of the King and the British people upon the occasion of the celebration of two great events in the history of your State and your City.

"The ter-centenary of the first exploration of this noble river and the centenary of the placing upon it of a vessel worked by steam are anniversaries which mark epochs, not only in the annals of New York, but also in the progress of the world.

"In the long and famous line of navigators who have extended our knowledge of the earth by their skill and daring and have brought

honor to the race to which you and we belong, there is no more brilliant name than that of Henry Hudson. He had a wonderful, though all too short, career of adventure, and the stainless record of his life was crowned by a tragic death in which his dauntless spirit shined bright and clear to the last. The glory of his achievements belongs partly to the English nation whence he sprang, and partly to the Dutch nation under whose flag he was sailing when he entered this arm of the sea and traced the course of the river far up to the north under the cliffs and forests of regions theretofore unknown. He sought, like many another English, Dutch and French explorer, a passage to the northwest from the Atlantic to the Pacific. What he found has turned out to be scarcely less important, and his discovery has resulted in another form the hopes and purposes that led him along this coast and ultimately into the mighty Bay which bears his name and where he met his end.

Two hundred years after the voyage of Henry Hudson, the enterprising foresight of Robert Fulton, encouraged by the experiment that had been made upon the canals of Scotland and on the rivers of the United States as well as by himself on the Seine, placed upon your waters the first vessel propelled by steam as applied to the service of commerce.

Thirty years before, in 1780, James Watt had made the steam engine a power in stead of a toy, and thirty years later, in 1835, the first steamship crossed the Atlantic to enter the harbor of New York. These also were great events fit to be commemorated here one hundred years after Fulton's steam whistle wakened the echoes of the Pallades.

Through the use which the unifying activity of your people has made of the natural advantages of this admirable harbor, the eastern gateway of your Continent, and of the inexhaustible resources of the country that lies behind it, through steam power which brings over the railroads the products of the West and distributes them from here by sea to the furthest corners of the earth, your City has grown to be the mightiest emporium of the Western Hemisphere. The vessels which sail from your port are larger in their tonnage and the goods they carry are more valuable than were all the vessels employed and all the goods carried in the trade of the whole world in the days of Henry Hudson. This growth of commerce has become

Great
Eric's
Delegate

Great
Britain's
Delegate

a powerful agency in drawing Nations together, in enabling them to know one another better, in promoting good will among them, in making them feel they are all interested in one another's welfare and that the highest of all their interests is peace.

"To His Majesty's Government, it is a particular source of pleasure that with the expansion of your City and your Nation the ties of respect and affection have grown always stronger between the British people and the country in which so much of the best blood of England has gone and in which the free spirit of the ancient institutions of our race has been so worthily preserved. It is their fervent wish that the prosperity with which Providence has blessed you may forever flourish and abound, and that the hopeful spirit and the versatile energy which we admire in you to-day, and which have enabled the United States to make such marvelous progress in all the arts of life, may continue to dwell in the hearts and stir the pulses of her people, and may be the parent of new and not less splendid achievement in the centuries to come."

Guate-
mala's
Delegate

NEW YORK, AUGUST 11.—"I have the honor to introduce the Special Delegate of the Republic of Guatemala, Licentiate Don Manuel Arroyo."

DON MANUEL ARROYO: "To the President of the Hudson-Fulton Celebration Commission, Mr. President, Ladies and Gentlemen: As the representative, and in the name of the Republic of Guatemala, I have the honor to tender to you my most cordial, respectful salutation on the occasion of this eventful and magnificent celebration in commemoration of one of the most important and transcendental events, not only to your country, but to the world.

"My Government cordially and with great honor in being invited to associate itself in this splendid celebration by a people who are among the first in the whole world, and it has conferred upon us the great honor of being appointed the bearers of its highest esteem, not only for the noble men and women that are now being commemorated at this time, but also to this great country which you have the good fortune to claim for your own.

"Therefore, in the name of the people and the Government of Guatemala, I salute you and assure you of my most sincere good wishes for the success of this celebration, which will mark an epoch in history."

MAYOR McCLELLAN: "I have the honor to introduce Professor Horace Fithcart, Special Delegate of the Republic of Haiti." Delegate

Professor Fithcart spoke in French, of which the following is a translation:

PROFESSOR FIFHART: "Mr. President: The Government of the Republic of Haiti in charging me to represent the Haitian nation at the Hudson-Fulton Celebration, particularly commands me to transmit its most lively felicitations to the Organization Committee, and to say to it at the same time how sensible of its gracious invitation Haiti has been. It wishes, by the reading of its representative, to assume the participation of Haiti in this solemnity which here assembles the delegates of all nations.

"The Haitian nation, Mr. President, has more than one reason why it is not able to remain indifferent to the gracious appeal of the Committee. The bonds of friendship which for so long a time have united it to the American people, the grand extent which the discoveries communicated to-day have given to international relations, the powerful influence which they have created upon the development of civilization, are also causes which have brought my country to participate in this great manifestation.

"Permitting, Mr. President, to profit by the opportunity which is offered, to thank the Committee, in the name of my Government, for the reception, so full of cordiality, which I have received in the beautiful city of New York."

MAYOR McCLELLAN: "I have the honor to introduce the Hon. Alan O. Clephane, Special Delegate of the Government of Honduras." Delegate

Mr. Clephane bowed his acknowledgements.

MAYOR McCLELLAN: "I have the honor to introduce the Italian Special Delegate of Italy, Vice-Admiral Alfonso di Brocchetti." Delegate

In the absence of Admiral di Brocchetti reply was made by Marquis Baggio DuCarne, commanding the Italian warship "Etruria."

MARQUIS BAGGIO DUCARNE: "Gentlemen of the Navy, of the Army, Members of the Hudson-Fulton Celebration Commission, Ladies and Gentlemen: On account of the delay of the arrival of

Italian Vice-Admiral di Brocchetti, I have the honor of taking his place as
Delegate of the Italian Government and of speaking on this solemn
circumstance held by the City of New York in honor of her great
men, Hudson and Fulton. The former, a bold and tenacious sailor,
who, on landing here in 1609, which later on was given his name,
saw all the importance of the place at once and how it would likely
become in future time one of the most conspicuous centers of the
world's trade. The latter, owing to his own invention, which was
to improve by degrees, effected the improvement by which Hudson's
idea could later on be turned out into reality, making thus of that
beautiful river a source of wonderful activity and life, as we see to-day.

"In the name of the Italian Government, I thank the Committee
of the City of New York and the Government of the United States
for the invitation to Italy to be present on this occasion. And it
is a real pleasure for us Italian sailors to see our colors flying together
with those of many other friendly nations, to honor the two great
men.

"Friendship between the United States and Italy seems to become
stronger every day, emigration and growing trade being the origin
of a thick net of interests and affections. But I need not speak of
these things. I simply wish to remember here the great proof of
friendship which was given to my country in those sad days when
one of the beautiful parts in southern Italy was lately destroyed by
a blind force of nature. So allow me to say a few words more just
to tell a sentiment which I so deeply feel in my heart.

"I always thought since I was a school boy that the American
people were a people of boldness and dash; in my mature age I
could persuade myself the experience how true this is. I feel I admire
Americans, who dash in the name of life in every branched human
activity and for which they are second to no other people on the
broad path of progress. And this, indeed, a wonderful fact, the one
we see along this river now - that under our own eyes, looking at
the Clermont by the side of the big steamers, which, starting from
England, Holland, Germany, France and Italy in quick succession
make up just like a bridge between Europe and America, we see
at once the history of the progress of the world during a century.

"The argosies of the sea of to-day all come here along the sides of
this river, being here attracted by the wonderful activity of life and

trade. That life and trade which were begun here by the first passage of the *Cleimont* up the Hudson between New York and Albany, at the speed of five knots an hour, has actually grown up by degrees to be very thick in these days, between Europe and America, across the ocean, at the wonderful speed of thirty-five knots an hour.

"In the name of Italy I wish peace and prosperity to the United States and to all other Nations here present, which are all likewise conspicuous factors of progress and civilization in the history of the world."

MAYOR McCLELLAN: "I have the honor to present His Japanese Imperial Highness Prince Kunihiko Kuni, Special Delegate of Japan." Delegate

Prince Kuni handed to Gen. Woodford a paper which the latter read as follows:

"His Imperial Majesty, my august Sovereign, has commissioned me to assist in this Celebration and to extend his cordial congratulations on the material progress that has followed the discovery of Hudson and the inventive genius of Fulton."

MAYOR McCLELLAN: "I have the honor to introduce the Luxembourg Special Delegate from Luxemburg, the Hon. Maurice Pescatore." Delegate

Mr. Pescatore bowed his acknowledgments.

MAYOR McCLELLAN: "I have the honor to introduce Senor Mexican Don Carlos Pereyra, Special Delegate of Mexico." Delegate

SEÑOR DON CARLOS PEREYRA: "Mexico joins with the American people in the commemoration of two great events, which belong equally to the history of the United States and to the history of all peoples. In the prowess of Hudson you glorify the man of action, and in Fulton's invention the marvellous power of a creative imagination. These two heroes of civilization represent the two integral forces of human conquest: -- will and genius."

"Hudson displayed the flag of a new, gentle country while looking for routes by which to reach the countries of the medieval dreamers. Instead of reaching the climatic regions of Marco Polo, which seduced him as they seduced the Italians, Spaniards and Portuguese of the glorious transatlantic Odyssey, he placed foot in a land richer than all the land of dreams, in which there are many characteristics of greatness, of which the most wonderful is the spirit of liberty."

"Fulton, with his invention, reduced the earth to the dimensions

Mexican
Delegate

assigned to it by the contemporaneous cartographers of Hudson. Civilizations, which in their origin were pluvial and later mastered the mediterranean basins of the world, had reached the period of oceanic extension. Fulton furnished the instrument to completely realize the future immutual cooperation of peoples.

"We are in the midst of a celebration in which all humanity feels as one. We praise you for presenting to the world the credentials which entitle you to be classed as an illustrious nation. All that is genuinely American is great and deserves admiration. It shines in the virtues of Washington; in the wonderful far-sightedness of Jefferson; in the political science of John Quincy Adams; in the eloquence of Webster; in the magnetic force of Clay; in the fortitude of Lincoln; in the genius of your inventors; in the daring of your explorers; and in your love for all that means a victorious effort of the intelligence and of the will to reach the harmony of nations and the peace of peoples.

"Mexico, in her development, singularly favored by sympathy toward all peoples, which being to her elements of happiness and culture, and being given to that stimulus all legitimate activities, earnest endeavors in this continent, this movement shall not cease until perfection is reached."

Nether-

Delegate

MAYOR McCLELLAN: "I have the honor to introduce to you the Special Delegate of the Netherlands, Mr. J. T. Cremer."

MR. J. T. CREMER: "Her Majesty, the Queen of the Netherlands has desired me to convey to the Hudson-Fulton Celebration Committee the expression of her people's great sympathy with the commemoration of events of such vast importance as the discovery of the Hudson River and the inauguration of steam navigation.

"The flag of the Netherlands was the first to fly on this noble river, and on the settlements of New Netherland, now the justly proud Empire State and City of New York.

"This discovery was owing to the spirit of enterprise of the brothers of the De Linds, nurtured in eighty years' struggle for freedom and to their leaders in this war, the Princes of the House of Orange-Nassau, who encountered trouble as the mainpring of the resources of the country. The name of the great soldier-prince Maurice once was given to this river, and the forts on its banks were named Orange and Nassau, from which are well remembered by our Queen.

"The memory of those days is still vivid on both sides of the ocean. Her Majesty knows that a great number of your worthiest citizens still cherish the country where their forefathers lived and practiced the old home virtues and customs; that tokens of friendship are constantly being offered by your citizens to her, in the interest of peace and good will amongst nations; and also that the one official flag, adopted by your Commission, is the old flag of the Netherlands, thus most closely associating to this Celebration the country which feels most for it.

"The sympathy of that country which had the hardest struggle for freedom has always been strong for the Great Republic of the New World during and after its fight for independence and liberty; and Her Majesty, the Queen of the Netherlands, remembering that on the 17th day of November, 1776, Fort Orange on the Island of St. Eustatius was the first to salute the flag of the United States, flying on the *Andica Doria*, has authorized me here to salute the emblem of your grand Celebration, her old flag, which to us, Mr. President, is your flag."

Mr. Cremer, at the conclusion of his address, stepped to a flag draped at the side of the stage, and, taking its folds to his lips, respectfully kissed it.

MAYOR McCLELLAN: "As the Mayor of the daughter city ^{Mayor of} of New Amsterdam, I have the great privilege and honor of intro- ^{Amster-} ducing to you the Burgomaster of the mother city of Amsterdam." ^{dam}

HON. W. F. VAN LEEUWEN: "Mr. Mayor, Honored Colleagues: I have not felt a monarch's inclination to cross the ocean, in order to transmit on this occasion the friendly greetings from the City of Old Amsterdam to the City of New Amsterdam. If I feel a certain predilection in using the name which the mighty metropolis of the Union bore in her youth, it is not only because this name conjures up historical facts pleasing to the Dutch mind, but rather because this name explains and accounts for those three-centuries-old bonds of friendship which join Holland and America.

"I am quite well aware of the fact that the Amsterdam Chamber of the East India Company did not sail on Hudson in the Half Moon in search of new lands, and that Hudson's discovery of the river which now bears his name might, to a certain extent, be attributed

Mayor of Amsterdam to chance, and if the Hollanders of those days had been of the kind such as some historians represent, then they would calmly have put Hudson's account of his voyage aside. The spirit of enterprise, however, which moved the Dutch of that age, made them equip ships in order to derive advantage from Hudson's discovery to trade with the newly-discovered countries and to found settlements there, of which the foundation of New Netherland and of New Amsterdam have been the immediate outcome.

"Among those ships was the Amsterdam vessel, *The Tiger*, commanded by the well-known Captain Adrian Block. Unfortunately, Block's ship was burned in the Fall of 1613 just as he was making ready to return in her to Holland. This was a great disappointment to the Dutch who did not come here for their health. If Block and his men had been of a ruminating habit, the habit which Washington Irving has ascribed to the Dutch in general, they would have gone on meditating all through the Winter upon that disaster that had overtaken them, with their hands in their pockets and their pipes in their mouths. What they actually did do was to set to work instantly to build another vessel, and by the Springtime of the year 1614 a ship was finished and launched large enough to venture out upon the ocean.

"There was a nice touch of prophetic fitness in the fact that the very first product of skilled labor on this Island was a ship; for a ship in the three centuries that lie behind us has formed the bridge between this and other continents, and which will continue to do so in the centuries still to come, unless the aeroplane shall take its place.

"And the spirit of prophecy was upon the Dutch builders of this first little vessel when they named her '*Onrust*,' '*Unrest*.' Probably they wished to designate the circumstances under which the vessel was constructed; but '*Onrust*' or '*Unrest*,' which can also be translated by '*Restless*' and '*Rustless*,' in the sense of untiringly energetic, at once describes the characteristic most essential of, and the motto most fit for the City of New York. This untiring energy, which has ever since characterized the majority of the inhabitants of this City, has made her the Metropolis which rightly rouses the admiration of fellow countrymen and foreigners,—the Metropolis which by her precept and example has contributed no little to make this country

the most powerful, the most prosperous country in the world in every respect.

Mayor of
Amster-
dam

"Holland, more especially Amsterdam, Old Amsterdam, rejoices at this. Old Amsterdam is proud that she has been privileged to lay the first small foundation stone of this grand structure of sturdy human labor, and I am second to none in uttering the well-meant and heartfelt wishes for this great City, speaking as I do for and on behalf of the Old City of Amsterdam. May the word 'Rechts,' which thus far has been the motto of this City, continue to remain her motto in the future. May this City continue to prosper and thrive to the advantage of the United States of America, and to the benefit of mankind in general. This is the ardent wish of the City of Amsterdam for the City of New -- permit me once more to call her by the name of her youth -- the City of New Amsterdam."

MAYOR McCULLAN: "I have the honor to introduce Senor Don Pio Bolanos, Special Delegate of Nicaragua."

Nicar-
aguan
Delegate

SEÑOR DON PIO BOLANOS: "Mr. President: The Supreme Government of Nicaragua, in accepting the invitation extended to it by your honorable Committee to attend the celebration of the third centennial of the discovery of the Hudson River and of the first century of the application of steam to navigation, has appointed me its Special Commissioner."

"In performing the honorable service thus imposed on me by my Government, I may be permitted to state to your honorable Chairman of the Committee and to its worthy members, that the Nicaragua Government and people send to you through me as their Commissioner their most cordial salutation, and commend me to give expression to their hearty sympathy with you in this great festival, by which this generation in the full enjoyment of its wonderful development and progress seeks to honor the memory of Henry Hudson and Robert Fulton."

"The achievements of these two figures in the history of the world, as has been the case frequently with the greatest of human accomplishments, were at first scarcely appreciated and often made the subject of the ironical jests of those who would deny them. It is necessary that centuries should pass for society, in its inevitable evolution, to realize that the accomplishments which at the time of their realization were considered of little or no importance have

the Norwegian ships and crews showing their flag the whole year round on the river and in this port.

"Also His Majesty, the King of Norway, my most gracious sovereign, himself as a sailor, has been pleased to send me the following telegram, which I herewith have the honor to communicate to you, Mr. President.

"*Mr. Mayor, Mayor of New York,*

"*His Majesty's King of Norway.*"

"*"The many and beautiful tributes to the 100th Anniversary of the Declaration of the United States."*

"*(Signed) H. M. King of Norway.*"

"Please accept, Mr. President, the assurance of my highest consideration."

MAYOR McCLELLAN: "I have the honor to introduce the Special Delegate of the Government of Panama, Senor Don Pancho M. Valdes."

Senor Valdes bowed his acknowledgments.

MAYOR McCLELLAN: "I have the honor to introduce the Hon. Rodman Wainmaker, Special Delegate of the Government of Paraguay."

Mr. Wainmaker bowed his acknowledgments.

MAYOR McCLELLAN: "I have the honor to introduce to you the Special Delegate from Peru, Senor Don Ricardo Luján."

SEÑOR RICARDO LUJÁN: "Mr. President: Please convey to the American people the greetings of all Peru upon this notable occasion, marking on the calendar, the discovery of Henry Hudson, which gave to the United States the greatest city of the Western Hemisphere, and on the other hand, the invention of Robert Fulton, which made possible to the world the magnificent commerce of modern times."

MAYOR McCLELLAN: "I have the honor to present Senor Don Federico Mejia, Envoy Extraordinary and Minister Plenipotentiary of Salvador, Special Delegate."

SEÑOR DON FEDERICO MEJIA: "Mr. Chairman and Gentlemen: It is with singular satisfaction that I find myself here as the specially accredited representative of the Republic of Salvador, to

Salva- doer's Delegate do honor on this occasion to the memory of Hendrick Hudson and Robert Fulton and their achievements. As a schoolboy on the New Jersey side of yonder river, named after the great discoverer, I was privileged to scrimp up and down the vast number of the steamers, made possible through the inventive genius of Fulton. To both of these men may be ascribed in marked degree the greatness of New York, its wealth, its power, truly the Empire State of the Union. And I am proud to do honor to two men who have contributed so largely towards the rise of all America."

Turkish Delegate MAYOR McCLELLAN: "I have the honor to introduce His Excellency Yousouf Zia Pasha, Special Delegate of Turkey."

HIS EXCELLENCY, YOUSOUF ZIA PASHA: "Mr. President: I take particular pleasure in informing you that I have been entrusted by my Government with the task of expressing to you all the pleasure that they have experienced at the extreme courtesy with which Congressional Turkey has been invited to be present at the Hudson-Fulton Celebration, organized, as I already had occasion of ascertaining, with such celerity in view of commemorating the discovery of the Hudson River and the application of steam to navigation."

"I take advantage, Mr. President, of the opportunity to tell you how happy I am personally to have been invested with my present mission which will be at the same time a voyage of instruction concerning the admirable institutions which have made the grandeur of the United States."

"I beg you to accept, Mr. President, the expression of my high consideration."

Uruguay's Delegate MAYOR McCLELLAN: "I have the honor to introduce Señor Don Rafael J. Fortiña, Special Delegate of the Government of Uruguay."

Señor Fortiña bowed his acknowledgments.

Venezuelan Delegate MAYOR McCLELLAN: "I have the honor to introduce Señor Don Manuel Aguilla, Special Delegate from Venezuela."

HON. MANUEL AGUILLA: "Mr. President: I am intrusted by my Government to present to you and through you to the City of New York, on this occasion, the best wishes of the Venezuelan people who have always felt for this country a most friendly feeling and admiration."

The New York Banks Glee Club then sang, to the air of Mrs. Trask's Verse
 "America," the following verse written by Mrs. Spencer Trask:

Alas! 'tis in the earth
 Thy name is written in death,
 O Liberty,

 Mendes

RABBI PEREIRA MENDES: "Our Father in Heaven, we ask Thy benediction to-day upon this our loved America, no three centuries ago Thou didst grant it to England and to Holland, whose world-work have made possible our life's joy to this day."

"For Thou it was who dost have England for her fight for religious and civil liberty. Thy money and compass had already helped to break the Armada's chain, but it was strength from Thee and courage from Thee that inspired her brave seamen to cross wild seas and made possible the foundations of human progress here, and in other far off lands."

"Above all, it was Thy love and Thy blessing which, three centuries ago, gave to Her in her own language the noble version of our Book of Books, the Bible, 'I will set up your tents O Israel' heralded that revolution which made possible the birth of this great Nation. For then it was that England's Puritans came to these shores the hope, the courage, the faith which made them continue the fight of their sires for liberty, for the power of conscience, for freedom of thought, of which America is to-day a world-clasp plan. Through those Puritans, whose very breath of life was that Book of Books, Thou didst found this blessed America upon the lines of Reverence, Righteousness and Responsibility."

"That loving protection, that courage, that hope, that faith, Thou didst also graciously grant to these sons and daughters of brave Holland so that she also fought for religious liberty, for freedom of thought, for freedom of conscience. Yea, both countries and this country did it. Thine bless when Henry Hudson, the son of England, carried

Benedic-
tion by
Rabbi
Benjamin

the flag of Holland to the mighty stream that laves this imperial City, whose waters bear the apostles of the world.

"Thy blessing hath ever rested upon this land. Thy inspiration hath caused her sons, and Fulton among the greatest of them, to utilize the wonderful powers with which Thou, the source of all power, hast invested Nature. Upon human enterprise when gratified by Thy spirit, upon the development of those powers of Nature when utilized for mankind's progress and safeguarded by righteousness in the use thereof, upon this our loved America, yea upon all countries we ask Thy benediction.

"Farther in heaven, for thus the prophets have taught the world to call Thee, we praise Thee with the inspiration of the ancient prayer, which for twenty-five centuries we have daily uttered: 'Amen' and followed by Thy great name in this world which was created with Thy will; may Thy Kingdom be established there; may Thy redemption of all mankind spring forth to save us from temptation, sin, and darkness, and may Thy Messiah come; so that, in truth, war shall cease, 'nation shall not lift up sword against nation, neither shall they learn war any more; all earth shall be filled with the knowledge of the Lord as the waters cover the sea;' yet, 'loving kindness and truth shall meet, righteousness and peace shall embrace, truth shall spring forth from earth and charity shall look down from heaven.' Give us, we pray Thee, this fulfillment of Thy benediction, upon all mankind. Amen."

Governor's
Island
Reception

In addition to the attentions to the official guests mentioned in Chapter XII and the formal reception described in this Chapter, the Reception Committee also had the pleasure of assisting the guests to attend two other notable receptions given in cooperation with the Commission, namely, the reception by Major-General Leonard Wood, U. S. A., commanding the United States Military Department of the East, and by Mrs. Wood, at the Headquarters of the Department on Governor's Island in New York Harbor on Monday, September 27, 1899, and the reception given by Col. Hugh L. Scott, U. S. A., Superintendent of the United States Military

Academy, at West Point on the Hudson River, on Wednesday, September 29.

The reception on Governor's Island was held in Corbin Hall from 4 to 6 p. m. The official guests of the Commission were taken in cabs from their hotels to the foot of West 44th street, and thence to Governor's Island in a United States naval tug, kindly placed at the service of the Reception Committee by Admiral Murdock.

All of the officials of the United States Navy Yard at New York; Rear-Admiral Sigsbee, U. S. N., Commander-in-Chief of the United States Atlantic Fleet; Admiral of the Fleet Sir Edward Seymour, G. C. B., of Great Britain; Grossadmiral von Roeder of Germany; Vice-Admiral Alfonso di Brocchieri of Italy; and many other distinguished officials, American and foreign, were present. The incalculable warmth which prevailed during the day did not interfere with the success of the reception, and the four hundred or more guests soon forgot the inclemency of the elements out-of-doors in the cordiality of the hospitality of the host and hostess. The scene under the warm lights of the reception room, filled with a distinguished company and glittering with the uniforms of the naval and military services, was very brilliant.

In the evening a dance was given.

The reception by Col. Scott at the United States Military Academy at West Point on Wednesday, September 29, possessed a peculiar interest for the foreign visitors who had the natural desire to see this famous school in which the future officers of the United States Army are receiving their military education. The official guests of the Commission were taken to West Point by train, arriving about 1 p. m. Col. Scott and staff, and the Military Academy Detachment of the United States Cavalry, mounted and in full dress uniform, met the arriving guests at the railroad station and escorted them to the campus. The public buildings of the Academy were decorated

West
Point
Recep-
tion

with the flags of all nations. Upon the arrival of the visitors opposite the Library, a salute of 17 guns was fired. From 1:15 to 2:15 P. M. a reception was held and luncheon was served in Memorial Hall, all officers and instructors of the Academy being in uniform in military full dress. During the reception, the Military Academy Band played the national airs of all nations represented in the company. During the reception and luncheon, care was taken to have the visitors meet all the officers of the Academy and the freest opportunity was given for the exchange of views on questions of military education and the visitors were permitted to ask any questions as to the method and system of the Academy.

From 2:15 to 3:15 the guests were escorted through the various buildings, the officers' mess, library, ordnance museum, chapel, landscape offices, cadet buildings, cadet mess and kitchens, and the cadet barracks.

By special orders, the following named officers assisted at the reception and inspection of public buildings:

Major Will Robles, Co. of Artillery, Corps.
Captain Thomas W. Darragh, 27th Infantry.
Captain William F. Nelson, 4th Infantry.
Captain George D. Culberty, Corps of Engineers.
Captain Charles B. Clark, 22d Infantry.
Captain Henry C. Johnson, Corps of Engineers.
First Lieutenant William A. Mitchell, Corps of Engineers.
First Lieutenant Harold C. Ellet, Corps of Engineers.
First Lieutenant John H. Schley, Corps of Engineers.
First Lieutenant Charles H. Pratt, Corps of Engineers.
First Lieutenant Vernon D. Anderson, Corps of Engineers.
First Lieutenant Samuel Frockenberger, 3d Field Artillery.
First Lieutenant Francis H. Smith, Coast Artillery Corps.
First Lieutenant Clifford Jones, Coast Artillery Corps.
First Lieutenant Charles R. Allen, Coast Artillery Corps.
First Lieutenant Clement E. Peterson, Coast Artillery Corps.
First Lieutenant Wilson Briggs, 5th Field Artillery.
First Lieutenant Frank G. W. Honeysuckle, 5th Field Artillery.
First Lieutenant George M. Morton, Jr., Coast Artillery Corps.

First Lieutenant Samuel W. Parker, 20th Infantry,
Second Lieutenant Vaughn W. Cooper, 12th Cavalry.

West
Point
Recep-
tion

After the inspection of buildings the visitors were conducted to the grand stand on the plateau and the Cadet Corps was paraded for review at 3.15 P. M. As usual, the parade of the cadets elicited the highest encomiums from the delighted visitors.

The party left on a special train for New York City with expressions of appreciation to the authorities of the Military Academy for their courtesy and kindness and for their interesting and instructive visit.*

* Col. Hugh J. Bull, U. S. A., Superintendent of the United States Military Academy at West Point, in his annual report to the Secretary of War, published after the foregoing winter, remarks that the following British Lord-Lieutenant, Viscount Alington of the Fleet, Sir Edward S. Balfour, Lord Esher, and Lord Cromer, of Germany, and the Admiral Le Port, of France, visited West Point officially. Sir Esher took a photograph of the review of the Cadet Corps, given in his report that it was "well done." The Admirals, Viscount Alington, presented his compliments to Major Williams and the Lieut. General J. H. Bull, at West Point with the following note to the Lieut. General:

"After a day of pleasant exercise and work
A right old helld for a soldier's home."

Wm. J. Bull, 1929."

* "The three Admirals," Col. Seward says, "just happened that they had just reached a military school in their countries. Field Marshal Lord Kitchener of the British Army recommended that the Government of Australia send a 'West Point' man. Australia sent Col. W. E. Budge, of the British Army, to inspect the Military Academy, to get ideas to put in practice in this Commonwealth. He was found to all intents a perfect man, and spent some time at West Point examining into every detail of the Academy. Months later Field Marshal Kitchener, in a letter to the Governor of the Military Academy, pointing out that he made his recommendation in Australia on the reputation of West Point Military Academy alone, but that after having seen the 'school' there, Field Marshal Kitchener told him:"

CHAPTER XVII

HISTORICAL PARADE IN MANHATTAN

THE principal event of Tuesday, September 28, 1929, was the Historical Parade in Manhattan Borough, New York City. The preparations for this parade were made under the direction of the Historical and Carnival Parade Committee of which Mr. Harmon Kibler is Chairman. The historical floats were constructed with the cooperation of the Historical Committee, of which Mr. Samuel V. Hoffman, President of the New York Historical Society, is President. The latter committee passed upon the historical accuracy of the designs before the construction of the floats began.

Form of
Pageant
Decided

The idea of a civic parade with floats bearing a series of historical tableaux was suggested at the very first meeting of the Executive Committee of the Hudson Tercentenary Joint Committee on December 16, 1925, but the exact form of the pageant was undecided for some time. In the summer of 1928, while the subject was under consideration, the tercentenary of the founding of Quebec was commemorated with a celebration which included historical pageants directed by Mr. Frank Lascelles on the Plains of Abraham after the English plan; that is to say, historical scenes enacted within a limited area to which admission was restricted by ticket. Upon extended consideration, that form of pageant did not seem to be adapted to a large city like New York where it was desired to present the scenes to the view of the largest number of spectators possible and free of charge. It was therefore decided to produce the historical scenes upon movable "floats" in a procession moving through six miles of the principal thoroughfares of the city.

On September 18, 1908, Mr. A. H. Stoddard of New Orleans, ^{Captain of Pageantry} who for many years had been Master of the Mardi Gras pageants in New Orleans, appeared before the Executive Committee and explained the methods pursued in the parades which have made New Orleans famous as the Carnival City, and on November 20, 1908, his engagement as Captain of Pageantry was authorized. Two months more were consumed in preliminary planning before the work of physical preparation for the Historical Parade — and for the Carnival Parade which was also adopted later — actually began. The arduous labors, involving a vast amount of detail, of organizing these two parades and designing and building the floats were therefore performed in less than eight months.

On January 20, 1909, the Commission rented from the Erie Railroad Company two frame buildings on the north side of 149th street at the Harlem River, in the Borough of the Bronx ^{the Yard} for a factory. The buildings were joined together and otherwise altered to meet the necessities of a work-shop, forming one large building about 337 feet long and 117 feet wide, which was called, after the New Orleans custom, "the Den." The Den and all of the work of float construction were under the immediate charge of Capt. Stoddard. As soon as the factory was ready, several artists and artisans skilled by many years' occupation in this kind of work were brought on from New Orleans and were not only used on the actual work of float construction, but were also employed as instructors to teach a larger number of persons employed locally. In fact, a school of float-construction was established and trained a working force which, at the height of the work in July, numbered 160 persons, men and women, including designers, modelers, papier-maché workers, carpenters, constructors, painters, decorators, costume makers, watchmen, etc.

The general system pursued in producing the historical floats was as follows: First, the subjects were chosen by the

Building
the
Floats

Historical and Carnival Parades Committee, with the aid of persons familiar with the history of the City and State. They were then submitted to Mr. B. A. Wikström,* the artist, who drew "plates" or colored designs about 17 by 22 inches in size, embodying his conception of the subjects selected. These were in turn submitted to the Historical Committee for revision as to the accuracy of details, and when finally approved were placed in the hands of the master-workmen at the "Den," for construction. Here every part of the floats — except the trucks on which they were built — was constructed. With a truck as a base, a rough foundation for the design was made of timber and covered with wire mesh. Upon this rough outline the stucco or papier maché was applied, as the case might require. The high parts were next built up, and the positions of the live or lay figures were accurately marked from the complete artist's design.

Meanwhile, the manufacture of the smaller objects which were to be added was prosecuted in the modeling room. This room, in which three master modelers and a large corps of assistants, men and women, modeled the objects in plaster or clay, was one of the most interesting departments of the Den. The rough skeleton of a figure was first built of lath and wire mesh, and then masses of green modeling clay were potted on that framework. The assistants next moulded the clay into the semblance of the design with their hands, wooden paddles and wire supports, and then the sculptor carefully modelled the face and form of the figure or the exact outline of the object to be produced. The next step was the taking of a plaster mould of the clay model. The papier maché workers then took possession of the cast. Five or six layers

* Mr. Wikström was born and educated in Sweden, having graduated from the University at Stockholm. He had a reputation as a sculptor, but his principal residence had long been in New Orleans, where he was in charge of the illustrations for the Mardi Gras pageants. In the department of art he was regarded as an expert. Mr. Wikström died in New York City on April 26, 1907, after he had completed and installed all the designs for the Historical Parades.

of thin, tough paper were pasted over every part of the cast and allowed to dry perfectly. The papier maché was then split in two by cutting through the layers, and the plaster cast removed, whereupon the parts of the papier maché mould were carefully joined and sewed with fine wire and the place of opening covered with more layers of pasted paper. When finished and dried the papier maché figure was able to stand a remarkable amount of rough usage and retain every line of the original clay model. These papier maché forms were then painted and were ready to be applied to the floats.

Almost every conceivable object was modelled and made into papier maché in that model room, from imitation flames and cabbages to heroic figures of men and women, a life-sized cow and horse, or an eagle that stood 18 feet high and measured 15 feet from tip to tip. The figures and objects that were too large to be carried out of the model room through the small doors or were too large for convenience in handling, were cut into small sections, and each section was carefully numbered, while a drawing of the figure or object, with the sections correspondingly numbered, was filed in the office to facilitate the reassembling of the parts.

The main part of the workshop was a busy scene. In one corner was a forge, with blacksmiths busily engaged in making chains and many kinds of iron parts for the floats; in another were two buzz-saws and a lathe, while in the center were carpenters' benches and the paint shop. Wandering constantly around the shop were watchmen, patrolling, day and night, on the outlook for fire or danger of any kind. From the girders stretched a network of fire hose, always attached to hydrants, ready for instant use; and on convenient shelves, at short intervals, were fire extinguishers and hand grenades. In surroundings like these the smaller objects and figures were added to the floats, and the final decoration with paint, tinsel and gilding added.

**Building
the
Floats**

The floats were made unusually substantial, in order that they might be used in parades in other cities along the river and might withstand the strain and wear of hauling over country roads from town to town.

As the Det. was not large enough to accommodate the 104 floats built for both the Historical and the Carnival Parades, over half of them, as soon as completed, were taken across the Harlem River to Manhattan Island and stored at 155th street, under the viaduct, being protected from the elements by canvas hung on the viaduct.

**Scale of
Floats**

For the benefit of others who may desire to profit by the experience of this Commission, it may be said that the scale adopted by the designers of these floats was in many cases unnecessarily large. The floats were 14 feet wide, 32 feet long, and from 20 to 40 feet high. Some of them were probably the largest of the kind ever built. The designers thought that on account of the scale of buildings in New York City the floats should be unusually large. As a matter of fact, the streets of New York are not wider than the streets of many other smaller cities, and the floats were not seen in such perspective in relation to the buildings as to cause any relative diminution of the former in comparison with the latter. In fact, the floats, crowded between the walls of the tall buildings which rose so far above them, seemed to crowd the streets through which they moved and to be even larger than they really were. Smaller floats would have vibrated less and stood the wear and tear of travel better than the large ones, and would have cost less.

**Artistic
Quality**

As to the artistic quality of the floats—they were not intended to be beaux arts productions nor was it expected that the modeling and coloring would be according to fine arts standards. They were, however, designed and constructed by the most expert artisans available in this kind of pageant work and no pains were spared to have the work-

manship conform to the best standard of this class of handicraft. In this effort the Committee on Historical and Carnival Parades was very successful.

The Historical Parade had two special objects in view: ^{Two} ^{Objects} ^{of Parade} One was to illustrate by moving tableaux memorable scenes in the history of the City and State for public education and entertainment. The second object was to unite in the procession the representatives of as many as possible of the nationalities composing the cosmopolitan population of the State, so as to make them feel that the heritage of the State's history belonged to them as well as to those more distinctly American. As a result, not only were the historical characters on the floats impersonated by students from the Universities, descendants of the old families of New York and members of the leading patriotic and hereditary societies, but about twenty different nationalities were represented in the marching bodies constituting the es-corts of honor. To many of the spectators, not the least educational feature of the parade was the striking illustration of the composite character of the population of New York afforded by the successive phalanxes of citizens of African, Bohemian, Danish, Dutch, English, French, German, Hungarian, Irish, Italian, Norwegian, Polish, Scotch, Swedish and Syrian descent. In several of the organizations, not classified by nationalities, were representatives of several other nations. The aboriginal population of New York State were represented by 70 real Iroquois Indians—men, women and children—who were secured from the Indian reservations for the Commission by Mr. F. E. Moore and who cost the characters on the floats representing the Indian period. These Indians, dressed in their picturesque native costumes, and still speaking the language of their ancestors, were the objects of intense interest alike to the American spectators and to the official representatives of foreign nations at the Court of Honor, before whom they paused and executed a ceremonial dance.

Order of
Floats
Disar-
ranged
by
Weather

The order of the floats in the Historical Parade was somewhat disarranged by the elements. The inclement weather of Monday, the 27th, was followed by such threatening indications and at times light showers in the early hours of Tuesday, that for a time it was uncertain whether the parade could take place on the latter day. When, at length, advice from the Weather Bureau reassured the Committee on this point, so much time had elapsed that it was impossible to haul the floats out from their shelters and arrange them in the chronological order of the events portrayed, without delaying the parade for two or three hours, to the great inconvenience of the waiting multitude, and particularly the visitors from out of town. It was therefore decided to form the procession as rapidly as possible, regardless of the chronological order of the floats, as the public was advised of the correct order in the descriptive programs and public prints.

The
Line of
March

The parade was formed at Central Park West and 110th street and in the streets adjacent thereto, and started about at the hour announced, 1 P. M. The line of march was down Central Park West to Central Park South (30th street), thence to Fifth avenue, and thence to Washington Square, where the procession was disbanded. From beginning to end the route was lined on either side with dense masses of spectators, either standing on the sidewalks and in the parks or sitting upon observation stands. Great enthusiasm prevailed all along the line, and particularly in the vicinity of the Court of Honor between 40th and 42nd streets on Fifth avenue, where the official review took place.

The procession was marshaled and commanded by the veteran soldier, Major-General Charles F. Roe, commanding the National Guard of the State of New York. Ambulances were stationed along the route of the parade at points indicated by flags, the arrangements for their service being made by Lieut.-Col. Wm. G. LaBoutillier; and a signal service for the

purpose of reporting the progress of the procession was arranged by Lieut.-Col. Frederick T. Leigh. The order of march was as follows:

her lap she held an open book, representing history. Upon the back of her throne was perched an owl, signifying wisdom. Behind her, a wigwam and a "Sky-scraper" represented the progress in architecture. From under the scroll at her feet issued the prows of a canoe and a battleship, symbolizing the progress in shipbuilding and navigation.

2. *Title Car of "Indian Period."* This float symbolized the League of the Iroquois who dominated the territory of the State at the time of Hudson's advent. A huge Indian head-dress, resting on a rocky mound embellished with Indian corn and foliage, was the principal feature. On the front of the mound were the clan totems of the Five Nations — the beaver, the tortoise, the bear, the wolf, and the deer.

3. *Legend of Hiawatha.* This float represented the legend concerning the formation of the League of the Iroquois. At the front was the canoe in which Hiawatha arrived in the land of the Iroquois, bearing with him his beautiful daughter. At the prow of the canoe, just landed, stood Hiawatha. Upon a rock by the maiden, in the clutches of an enormous eagle which crushed her to death. Behind them was the council fire, around which stood a group of Indians. The legend is to the effect that after Hiawatha had mourned his daughter three days, he rose in council and formed the League of the Iroquois.

4. *The Five Nations.* The Iroquois Confederacy was originally composed of five related nations, called the Mohawks, Oneidas, Onondagas, Cayugas and Senecas. In 1714 the cognate Tuscaroras, driven out of North Carolina, were received into the Iroquois Confederacy, which thereafter became known as the Six Nations. The float represented a group of Indians before a wigwam, and upon a shield in front of them life-sized figures of a deer, a bear, a wolf, a beaver and a tortoise.

5. *The First Sachem of the Iroquois.* The first Sachem of the League was the venerable Ato-ter-ho, a famous Onondaga

Descrip-
tion of
Floats.

Descrip-
tion of
Floats

chief. The Indian traditions represented him as living in a swamp, where his dishes and drinking cups were made of the skulls of his enemies. He was unapproachable because he was clothed with hissing snakes. The float represented Ato-tar-ho, seated amid badmashes, surrounded by snakes and frogs, and approached by Indians bearing propitiatory gifts.

6. *Season of Blossoms.* The tableau of the Season of Blossoms, or Spring, showed the Indians at work manufacturing implements of war and the chase, making moccasins, tilling the fields, making their birch-bark canoes, etc.

7. *Season of Fruits.* The summer season to the Indians was known as the Season of Fruits. The two important crops were celebrated by the festivals "Ha-men-da-yo," or the Berry Festival, and "An-dah-wa-o," or Green-Corn Festival. The float represented a festival dance by the aborigines.

8. *Season of Hunting.* The Season of Hunting was what we call fall. At this season hunting was indulged in to the exclusion of all else. The float represented a life-sized moose upon a crag, birds flying in the air, and Indians hunting with bows and arrows on land and in a canoe.

9. *Season of Snakes.* This float represented the dance to propitiate the Great Spirit, in order that he might mitigate the rigors of winter, which at one time killed many Indians. In the background was a typical bark cabin of the New York Indians.

10. *Indian War Dance.* This float represented a group of Indians engaged in a war dance under a great tree. The war dance was used to arouse the enthusiasm and to enlist warriors for dangerous expeditions before the departure of war parties. The dance was held in the evening, fifteen men being sufficient, but as many as twenty-five or thirty could perform.

11. *Title Car of "Dutch Period."* This float represented

the prow of an ancient ship, upon which two lions supported a shield bearing the arms of the Netherlands. At the side and rear were draperies of Dutch colors.

Descrip-
tion of
Floats

12. *The Half Moon*. This float was a reproduction on a slightly reduced scale of the ship in which Hudson explored the Hudson River.

13. *Life of Henry Hudson*. Henry Hudson was set adrift in Hudson's Bay in June, 1611, by his mutinous crew, and with a few companions met an unknown fate. The float represented Hudson's boat struggling among icebergs and floes. Upon the highest berg were two polar bears.

14. *First Vessel of Manhattan*. The first vessel of Manhattan was the ship *Restless*, built on the island by Adrian Bloet, in the year 1624, to replace his ship the *Tiger* in which he arrived and which was destroyed by fire. The float represented the nearly completed hull of a small ship of ancient design, propped up on stools. Some standing trees and some felled suggested the source of the timber and the beginning of the conquest of the wilderness.

15. *Purchase of Manhattan Island*. In 1626 Peter Minuit, the first Dutch Governor-General of New Netherlands, purchased the whole of Manhattan Island from the Indians for the equivalent of \$24. The float represented a group of Indians under a spreading tree, approached by a number of Dutchmen just landed from a challop. Between the white men and the natives were displayed chests of European wares offered in traffic.

16. *Bronck's Treaty*. In 1639 Jonas Bronck, after whom the Borough of the Bronx and the Bronx River are named, purchased land in that Borough from the Indians. In 1642, after many hostilities, a treaty with the Indians was signed in his house. The float represented part of the exterior and part of the interior of Bronck's house, surrounded by palisades. Seated at the table was van Tienhoven, the interpreter, and

Descrip-
tion of
Floats

around him were Bronck, his clerk, Dominic Bogardus, Ensign van Dyke, and the Indian chiefs. In front of the house was a well with an old-fashioned well-sweep, and some pige.

17. *Reception of Stuyvesant.* Peter Stuyvesant, the fourth and most famous of the Dutch Governors-General, was appointed in 1647. He lost a leg in the Dutch service at the Island of St. Martin. It was his lot to be obliged to surrender New Netherland to the English in 1664. The float represented a Dutch house with cross-sloped gables in New Amsterdam. Upon the porch, under the Dutch flag, stood Stuyvesant, surrounded by subordinates and soldiers, addressing the cheering citizens before him. In the foreground was a flag-staff bearing the arms of New Netherland and the flag of the Dutch West India Company.

18. *Bowling on Bowling Green.* Bowling Green, at the foot of Broadway, is the oldest park in New York City. It had been used as a public place for many years when, in 1732, it was laid out especially as a Bowling Green. The float represented a party of Dutchmen bowling on the green before the advent of the English. By poetical license, the windmill which once stood a mile to the westward of Bowling Green was introduced in the background of the float.

19. *Governor Leisler and the Huguenots.* When William and Mary were crowned King and Queen of England in 1688, Governor Nicholson fled from New York and Jacob Leisler assumed the reins of government in behalf of the people. In 1690 he deeded his property at New Rochelle, N. Y., to Huguenot emigrants. In 1691 Leisler was hanged as a traitor but later the stigma was officially removed. The float depicted the transfer of the deeds by Leisler to the Huguenots in front of the gate to Fort James at the Battery.

20. *Dutch Dworay.* This float represented a picturesque cottage of the days of New Amsterdam. In the porch stood a

burgher and his boy, while on the step stood the burgher's wife feeding the chickens in the dooryard. In the foreground stood the life-sized figure of a cow, beside which a buxom Dutch maiden sat on a milking stool.

21. *New Amsterdam Becomes New York.* This scene represented the evacuation of Fort Amsterdam by the Dutch garrison, led by Gov. Stuyvesant, in 1664, when New Amsterdam was surrendered to the English. Stuyvesant and his troops were represented as issuing from the gate of the fort, while within the fortification the colors of the Netherlands were being hauled down.

22. *St. Nicholas.* The patron saint of the Dutch children was represented by Santa Claus in a sleigh filled with toys, drawn over the snow by six reindeer.

23. *Colonial Period.* This float symbolized the English regime, which, with a single brief interruption, extended from 1664 to the American Revolution. In front of a colonnade draped with British flags, a crowned lion and a banner bearing the arms of Great Britain represented the successors of the Dutch. Radiating from the base in the foreground, the muzzles of several cannon suggested Great Britain's military power on land and sea, while chests of tea in the background recalled the system of taxation which was one of the causes of her loss of the colonies.

24. *Schuyler and Indians at the Palace of St. James.* This float depicted the scene when in 1692 Col. Peter Schuyler took five Iroquois chiefs to London, partly to impress them with the power of England and partly to advise the home government to a stronger policy toward the French in Canada. The float represented royalty seated on a gorgeous throne, and upon the steps to the throne, illuminated by candelabra, stood Schuyler and a group of Indians in their picturesque native costumes. At the four corners of the float were lions supporting shields bearing the arms of Great Britain.

Descrip-
tion of
Floats.

25. *Trial of John Peter Zenger.* John Peter Zenger edited a little paper called the *Weekly Journal*, in which he freely criticised the arbitrary acts of the royal government. In 1735 he was tried for libel, but acquitted in a verdict which is commonly said to have been the establishment of the principle of the free press. The float represented the scene in the courtroom in the old City Hall which stood at the corner of Nassau and Wall streets, New York. The robed judges on the bench, the lawyers at the bar, and the spectators in colonial costume, presented a realistic picture.

26. *The Stamp Act.* When Great Britain enacted the Stamp Act, in 1765, the citizens of New York were so indignant that they hanged Acting Governor Colden in effigy, burned his coach, paraded the streets with copies of the Stamp Act on poles, lauded "England's Polly and America's Kain." The float represented the bonfire in which the coach was burned at Bowling Green.

27. *Colonial Home.* This was designed to give an idea of domestic life in New York City during the English period near the time of the Revolution. It represented both the exterior and interior of a house of the period. Indoors a woman sat spinning. On the porch, beside the mistress of the house, stood the master, just returned from the hunt, while before him in the foreground stood a colored servant holding the hounds.

28. *Governor Dongan.* Thomas Dongan, Earl of Limerick, by royal permission granted to the people of New York the famous Dongan Charter in 1683. It contained many liberal provisions and was regarded as a great advance toward popular government. The float represented the Governor delivering the Charter to the representatives of the Colony.

29. *Philipse Manor House.* In 1693 Frederick Philipse's possessions, extending from the Spayten Duyvil Creek to the Croton River, were erected by Royal Charter into the

Manor of Philipsburg. The float was a large model of the old house in Yonkers, called the Manor Hall, which is said to have been built in 1686.

Descrip-
tion of
Floats

30. *Exploit of Marinus Willett*. When the British troops withdrew from their barracks in New York City in June, 1776, they attempted to take on board ship several cartloads of spare arms. Marinus Willett and other citizens detained the arms, and they were used to equip some of the American troops. The float represented two carts, filled with arms and driven by British soldiers, halted on their way by Willett and other citizens.

31. *Destruction of the Statue of George III.* After the repeal of the Stamp Act, the people of New York erected in Bowling Green in 1773 a equestrian statue of George III. After the Declaration of Independence the patriots pulled the statue down, July 9, 1776, and melted it into bullets. The float represented a group of citizens pulling the equestrian statue from its base by means of ropes.

32. *Publishing the State Constitution.* The publishing of the Constitution of New York State was done at Kingston, in April, 1777. This famous document was begun at White Plains, matured at Titchkill and finished and proclaimed at Kingston—the Convention having gradually retreated northward to escape the British. The float represented the exterior of the Court-house at Kingston, in front of which, upon a barrel, stood Robert Benson, Secretary, reading the Constitution to a group of citizens.

33. *Storming of Stony Point.* At midnight, July 15-16, 1779, General Anthony Wayne and about twelve hundred men captured by surprise and assault the almost impregnable position of the British on Stony Point on the Hudson River. By this daring feat Wayne won the applause not only of the Americans but also of some of the foremost generals of Europe. The float represented a fort on a craggy height, surmounted

Description of Floats by a British flag and occupied by British soldiers, who defended it against the Continental soldiers scaling the rocky promontory.

33. *Capture of André*. Major André, of the British Army, was the intermediary through whom Benedict Arnold and the British Command-in-Chief conducted their secret negotiations for the betrayal of West Point. André was captured by the Americans near Tarrytown in 1780 and was hanged at Tappan. The scene represented the three captors leading André on horse-back.

35. *Order of the Cincinnati*. The Order of the Cincinnati, composed of descendants of officers in the allied American and French armies and the oldest hereditary society in the United States, was formed in "the Temple," near Newburgh, in 1783. The float represented the exterior of the temple, before which a number of Continental officers, with raised hands, took the oath of membership. The well-known insignia of the Order of the Cincinnati adorned the sides of the float.

36. *Hamilton's Unpopularity*. On July 18, 1795, a public mass meeting was held in front of the old City Hall, on the site of the present Sub-Treasury in New York, to discuss the proposed Jay treaty with Great Britain. The meeting broke up in disorder, during which Alexander Hamilton mounted the stoop of an old Dutch house in Broad street and tried to quiet the mob. His attempt was requited with violence, as he was knocked down and dragged through the streets. The float represented the front of a building, upon the porch of which stood Hamilton addressing a crowd of citizens.

37. *Old-Time Punishments*. This float gave realistic representations of the ducking-stool, pillory and stocks.

38. *Washington Taking Oath of Office*. Washington was inaugurated as first President of the United States on April 30, 1789, in Federal Hall, which formerly stood on the site of the

present United States Sub-Treasury, at the corner of Wall and Nassau streets, New York City. The oath of office was administered to him by Chancellor Livingston from the balcony facing Broad street. The float was a realistic representation of the front of Federal Hall, upon the balcony of which stood Washington and members of Congress, while in the foreground below stood a number of citizens. From a staff over the balcony hung an American flag. This float aroused great interest among both foreign and American spectators, many raising their hats respectfully as it passed.

39. *Washington's Coach.* This float was a full-sized representation of the picturesque "chariot" drawn by four horses and mounted by two footmen in the rear, in which Washington rode to his inauguration in 1789.

40. *Nathan Hale.* In September, 1776, when Washington desired to get information concerning the British designs, Capt. Nathan Hale volunteered to cross the enemy's lines. Disguised as a school-teacher — his own profession — he went by way of Connecticut, the Sound and Long Island to New York, where he was discovered and hanged, September 22, 1776, regretting that he had but one life to give for his country. The float represented the British Commander seated at a camp-table before a tent, and before him a guard of British soldiers who had just arrived with their captive.

41. *Washington's Farewell to His Officers.* This float represented the interior of Frauncees' Tavern, in New York City, and the scene on December 14, 1783, when the Commander-in-Chief formally bade farewell to his officers before proceeding to Annapolis to resign his commission.

42. *Legend of Rip Van Winkle.* This float represented the story of Rip Van Winkle, the good-natured but intemperate Dutchman, who drank liquor with Hudson's ghostly crew in the Catskill Mountains and slept twenty years — written by Irving and made doubly famous by Joseph Jefferson's inaper-

Descrip-
tion of
Floats

Descrip-
tion of
floats

sonation — probably the most celebrated legend of the Hudson River. Upon the rocky mountain heights were represented Hudson and his eerie crew, drinking with Rip Van Winkle the sleep-producing liquor which the latter had carried up the mountain at the request of one of the crew.

43. *Legend of Sleepy Hollow.* The float represented the story of the nocturnal pursuit of Ichabod Crane by a "headless horseman," who carried his head under his arm and buried it at Ichabod as he crossed the Sleepy Hollow bridge, near Tarrytown. In the background stood the front of the Sleepy Hollow Church, surrounded by gravestones, while in the foreground were represented Ichabod and the headless Hessian on horseback dashing over the Sleepy Hollow bridge.

44. *Title Car of the United States and Modern Period.* Upon this float a huge American eagle held in its beak a scroll bearing the national motto. Around a flaming altar in the foreground were arranged shields bearing the arms of the different States of the Union. The float was profusely ornamented with American flags, shields, and five-pointed stars.

45. *The Clermont.* This float was a reproduction of the Clermont on a small scale. The characters on board represented Robert Fulton, Chancellor Livingston, and others.

46. *Fulton's Ferry.* In like manner this float represented Fulton's ferryboat of 1812. This boat was built on the catamaran principle, with two hulls, was only 80 feet long, and required twenty minutes on the average to cross the Hudson River from Cortlandt street to Jersey City.

47. *Reception of Lafayette.* Lafayette, the friend of Washington, returned to France after the American Revolution, but revisited this country in 1824 and 1825 and was received with popular demonstrations of affection wherever he went. The float represented an arch of welcome, under which Lafayette was being received. The arch was profusely decorated with American and French colors. In the foreground was the

barge in which the distinguished guest landed, and in the background was a saluting cannon.

Descrip-
tion of
Float

43. *Erie Canal Boat*. The Erie Canal, connecting Lake Erie with the Hudson River, was begun in 1817 and completed in 1825. By this enterprise New York Harbor was connected by water with the remotest regions of the Great Lakes; commerce was greatly increased, and New York, which formerly ranked second to Philadelphia in size, soon became the metropolis of the New World. The float represented a canal boat drawn by horses. On the boat were several passengers, while two or three more trudged along the towpath behind the horses.

49. *Old Fire Engine*. This float was modeled after a hand engine which was in use in New York before the introduction of Croton water and the invention of the steam fire engine. The original engine is now at the headquarters of the veteran firemen, 51 West Street, New York.

50. *Old Brooklyn Sleigh*. This float represented a period long gone by in New York City, before river tunnels, subways, elevated roads, electric trolley or horse cars, when winters were more severe than now, when the snow was not removed from the streets, and when the omnibus in summer and sleigh in winter were the common modes of public transportation. Upon the float was a veritable old-fashioned sleigh, filled with passengers, and drawn over the snow by four horses.

51. *Garibaldi's Home, Sicily Island*. Garibaldi, the Italian patriot, lived at one time in Clifton, Sicily Island, after his unsuccessful revolutionary efforts in 1849. There he was associated with Arzuffi, the telephone inventor, in making candles. The float represented the Garibaldi cottage, in front of which stood Garibaldi, and several of his compatriots.

52. *Introduction of Croton Water*. This float represented the introduction of Croton water in the City of New York in 1842. In the background a female figure poured water from

Descrip-
tion of
Floats

a cornucopia into a reservoir, from the front of which the water issued in streams. Several female figures with jars in the foreground, symbolized the use of the water.

53. *Statue of Liberty*. This float contained a miniature of the Statue of Liberty Enlightening the World, which stands on Bedloe's Island, in New York Harbor, and which was presented to the United States by the people of France as a memorial of the ties of friendship which have united the two nations ever since the French Army and Navy helped the Americans win their national independence. In the foreground two seated female figures symbolized America and France, while their friendship was further indicated by other figures and by decorations.

54. *Father Knickerbocker Receiving*. Knickerbocker, the alleged author of Irving's satire, "Knickerbocker's History of New York," has been popularly adopted as the patron saint of New York. The float represented Father Knickerbocker benignantly welcoming to New York all of those who come to our shores from foreign lands.

CHAPTER XVIII

AQUATIC SPORTS

ON Wednesday, September 29, 1909, were inaugurated the Aquatic Sports on the Hudson River. The plan for these sports was the natural outgrowth of the two fundamental ideas of the Celebration which were inseparably associated with the river; but while Hudson's voyage represented the hardships and anxieties of the pioneer explorer, and Fulton's invention the serious material interests of commerce and travel, the aquatic sports offered an opportunity for the expression of the spirit of pleasure in friendly competition of skill with various forms of light craft. They were also designed to permit the personal participation of the foreign sailors in the Celebration on the water in addition to their appearance in various functions on land. The sports, which aroused widespread interest and which were in every way successful, were directed by the Aquatic Sports Committee of which Lieutenant-Commander Alfred Brooks Fry, N. Y., N. Y., is Chairman. They were held on three different days and in three different places.

On Wednesday, September 29, pulling races for crews from the American and foreign war vessels, the United States Revenue Cutter Service and the Naval Militia organizations were held at New York.

On the same day, races for motor boats were held at New York.

On Thursday, September 30, there were motor boat races at New York.

On Saturday, October 2, rowing races for amateur crews and canoe races were held at Yonkers.

On the same day, there were motor boat races at Newburgh.

And on the same day there were races for sailing yachts at Newburgh.

The following details are furnished by Lieutenant-Commander Fyfe.

Pulling
Races at
New
York

The pulling races for crews of war vessels, etc., on Wednesday, September 26, were started at a point in the Hudson River opposite 157th street. The course for each race was two miles, straightway, and the finish was at a point opposite the headquarters of the First Battalion Naval Militia of New York, at the foot of 97th street. There were five races and the prize winners were as follows:

Class I: For crews of foreign war vessels only, rowing in twelve-oared cutters. First prize, crew of *Viktoria Luise*, Germany; second prize, crew of *Fearless*, Italy.

Class II: For crews of United States Revenue Cutters. First prize, crew of *Groshen*; second prize, crew of *San Jacinto*.

Class III: For crews of American war ships only, rowing in twelve-oared cutters. First prize, crew of *Albatross*; second prize, crew of *Louisiana*.

Class IV: For crews of Naval Militia organizations. First prize, First Battalion, Naval Militia, New York; second prize, Naval Militia, New Jersey.

Class V: For crews of foreign and American war vessels, United States Revenue Cutters, and Naval Militia organizations, rowing in twelve-oared cutters. First prize, crew of *Albatross*; American second prize, crew representing Germany; third prize, crew representing Italy.

Motor
Boats at
Yonkers

The first of a series of three motor boat races was held at Yonkers on Wednesday, September 29. Three classes filled. The details follow:

Class A: High Speed Boat, 100 feet over all length, thirty-horsepower, propelled by "Electric Power," New York City, N. Y.

Class B: High Speed Boat, 100 feet over all length, thirty-horsepower, nine starters. First prize won by "Electric Light," Long, De Long, Albany, N. Y. Second prize won by "De Witt," Joseph H. Harding, New York City. Third prize won by "Peter Pan," James Simpson, New York City.

Class C: High Speed Boat, 100 feet over all length and under, thirty-horsepower. First prize won by "Hobbs' Power," Max C. H. Schuman, Cincinnati. Second prize won by "Guthrie II," William J. Brainard, New York City.

These boats earned Souvenir Medals which were offered to all that completed their races but won no prizes: "Barber,"

Charles Bassett, Syracuse, N. Y.; "Barbara II," Charles A. Bird, New York; "Sciro," George C. Sutton, New York; "Vivian," George J. Gould, New York; "Arrow," Charles F. Seafeld, Long Island; "Say," Herbert Smith, New Haven; and "Scamp," T. Sprague, Yorkers.

Eighteen boats in all competed in the races.

The second series of races was held on the Hudson River ^{Motor} ^{boats at} ^{New York} opposite the upper part of New York City, on Thursday, September 30. The starting line was off the New York Motor Boat Club House, at the foot of 148th street. One class of cruising boats of over 40 feet over-all length raced to Peekskill and return, a distance of 60 nautical miles. All other classes raced around a ten-mile triangle, the High speed boats three times and all others twice. The details follow:

Class A: High Speed Boats, not over 42 feet and over 33 feet, over-all length, one starter. Sail-over prize won by "Doris II," E. J. Schoeden, Jersey City, N. J.

Class B: High Speed Boats, 33 feet over-all length and under; five starters. First prize won by "Haida Papoose," Max C. Fleckhauer, Chatham. Second prize won by "Elmer L," Lansing De Long, Albany, N. Y.

Class C: Cabin Cruising Boats, over 40 feet over-all length; five starters. First prize won by "Avis," F. C. Haven, 562 Harbor, Long Island. Second prize won by "Wanderlust," E. J. Steiner, New York.

Class D: Cabin Cruising Boats, 40 feet over-all length and under; sixteen starters. First prize won by "Helen II," S. W. Granbery, New B. N. J. Second prize won by "Elmo II," F. D. Coker, Jr., New York City. Third prize won by "Mary," Wm. Murphy, New York.

Class E: Open Launches; six starters. First prize won by "Talequah," M. H. Niles, New York City. Second prize won by "Onyches," Fred X. Griffin, Brooklyn.

In Class F, "Vixen" was first on correct time, but was protested for racing with only one person in the boat, contrary to the rules, which stipulated that a crew should consist of at least two persons. Therefore "Vixen" was disqualified.

These boats were awarded souvenir medals: "Alabama," J. H. Hoadley, New York; "Puyran," T. F. Patterson,

"Belle," Robert L. Stillson, Nyack, N. Y.; and "Widgeon II," Wm. L. Martin, Albany, N. Y.

Seventeen boats in all took part in these races:

These races were held at Yonkers on Saturday, October 2. The entry list comprised 53 racing shells and 24 canoes, manned by 194 oarsmen and 60 canoeists. The results of the races at Yonkers were as follows:

1. Intermediate Single Shell. Won by Metropolitan Rowing Club, New York City; time 8.30. Second, Scawmunka Boat Club, Long Island City; time 8.50.

2. Tandem Double Blade Canoe. Won by Knickerbocker Canoe Club, New York City. Second, Fort Washington Canoe Club, New York City.

3. Senior Quadruple Scull. Won by Nassau Boat Club, New York City; time 6.17 2-5. Second, Metropolitan Rowing Club, New York City; time 6.17 4-5.

4. Junior Double Gig. Won by Nassau Boat Club, New York City; time 7.25 2-5. Second, Hudson Boat Club, New York City.

5. Tandem Single Blade Canoe. Won by Fort Washington Canoe Club, New York City. Second, Knickerbocker Canoe Club, New York City.

6. Senior Four-Oared Boat. Won by Atlantic Boat Club, Baltimore, Md.; time, 6.05. Second, Atlantic Boat Club, Hoboken, N. J.; time 6.07 1-5.

7. Senior Single Shell. Won by Harlem Rowing Club, New York City. Second, Harlem Rowing Club, New York City.

8. Intermediate Four-Oared Gig. Won by Nassau Boat Club, New York City; time, 6.52. Second, Columbia University Rowing Club, New York City; time, 6.57.

9. Senior Eight-Oared Shell. Won by Nassau Boat Club, New York City; time, 5.44. Second, Walonatala Boat Club, Lansing, I. I.; time, 5.47.

10. Club Fours Canoes. Won by Forest Cliffs Club, New York City. Second, Fort Washington Canoe Club, New York City.

11. Senior Octuple Scull. Won by Metropolitan Rowing Club, New York City; time, 5.51. Second, Union Boat Club, New York City; time, 6.01 2-5.

Races for sailing yachts were held on the Hudson River at Newburgh, N. Y., on Saturday, October 2. Fifty-seven yachts started. Of these 42 came from Long Island Sound ports, two from Gravesend Bay, and 13 from points along the Hudson River. Early in the work of preparation for these

Sailing
Yachts at
New-
burgh

It became evident that the number of sailing yachts along the Hudson River was small, and that it would be necessary to secure entries from Long Island Sound and Gravesend Bay racing fleets in order to make the races successful in point of numbers of competitors. This was not easily accomplished, partly because the racing season had ended, but mainly because of the impossibility, with the extraordinarily augmented traffic of the Hudson River, of the yachts proceeding under sail from their home ports to Newburgh. It became necessary therefore to furnish free towing to yachts entered for the races. In no other way could the attendance of a fleet commensurate with the importance of the event have been secured.

Seventeen classes filled, and in accordance with the rule adopted for the races, a yacht appearing alone in still another class, became entitled to a sail-over prize. The winners were as follows:

Class D: Three starters. First prize won by "Flaming," F. T. B. Moore, New York. Second prize, "Violet," John P. Brown, New York.

Hudson River Class C, Division 1: racing as one class. Four starters. First prize won by "W. W.," W. W. Jackson, Kingston, N. Y. Second prize, "Tanya," John J. Cahill, Newburgh, N. Y.

Hudson River Class C and Division 2: one class. Four starters. First prize won by "Michael," Harry R. Jackson, Newburgh, N. Y. Second prize, "Whitely," W. D. P. Jones, New York.

Hempstead Harbor Class, Division 1: Four starters. First prize won by "Deerberg," John P. Jackson, New York. Second prize, "B. Bull," Richard A. Moxley, New York.

Hempstead Harbor Class, second division: Two starters. First prize won by "Beloum," W. J. Decker, New York city.

Hempstead Harbor Class, third division: Three starters. First prize won by "Busy Bee," R. E. Caldwell, New York. Second prize, "Rascal III," S. C. Hopkins, Catskill, N. Y.

Hempstead Harbor Class, fourth and fifth divisions racing as one division: Four starters. First prize won by "Pelican Hawk," W. G. Davie, New York. Second prize, "Violet," H. A. Jackson, Jr., New York.

American Yacht Club, design class: Three starters. First prize won by

"Cricket," W. W. Swan, New Rochelle, N. Y. Second prize, "Jolly Tar," sailing, H. S. Duff, New York.

Larchmont Yacht Club, one design class. Two starters. First prize won by "Vaquero," John McCaughy, Mamaroneck, N. Y.

New Rochelle Yacht Club, one design class. Three starters. First prize, won by "M. J. G.," J. L. McNeill, New Rochelle, N. Y. Second prize "Virginia," David Decker, New Rochelle, N. Y.

Manhasset Bay Yacht Club, Freshwater Class. Four starters. First prize yacht, "Ahwa," Otto Peters, New York City. Second prize, "Foxy," Louis E. Egger, New York City.

Class 80. Two starters. First prize, won by "Sabrina," T. Pache Bleeker, New York.

Manhasset Bay Yacht Club, "Typhoon." Two starters. First prize won by "Albatross," J. W. Allen, Great Neck, N. Y.

Manhasset Bay "Bug" Class. Four starters. First prize yacht "Dragon Fly," David Gould, Great Neck, N. Y. Second prize, "Redwing," H. H. Todd, New Rochelle, N. Y.

Hudson River Class Jr. Four starters. First prize yacht, "Zee H," Willem E. van Hasden, Great Neck, N. Y. Second prize, "Spring," Nelson D. Brown, Harding-on-Hudson, N. Y.

Amherst Yacht Club Day Class. Six starters. First prize yacht, "Imperog," George Gordon, Day, Hamden, Conn. Second prize, "Hurdy," Wm. McHenry, Hamden, Conn.

Hudson River Class No. Cathartes. One starter. First prize won by "Arrow," George H. McNeill, Newburgh, N. Y.

Hudson River Class C. Cathartes. Two starters. First prize, won by "Riddle," J. P. Standish, Grand View-on-Hudson.

These yachts, having completed their several courses, and having won no other prizes were then taken to the Grand Lot: "Joy," G. R. Le Sauvage, New York; "Rumalla," H. H. Tucker, New York; "Dirt," W. A. Adrionce, Jr., New York; "Vesta," James O'Brien, New York; "Crescent," L. de B. Handley, New York; "Sally Ann," A. E. Black, New York; "Jolly Roger," Harry L. North, Sea Cliff, N. Y.; "Albatross," Herbert L. Stone, New York; "Ole," J. A. Madsen, New Rochelle, N. Y.; "Mayola," B. V. Grimm, New Rochelle, N. Y.; "Horn," D. L. Decker, New Rochelle, N. Y.; "Madisona," H. P. Smith, New York; "Lalish," Grant S. Kelley,

Sailing Yachts at Newburgh
 Whitestone, N. Y.; "Kiddo," A. C. Andrews, Bayside, N. Y.; "Ardetto," Clarkson Cowd, Great Neck, N. Y.; "Mayfly," Alfred Brooks Fry, New York; "Wasp," A. S. Robinson, New Rochelle, N. Y.; "Molly," H. I. Weller, Jr., Fishkill on Hudson, N. Y.; "Success," L. K. Wood, Yonkers, N. Y.; and "Surprise," Walter Smith, Yonkers, N. Y.

Five protests were filed immediately after the end of the races. In Class Q, "Joy" protested "Honor," alleging a foul of the starboard bow in the end of the first round. This protest was dismissed as the crew was not proved.

In the second division of the Handicap Racing Class, "Belmont" protested "Juanita," alleging a foul of the upriver starboard bow. This protest was sustained on the statement made by the owner of "Juanita" and "Juanita" was disqualified.

In the New Rochelle Yacht Club designed class, "Madiana" protested "Virginia," alleging the forcing of the starboard tack during round one immediately preceding the start of the class. This protest was dismissed as it was not proved.

In the Manhattan Bay Yacht Club Freeabout Class, "Ahoy" protested "Avis" (which finished first), alleging that certain changes had been made in the boat without the knowledge or consent of the owner, of other boats in the class. In accordance with the rule governing the races, this protest was referred to the Chairman of the class. That official presented the matter to the owners of boats enrolled in the class and the protest was sustained.

In Class S, "Kiddo" protested "Sabrina," alleging that the latter had a crew of four persons, the rules allowing only three in that class. The protest was dismissed, inasmuch as the fourth person in the crew was a woman, while the rules provided for a crew of three "men" and as inasmuch as in the opinion of racing men thoroughly familiar with boats of the type of "Sabrina" the extra weight carried was, in the con-

dition of weather prevailing on the day of the race, of no advantage whatever.

All the races referred to were witnessed by thousands of people afloat and ashore, the many *canoe races* in particular exciting popular interest. No accident of any moment marred the affairs, and their success, due to the heavy cooperation of all concerned, formed one of the marked features of the Hudson-Fulton Celebration.

CHAPTER XI THE OFFICIAL BANQUET

THE Official Banquet was held in the Hotel Astor, New York City, on Wednesday evening, September 29, 1904.

This brilliant function was arranged by the Banquet Committee, of which Mr. Francis Lynde Stoughton is Chairman. With the exception of the Official Guests and the Legislative and State officers in attendance at the banquet, as given, attendance was by subscription upon invitation. The price to every other guest, including members of the Commission, was \$20. The banquet was held in the Grand Ball Room which was then just completed in the upper extension of the Hotel Astor, and which was used for the first time on this occasion. The scene presented was one of the most brilliant of its kind ever seen in New York.

Decor-
ation of
Grand
Ballroom

The room was decorated for this occasion so as to produce the effect of a palace built in Denmark. A large frieze at the back of the upper gallery represented a fleet of Viking ships, painted in brilliant colors and gold. At the north and south ends of the room, on the wall back of the second gallery, large paintings, each about 20 feet long, were placed. The one at the north end represented the *Hell of Henry Hudson*. That at the south end represented the *New York Harbor* of to-day, showing the scene of Discovery and the *Leutonia* coming up the bay, suggesting the result of the voyage of Henry Hudson and the invention of Robert Fulton. Underneath these paintings, respectively, built out from the upper gallery, were two large models of ships, one representing the *Half Moon*, the other the *Clermont*. These were flanked in masses of orange colored cymathemiums and asparagus

vines. The room was relieved still further by large masses of *Decor-
chrysanthemums, sunflowers, dabbies and gold-rod, all the ration of
flowers being yellow or orange.* The elaborate scheme of *Decor-*
mural decoration was made possible by the fact that the prop-
rietor, Mr. William C. Muncey, had consented to postpone
the permanent decoration of the ballroom until after the
banquet, which necessitated the closing of the ballroom to the
public for at least a month. The decorations were designed
by Mr. Edward G. Unto.

The tables, which were arranged to accommodate twelve diners *Decor-*
each, were decorated profusely with orange chrysanthemums. *Decor-*
At them were seated about 1,000 guests, composed of 40 of the *Decor-*
principal officials of the United States, New York State and *Decor-*
New York City Governments; 212 members of the New York *Decor-*
State Legislature; 50 members of special delegations from
foreign countries; 37 members of the foreign Diplomatic
Corps; 40 members of the foreign Consular Service in New
York; 120 officers of the American Navy; 80 officers of foreign
navies; 12 members of the Champlain Tercentenary Com-
mission; 52 citizen aides to the Hudson-Pulaski Celebration
Commission; 27 individual guests of the Commission; 30
representatives of the American press; 10 representatives of
the European press; and 1,158 subscribers. The conven-
tional platform with a long table for the speakers was omitted.
In its place, a small table, on one side of the room near the
entrance, served as the rostrum, immediately in front of which
the speakers and guests of honor sat at small tables. Although
the sentiment of the Commission was in favor of admitting
ladies to the tables, the physical limitations of the banquet
hall compelled the Committee to restrict the tickets to gentle-
men only. So far as the boxes in the gallery permitted, how-
ever, the banquet was graced by the presence of the ladies.

The Bill of Fare The menu was as follows:

Costa Rica, Mel. V. de du H. de Trippé
 Canine, L. Tertre Verte à l'Américaine
 Holland, Omelette Vanille
 The Netherlands, Crème à la Vanille
 Lubeck, Pommes de terre à la Hollandaise
 Portugal, Omelette à la Portugaise
 Rio de Janeiro, Pigeon Glacé à l'Américaine
 Roumania, Mashed Potatoes
 Scotland, Cullen Chicken
 Sweden, Potatoes au Gratin
 Siam, Tapioca
 Greece, Soufflé de Poulet à la Grecque
 Peter, Turkey Turkey, Turkey
 Café Noir
 Biscuits à la Vanille
 Fruit à l'Américaine
 Mont St. Charles, Pâtisseries-Fruits, Cakes, 1898
 Wine, Rock Wine

The courses were designed to appeal to the eyes as well as to the palate. The first course served was a melon garnish especially for the occasion in Ellinger's shop near Albany, and when served each slice was equipped with silver must and nails in an exact reproduction of the rigging of the Half Moon, the melon itself forming the hull. The melons were brought to the room to the strains of the National Hymn of Holland. Care was taken to serve American products as far as possible, which accounted for the serving of clear green turtle as the soup. The next course was a dish of crab meat, representing red fishes. This was followed by a southern fish, the pompano; and then birds, sweetbreads. Then came the cakes, which was served on a service made especially for the occasion, consisting of a Delft cup, resting on a Delft saucer and Delft service plate. After the birds, the ice cream was served in boxes which were surmounted by a miniature column of the Henry Hudson Monument, which is now in process of erection on Spuyten Duyvil Hill. These ice cream boxes were made in silk, in the American national colors, and were brought in to the strains of the Star Spangled Banner. With the coffee

were served cigars especially made in Havana for the occasion, placed in leather bags on which were "burned" reproductions of pictures of the earliest Dutch period, showing the Indian on land and the Indian on water. All the foregoing pieces of decorations were given to the guests as memorabilia of the occasion.

The official souvenir of the banquet was a copy of the Official Souvenir Medal, three inches in diameter, executed in bronze.

Before the dinner Mr. Edwin H. Lemare rendered the Music following selections on the banquet hall organ:

Verpelt, *De L. A. and B. L. M. of the League of Nations* Wagner
 Minuet in A
 Fugue à la Gigue
 Chant de Bonheur
 Overture à l'Opéra
 Marche des Nations

At the conclusion of the dinner and before the speeches, Mr. Lemare rendered an Andantino in B flat, an improvisation by himself.

The program of the post-prandial exercises provided that at this function the Governor of the State should preside, as the Mayor of the City had presided at the Official Reception on Monday. General Woodford, as President of the Commission, therefore presided Governor Hughes as the presiding officer. Then followed an address of welcome in behalf of the State by Governor Hughes and an address of welcome in behalf of the United States by Vice-President Sherman. As the limitations of time prevented all of the representatives of foreign nations from responding, his Imperial Highness Prince Kuniyoshi Kuni of Japan was invited to speak for the Special Delegates. Then the Governor proposed a toast to "The Visiting Ships." To this toast responses were made by Sir Edward Hobart Seymour, R. N., O. M., G. C. B., G. C. V. O., Admiral of the Fleet, of Great Britain; Gross-admiral Hans Ludwig Raimund von Koester of Germany; Rear Admiral Jules Louis Marie Le Pond of France; Captain

Manuel E. Izaguirre of Mexico; Capitano Filippo Baggio Ducairne of Italy; Captain G. P. van Lierck, Colonbrander of the Netherlands, and Captain Almada of the Argentine Republic. These addresses were followed by a toast to "The Diplomatic Representatives," to which Señor Don Joaquín Bernardo Calvo of Costa Rica replied in behalf of the Diplomatic Corps. After these formal toasts, addresses were delivered by Jonkhof J. London, Envoy Extraordinary and Minister Plenipotentiary of the Netherlands, and Mayor McClellan. Senator Root delivered the epilogue to the foreign visitors. Then, as the Dutch were the first to explore the Hudson River, they were accorded the honor of the last speech, which was made by the Hon. J. T. Cramer of the Netherlands.

Following is a verbatim report of the speeches:

General
Woodford

GENERAL WOODFORD: "It is the sad fortune of your President to be compelled tonight to surrender the task of welcome to another; but you have heard my voice so often during the four days of our festival that you will be glad of a change. It is my privilege to present one who was my law student many years ago, and his tremendous success at the bar justifies all the education he received in my office. He is now Governor of the State of New York; and he might have been the candidate of the Republican Party for President of the United States, if his own preceptor had not fallen down so gloriously in presenting his name to the National Convention.

"I have great pleasure in presenting to you as the Presiding Officer of this evening, when in the City of New York, with no regard to party, politics and honors—a lawyer, great in his profession, a Governor, who *leans to the line* according to his sense of duty—I tried to make a bad pun, and you did not catch on.

"And now, excellency, will you take the Chair, and in behalf of New York, bid greeting to our guests."

Governor
Hughes

GOVERNOR HUGHES: "President Woodford, Distinguished Guests, Ladies and Gentlemen, The State of New York chartered the Hudson-Fulton Celebration Commission in order that there might be suitable commemoration of the discovery which led to the

settlement of this Commonwealth, and of the invention which made ^{Governor} possible its distinguished progress. I desire at this time, on behalf ^{Duques} of the people of the State of New York, to express appreciation of the unselfish effort, of the intelligence and of the wisdom with which the various exercises of this Celebration have been conceived and executed.

"It is difficult to realize the extent of endeavor which has been necessary to make possible a celebration on so large a scale, and in a manner worthy of the great occasion, and one which shall be deemed by our people, with their intense pride and loyalty, worthy of the intelligence and acumen of the citizens of the State of New York.

"President Woodford, I desire to express to you and to the members of the Hudson-Tulon Celebration Commission the gratitude of the State of New York for the manner in which you have discharged your duty. It has required lavish expenditure of time and energy on the part of those who are entitled to the indulgence of leisure. It has required that the moneys expended by the State and City should be supplemented by private benevolence. This Celebration is the result of cooperation, led by diffusion of public opinion, of distinction, worthy representative of a great community.

"The State of New York, comprising about nine millions of people, the first in wealth of all the States of the Union, with varied opportunities for industrial activity, and with preeminence in every line of honorable effort, bids welcome to-night to the distinguished guests from East and West, who have come here to join in this Celebration of a discovery of the utmost significance—in its relation not simply to the foundation of a State, or to the development of a Nation, but to the progress and peace of all the world.

"It would not be fitting that at this time we should limit our thought to the events associated directly with the river that bears the name of the discoverer or with the history of this State which we are proud to call our home. New York is great because here are focussed the energies of a nation. The river whose discovery we celebrate is an artery of the national life. Along that river and the natural highway which opens through the range of mountains stretching across a continent, we have proceeded to the West, and to-day, West and East are linked together by the com-

Governor
Hughes material intercourse which centers in the metropolis at New York Harbor.

"I would tonight, in this opening word, direct your attention beyond the boundary of the State which we love, to the Nation of which we form a part. Far on the Pacific Coast they are celebrating the great Northwest in an expedition of extraordinary beauty and interest. From north, south, east and west, lines of interest and of communication are converging to this financial and commercial center. New York is not America, but New York, more largely than any other place, represents the energies, the talent, the ability, the varied activities of all the United States. We have drawn here not only sturdy, alert and energetic sons of the Old World, but many of the best sons of the New World.

"No celebration can adequately represent New York. It would be impossible for the most distinguished commission to plan a ceremony or spectacle which could give any proper representation of its interests, but we are ponder to make of the fact that our work is contributing to the national development than we are of our relation to city or State. The progress of the last fifty years has brought this great people, from the Atlantic to the Pacific, to a sense of unity which the fathers hardly believed possible. The early struggles of the line of colonies along a strip of the Atlantic coast were rendered the more difficult because of the serious obstacles that stood in the way of effective cooperation. Perseverance, - the development of devotion to our common country - has been greatly influenced by invention and the formation of intercourse, and to-day, the dominant sentiment of the people of this favored State of New York, as it is the dominant sentiment of all the people of all the States of the Union, is, that we are bound under one flag, with no regional differences, with no chances of future - which can interfere with the realization of the dream of a free and united people.

"We realize that in our local activities we have the advantage of a system of organization which enables us in matters of local administration to accomplish much that would fail of achievement under a more centralized government. We realize that our States, fortunately, have an opportunity in local concerns to care for the welfare of the people, which a Nation differently constituted might utterly and miserably fail of securing. But our State lines, despite

our loyalty to our home, the place of our birth, despite our interest in local history and our pride of local achievements, mark no essential difference in sentiment or in fundamental principles.

"Americans fundamentally think alike. New York has sent her sons to the far West and is fructifying the continent wide open, and the West is giving of its best to the East. Valuable as are the interchanges of trade, the most important interchanges of the country to-day are in human life and purpose and endeavor by which we are bound together and through which the community of our interests finds constant expression in devotion to one flag and one country. It is because the discovery of Hudson and the invention of Fulton not only made the Empire State possible, but have so largely aided in the development of the life of the Nation, that this Celebration is one of national significance. We have our differences and occasionally they are exhibited in such a way as to suggest serious sectional division, but in reality the forces that bring us together are far stronger than those that would divide us. And New York is proud that it is New York, not because of any isolated interest that it possesses, not simply because of its prosperity in agriculture and industry, but because of the contribution that it has made to the progress of the entire country, and of the fact that East and West meet in their joint operations, and here are executed the transactions of a great people indissolubly bound by ties of commerce and ties of common affection and loyalty.

"I, therefore, on this occasion, as the Governor of the State of New York, rejoicing in the wealth and prosperity of this Commonwealth and in their relation to our national ideal, propose to you the toast of the President of the United States."

The toast was responded to, the guests rising.

GOVERNOR HUGHES: "I will now ask to respond to that toast a distinguished citizen of the State of New York, who, in the absence of the President of the United States, will speak for him, the Vice-President of the United States, the Honorable James S. Sherman."

HONORABLE JAMES S. SHERMAN: "Mr. Toastmaster, Vice-Ladies and Gentlemen: The two events celebrated in these two weeks on a grand and unparalleled scale, are types of the master factors in

Vice-
President
Sherman

human progress. These are the discovery of the secrets of the earth and the practical use of science and mechanism. Hudson and Fulton were far apart in time; they were near akin in spirit. Two hundred years elapsed after the opening of this North River to white men before the *Clermont* followed the Half Moon on the surface of its waters. The achievement of the discoverer and the benefaction of the inventor bridge the gap, for both added to the resources and service of mankind.

"Our high privilege is to accept gratefully the gifts which they bestowed on the race and to appreciate the qualities in them which justify the honors to them accorded wherever thought and speech are known. Most of all, in this Empire State are we debtors for the estuary and for ocean navigation because the Commonwealth owes a large part of its growth and grandeur to these forces, and the nearly States have shared and now share in the boon and the blessing. Fancy cannot conceive the second city on the globe and a State comparable with the ruling powers of the earth without the vital artery, the Hudson, and the steam vessels which, like war birds' shadows, fly over all waters beneath the stars.

"Aye! Even more, Hudson threw wide open the gates of the continent for the Republic which was later to lead all nations in their upward march to the loftiest heights of civilization, while Fulton devised the means for transportation on river and lake and sea for limitless commerce for millions of products yet to be, and for making all ocean paths familiar as the dooryard of the home.

"But let us not cry by no means the importance of the Hudson in view of the expansion of settlement over the continent. It is false to reckon what it meant when the Dutch first came, or what to the original Thirteen States when the Constitution was adopted. The map of the Atlantic coast at that time was, with its scattered settlements, shows the North River as the vertical column of the Union. The coming years were to bring the music of varied industries, to multiply homes of thrift, in hamlet, town and city, and to build schools and libraries, hospitals and churches for a prosperous people.

"Greater are the Mississippi, the Missouri and the Columbia, and in their wild way the Colorado and the Rio Grande, but in more recent days they began to pour their treasures into the lap of the Republic. More dense is the population, more in number are the

keels, more busy is the traffic, more varied is the activity, on the Hudson than on any other American waters. In its subjection to commerce it is the senior of the streams of the continent in this respect, rivalling even the St. Lawrence. What the Euphrates was to Babylonia, what the Nile was to Egypt, the Ganges to India, what the Yellow River is to China, the Rhine to Central Europe, and the Thames to England, the Hudson is to New York and the Atlantic slope.

"Never before this jubiliant fortnight was this arm of the sea covered by such a vast host of rejoicing admirers. But these waters are not merely a stage for a holiday, for spectacles however gorgeous surpassing any royal field of the cloth of gold. This broad strait is the servant of man's needs, the humble carrier of his freight. No other inland current bears such burdens of the earth's products and of diverse merchandise. In 1874, the last officially reported year, 122,247,355 cubic feet of freight were carried on the Hudson, of which 25,010,729 were of exports and imports. The tonnage of the Mississippi and the Ohio and their tributaries for a year was 27,856,641. That of the Great Lakes, including St. Mary's Canal, was 75,600,640 tons of freight. The life, energy which the Half Moon visited is now more full of life than the Orient sees which the explorer sought, is enriched by a commerce more robust and beneficent than that of Holland or Venice or of Spain in their pride. Something more is here, however, than a substitute for the mules and camels of the caravans of old, or the packbearers of primitive tribes.

"Notable by the varied beauties of nature, conspicuous as the center of great and increasing multitudes, and as the channel of a traffic diversified and cosmopolitan, and adorned by the palatial homes of culture and refinement which crown its heights, the Hudson is glorified by the splendid page which it has written in the history of the State and Nation. This roll is spread from the red blood of Indian massacres. Thrift and domestic virtues were implanted by the Dutch. The threats of French invasion stirred the early settlers by frequent alarms but the defense was quick and steadfast. Nowhere were the rights of the colonies and the demands of liberty asserted more promptly or with more vigor. The first movements for American union, the initial steps for a State Constitution and for a con-

Vice-
President
Sherman

Vice-
President
Sherman

tinental Republic consecrate the sites of these festivities. From Long Island by Stony Point, to Stillwater and Saratoga, the battles of the Revolution make these banks and connecting valleys holy ground. The annals of West Point redeem the treason of Arnold. From Newburgh the weary heroes of the Federal army were dismissed to return home for the tasks of building a stable society and a free government. Washington's refusal to play the part of Cæsar, his career as President, his retirement as a private citizen, ennoble the air we breathe, the very ground we tread. This magnificent and prolonged Celebration is a deserved tribute to the toils and struggles and heroisms which, in the decisive events in human progress, have illumined these waters and plains and highlands.

"The dream of a Northwest passage to China and the Spice Islands brought Henry Hudson higher and led him to perish on the far Northern bay which bears his name. He did not find the way to the Orient, but by his discovery a commerce has been created, wealth has been developed, splendor has been exhibited beyond his most golden dreams, while Gulliver has received profit beyond all that could be desired from any short route between Europe and the Indies.

"The North Star governed the whole career of Hudson. His thoughts turned to it as truly as the needle to the pole. The theory of the open polar sea led him to his death. He was in the first rank of the long array of explorers who have sought the ultimate North. Epic finer adds to this jubilee the reports of the planting of the Stars and Stripes on the drifting ice of the apex of the world. Both of the expeditions which that feat, the aim of science and adventure for four centuries, were designed and equipped at the mouth of this historic river. The rivalry of Cook and Peary gives zest to the discovery which offers no open sea, no passage to China, no habitable land, only a cold and desolate laboratory for the geographer and meteorologist. Yet Hudson's achievement here and his farthest advance on the immense bay of the North were index fingers to the pole. An American, matters not be it one or two, solved the problem of exploration and our flag marks the final goal. It is the culmination of Hudson's scheme, the proof of his sagacity, the torch of his enduring fame. The same Old Glory which flies with the sun's rays here and now, amid all the splendors of the twentieth

century, floats over Arctic ice at the point of the extreme North, because Hudson gave this river to white men in September, 1607.

Vice-
President
Sherman

"Fitting, indeed, it is that Fulton's name be joined with that of Hudson in this festival. His genius and invention fully multiplied the value and usefulness of this grand river. His Clermont was not a large boat, but it was the pupa to develop into an insect of the highest order; it was the acorn to produce the towering oak; it was the egg out of which was to fly the majestic eagle of trade and of war wherever streams flow large or oceans marshal their swelling waves. Grown-up Clermonts are the ships which have just circled the globe on their mission of peace. The Mauretania speeding across the Atlantic in less than four and a half days and carrying the population of a city and the treasure of Golconda, is the Clermont a hundred years old.

"Into the latest warships of the United States, naval architects and skilled mechanics have expanded Fulton's invention. All the navies of the powers of all the continents are the harvest of the seed sown in the Clermont.

"Because steam propels ships, the silks of the Orient compete with domestic cotton in our markets while American kerosene lights the huts of Persia and Hindustan, and European peasants put off patterns and sabots for shoes made in Massachusetts and Missouri. The toilers of Great Britain, France and Germany get wholesale meats at low prices from our Western plains; the teas of Japan, China and Ceylon furnish a grateful beverage in every land; the aroma of the coffees of Java and Brazil are the pleasing scents of the breakfast table; the fruit of the tropics is found on the Arctic. The salmon of the Columbia is served in the camps of the Adirondack and of Georgia. The handicraft of India is familiar everywhere, while American clocks tick the seconds, as sewing-machines stitch and typewriters click at the foot of the Himalayas and in the wilds of Abyssinia. The children of the Clermont have transformed the thousands of miles of the wild Pacific into a midland sea. They have distributed comfort and increased the joys of life to all mankind.

"But the exchange of commodities and the direct profits of the expansion of commerce, while a benefit, are not the only benefit from the invention of Fulton. Steam navigation has brought the nations closer together, has made them neighbors both in distance and time.

Vice-
President
Sherman

As they can clasp hands more readily, their hearts are more inclined to beat in unison. No other material agency so much promotes human fraternity as staff intercourse, and as the stormy oceans which used to be barriers of terror and of hate.

"In the forests at the sources of the Hudson, the smacking of the pipe was, with the *hi-po-ki*, the symbol and the pledge of peace. The stack of the *Clemont* was a new and greater pipe of peace for all men. The funnel of the glass fleets of battleships gathered to-day in New York Bay like upward the smoke of good will. May this portent be the harbinger of confirmed unity among the earth's controlling powers. That is the prophecy of *Clemont*. The port may forget that be

"Hear'd the keel of *Clemont* launch'd, the ship was reined a gleam'dy ferry,
From the Nation's harbor, sent quelling to the central blue."

"Instead of the thundering of the cannon, here is the musical beating of the toiling arms of the ships of many civilized peoples. Instead of battle-flags, here the standards of Europe, Asia and America in the blessed sunshine of the world's peace. Great Britain honors this occasion by the presence of the distinguished High Admiral of its Fleet and with types of her most powerful war vessels. Germany sends a famous Admiral, the friend of Dewey and our friend, with the flower of its navy. France, our sister Republic, is mindful of our glad acclaim as we to all the squadrons of *D. Charles*. The Netherlands add to the Half Moon the modern *Versucht* to celebrate the ancient alliance, give proof of her naval progress, and join in the discovery made under Dutch auspices. Japan, in the person of a Royal Prince, rejoices with us. Brazil reaches to the harmonious relations of the Western Hemisphere. Our own latest triumph of naval architecture, our fighting power bring out the Stars and Stripes, in greeting and in welcome. The deepest and highest notes of the jubilee anthem are borne by the breezes which get their tone from the Half Moon and the *Clemont*, sure witnesses from the centuries that 'Peace hath her victories no less renowned than war.'

"To the pledges of friendship and of prolonged peace which our foreign guests extend by their gracious presence, we, for nearly a hundred million well-wishers, return thanks, while we proclaim assurances that our most earnest desire is for the peace of all mankind

and for the brotherhood of all nations under the sun, with justice everywhere supreme."

GOVERNOR HUGHES: "The eloquent words of our Vice-Governor
President have given emphasis to the thought that I am sure is in
the minds of all, that the main feature of this Celebration is the
visit of the distinguished representatives of the nations of the earth.
Hudson does not belong to New York; he is no even a hero of the
United States. His discovery of the Hudson must be remembered
in connection with his visit to the Chesapeake and the Delaware,
and that single visit to the North where, in his discovery of the sea
now called by his name, he laid the foundation for the exploits of
that imperial trading corporation which exercised such vast powers
and by virtue of the enterprise and the daring of its enterprises,
contributed so largely to the discovery and the conquest of the
western portion of the Continent."

"Hudson is the hero of the Western world, not merely of the
United States. Fulton's invention was the precursor of the fleets
now at anchor in our noble stream; his work has revolutionized
trade and commerce and made all nations of the earth his debtor
and it is not only most agreeable but appropriate that here in honor
of Fulton and Hudson should gather the special representatives of
the great powers. Perhaps I may be permitted to add an expression
of our hope that in the prosperity and progress of the United
States which they recognize by this visit, they have found an important
security of the peace and friendship of the nations."

"It is impossible that we should have the pleasure of listening,
much as we should like to, to all the special representatives who have
honored us with their attendance. I have the honor to introduce
to speak on their behalf, His Imperial Highness, Prince Kuni."

PRINCE KUNIYOSHI KUNI: "I am extremely grateful to be per-
mitted to participate in the Celebration of this magnificent year in which
you are so liberally and enthusiastically celebrating. Peoples meet
together and celebrate events due to their modest but none can
surpass this event in the importance which it has had in the history
of mankind."

"To-day we are assembled from all parts of the earth to glorify
the deeds of the great explorer and of the inventive genius, and to

Prince
Kuni

testify to the marvelous developments that have converted the shade of a few scattered Indians into the metropolis of the New World.

"New York is now the center of commerce and industry, as well as that of art, science and literature. She has accumulated enormous wealth that manifests itself in this solid and massive structure in all its widespread area. She has a vast amount of treasure hoarded in the bottoms of Leviathans that ply between her docks and all parts of the world; and yet she has still greater resources in her sons, to whom we owe a great debt of gratitude for the advancement of modern civilization and the enhancement of human welfare.

"But, gentlemen, this is but but only in the history of your country. The life of a nation is long and permanent. What a great future is reserved for your people! And there still more marvelous achievements for a great Nation that has already achieved such wonder. May this great New York become greater and greater with the noble name of Hudson and Fulton."

Governor
Hughes

GOVERNOR HUGHES: "As it is impossible that these much appreciated words of Prince Kuni should be followed by addresses by all the other special representatives who are here, I will ask you to drink to the health of all the special representatives of foreign nations who have graced this occasion with their presence, and through Prince Kuni, have so cordially testified to their interest in our progress."

The toast was drunk standing.

GOVERNOR HUGHES: "The men of power representing the nations of the earth are accompanied by the ships of might. If Fulton could have seen these terrible engines of destruction the final result of his inventive skill, I wonder if he would have persisted in his endeavor to find a means of successful steam navigation. Here they are—the horrible dogs of war, the handsome dogs of war! We admire their power. We rejoice that they are so self-contained and resorted in their deportment! They are here to-day to add to the glory of representation in distinction and achievement which is furnished by the visiting representatives, these symbols of majesty and strength—in their armament, in their fleetness, in the perfection of their control, the last word of science and invention. They are here, the messengers of peace—all the more important

and influential as messengers of peace, because so well equipped for strife. We rejoice that the celebration of the visit of the Half Moon three hundred years ago and of the successful navigation of the river by Fulton a little over one hundred years ago should be the occasion of the assembling in these happy quarters of these representatives of power in circumstances so auspicious. I give you the toast of *The Visiting Ship*."

The toast having been drunk, the Governor asked Sir Edward Seymour, Admiral of the Fleet, to make the first response to this toast.

ADMIRAL SEYMOUR: "Governor Hughes, Mr. President, Admirals, Ladies and Gentlemen: I may commence by truthfully telling you, Sir, that I am extremely conscious of the great honor that has been done me in being sent here to represent the English Nation, also to represent the British Navy. I am sure that security everywhere in the world where a navy goes is so much of an absolute necessity as it has always been to our Nation. It is therefore that I feel that I may speak for a country that is especially, or has been, the naval power of the world. We look around us and we Englishmen see with great interest, believe me, the wonderful nations that are springing up not only in your great American Nation, but in other nations of the world. I may venture to say that it has long been my feeling that we partly owe this, or very much owe it, to your Nation. Why? Because, until we were educated by your incomparable writer, Admiral Mahan, we did not know. That is one influence your Nation had on the world. We have learned in now, and rightly and naturally the nations of the world are increasing their force by sea. But let us not assume for an instant that means anything but peace. The seas must be policed just as much as the land. Even in the little quiet cities of London and New York, policed by the honest men, and generally thought necessary.

"I may now say two or three words on the extraordinary changes that have taken place in sea things in the last half century. It is no exaggeration to say that if your celebrated sailor, Paul Jones, had waked up from his sleep in the year 1850 and been put on board ships which I myself have served in, sailing ships, men of war, he would have only said, 'Well, this is a very fine ship. It is a little

Admiral laugen, the guns are a little larger,' but he could have put her under way and sailed her as he did his own ship. Of course, I might go a little farther and compare these two ships that interest us very much, the Half Moon and the Clemonot, with the ships of the present day. It will perhaps help to bring home to you the enormous change since Hudson's day when I remind you that if his ship was put aboard the Inflexible and put athwart ship, as we call it, or across ship, there would have been but ten feet to spare, and if you put them fore and aft the deck, you could put about eight of them one after the other. That gives a bold impression, I think, of the difference in size.

"We Englishmen feel very proud that Hudson was an Englishman. We share also with Holland the honor of his actually sailing from that country, on which we congratulate our friends the Dutch.

"The results of the discovery of the Hudson by the great navigator after whom the river is named, and the subsequent invention of Fulton are matters which I feel very gladly, but they have been so enlarged on this evening, in a far more eloquent way than I can do, that I will not take upon myself to do it.

"In conclusion I would like to say two or three words. They are only this: One of your great poets in his poem on the Lighthouse said

"I sail on wonder ship"
 And never sailing but the ocean roam;
 Beating to wind the keel when all collapse,
 Beyond the long horizon of the main.

"But as I said earlier in my discourse, the men-of-war are equally necessary to police the sea, and therefore I say the same thing applies, that they must be trained as a matter of policy to promote the commerce, the wealth, and the harmony of the nations of the world."

GOVERNOR BUCHHELS: "The next response will be made by Grossadmiral von Koester."

Admiral
 von
 Koester

GROSSADMIRAL VON KOESTER: "Mr. Governor, Mr. President, Ladies and Gentlemen: I wish to thank you for your kind invitation and the splendid reception of land and my fellow officers. I also thank you, Mr. Governor, for the kind words you have said about the German Navy—words which form, by good feeling, another link in the long chain of good and friendly relations happily existing between our two nations and navies.

"Your fleet has only a few months ago returned from its famous cruise around the world. From everything I learned about this voyage, it was my dearest long since to see with my own eyes your fleet, which accomplished by its cruise a brilliant record unattained until now by any other modern fleet. I wish you to know that the German Navy, from the Emperor to the youngest officer, has watched with the keenest interest the accomplishment of that voyage and I am glad to express our sincerest congratulations on this excellent proof of efficiency. This strong and efficient fleet has been, wherever it came, a herald of peace, and it has proved the fact that a mighty fleet does not object to the love of peace, but is a guarantee of it.

"When the American Atlantic Fleet crossed the ocean last year, the only thing we did regret in Germany was that our country was too far out of their way to have the honor of greeting them as our guests and returning the hospitality that we have so often enjoyed in your great country.

"Gentlemen, I propose the prosperity of the American Navy and the health of their gallant officers."

GOVERNOR HUGHES: "The next response will be made by Rear-Admiral Le Poer."

Admiral Le Poer's reply, of which the following is a translation, was in his native language. He said:

"Messieurs: After the distinguished orator who have so brilliantly revived the two geniuses whose memory the whole world honors to-day, it does not become me long to detain you in kind attention.

"I have it at heart, nevertheless, to say to what degree I feel the honor which the Government of the French Republic has done me in sending the honored district which I command to represent our navy at the fete of New York, and in entrusting to me the agreeable mission of bringing to Hudson and Fulton, those two immortal children of America, the homage of our profound admiration.

"The most noble, the most evil figures, do not always escape being forgotten with the eager tendency, with the indomitable energy which characterizes those the Americans have wished to perpetuate those of Hudson and Fulton. They have wished to conserve their remembrance for reverent transmission to generations which will follow us. It is in that spirit that they have

organized the splendid fetes at which they have convened the entire world.

"It is a happy thought, Messieurs, for a people ought to wreath with veneration the memory of those who were among their precursors in the path of progress.

"Honor, then, to the State and to the City of New York! Honor to all Americans, who wish to immortalize Hudson and Fulton.

"Permit me, Messieurs, to profit by this occasion to thank, in my name and in the name of the French division, the Festival Committee and all the population of New York for the reception, so cordial, which has been given to me."

GOVERNOR HUGHES. "The next response will be made by Captain Manuel E. Izaguirre, of Mexico."

Captain
Izaguirre

CAPTAIN MANUEL E. IZAGUIRRE: "Mr. Governor, Ladies and Gentlemen: Mexico joins with the American people in commemorating two great events which belong equally to the history of the United States and to the history of all peoples. In the prowess of Hudson you glorify the man of action, and in Fulton's invention the marvellous power of a creative imagination. These two heroes of civilization represent the two integral forces of human conquests — will and genius.

"Hudson displayed the flag of a mercantile country while seeking for routes by which to reach the countries of the medieval dreamers. Instead of reaching the chimerical treasures of Marco Polo, which seduced him as they seduced the Italians, Spaniards and Portuguese of the glorious Transatlantic Odyssey, he placed foot in a land richer than all the land of dreams, in which there are many characteristics of greatness, of which the most wonderful is the spirit of liberty.

"Fulton, with his invention, reduced the earth to the dimensions assigned to it by the contemporary cartographer of Hudson. Civilizations, which in their origin were plural and later merged the mediterranean basin of the world, had reached the period of oceanic extension. Fulton furnished the instrument to completely realize the inter-continental copulation of peoples.

"We are in the midst of a Celebration in which all humanity feels as one. We praise you for presenting to the world the credentials which entitle you to be classed as an illustrious nation. All that is

genuinely American is great and deserves admiration. It shines in the virtues of Washington; in the wonderful far-sightedness of Jefferson; in the political science of John Quincy Adams; in the eloquence of Webster; in the magnetic force of Clay; in the fortitude of Lincoln; in the genius of your nation; in the decline of your explorers; and in your love for all that makes a victorious effort of the intelligence and of the will to reach the harmony of nations and the peace of peoples.

"Mexico, in active development, singularly favored by sympathy toward all peoples, which bring to her elements of happiness and culture, and by a government that stimulates all legitimate activities, earnestly desires that in this continent this movement shall not cease until perfection is reached."

GOVERNOR HUGHES: "The next response will be made by Capitano Filippo Baggio Dacarna, of Italy."

CAPTAIN FILIPPO BAGGIO D'ACARNA: "Your Excellency, ^{Dacarna} Ladies and Gentlemen. I feel that I should be very proud and very grateful for the circumstance which brought me here to night as delegate of the Italian Government. As much I wish to thank the Government of New York and all the nobles of the Government for the kind and friendly reception of Italian sailors which were sent here to join your citizens in honoring our great men, Hudson and Fulton. I have the honor to convey my country's best wishes for the United States and its Navy. I wish prosperity to ever and ever develop all over this country so that its development shall extend all over the land and sea."

"The beautiful and powerful United States Fleet that the Italians are daily admiring in our harbor, is the fruit of the policy, the surest sign of the great progress made by this country upon the seas."

"In the name of the Italian Government and of the Italian Navy, I wish the United States Navy to be always great and powerful and prosperous in all directions."

GOVERNOR HUGHES: "The next response will be made by Captain Colenbrander, of the Netherlands."

CAPTAIN G. P. VAN HEERING COLENBRANDER: "Your Excellency, ^{Colenbrander} Ladies and Gentlemen. I can only add a few words to all the speeches that have been given here, and those words, in the

first place, that I am much honored by the invitation to give a response here to the welcome given for our nations.

"I should like to point out that the position of our small country is a most important one and has been a most important one, although in the center of the world, in the middle of the Atlantic, the great ocean of Europe. We have a small coast with splendid harbors, and it is to be hoped that those harbors may be of great value in certain circumstances. Our eastern colonies lie just on the way from China to Europe. From one side, we are in a certain direction on the way to those lands. All these great powers, the great nations, are of course in the first place there to keep up peace. It comes deep from our hearts that it will never be a necessity for us to keep peace there. And I am quite certain that the development of the American nation will add to the possibility that it will never be a necessity to fight this, our duty, in certain circumstances. I hope that within fifty years, and possibly earlier, all those big nations shall not be a necessity. As a small nation only hope to see the development will come in other ways, and that we will supply machines for making it out, not on the sea, but on the land.

"I think I would like to add a word to the American Nation, which has been a ship, and especially in the last two hundred years, at the head of the invasion of all things which were welcome to the civilization of nations."

Governor GOVERNOR HUGHES: "The first response to the toast 'The Bugles of Visting Ships' will be made by Captain Alondra, of Argentina."

Captain Alondra bowed in response, but did not speak.

GOVERNOR HUGHES: "The greatness of the visit, and the great need of it."

"We are honored, not simply by the visit of the special representative of the Nation, but simply by the magnificent display of their naval power, but also by the presence of those who, in the routine of international communication are engaged in interpreting their then but ships may come, and ships may go, and invention may succeed or fail, but diplomacy goes on forever.

"Our gratification is that with the progress of the years it becomes more candid and direct, and thus we have the pleasure of welcoming to our shores those who come with no thought of intrigue, but in

connection with the exchanges of international intercourse to give and receive assurance of the friendly feeling which is mutually entertained. I give you the toast of 'The Diplomatic Representatives.'"

The Toast having been drunk, the Governor said:

"There will be one response to this toast, and that will be made by Señor Joaquín Bernardo Calvo, the Minister of Costa Rica."

SEÑOR JOAQUÍN BERNARDO CALVO: "I, Vice-President, Minister, Mr. Governor, Mr. Mayor, Gentlemen! I have the signal honor of responding to the toast which our honorable Toastmaster has just proposed to the Diplomatic Corps accredited to Washington, on this memorable occasion when such important events of civilization and human progress are being celebrated."

"It is not probable that either Henry Hudson or Robert Fulton, no matter what they might have thought of the value of their great achievements, could have dreamed that the river bearing the name of the former would be such a potent factor in local development and in the commerce of the world."

"If the blessings of 'E pluribus unum' attained with the greatest conceivable success had not made a portion of this nation the States which the Hudson River Unites together as there, the means of communication, their mighty river would be classed among the greatest international waterways. We constantly see upon its waters the colors of many a foreign country, and to day we see waving in all splendor the flags of all the nations of the world."

"On behalf of the diplomatic representatives of all these Nations, I have the honor to express our profound and sincere gratitude for having so kindly bidden us to participate in this glorious Celebration, which makes our hearts glow in your smiling."

"Gentlemen! Our kindest regards to the United States of America, to the prosperous State of New York, and to this wonderful City."

"GOVERNOR HUGHES: "We have now concluded the formal part of the toast of the evening, and it will be our pleasure to have a few informal and brief speeches from others whom we delight to welcome upon this occasion."

"Ever since the visit of the Half Moon, which in the light of our modern knowledge seems like Halibut City, we have been tremendously impressed by Dutch ideals, Dutch customs, Dutch traditions,

What is not English, or Irish, or Scotch, or German, or Italian, or Spanish, or French, or otherwise, among us, is unmistakably Dutch.

"Living in Albany, as I do at this time, I am most impressed with the fact that the Dutch own New York. We have solidity, tactfulness, cleanliness, order, placidity, the capacity for the enjoyment of life—*all* the qualities which go to make up a happy and useful life. All these benefits we trace directly to the visit of the Half Moon. Fortunately it was for us that the Half Moon was the first to come into New York Harbor. If we had not had that reinforcement of our equilibrium at that early date, we should soon have been destroyed by the rivalries of our manifold energies.

"I take great pleasure in telling you the Minister of the Netherlands to speak to you tonight."

Medley
London

JONKHEER J. LOUDON: "It is a great pleasure and a great satisfaction for me, as representative of the Netherlands in this country to have the honor of addressing you on this festive occasion—a pleasure because in these days, more than ever since I set foot on American soil, I feel at home and at unison with the citizens of this great Empire City and Empire State, that once bore the name of New Amsterdam and New Netherland; a satisfaction because this Celebration comes on a moment when minute historical research has definitely established the fact that the early Dutch settlers, and especially the influence of the old Netherlands, have left indelible traces on the banks of the Hudson and far beyond in the New World. It will be presumptuous on my part and untruthful to say that Holland's influence has been one of the chief factors in the molding of the American spirit—that spirit that undeniably exists and is so strong, so fruitful, that it influences often within a lifetime the composite elements of our nation. Yet, it is such a *modern* spirit is due to the institutions, it is proved in the light of historical research that Holland's influence upon this country has been great.

"It is particularly gratifying to us Hollanders that the influence of the old Dutch Republic on the great Republic of *Great* Washington is so fully recognized by modern American historians and that this recognition is greeted with so much sympathy by the American public. It warms our hearts in these days especially to see, to hear, to feel that recognition in every way. It fills us with pride to behold in the decorations of every important thoroughfare of this truly

sky-scraping city the orange, white and blue, the colors under which Minister the first rebels against the tyranny of the Duke of Alva, the self-styled 'beggars on the sea,' initiated our great struggle for independence, soon to be led by that hero of heroes, William the Silent. And side by side with that heroic banner adopted as the flag of your Celebration, we see in every street the red, white and blue, the flag of the United Netherlands, which has remained that of Holland ever since and was the first to salute the Star Spangled Banner in 1776. The present Celebration recalls the days 320 years ago when Holland, little Holland, undaunted by the armed forces of her mighty oppressor, sought expansion on the distant seas, when the love of liberty, of unfettered development in every line of action, of thought and art, imbued her citizens, as well as those of other nations, who dwelt on her shores, with ideas of free government, free thought, free speech and free education.

"These principles were brought over to this virgin soil not only by not only by Hollanders, but perhaps even to a much greater extent by Englishmen—Englishmen who came from those countries where those bands of Dutch had emigrated years before; Englishmen, especially, who had found in Holland a refuge from religious persecutions, those noble Pilgrim Fathers who, after having lived with us the twelve years of co-existence with Spain imbued with the ideals Holland was searching for, sailed for the New World, to carry our ideal Englishmen who like William Penn in later years, whose mother was Dutch, who spoke our language and whose form of government was entirely modelled on that of Holland.

"I need not dwell on the history of the Netherlands settlement of Manhattan Island. Most of those who are taking part in this Celebration know how the intrepid Henry Hudson in the service of the Dutch East India Company landed here with his little Half Moon after a valiant fight to find a northern passage to the East Indies, how Dutch traders settled here until the colony became a city governed in the name of the West India Company by Minuit, by Van Twiller, by Kieft, by Field Peter Stuyvesant—that period of your history depicted with such delightful humor, with such witty innuendo by Washington Irving. You know of course, finally in time of peace, our great rival on the sea took New Amsterdam by surprise, how in an ensuing war the Dutch Admiral Evenmen

Minister
Loudon captured the whole of New Netherland, and how finally, by the treaty of Westminster, an exchange of colonies was made which gave us Surinam, which we still hold, but deprived us of New Netherland.

"The energy, the tenacity and perseverance of the Hollanders of old are still characteristics of our race, both at home and in our colonies. The free, the democratic Hollander has not lost his catholicism. That catholicism is no longer founded upon defence against oppressors. It is founded on the gratitude every right-minded Hollander feels toward the line of princely leaders who created and perpetuated our independence. It finds its highest expression in the veneration of every Hollander for that fair and august representative of the House of Orange who now reigns over us -- for Her Majesty Queen Wilhelmina.

"Under the auspices of the House of Orange, in the land of that great master and the old friend teacher of international law, Hugo Grocius, the international code of arbitration seems well located. The peace conferences are steadily but gradually increasing, the germs of arbitration and peaceful solutions of international conflicts flourish all over the world. Their work itself is not incompatible with great armaments because the peace-lovers are willing to pay and in the measure in which they are ready to do so, the old Roman saying will remain true: 'If you wish for peace, prepare for war.'

"An American citizen, a great human benefactor, Andrew Carnegie, has forever connected his name with the Court of Arbitration; America can do more than doing others for that cause, and we sincerely trust that she will do.

"With the same bonds in view, the historic ties of friendship between the United States and Holland are bound to increase. Moreover, we are neighbors in the far East. Our colonial empire with an administration tested by an experience of more than 50 years and carried on under a truly liberal flag, is surrounded by great powers that we know have in view what we diplomats call the maintenance of the territorial *status quo*. Among those powers none is more akin to us than the United States in the Philippines.

"May, then, our cordial relations in different parts of the world steadily grow, and may that proud little Half Moon offered to you

by Holland on this occasion, remain the symbol of the ties that will forever unite us across the seas.

Governor HUGHES: "Amid all the marvels of the western world after due consideration of the growth of the three centuries, Hughes it may be said that nothing is more complete, symmetrical and wonderful of profound admiration than the complacency of the citizen of the City of New York. He takes this Celebration for granted. He looks on good-naturedly, gratified at the speeches, pleased with the preparation for his amusement, but seeing no particular necessity for surprise on the part of any one that New York should gather here the brightest and best of the world to celebrate its progress. Our city is vulnerable at every point but invulnerable, at all. It is a place where the whole is much greater than the sum of all its parts.

"There is only one who can represent New York, and that is he who in the official representative of the entire City for many years, has administered its affairs with such wisdom, skill, and promise, and has contributed to its prosperity. — Mayor McClellan."

MAYOR GEORGE B. MCCLELLAN: "When we are honoring this week, what we are honoring tonight, is not so much Fulton and Fulton the man, as Fulton and Fulton the deeds of deeds not so much what they did, as the result of their achievement. For, as Fulton was the first to apply practically the steam engine to navigation, so he sowed the seed of modern oceanic development, and so Hudson was the first to make known to the world the site of this city of ours, I am a complacent enough New Yorker to believe that by sowing he sowed the seed of twentieth century civilization. As the steamboat is the concrete expression of this era of labor-saving machinery, so New York is the concrete expression of the pride and the hurry and the rush of the world and the strength and the power of the commercial progress of the day.

"There is no man with the soul of a realist or a lover of the beautiful, no matter how slight, who does not in his heart of hearts regret that the motor boat has replaced the canal, and that as the emblem of progress, the Dreadnought has displaced the Bull Moon.

"Amsterdam, once the mistress of the commercial world, although still in the full vigor of her maturity, has yielded her supremacy to a younger rival; but in seeing herself surpassed she has seen herself recreated, and lives again the triumphs of her youth in those of

Feyer-
McClel-
lan

Mayor
McClintock

the city to which she herself gave birth — her daughter, New Amsterdam. And as we honor the mother city for what she was to us and for what she has given us, so we who know her love the daughter city for what she is and for what she has given us in our civilization of to-day.

"This Celebration is really in honor of the spirit which New York embodies, the spirit of the twentieth century, the spirit of the modern world. So it has been accepted by the nations of the earth, who have treated it not as local in its application, not even as merely national, but as an event belonging to all. As long as humanity remains as it is, the world will never see the realization of that internationalism which, destroying national boundaries, would reduce the nations of to-day to mere geographical expressions, and would make of the earth one impossible and decidedly unpleasant Utopia of governmental partialities. Now, in our time at least, will the earth ever become one vast federal republic. Each nation has its own particular problems to solve, its own salvation to work out in its own individual way. The only possible internationalism is the internationalism of forbearance and help and sympathy that comes from a determination to live and to let live in the application to world politics of the golden rule of life.

"Every gathering, such as this, that is international in its character helps to a better understanding among the peoples of the earth, helps to draw the nations more closely together in a real human brotherhood, a union of mutual esteem and mutual good will.

"In the name of the people of New York, I, the Mayor, bid you who are here to-day, who have come from near and come from far, a sincere and hearty welcome."

Governor
Hughes

GOV. HUGHES: "Now ye shall have a final word for New York, not the City, but the State, from one who embodies in his personality the contribution of the State to the Nation. He recalls to us that New York, whether it has excelled in industry, great as it has been in the world of commerce and finance, has made its most important contribution to the life of the nation in the persons of distinguished statesmen whom she has given for the conduct of various national affairs. From John Jay, through the long roll including William L. Marcy, William H. Seward, Grover Cleveland and Theodore Roosevelt, to him who now represents us in the Senate

of the United States—one of the ablest and most distinguished of New Yorkers—we have reason to be proud of the Empire State in national affairs. I take pleasure in presenting Senator Root."

SENATOR LUDWIG POOT: "Mr. Chairman, Mr. Vice-President, Senator Root, Governor, Your Excellencies, Ladies and Gentlemen: It is my office to say 'Good-Night' and 'Good-Morrow' and to renew to the distinguished guests who have come from foreign lands to grace our Celebration, the assurance of our appreciation of the courtesy and kindness of their governments and their peoples."

"I hope that our feelings will be appreciated at home, my friends, and that your governments and your peoples will know how deeply we all feel the common, the friendly, and the sympathetic with which you have taken part in these festivities in which we have been so deeply interested."

"We are not celebrating ourselves. We are not celebrating the greatness and virtues of ourselves. We are celebrating the wonderful progress of our own country. We acknowledge in this world the great race of men who made the age of discovery. He broadened the limits of human knowledge, pushed back the horizon and opened to mankind a vast field of opportunity. We acknowledge in this world the great race of men whose inventive genius has multiplied the productive power of mankind, and laid the foundations for a broader and nobler and a more permanent civilization of the world over."

"We celebrate, not ourselves but, standing at the gateway of the new world, we celebrate the immense significance of America to all mankind. You, my friends—and among of you are friends and personal friends indeed—who have come to us from all roads, find here, from whatever country you come, the children of your own fatherland. This land has welcomed here to live, to prosper, to be of use, of comfort, of comfort, of reward for industry, of position, of superior intelligence and energy. Here, in all that you find that is worthy of admiration or commendation, you find in part the work of your own brothers, every one of you. From the fertile soil, the rich mines, the vast forests, the towering factories, the multitude of inventions that characterize the progress of America, streams of wealth have been pouring back to improve the conditions, increase the wealth, energy and comfort, and advance the civilization of the people of your own lands."

Senator
Root

"We here, free from the fetters of age and long customs, have been trying out your experiments for you. And back there, this virgin field in governmental and social experiment has gone to each one of your lands by the testimony of your own sons—less on after-lesson of valor, of superior value, for your own guidance in your struggles for peace and justice and liberty. This is your Celebration as well as ours.

"We celebrate the march of mankind from the days of Hudson to this hour—the march of all mankind along the pathway from cruelty and selfishness and oppression and slavery to the enlightenment, the charity, the brotherly love among men of this twentieth century.

"This meeting of millions upon the shores of the New World, millions whose fathers have spoken every language under the sun, millions who have brought the traditions of every custom, of every law, of every prejudice throughout the whole broad world, the meeting of these millions here in this cosmopolitan city, to rejoice in peace, in prosperity, in all the truths of civilization, in which every Nation has a part, marks the progress from those dark and bloody days when English and French, Dutch and Swede and Spaniard butchered each other in the forests on the Atlantic Coast and contended for the mastery, which happy time has proved to be needless, to enable all mankind and every race to enjoy the happiness and the fruits to be gathered up on this virgin soil.

"May the fraternal feeling that marks this happy gathering never give way to the hatred, the cruelty, the selfishness and greed of those earlier days. May the fruits of civilization which we have acclaimed with banners and illumination and procession and parade, never again be turned aside, and the sun, by persons of mankind turned backward, by the wars that disgraced the days of old. May the harmony, the fraternal feeling of this festival be an augury for the future. May the blending of races which has made possible all that we now celebrate never be made naught by the conflict of races upon the battlefield. May the spirit of this day persist, grow even more effective in the minds of men, and this occasion be a precursor of many a festival in the years to come, marking the steady progress of all the peoples of the earth, who have united to make America what it is, upward and onward, along the path that leads to perfect peace and justice and liberty."

GOVERNOR HUGHES: "As Henry Hudson, coming in the Governor Half Moon, said the first word three hundred years ago, so in this Hughes late hour of commemoration we shall permit the last word to be spoken by the special representative of the country under whose flag he sailed — the Hon. J. T. Crocker."

MR. CROCKER: "I am particularly thankful, Mr. Governor, Belgium that I am able to speak a few words of thanks before my countrymen Crocker who have been here a short time, in rather a large number, scattered and go to their homes. We would not feel satisfied if we had not taken this opportunity of saying thanks to you, not only for ourselves, but for our countrymen at home, for the reception you have given us. We shall tell them that our country is not forgotten yet on this side, but that you think of us as one of your visitors names us, 'Brave Little Holland!' and we shall tell our Queen that when her name was mentioned here it was met with general applause, and that I have heard from your women and from your men that she is cherished and revered by every one; and these are words greater than we could have expected when we came here."

"Ladies and gentlemen, when you shall come to our shores you will be received there with open arms, as you have received us; and especially when you send us again those men you have sent to the Hague twice now. I remember the first time your representatives at the Hague Conference spoke in this old church of Delft, over the grave of one of our loved ones, Mr. Seth Low and Mr. White spoke their words of sympathy and of peace; nor shall I forget how Mr. White said he thought these conferences would gradually reduce the weight of the armaments which crush down the nation of the world."

"Ten years have passed since, and the weight has provisionally increased, and the police which we pay in that way is weighing more and more upon the nation. I should perhaps not speak of that here in this moment, when such a grand story lies in the Hudson River, and where gallant admirals and captains are here to hear these words. As the French proverb says, 'You should not speak of the rope in the house of a man who has been hanged.' But, gentlemen, I cannot believe we are here in a country of militarism. I cannot believe that the soul of America in the long run can be permanently the soul of armies and the ground of militarism. No, I

Delegate insist upon what I have always thought of this hallowed ground: **Cremet** that it is the ground of liberty and freedom. The words which have just been spoken by your Mayor are live poems in our hearts, and we look upon your country as the country of science, of free science. When we saw yesterday these young men and children passing our pond and on Fifth Avenue, all looking happy, and lifting their eyes to their rulers as children look at their parents, their rulers then did not look as men who would think more of militarism than the advancement of trade, commerce, industry, science, of the science which brings your men to a scientific enterprise and enterprising science. Therefore, gentlemen, when we go back to our country we shall be sure we have your sympathies with us, and our small nation with your great one, may play a part in that happy future for the nations which will reduce the weights of these armaments; and at the same time, gentlemen, be assured that in this sense we offer you our thanks for your kind reception. And to you, the rulers of this country, State, City and your Celebration Commission, but above all to the citizens of New York, who have shown us so much sympathy, have shown us that they consider us of their blood and as Americans, we will not say 'Good bye,' but 'Au revoir.'

Governor **HUGHES:** "And now, with a renewal of the people of mutual affection and esteem, we say 'Good-Night' to all our distinguished guests; we say 'New York is yours;' to New Yorkers, the one word, the word of our history, the word of our motto, 'Excelsior!'"

CHAPTER XX

MILITARY PARADE

THE military parade in Manhattan Borough, New York, ^{Arrangements for} was the principal feature of the Celebration on Thurs- ^{Parade} day, September 30, 1909. The arrangements for this parade were made by the Military Parade Committee of which Major-General Charles F. Roe, commanding the National Guard of the State of New York, is Chairman. General Roe was also Grand Marshal of the parade, as he was of the Historical Parade on the preceding Tuesday and the Carnival Parade on Saturday evening following. The line of march on Thursday was the same as that for the Historical and Carnival parades—starting at Central Park West and 116th street, thence to 55th street, to Fifth avenue, and to Washington Square.

Ambulance service and temporary hospitals were established along the route of the parade and telephone service was maintained so that reports from and orders to any part of the column were readily transmitted.

The parade scene of Tuesday at the Court of Honor and along the line of march was repeated on Thursday, except that the beautiful weather of Thursday, contrasting with the threatening skies of Tuesday, added to the brilliancy of the ceremonies and seemed to increase the vivacity of the multitudes of spectators. The entire route of the parade was lined with vast crowds, those from 23d street to Fourth street and in Washington Square being far greater than at points north of 23d street.

Through the courtesy of Captain Jacob W. Miller, officers of the Naval Militia met the detachments from the several Foreign Navies and conducted them to the place where they

were to form for the parade, and after the parade conducted them to the vessel that took them back to their ships.

Official
Review

Notwithstanding the many opportunities for delay in the landing of the men from the combined war-fleet of 47 vessels, the procession started from 110th street with military promptness at 1 P. M. and finished the Court of Honor at 2.30. Here it passed in review before the Governor of the State and a distinguished company including United States, State and City officials, officers of the Hudson-Fulton Celebration Commission, special foreign delegates, members of the Diplomatic Corps and foreign Consuls, officers of the foreign and American armies and navies, and other guests of the Commission.

The order of march was as follows:

Composi-
tion of
Military
Parade

General John M. Schofield, Chief of Parade

Staff

Colonel Smith

Major-General George Albert Wagner

Adjutant

First Brigade Colonel William H. Fox

Second Brigade Colonel George A. B. Smith

Third Brigade Colonel George A. B. Smith

Fourth Brigade Colonel George A. B. Smith

Fifth Brigade Colonel George A. B. Smith

Sixth Brigade Colonel George A. B. Smith

Seventh Brigade Colonel George A. B. Smith

Eighth Brigade Colonel George A. B. Smith

Ninth Brigade Colonel George A. B. Smith

Tenth Brigade Colonel George A. B. Smith

Eleventh Brigade Colonel George A. B. Smith

Twelfth Brigade Colonel George A. B. Smith

Thirteenth Brigade Colonel George A. B. Smith

Fourteenth Brigade Colonel George A. B. Smith

Fifteenth Brigade Colonel George A. B. Smith

8. The parade was held on the 12th of August, New York, Mayor Guy V. Boyle, Hon. John C. Thompson, as President of the Grand Jury, presided.

The Ninth Division, consisting of the Grand Army of the Republic, did not parade because of the distance and the age of the members, but was formed on each side of the Court of Honor, where, under the command of its Grand Marshal Captain Thomas G. Barry, G. A. R., acted as Guard of Honor to the distinguished guests and the foreign officials on the Reviewing Stand.

Form
of the
Parade

The parade, which was held on the afternoon of July 1, 1893, was a grand and successful one. In one respect it was unique. Never before had men come from so many nations so far from the soil of New York. The international character of the procession, the many people from foreign lands to the spectators. The Americans were deeply interested in the appearance, discipline, equipment and marching of the foreigners while the foreign guests at the Court of Honor were equally interested in the appearance of the armed forces and the regular army, navy and militia of the United States and the armies of their sister nations.

Each division of the procession had special features which attracted attention.

The British, in their red tunics, in straw hats and white leggings, who led the Ninth Division, were given a magnificent reception, the spectators cheering on horse and foot alike. Nothing could more effectively have demonstrated the unflinching influence of time than this demonstration which, by an interesting coincidence, took place at a point where 133 years before, Americans and British troops were engaged in battle.

combat.* After the British sailors came the Germans with their famous high step called the "Emperor's step," the French with their peculiar short, quick steps; the Mexicans with their characteristic uniform; the Italians, including the naval cadets, the future official personnel of the Italian Royal Navy; the Netherlands, the modern successors of the famous fighting "beggars of the sea;" and the Argentine sailors who came farther than any others to participate in the celebration, each in turn receiving enthusiastic demonstrations of welcome and each the object of individual interest.

The continuous roar of applause which accompanied the West Point Cadets along the whole line of march heralded the approach of the Second Division before it came in sight. As the Court of Honor these young men, who are to be the future officers of the United States Army, excited intense interest on the part of the foreign naval officers, diplomats, and official delegates, many of whom had been in the Corps of Cadets at West Point the day before, and who rose to their feet and eagerly leaned forward as the Cadets drew near. Besides the West Point Cadets, the Coast Artillery was the only representation of the regular army. Their appearance excited admiring comments.

The Third Division, composed principally of men from the American war ships, identified by their gun platforms bearing the names of their respective ships, was received with various demonstrations of enthusiasm according to the possibilities of the spectators for one ship or another. The men wore their blue uniforms, which they had laid aside, and carried their rifles at their shoulders. Many civilians were amazed at the number of fighting men poured forth by the warships. The men-of-

* The Court of Honor, consisting of the United States and foreign naval officers, met at 10 A. M. on the 26th of October at the upper West Point, where it was held the following day, the 27th, at the Hotel de Manhattan Island and the upper part of the parade ground, south of Harlem.

Features
of the
Parade

was men were followed by a battalion of officers and men from the United States Revenue Cutter Service, whose uniforms were so similar to those of the naval detachments that many spectators did not notice that they were a separate body. This was the first time that they had paraded as a body in New York City, and their first appearance elicited warm encomiums from competent judges.

The Fourth Division, composed of battalions from the National Militia of New York, was also an interesting and instructive part of the procession to the thousands of whom probably knew little of this branch of the fighting service of our sea-board States.

The Fifth Division, composed of the National Guard, which a familiar spectacle to Americans, interested especially to the foreign representatives, particularly those who had not made a special study of the dual military system of the United States. It was directed to make none of the visitors understand the difference between the citizen soldiery, who are kept under military discipline while following their pursuits as citizens and who are ready to be mobilized for military service on an hour's notice and the standing army of the United States who devote their whole lives to the profession of arms. When this system of a small standing army, with a great reserve of civil National Guardsmen was explained, they expressed their admiration for the system and for the body of men marching before them. One commentator said he had never seen anything like it for strength and drill.

The Sixth, Seventh and Eighth Divisions, on account of the variety of the uniforms of the participating organizations, were more picturesque in proportion to their numbers than their predecessors, and all kind continuous applause. A notable feature of the Eighth Division was a flag 200 feet long and wider than the section, carried horizontally by the Sons of Veterans.

There were no real mis accidents and the parade moved with-^{Accident} out interruption except such as was necessary for the move-^{of} ment of certain surface railroad lines, whose operations had been previously arranged for with the police and railroad officials.

The work of the police in controlling and dispersing the crowds was skilfully, effectively and patiently done under very trying circumstances and deserves the greatest praise.

The streets were cleared for and kept clean during the parade and the untold work of widening Fifth Avenue, commenced in the spring, which at one time threatened the success of the parade, was rushed to a sufficient state of completion so as not to be an interference.

CHAPTER XXI

NAVAL PARADE TO NEWBURGH

THE principal event of Friday, October 1, on the Hudson River, was the Naval Parade to Newburgh and the ceremonies in the latter city.

Half
Moon
and
Clemon-
t

Prior to this, however, that is to say, on Wednesday, September 29, the Half Moon and Clemont, with the Naval Militia under Commander R. P. Forsberg, acting as an escorting squadron, had started up the river, anchoring at the principal communities between New York and Newburgh in order that these villages and cities might have an opportunity to see the vessel and render them proper hospitality. Their movements were so regulated that they arrived at Cornwall early on Friday, October 1, and were prepared to join the naval parade just before it reached Newburgh.

Composi-
tion of
Parade

For the naval parade of October 1, the fleet was divided into eight squadrons, as follows:

First Squadron: Steam boats plying inland waters, including ferry-boats, commanded by Capt. George A. White.

Second Squadron: Steam yachts, commanded by William Butler Dunham, Jr.

Third Squadron: Motor boats, Flag Officer J. Adolph Mollenhauer.

Fourth Squadron: Tug and steam tugs, Flag Officer E. B. Datzell.

Fifth Squadron: All other craft applying for anchorages from New York to Newburgh inclusive, Capt. Howard Emerson.

Sixth Squadron: The Half Moon and Clemont, the Naval Militia and the United States vessels detailed by the naval authorities, Commander R. P. Forsberg.

Seventh Squadron: Revenue cutters, etc., Senior Captain O. C. Handley, U. S. R. C. S.

Eighth Squadron: Flag transients and motor boats acting as despatch vessels, Capt. J. Frederic Fane, Flag Lieutenant to the Chairman of the Naval Parade Committee.

The fleet assembled between Fort Washington and Spuyten ^{Assembly and} Dayvil. In order that vessels of different rates of speed might ^{Proprietors} reach Newburgh Bay, 60 miles distant, at the same time, the fleet was divided into three groups. Vessels having a speed of between 10 and 13 miles an hour were started at 7:45 A. M.; those with a speed of between 13 and 17 miles an hour at 8:45 A. M.; and those with a speed of over 17 miles an hour at 9:45 A. M.

The procession, including the official steamers Robert Fulton, Rensselaer, Plymouth and Providence, the United States men-of-war, torpedo boats and submarines, the Utrecht of the Royal Netherlands Navy, and a large number of steamers and yachts, presented a memorable spectacle as on this brilliant October day it passed up the river through the broad expanses of the Tappan Zee, Havensack Bay, Peckskill Bay, through the mountainous passage of the Highlands, and emerged into the capacious bay of Newburgh. Just after the main procession passed between Storm King and Breakneck Mountains, the northern gateway of the Highlands, it was joined by the Half Moon and Clermont and Escort Squadron from Cornwall, and the whole fleet arrived off Newburgh amid salutes of artillery, music by numerous bands, and enthusiastic cheering by the multitudes on the shores and heights of Newburgh.

Upon landing at the Ramad B wharf, the Governor of the State, the President of the Commission and other officials were met by the Hon. Benjamin McClung, Mayor of the City, Col. Arthur MacArthur, Chairman of the Upper Hudson Committee, Captain William J. McKay, Chairman of the Upper Hudson Naval Parade Committee, and other prominent citizens, and escorted to a platform near by, where the ceremony of welcome and of transferring the Half Moon and Clermont to the Upper Hudson Committee took place.

General Woodford, the President of the Commission, opened the proceedings by saying:

“Ladies and Gentlemen: It gives me great pleasure to announce to you the Hon. Mayor McClung, of the City of Newburgh.”

Mayor
McClung

Mayor McClung said:

“It gives me great pleasure to welcome at this time so many distinguished guests to our city. You are more than welcome, certainly, as you do, and representing not only the great Empire State, but the entire United States and foreign nations, but at this time particularly, when this place has been selected as the spot where the ceremonies are to be held for the transfer of the Half Moon and the Clermont from the care of the Lower Hudson Committee to the Upper Hudson Committee and without any formal remarks, I desire to extend to you the welcome that is deserving, and to extend also the hospitality of the city and the freedom of it; while you stay with us, we will endeavor to make it as pleasant as possible. I now take pleasure in introducing Captain Jacob W. Miller, Chairman of the Naval Parade Committee, having charge of the Half Moon and the Clermont.”

Captain
Miller

Captain Miller said:

“President Woodford, in obedience to your orders, I have the honor to state that I have, with the assistance of the Naval Parade Committee and the Naval Militia of the State of New York, transported safely the Half Moon and the Clermont to Newburgh Harbor, and I now have the honor of turning them over to you for such disposition as you may deem fit.”

General
Wood-
ford

General Woodford, first addressing Governor Hughes and the other guests, and then the general audience, said:

“Excellency, Friends, Gentlemen of the Diplomatic Corps, Ladies and Gentlemen: By the great generosity of distinguished citizens and prominent merchants and bankers of Holland, an exact copy of the historic Half Moon has been built, and by the gracious courtesy of Her Majesty, the Queen of Holland, this vessel has been brought in the charge of the Navy of Holland, and has been transferred to the Hudson-Fulton Celebration Commission. The title to the Half Moon is in the Commission. By the generosity of New York men, a copy of the Clermont has been built by our Commission, and the title to the boat is in the Commission. By the faithful and zealous care of Captain Miller, these boats have been brought to the waters of Newburgh. In the name of the Commission, I now put them in

the keeping of the Upper Hudson Committee. They are filled with most valuable relics. I charge the Upper Hudson Committee so to guard and care for them that when our ceremonies are ended, we may be able to make fitting permanent disposition of them.

"To the representatives of all the foreign governments who so generously have come to us and who have taught us to be their friends, I give thanks, to each and all; and I hope the ceremonies of this week will find us in closer friendship, and that when we part there shall be only love in the hearts of each of us, each tending towards that better day when all the nations of the earth shall be one in a common fraternity."

Mayor McClung then introduced Colonel Arthur Mac-^{Colonel} Arthur, the Chairman of the Upper Hudson Committee, who ^{Lieut.} ^{Arthur} spoke as follows:

"General Woodford, citizens of Newburgh, Ladies and Gentlemen: As the Chairman of the Upper Hudson Committee of the Hudson-Peakon Celebration Commemorate I am glad to me great pleasure to accept from you these emblems of an ancient day that are full of reminiscences, and which embody in view of the vast improvements made in the advancement of mankind, are symbolic of the steps of progress.

"We come down to you from the head waters of the Upper Hudson, where the green trees and pellucid currents ever welcome those who travel over their waters - we see fields beyond the swelling flood and dried in living green, extending a welcome hand to all those who come up this highway of commerce. I appreciate the honor, and I can assure you in the name of those who dwell along the banks of the Hudson that these treasured emblems of the past will be as safely guarded and as carefully handled as carefully taken care of as it is within the scope of our possibilities to do. I thank you in the name of the Upper Hudson Committee. And I want personally to add my token of gratitude for this great Celebration that has risen to such wonderful magnitude, world-wide in its significance, under the able care of you here, your heart and your brain. I thank you."

Mayor McClung next introduced Governor Hughes, who ^{Governor} ^{Hughes} spoke as follows:

"Mr. Mayor, Fellow Citizens: This day I have looked forward to as one of the most agreeable of the days of Celebration, because

Governor Hughes: it was understood that I was not to be called upon to make any extended remarks. I am very glad, however, to have an opportunity to express my appreciation of the privilege of taking part in the day's ceremonies. No celebration of the discovery of Hudson or of the great invention of Fulton would have been complete without a journey up the stream which was the scene of the discovery of Hudson and of the great success of Fulton.

"Many voyages of note have been made up this river. Friends and foes, men of great distinction and ability in varied lines of effort, have made this world famous journey, but never in the past three hundred years has a company voyaged up the Hudson so broadly representative. It represents the prosperity and the progress of this era—it is happily significant of the mutual regard and friendship which bind us to all the world by unbreakable bonds of amity. We have here today a company bearing messages of good will from all the leading nations of the earth, and we rejoice that they, with us, under such favorable auspices have been permitted to sail this beautiful river.

"You in Newburgh are entitled to an important share in this Celebration, not simply because of your relation to the river, but because here was the scene of one of the most striking events of the great struggle which resulted in the foundation of this nation. Times of strife and misery have passed. We can retrace the old path without creating any feeling of bitterness. We may recall the days when the Father of his Country at this place, with anxious heart, watched the development of the great contest, and later, the day when that contest, even with every power still under his control, nearly broke down. A revolution rapidly developing which promised ill for the colonies that he had maintained so fully their independence. It was a time when all were fearful of the fire in the powder bin, and it was here, in those circumstances, that that peerless leader of men, anxious that the country should be placed upon a stable foundation, was offered the crown and kingly powers. Here, and not on the field of battle, he most truly asserted the power and permanence of the Republic. Here, when he turned aside that offer, intended not only as an appeal to his ambition but also as a means of securing the fruits of his victory, he revealed the strength of the manhood and the purity of

the patriotism the memory of which is one of the choicest blessings of the American people. Governor Hughes

"And I rejoice with you that here we can take account of the troubles and cares of those who, as pioneers, settled this valley; of the many heroes who have made it the subject of story and romance; of the many geniuses of literature who have been inspired by the beauty of its scenery; of the many leaders of industrial enterprise that have contributed to material prosperity. It is here that we can rejoice that, blessed with inventive skill, blessed with alertness and ingenuity, we are still more richly endowed by the example of the fidelity of the great man who so long ago made Newburgh his headquarters; who at all times and to all peoples will represent the genius of American institutions — the immortal Washington."

Mayor McClung then presented to the audience Lieutenant-Rey. Mc. Commander Lam, representing Henry Hudson, and the Rev. Bullock Charles S. Bullock, representing Robert Fulton.

Mr. Bullock said:

"It is about one hundred years since I first came to Newburgh, on the 18th of August, 1807. When I first came into Newburgh Bay none of you were here to greet me. It was very early in the morning, and the few scattered lights that gleamed from the windows, with the curling smoke from the freshly lighted fires, were the sole evidences of life. We were using cord-wood then on the *Clamout* as we are using it to-day. I was not at that time married. When just about here we were making the announcement that we 'hoped to be.' I trust you will have the pleasure of then had of meeting my fiancée, Miss Harriett Livingston.

"I came again to Newburgh a few months ago when the booming of cannon and the receding of which announced the launching of that magnificent floating palace which bears the name of my friend here, 'Hercules' and which to-day has outrun all the swift runners in the trip from New York.

"It does not seem that any great invention ever springs Minerva-like from the brow and brain of genius. The steamboat grew out of the efforts of men who had gone before. I was possible, as a steamboat navigator on the Hudson, because someone else dared to wrestle with the problem before me. The things that were new

a hundred years ago are the things that are old to-day. They were no stranger than that the things that are new to-day. One hundred years from now our children will gather in air-ships as we gather to-day, and will look down upon the scenes of these days as we look back upon those of a century ago."

Guests
Intro-
duced

Mayor McChung then presented successively Miss Evelyn Birkbeck, who is betrothed to Robert Fulton's fiancée, Miss Livingston; J. H. van der Bruijne, personifying Hudson's mate; Mr. E. J. Parham, Assistant Engineer of the Netherlands Navy, under whose immediate direction the *Half Moon* was built; and Mr. J. C. Stoop, a member of the Netherlands delegation. The latter spoke as follows:

Delegate
Stoop

"Ladies and Gentlemen: I did not think it would be necessary for me to be introduced to you as being only a very unimportant part on this occasion, still as your Chairman was so kind as to do so, I thank you for the kind reception. It has been a great pleasure to us, to the delegation of Holland, under the able leadership of Hon. J. T. Crommelin, who is the official representative, to come to America, and to come to New York and receive such a tremendous amount of attention. The Professor and myself are the only representatives of our Dutch delegation this morning and the reason is that you have so generously killed, but almost disabled the rest of the delegation through your generous and well-intended forethought. At the reception and ball last night in Brooklyn we were very heartily received, but did not hear from you until half past one this morning, and the ladies particularly, were not able to come here to-day."

First
Parade

At the conclusion of Mr. Stoop's remarks, the official party became the guests of the City of Newburgh and proceeded to the official reviewing stand in another part of the city to witness the parade and other local ceremonies, a description of which will be found in Chapter III.

A portion of the vessels of the naval parade, including the Escort Squadron, remained at Newburgh and participated in the Upper Hudson naval parade and local ceremonies during the following week, while the remainder returned at will to New York.

CHAPTER XXII

CARNIVAL PARADE IN MANHATTAN

THE Carnival Parade in Manhattan Borough on the evening of Saturday, October 2, 1903, was under the direction of the Historical and Carnival Parades Committee, of which Mr. Herman Ridder is Chairman, with the able cooperation of a special organization under the leadership of Mr. Theodore Hemminger.

The Carnival Parade was a "Carnival" in the derivative, ^{of the} not the primary, sense of the term. The word carnival, ^{Carnival} derived from two words "carni," and "vale" and meaning literally "farewell to flesh," was originally applied to those festivities in southern Europe attending the days immediately preceding Lent and culminating on the Tuesday before Ash-Wednesday, called Mardi Gras, or Fat Tuesday. These, in turn, were probably traceable to earlier festivals of the Romans. In Rome and certain other Italian cities, notably Venice, the carnivals have been of great splendor. In Paris the carnival is celebrated with great brilliancy. The Germans, Austrians and Swiss are also familiar with this form of festivity. Among the German carnival cities, Cologne on the Rhine is notable. There, every citizen, from the "burgomaster" to the smallest messenger boy, participates. Well-known artists help to design the "float," while the "Tunkers," an organization not unlike the Honorable Artillery of Boston, acts as bodyguard and marches merrily along. Parades of allegorical chariots, masked balls, the blowing of horns and the throwing of flowers and confetti are characteristic features of the European carnivals. In the United States, carnival is regularly celebrated in New Orleans. The first notable procession of masqueraders there was held in 1827, the inaugurators including a number of

young gentlemen who had just returned from France after finishing their Parisian education. Ten years later the Mardi Gras of 1837 was celebrated on a grander scale. From that time the custom has been handed down from father to son and its observance has made that city famous.

From the festive character of these observances the word "carnival" has acquired the secondary meaning of general public festivity, without the association of any sectarian ideas with it. It was in this general sense that the term was applied to the Carnival Parade of the Hudson-Fulton Celebration.

Sections
The parade

The principal idea taken from the old carnivals was that of representing upon moving vehicles, or "floats," allegorical, mythological and historical scenes. This feature of the Celebration was adopted with a serious as well as festive purpose. The Hudson-Fulton Celebration, as a whole, commemorated primarily the discovery of the Hudson River by Henry Hudson in 1609 and the successful inauguration of steam navigation upon that river by Robert Fulton in 1807. Incident to the commemoration of these events, however, was the celebration of the progress of our people in every department of human affairs during the past three hundred years. The great Historical Pageant and most of the other features of the Celebration dealt chiefly with the facts of history and of material and social progress. The Carnival Pageant, however, dealt with an entirely different phase of culture; for while the Historical Pageant illustrated a few conceptions of the imagination of the American Aborigine, the Carnival Pageant illustrated that great body of Old World folklore which has inspired so much of the beautiful imagery of the poetry, song, and drama of all civilized nations. Although the legends and allegories represented were not indigenous to America, yet they form a real part of our culture, inherited, like the cumulative facts which constitute our progressive civilization, from the past.

In a comparatively new country like ours the earliest efforts of the scults are directed to the conquest of nature and the amelioration of physical conditions. Later, with the accumulation of wealth, comes a degree of comfort and leisure which permits the mind to turn more freely to intellectual culture. American civilization, young as it is, has advanced to the stage where it appreciates its intellectual heritage from the Old World, and nowhere in this country is that heritage more highly prized than in New York City and State. The Carnival Parade, therefore, was something more than a jollification and a merry-making. It was designed to recall the poetry of myth, legend, allegory and in a few cases of historic fact, which, while foreign in local origin, is an heritage of universal possession and belongs to all nations.

When the Carnival Parade was suggested, the Chairman of the Historical and Carnival Parade Committee, Mr. Herman Ridder, conferred with Mr. Theodore Henninger, Dr. Gustav Scholz, Mr. Oscar Seitz, Mr. Frank Mann and Mr. Adam Naimel, representing several large German societies in New York City, and receiving an assurance of a hearty support, it was decided to invite delegates of all German societies of the five Boroughs to a meeting which was held on May 3, 1909, in the Arion Club House. Mr. Fidler acted as Chairman of the meeting and Mr. Henninger as Secretary pro tem. Mr. Stoddard, the Captain of Paganry, explained that the German speaking nations, Germans, Austrian and Swiss, were well acquainted with pagantry in their fatherlands and that a support from these societies would assure success; it was further decided that a second meeting should be called and the societies should organize on May 22, 1909. At the second meeting representatives of 684 societies, representing 60,070 members in the five Boroughs, were present. Mr. Ridder explained that it was necessary to elect a board of officers which should be empowered to do all business in cooperation

Working
German
Faction

Working with the Commission, and with the greatest enthusiasm for the success of the Celebration, the societies organized and elected the following officers:

President: Mr. Theodore Henninger, president and representative of the United Singing Societies of New York, and president of the 22nd National Sängerbund of the North Eastern Sängerbund of America.

Vice-Presidents: Mr. William Hollweg, representative of the Arion and United Singers of New York; Mr. S. K. Saenger and Mr. Adam F. Bond, representatives of the United Singers of Brooklyn; Mr. Richard Muller, of the German Veterans Kriegsbund; Dr. G. Scholer, of the Athletics and Turner Societies; Mr. Joseph Thum, of the Bowling Club; Mr. Edmund Zeller, Mr. Fred Schilt and Mr. Theo. Baumhart, of the Sharpshooters; Mr. John Paradise and Mr. Ed. O. Brandle, of the Volksfest Societies; Mr. Joseph Lammle, of the Benevolent Societies and Lodges; Mr. Paul Abris and Mr. Christian Kuhn, of the Vereinigte Deutsche Gesellschaften of New York; Mr. Max Koeppel, of the National Bund of Brooklyn; Mr. William Breitenbach, of the Bronx Borough Societies; Mr. R. Langenhor, of the Richmond Borough Societies; Mr. Hans Jorgensen, of the Queens Borough Societies; Dr. E. Polack and Mr. Ferdinand Rulke, of the Austria Societies; and Mr. H. J. Landolt, of the Swiss Societies.

Secretary: Mr. Louis Heindeloch.

Mr. Henninger took full charge of the office of the organization at 146 East 50th street without any compensation, and worked with the assistance of the Secretary fully four months to organize the floats and their escorts. This enormous and hard work was done very successfully. Much regret was caused by the necessity of cutting down the participation of escorts to the floats, owing to the limited time of the parade, but this difficult matter was overcome by the good spirit manifested by all the societies. There were 12,500 participants of both sexes

in the parade, the characters on the floats being taken exclusively by members of the societies.

Working
Organ-
ization

The floats were built in the manner described in the chapter on the Historical Parade, and the route of march was the same as for the Historical and Military parades.

The scenes along the line of march—the vast crowds, the brilliant assemblage of officials at the Court of Honor, the demonstrations of applause—were substantially the same as those attending the two previous processions.

It was originally planned to have the floats escorted by men carrying naphtha torches, but owing to the difficulty in securing suitable men for this work, the torches were dispensed with and colored fire was burned profusely.¹ This was hardly necessary, however, as the avenues through which the procession moved were brilliantly illuminated by electric lights strung continuously on both sides of the streets.

The order of the procession was as follows:

Order of
Pro-
cession

PRESIDENT OF THE PARADE

PROSECUTOR

MR. HARRIS, District P. M. Chairman, Mayor

MR. HARRIS, Chairman of Central Parade Committee

GRAND MARSHAL

MAYOR-General Edmund F. Byrne

CHIEF OF POLICE

MR. JAMES T. McLEOD, George Moore, Wingate

ARMY

THE HONORABLE COLONEL WILLIAM W. L. H.

LIEUTENANT COLONEL GEORGE H. HARRIS

LIEUTENANT COLONEL JOHN W. F. L. L. L. L.

LIEUTENANT COLONEL JOHN W. F. L. L. L.

LIEUTENANT COLONEL JOHN W. F. L. L. L.

LIEUTENANT COLONEL JOHN W. F. L. L. L.

¹ Under license from the City of New York, the use of naphtha torches in the parade was prohibited. The use of colored fire was, however, permitted, and the use of the same was, in fact, the only method by which the parade was illuminated. The use of the same was, in fact, the only method by which the parade was illuminated.

Following are brief descriptions of the scenes represented on the floats:

Order of
Car of
Floats

1. *Title Car: "Music, Literature, and Art."* This car was an ornamental car to head the procession of floats, and bore its title. It took the fantastic shape of a dragon spouting flames and surrounded by fire.

2. *"Mars."* Mars, the God of War, was represented riding in his chariot in the clouds, accompanied by two of his five golden horses who personified the evils which attend war.

3. *"Cerberus."* This float represented an enormous animal's head poised ready for its invisible master. The human figures on it were an identification of the colors as they appear on the palette just after having been squeezed from the artist's tubes preparatory to blending for his work.

4. *"Song."* The principal figure in the float represented a woman playing up on a harp and singing. The birds and the plumes which entered into the decoration of the float symbolized the music of the feathered songsters.

Descrip-
tion of
Floata

5. "*Arion*." Arion, a famous Corinthian musician, was returning home from a musical contest in Sicily, where he had won a great money prize. In order to get his money the sailors plotted to kill him. They gave him time, however, to sing his death song, which so charmed the fishes that when Arion threw himself overboard a dolphin took the musician on his back and brought him safely to his home. This float represented his enthusiastic reception on his arrival.

6. "*Crowning of Beethoven*." Fame, in this float, was crowning the bust of Beethoven with a laurel wreath as one of the greatest musicians of his age. Around him the Muses were dancing, and singing, as the composer was crowned.

7. "*Blind Harp*." This float was an idealization of the Blind Harp, which is one of the oldest musical instruments. The harp itself was represented in the apex of the float and the figures which stood in front of the harp represented the winds playing on it. The large figure holding the harp represented outdoor music.

8. "*Lohengrin*." Lila, Duchess of Brabant, an orphan, was accused by her god-son, Friedrich, Count of Teutonia, of the murder of her brother, of which she was innocent. She placed her defense in a knight, who she dreamed would appear from the clouds to protect her. As she waited, a boat appeared, drawn by a swan. In it was Lohengrin. He came ashore, conquered Friedrich, and saved the maiden. The float represented his arrival.

9. "*Lorelei*." This float represented in its chief figure the beautiful siren who has been a favorite theme in German song and poetry.

10. "*Death of Fafner*." Fafner, a giant, stole the Rheingeld which makes the golden glimmer on the Rhine. He took the form of a dragon around it and Siegfried, son of Siegmund, was appointed to kill him. The only weapon which was capable of killing the dragon, a sword called "Nodung," had been

broken. After a long wait, Siegfried finally mended the sword³ Description of
himself, went to "Hate Hole" and killed Fafner and recovered Floats
the Rheingold.

11. "*Queen of Sheba*." The Queen of Sheba, who, according to the tenth chapter of the first book of Kings, made a visit to King Solomon, was here represented at her meeting with the "wisest man." Near her was the float in which she traveled.

12. "*Gottsdamnung*." "Gottsdamnung" is the fourth part of Wagner's "Ring of the Nibelungen," in which Siegfried wears the magic ring from Brunhilda and is murdered by Hagen, whereupon Brunhilda mounts the funeral pyre with his body, the Rhine daughters regain the ring, and the Valhalla burns.

13. "*Maisensinger*." The maisensingers, or martensingers, were the courtly poets who cultivated minne poetry as distinguished from folk song. This float represented the scene in Wagner's musical comedy, "Die Maisensinger von Nürnberg," in which Walter, a young knight in love with Eva, wins her hand by singing, first in a tournament. Upon the float Walter was represented as singing before the judges.

14. "*Walkure*." Die Walkure, or the Valkyries, were the maidens who attended Odin and who, riding through the air in brilliant armor, distributed death as according to his command. They also conducted to Valhalla the souls of heroes who died in battle.

15. "*Tannhauser*." Venus, the Goddess of Love, when she was sent to the earth, became embodied and she used sorcery to lure mortals to her cave. Tannhauser, one of the best harpists and singers of Thuringia, was lured to her. He found a beautiful cave occupied by a beautiful woman, and was pleased to stay and learn her songs. This float represented Tannhauser in Venus's cave.

16. "*Frei Lutz*." Der Freischütz, the free shooter, was a legendary hunter who made a compact with the devil that six

Description of Floats — bullets from his gun should follow his own will, while the seventh should follow the devil's. It is the basis of Weber's famous opera. The float represented the retreat where the free shooters went to cast the magic bullets. Various characters from the opera — Nephelopheles, friars, free shooters and the heroine — were also represented.

17. "*Siegfried*." This float represented the scene in "The Ring of the Nibelungen" in which Siegfried, reared by Mimi, the Nibelung, fuses the magic sword with which to kill the dragon that guards the fateful ring. The float showed Siegfried and Mimi at the forge underground.

18. "*Humor*." This float, which was surmounted by a cap of folly and ornamented by jesters' wands, represented folly fully as much as humor. On the float were grapes and a bottle of Rhenish wine. The figures on the float were dancing and singing and giving every evidence of being in the best of humor.

19. "*Titania*." In Shakespeare's "A Midsummer Night's Dream" Titania is the Fairy Queen and wife of Oberon. In west European folk-lore Oberon was the King of the Elves.

20. "*Origin of Poetry*." The float represented part of the old Norse legend. Odin entered the cave where Ginnlud guarded a magic liquid which made the drinker thereof a poet. Ginnlud permitted him to take a single draught from each of three vessels, but he drank all three dry. Then transforming himself into an eagle he flew toward Asgard. The gods set out their jars and Odin disgorged the inspiring liquid. That which fell in the jars was true poetry and that which fell on the ground belonged to the silly poets.

21. "*Andreas Hofer*." Andreas Hofer was a patriotic leader of Tyrol who lived from 1767 to 1810 and who, after France had secured possession of Tyrol, sought the reunion of Tyrol to Austria. The float represented him and some of his warriors in the mountains a few months before his betrayal into the hands of the French, by whom he was shot.

22. "*Marathon*." The float represented the incident which has led to the use of the word Marathon in connection with racing—namely, the arrival in Athens of the runner who brought from the famous battlefield of Marathon the news of the Greek victory over the Persians in the year 490 B. C. The classic columns and figures symbolized the Greek capital.

23. "*Frost King*." This float represented the mythical Frost King, who has control over the snows and the other elements of the winter. Around him were grouped his fairies, who have charge of the winds, the snows, the frost and the thaw. The Frost King was represented in his home directing the elements.

24. "*Gesler Tell*." William Tell, a famous marksman, refused to salute the cap of Austria, was condemned to death, but permitted to remain himself by his skill in shooting an apple from his son's head. Having successfully performed that feat without injury to his son, and having been released, Tell availed himself of the first opportunity and shot Gesler, the tyrant. This float represented the arrest of Tell after having killed Gesler.

25. "*Nimrod*." Nimrod, who, according to Holy Writ was the founder of the Babylonian and later of the Assyrian Empire, was a "mighty hunter before Jehovah." This float represented Nimrod and his fellow hunters in primitive costume engaged in the chase.

26. "*Andromeda*." Andromeda was the beautiful daughter of an Ethiopian king, a part of whose territory was devastated by a flood. When a sea monster appeared, whose wrath could be appeased only by the sacrifice of Andromeda, she was fastened to the rocks to await her fate. But as the monster appears Perseus, returning from his successful battle with Medusa, happens along just in time, slays the monster, and receives the beautiful Andromeda as his reward.

27. "*Fritz Reuter*." Fritz Reuter was a German writer who

Descrip-
tion of
Floats

Descrip-
tion of
Floats

lived from 1810 to 1874 and who wrote in low German. His works were artistic in both pathos and humor. The float represented his bust, surrounded by figures personifying characters in his writings. Above all was the Goddess of Fame offering the laurel wreath.

24. "*Hanse.*" "The Hanse" was the name officially adopted in 1343 to designate the commercial league between various cities in Germany to protect the commerce of its members by bond and law, to extend business relations with foreigners, to kill competition and to maintain corporate immunities. It was better known as the Hanseatic League. The principal figure on the float personified Hansa, a pile packages of merchandise and the lighthouse indicated commerce.

25. "*Harvesting.*" Ceres, the Goddess of Grain and the Harvest, was the central figure in the midst of this float. She held a horn of plenty and rear by were sheaves of wheat. The figures around her represented the gathering of the harvest.

26. "*Peace.*" This float represented Peace hovering over the world with the olive branch, while the ideal conditions which will prevail when universal peace is established on earth were represented by the friendly company of the lion and the lamb, and the shepherd boy and girl watching their flocks.

31. "*Diana.*" Diana appears in mythology with many attributes, and poets sing to her as the Goddess of Night (the moon), the Goddess of Fruitfulness, and the Goddess of the animal kingdom. Above all other goddesses in the classical Pantheon, she was the Huntress. In the latter character she was represented in this float chasing a stag.

32. "*Europa.*" Jupiter, King of the Gods, fell in love with Europa, a beautiful daughter of the Phœnician King Agenor. In order to win her he transformed himself into a beautiful white bull and mingled with a herd of cattle near the seashore where Europa and her maidens were. The girl noticed the bull, which was so gentle that she crowded him with garlands and finally

climbed onto his back. Whereupon the bull plunged into the sea and swam with her to Crete, where Jupiter again took his own form. The float showed Europa riding away on the bull's back.

33. "*Uhlberg*." This float represented that ancient castle and the famous Heidelberg tun in the cellar beneath. The latter, set up in 1751 by the Elector Charles Philip, has a capacity of forty-nine thousand gallons. Until 1769 it was constantly kept full of Rhine wine. The legends which cluster around the old cask include that of a gnome who drank the great cask dry, a feat which, it is said, the students of Heidelberg have attempted in times past to emulate.

34. "*Gnomes*." The home of the gnomes was underground in a cave. They were always supposed to be blacksmiths by profession. This float represented the court of the King of the Gnomes, with his subjects around him playing and working beneath the ground. The gnomes were always supposed to be the bad and mischievous folk.

35. "*Bavaria*." Bavaria was represented by a float bearing allegorical figures personifying the country — musicians, artists, etc., representing the art nouveau.

36. "*Sirens*." The Sirens, in mythology, were sea maidens with sweet voices, who, by their charms lured voyagers to destruction upon the rocks of their island. In the *Odyssey* Ulysses stopped the ears of his crew with wax so that they should not be diverted from their labors, while he caused himself to be bound to a mast so that he might listen to the Sirens' songs without danger.

37. "*Medusa*." In Greek mythology Medusa was a hideous female monster whose hair was interwined with serpents and whose glance turned people to stone. Perseus, equipped with a magic helmet which rendered him invisible, and with a shield like a mirror, by means of which he could see the Gorgon without encountering her deadly glance, sought her out and

Description of FLOATS show her. The float represented the scene where Perseus looks into the shield and sees Medusa.

38. "*Elves of the Spring.*" This float represented the opening of the flowers and the fairies is ming therefrom, suggesting the magical change which comes over the face of nature with the retreat of winter.

39. "*Good Luck.*" This float represented several forms of popular superstition in the horn shoe, the rabbit, the four-leaved clover, the black cat, etc. The Swastika which gave the motive to the decoration of the drapery, has been a symbol of good luck among the peoples of both hemispheres, including the American Indians.

40. "*The Jungle.*" The folklore of the ancients was based on their contact with the natural world -- the dragons and other fabled beasts being poetic exaggerations of real life. "The Jungle" represented a wild and a scene in the East, where the elephant occupies a conspicuous place in religion and mythology as well as daily life.

41. "*Egyptian Art, Music and Literature.*" The five arts of the ancient Egyptians were represented in this float. A great central figure held a lotus flower in one hand and a harp in the other represented music and art. Music was further represented by figures holding ancient musical instruments. Literature was represented by hieroglyphics on the float, and architectural art and monumental literature were shown by the Sphinx and by tablets supported by Egyptian columns.

42. "*Father Rhine.*" This float represented the river Rhine. Old Father Rhine, himself, stood at the prow of a Rhinish carnival ship. At the foot of the Rhinish vineyard stood his faithful cultivator, and at the top of the rock stood his medieval castle, to guard the fruit of the vineyard.

43. "*Germany.*" This float represented an idealization of Germany. Germania, the central figure, held the Imperial Crown in her hand. Beside her were eagles, draped with the

German colors. Nine figures represented the different states which make up United Germany.

Description
of
Floats

44. "*Mermaids.*" This float depicted a scene at the bottom of the ocean, the home of the mermaids, which the seafarers' legends have always described as beautiful creatures with the bodies of women and the tails of fish, who lure sailors to the bottom of the sea and to their destruction. The artist depicted the mermaids disporting themselves on coral reefs surrounded by fish and other inhabitants of the deep and by seaweed and other plants of the sea.

45. "*Fairies.*" This float represented the home of the fairies among the flowers. The fairies were always believed to be little people who lived in the flowers, where they slept all day and came out to play at night when mortals were asleep. This float represented the fairies at play with the butterflies.

46. "*Cinderella.*" This float represented Cinderella just after the Prince has found her and has discovered that the silver slipper which no other woman in the kingdom could wear fitted her perfectly. Cinderella was seated in an immense slipper with the Prince before her and near her were her jealous sisters and their friends.

47. "*Ophion before Pluto.*" Ophion, the son of Apollo, played the lyre so well that even the trees and rocks followed him around when he played. His beautiful wife, Euridice, was bitten by a serpent and died. Ophion followed her to the regions of the dead, and played so sweetly before Pluto, its king, that he finally consented that Euridice should go back with him to the land of the living.

48. "*God of the Alps.*" This float illustrated a legend of Switzerland. The presiding Alpine deity had forbidden the killing of a certain animal, and a hunter, having disregarded a thrice given warning and killed the animal, was himself slain by a stone hurled upon him by the God of the Alps.

49. "*Andeanche of Freedom.*" This float symbolized Swiss

- Description of Floats
- liberty. It recalled the vow of the Swiss at Rudi, where, in 1307 was planned the revolt against Austria which resulted in Swiss independence. A figure on the globe symbolized freedom. The meadow at Rudi, which is regarded as the cradle of Swiss liberty, was purchased in 1859 by the school children of Switzerland to be preserved as a national memorial.
50. "*Uncle Sam Welcoming the Nations.*" This float symbolized the hospitality which the United States extends to the people of all nations of the world.

CHAPTER XXIII

DEDICATION OF PARKS AND MEMORIALS

INTERSPERSED among the events of the first week of the Celebration were the dedications of several permanent memorials. These ceremonies were correlated by the Dedications Committee of which the Hon. Warren Higley is Chairman.

In the original program for the Celebration, Wednesday, September 29, was set apart particularly as Dedication Day; but as the plan of the Commission developed, it became apparent that it could be impractical to conduct these functions on a single day and they were therefore arranged on the dates most convenient in each case.

Prior to the Celebration, the Committee on Dedications sent ^{Liter-}out several hundred circulars to patriotic and historical societies, ^{and of} ^{Com-}suggesting the dedication of parks, monuments, tablets, etc., ^{in the}as permanent memorials, and several such ceremonies were arranged with the direct cooperation of the Commission.

The Commission issued 7,000 copies of a pamphlet of 64 pages and cover, containing illustrations and descriptions of the memorials dedicated, brief historical accounts of the events commemorated, programs of exercises and lists of committees in charge of the ceremonies.

The dedications in chronological order were as follows: List of
Dedica-

September 27, 11 A. M. Police Department Park. For detailed account of the proceedings see Chapter XXV.

September 27, 2 P. M. Helen Magoon at on Spuyten Duyvil Hill, New York City. For a record of the proceedings see Chapter XXV.

September 28, 11 A. M. Tablet in honor of some public school teachers who taught under Dutch rule. Erected by New York University on the University Building in Washington Square. A description of the tablet is given hereafter.

List of
Dedications

September 29, 4 P. M. Bust of Robert Fulton. Erected in the Hall of Fame by New York University. A brief account of the proceedings is given hereafter.

September 29, 11 A. M. Fort Amsterdam Tablet, New York City. For an account of the proceedings, see Chapter XXVI.

September 29, 1 P. M. Washington Heights Tablet at 137th Street and Broadway, New York City, erected by the Washington Heights Chapter of the Daughters of the American Revolution to mark the "first line of defense" on the Heights in 1776. A description of the memorial and the program of exercises are given hereafter.

September 29, 2 P. M. Statue of Gen. Anthony Wayne at Newburgh, N. Y., on the grounds of Washington's Headquarters. For an account of the proceedings see the chapter on the Celebration at Newburgh.

September 29, 3:35 P. M. Tablet erected at No. 48 Wall Street, New York, by the Society of Colonial Wars to mark the site of a bastion of the old city wall. A description of the memorial and program of proceedings are given hereafter.

September 29, 4 P. M. Fort Mifflin tablet, New York City, by the American Society of the Sons of the American Revolution. For an account of the proceedings, see Chapter XXVII.

September 29. A physics concert at Cornell, N. Y. See chapter on Cornell celebration.

October 2, 1 P. M. Free Point Arch by the New York State Society, Daughters of the Revolution. See Chapter XXVIII.

October 5, 4 P. M. Monument at Kingston, N. Y., to the memory of Sir Thomas Chambers, Lord of the Manor of Fort Hall and one of the founders of Kingston. See chapter on Kingston exercises.

October 5, 5 P. M. Tablet in the Industrial Home at Kingston, N. Y. See chapter on Kingston exercises.

October 6, 4 P. M. Monument to Verrill in Battery Park, New York City by the Hudson College. See Chapter XXIX.

October 7. Memorial service in the city of Hudson by the Hendrick Hudson Chapter, D. A. R. See chapter on Hudson exercises.

The Mary Washington Colonial Chapter, Daughters of the Colonial Revolution, of New York City, planned to dedicate on September 29 a tablet at Broadway and 134th Street to mark the "third line of defense" on Washington Heights in 1776, but owing to unavoidable circumstances the dedication was postponed.

Sch. of
Teachers
Tablet

The school teachers' tablet which was erected on the northwest corner of the University Building at Washington Square, facing University Place, and which was dedicated under the auspices of New York University on September 28, was the

gift of the Chancellor of the University, the Rev. Henry M. MacCracken, D.D., LL.D. At the top of the tablet is an enlargement of the seal of the University bearing the well-known device of the uplifted arm and hand with torch, the three maces, and the motto "New York University, Founder of Praesentem, MDCCCXXV." Under the seal is the following inscription:

TO HONOR THE SCIENCE
OF THE HISTORY OF THE
ARTS AND THE LITERATURE
OF THE MIDDLE AGES
AND THE
TO COLLEGE
JANUARY 1890
WILLIAM V. C.
J. EDWARD MCGEE
HARRISON W. H. C.
TO THE
NEW YORK UNIVERSITY
HALL OF FAME

The exercises concluded with an address by M^r. J. B. Aulais de Bournoff, Professor at the University of Utrecht and a member of the Netherlands delegation to the Fulton-Fulton Celebration, and a final address by William H. Maxwell, Ph.D., LL.D., City Superintendent of Schools, who unveiled the tablet.

The bronze plate of Robert Fulton dedicated to the Hall of Fame at New York University on September 29, was erected on the premises of the Club and dedicated to the Fulton celebration previously placed there and dedicated by an inscription. At 4 p. m. there was a reading of the history of the honor in which Chancellor MacCracken on October 1, 1890, presented "Robert Fulton" was dedicated to Charles C. Smith, LL.D., who was President of the Chamber of Commerce of the State of New York from 1887 to 1889, and Mr. James G. Cannon read an address entitled "Early Sailing Vessels and Steam Navigation" written by the Hon. S. P. van Righen, President of the Chamber of Commerce of Amsterdam, the Netherlands, and an official delegate from that country to the Fulton-Fulton

Celebration. After these exercises, the audience proceeded to the Colonnade of the Hall of Fame where the bust was unveiled by Mr. Samuel W. Tainchild, Chairman of the Committee on Internal Trade and Improvements of the Chamber of Commerce of the State of New York.

The Committee of the University Council in charge of the ceremonies was composed of Messrs. James C. Cannon, George F. Victor and William H. Porter.

First
line of
Delegates.

The tablet at 1,7th street and Broadway, in New York City, which was dedicated on September 29, was erected by the Washington Heights Chapter, D. A. R. The officers of the chapter and the committee in charge were as follows:

Regent, Mrs. Samuel J. Kravitz.
First Vice-Regent, Mrs. Julia Eichen Sober.
Second Vice-Regent, Mrs. Charles E. Bostwick.
Recording Secretary, Mrs. Anna S. Geer.
Corresponding Secretary, Mrs. Isabel P. Bangs.
Treasurer, Mrs. Howard B. Robbins.
Registrar, Mrs. Frederick A. Tarnold.
Historian, Mrs. Joseph H. Weller.
Chaplain, Rev. Philip H. Goss.

Committee, Mrs. Joseph B. Wade, Chairman; Mrs. Stanley L. Olin, Secretary; Mr. George D. Bangs, Mrs. Mary J. Bracken, Mrs. William H. Duckworth, Mrs. Charles Finkler, Mrs. E. Monroe Hand, Mrs. George F. Hyde, Mrs. M. Elizabeth Lester, Mrs. Janet M. Lincoln, Mrs. Charles B. Lisco, Mrs. William C. Merriam, Mrs. Joseph T. Newcombe, Mrs. Jacob C. Stranier, Mrs. George L. Stern, Mrs. George C. Stoddard, Mrs. William Swan, Mrs. Walter H. Tappan, Mrs. E. B. Trevelyan, Mrs. H. Crowell Tread, Mrs. Albert Vorhees, Mrs. Jethro Waller, Mrs. George T. Wilson and Mrs. Frances J. Worcester.

Committee of Washington Heights Taxpayers' Association in charge of local attractions: Hon. Joseph T. Newcombe, Chairman; Dr. W. F. Alexander, Benjamin E. Blauvelt, Dr. W. W. Bortwick, J. Romulus Brown, Minnie Post Childs, Hon. John R. Davies, Jacob Erlich, Gus C. Henning, Robert J. Hoguet, Merritt M. Kohn, Robert D. Eohn, J. M. Libbey, Rev. John Mackay, D. F. Mahoney, Hon. Thomas McAvoy, Hon. John J. McDonald, Hon. John J. F. Mulcahy, Frederick Samuel Robinson, Dr. L. A. Rodenstein, J. Schulberg, William B. Sellen, Robert F. Stearns, E. B. Treat, and Hon. F. J. Worcester.

The tablet, which was placed upon a boulder, bore the following inscription:

This stone marks the position
of
"THE FIRST LINE OF DEFENCE"
Constructed across these Heights
in 1776
Bravely defended by
THE AMERICAN ARMY, 1776
Erected by the Washington Heights Chapter,
Daughters of the American Revolution,
October, 1922.

The program of exercises was as follows:

Music: "My Country 'Tis of Thee."

Invocation: Rev. Joseph H. McMahon, Ph.D., Rector of the Church of Our Lady of Lourdes.

The Purpose of the Memorial: Hon. Warren Hight, Chairman of the Commission on Public Monuments and Historical Celebrations.

Presentation of the Memorial: Mr. Samuel J. Kromer, Agent, Washington Heights Chapter, D. A. R.

Playing of the Tablet: Mrs. Olive Mosely Bostwick and Master Count-Luck Shinnar Orls, Washington Heights Chapter, Children of the American Revolution.

Music: National Anthem.

Acceptance of the Monument: Captain of the Corp. Hon. George B. McClellan, Major.

Honored Guest: Josiah P. Thompson, A.M., LL.B., Historian, Empire State Bldg., Son of the American Revolution.

The Public Board of View: Hon. William S. Bennett, M. C.

Band: St. Luke's P. E. Church, Astor, Ochsberg, and St. Luke's P. E. Church, M. McClellan Hall.

Delegation.

A reception was tendered by St. Luke's P. E. Church at Hamilton Grange, the old home of Alexander Hamilton, after the ceremonies.

The following historical account of the site is taken from the pamphlet of the Commission's Committee on Dedication:

The fortifications of that part of Manhattan now known as Washington Heights, which was in 1776 included in the general title of the Heights of Harlem, centered at the citadel of Fort

First
Line of
Defense

Washington, but included surrounding points of vantage, admirably selected by the officers of the American Army, and constructed with infinite labor by the men of the small army of defense. On the northern side the defenses consisted of three lines of earthworks, known as the First, the Second and the Third, respectively situated on the approximate lines of 147th, 152d, and 156th to 162d streets. Of these, by far the most elaborate and regularly military in character was the First, which also was the earliest in date of construction, having been commenced during the fighting which took place on September 16, 1776, commonly referred to as the "Battle of Harlem Heights," during which the reserves under General Spencer were laboring vehemently on the construction of this line of defense. The works extended from St. Nicholas avenue, then the King's Highway, at a redoubt on the summit of what was then and long since known as "Break Neck Hill," and crossed the hill we now thread through the grounds of the Matherell mansion, used by General Spencer as his division headquarters, in an irregular and zigzag fashion to a point on the line of Broadway and 157th street, where the entrenchment terminated in an abrupt descent to the Hudson River. At this point quite an elaborate redoubt was later developed, and within it and along the line some of the small cannon, probably brought from Fort George at the Battery, were mounted. The Second Line, which has already been marked by a memorial tablet on the wall of Trinity Cemetery, at 153d street, was naturally strong by reason of the rocky nature of the Heights at that point. The Third Line, which extended around the Lewis Hill on Riverside Drive, and irregularly across the hillside to Washington's Headquarters, was not at any time in a fully completed condition, but its interest in connection with the others makes it a suitable subject for a memorial tablet. The First line of defense came into active use on October 27, 1776, when an attack in force was made upon it by the British.

troops moving from the neighborhood of Harlem, aided by ^{the of} two war vessels in the Hudson. The garrison, promptly ^{the of} manning the line, successfully resisted the advance of the British force, and Colonel Robert M'Gaw, in command of Fort Washington, brought down one of the two heavy guns mounted in the fort and nearly succeeded in sinking one of the British war vessels by well-directed fire. On the occasion of the final assault upon Fort Mifflin, November 16, 1776, a similar but much more formidable attack was made upon the First Line of defense by a combined force of British and Hessians of about 10,000 men, upon which the general command of Lieutenant-General Sir Earl Percy. The line was on this occasion defended by a small body of 600 Pennsylvanians, aided by a detachment of the Connecticut Rangers. They gallantly opposed the advance of the overwhelming force until daylight broke was rendered untenable by the loading of the Forty-second Highlanders in the rear of their position. Then they fell back upon the Fort, stoutly disputing the way, until they and its other defenders found themselves enclosed by the circle of 15,000 opponents, and were marched into the bitter captivity of New York prison houses and ships, from which so many of them emerged only on their way to their graves.

The tablet dedicated at No. 33 Wall street, New York City, ^{City Wall} on September 23, to mark the site of one of the bastions of the ^{Bastion} old City wall, was unveiled by the Society of Colonial Wars in the State of New York, of which the following named gentlemen were the officers:

- President, Mr. Walter Elliptical Seaborn.
- Deputy President, Mr. William Cuyler Seaborn.
- Lieutenant-Governor, Mr. John B. B. Pratt, Henry Clay, George Ford, and Amos A. B. C. C. C.
- Secretary, Mr. Lyman D. D.
- Deputy Secretary, Mr. Edward C. C. C.
- Treasurer, Mr. Charles C. C.
- Registrar, Mr. John Francis D. D.

City and
Island. Chancellor, Mr. William Whitehead Ladd.
Vice-Chancellor, Mr. William Charles Bates.
Surgeons, Thomas Davidson, M. D., and Everett Suydam Weiss, M. D.
Historian, Mr. Edward Trenchard L.
Chaplain, Rev. Dr. Howard Danford.
Cemetery, William Henry Johnson.

Tablet Committee, New York: Samuel Putnam Avery, Francis Seligwick Bangs, Howard Randolph Bayne, David Wood Bell, Beverly Chew, Clarence Henry Eagle, Frederic de Peyron Feser, Frederick Gallatin, Walter G. G., Samuel Verplanck Loomis, Charles Bentley Habbell, Charles Isham, Oliver Livingston Jones, Elsie Todd, John K. K., Edward de Bente Livingston, Joseph Tompkins Lee, Edwin Augustus McMill, Stephen Henry Olin, Robert Olyphant, Charles Rosell Olin, George Richard Schiffman, Charles Stewart Smith, Daniel Melvorne Stimson, Hamilton Bullock Tompkins, John Reynolds Totten, Charles Clifton Opham, Robert E. Van Cortlandt, Charles Elliot Weiss, and Everett Suydam Weiss.

General Committee, Thomas Livingston, M. D., Chairman; Mr. B. W. B. Brown, Secretary, and Messrs. Alexander C. Chalmers, Frederick Davidson, George Percy Hall, Mark Hastings, Henry Gansevoort Seaford, Clarence Storm, Walter Lippman Landon.

The order of exercises at the dedication was as follows:

Invocation, Rev. Dr. Howard Danford, Chaplain of the Society.

Papers of the Publication Committee of the Society. Dr. Thomas Darlington, Chairman.

Address and Transfer of Custody of the Tablet. Mr. Walter Lippman Suydam, Governor of the Society.

Address and Acceptance of the Custody of the Tablet. Mr. Herbert L. Olin, President of the Board of New York, New Jersey and Banking Companies.

Charles Addison, Jr., M. D., English, Chairman of the Committee on Dedication, Hudson-Fulton Celebration Commission.

Following is a brief historical sketch of the site marked by the tablet.

War having been declared between the English and the Dutch in 1652, the inhabitants and government of New Amsterdam expected that some attempt would be made by the English to capture the town. The fort was accordingly repaired and the citizens enrolled in four companies. So superior in numbers were the English in the New England colonies that it was felt

necessary to construct some defense against a land attack. ^{City Wall} ^{Bastion} Accordingly, in 1653 a wall was constructed from the North to the East River. The wall extended along the line of the present Wall street a few feet north of the north side, thence in a southwesterly direction to the North River, thence to the fort at the foot of Broadway. It was built of palisades twelve feet high and eighteen inches in girth, sharply pointed at the upper end. Posts seven inches thick were erected at intervals of a rod, to which split rails were nailed two feet below the top on the inside. On the inside was a banquette of earth four feet high and from three to four feet wide, thrown up from a ditch three feet deep and two wide.

In 1667, when there was fear of a French invasion, the English carried two stones on the wall, one to the northwest corner of West and William streets and the other at the northeast corner of Wall street and Broadway. The wall, having fallen into a state of disrepair, was demolished in 1699. The tablet marks approximately the site of the first named bastion, and through the courtesy of the officers and directors of the Bank of New York, National Banking Association, in whose custody it will remain, is affixed to the front of its building at No. 60 Wall street, New York City. The design of the tablet is by Messrs. Beatty and Stone, architects; the model for the casting having been made from their drawings by Mr. Albert Weinert, the sculptor. It was cast by Mr. John Williams. The design of the tablet is quite elaborate. Within a border repeats ringed rings of wampum beads, arrows and bullets, with Tudor roses at the corners, and a plan of the city below Wall street in 1653, a representation of the ship Half Moon, and the seal of the Society of Colonial Wars in the State of New York. The inscription is as follows:

"Here stood the first Fort of the Province, from 1653 extending from the East River along the line of the present Wall Street and thence West to the City of Hudson's River.

"The tablet was erected at the Society of Colonial Wars in the State of New York on the occasion of the Hudson-Paterson Celebration at New York City, 27th September, 1907."

CHAPTER XXIV

DEDICATION OF PELISADES INTERSTATE PARK

THE Pelisades Interstate Park was formally dedicated under the auspices of the Pelisades Interstate Park Commission of New York and New Jersey and the Hudson-Fulton Celebration Commission by ceremonies held at Alpine, N. J., on Monday, September 27, 1909, beginning at 11 o'clock A. M. In the absence of General Stewart L. Woodford, President of the Hudson-Fulton Celebration Commission, Dr. George F. Hunt officially represented the Commission in the ceremonies.

The Pelisades Interstate Park Commission consists of ten members, five of whom are residents of New York and five of New Jersey, and all ten are duly appointed by the Governor of New York and the Governor of New Jersey. The Commission is organized as follows:

NEW YORK

George W. Perkins, President.
Franklin W. Hopkins, Vice President.
J. DuPratt White, Secretary.
D. McNelly Stautler, Treasurer.
Edwin A. Stevens.

Edwin A. Stevens, President.
D. McNelly Stautler, Vice President.
J. DuPratt White, Secretary.
Abram De Bander, Treasurer.
George W. Perkins.
Franklin W. Hopkins.
William H. Potter.
William A. Linn.
William E. Dana.
Nathan F. Barrett.

The Hon. Edwin A. Stevens presided at the dedicatory exercises.

The opening prayer was offered by the Rev. Howard C. Robbins, of Unfledwood, N. J., in the following words:

Rev. Mr. REV. HOWARD C. ROBBINS: "Almighty God, unto whom all
Reb. Mr. hearts are open, all desires known, and from whom no secrets are

hid, cleanse the thoughts of our heart, by the inspiration of Thy Rev. & L. Holy Spirit, that we may perfectly love Thee, and worthily magnify ^{Revelations} Thy Holy Name through Jesus Christ, our Lord.

"We bless Thee, Lord of heaven and earth, for this occasion of great and public joy. Grant that the solemnity of it may be upon our spirits. Grant that by the largeness of it our hearts may be enlarged. Inspire in us a heat of fervent recollection, that our self-interest may be silenced and put to silence, and for a moment we may find our happiness in what concerns the general good of man.

"Fair is our heritage, goodly is our heritage. We bless Thee for the records of creation, as written in the ancient Palisades. Help us to read bright the written records. Teach us thereby to recognize a wisdom anterior to that of Nature, and a force constraining her. Lord, we thank Thee that Thou wilt not leave this world a victim of chaotic forces.

"We thank Thee that Thou didst prepare such a habitable world for man. Before the mountain was brought forth, or even the earth, and the world were made. Thou art God from everlasting, and world without end. We praise Thee, O God, we acknowledge Thee to be the Lord. All the extended worship Thee, the Father everlasting. We rejoice that Thou hast given us dominion over Nature. Of Thee cometh counsel and invention, and every human strength. Thou hast taught us to seek out food and raiment and shelter, and to protect our lives against Thy lower creatures. Of Thy providence it cometh that our life hath been preserved upon the earth. We thank Thee not alone for the devices which have sheltered human life, but for those which have enlarged it. We bless Thee for commerce and industry, for science, literature and government, and for all the arts of peace. In particular, we adore Thy mercy for the invention of which this river was the witness. We thank Thee that Thou didst put into the heart of Thy servant Robert Fulton the great device whereby the ends of the earth are brought together, and the brotherhood of nations is made manifest, and the coming of Thy Kingdom is advanced.

"We rejoice in many notable endeavors to which this river witnesseth. We bless Thee for the vallant histories inwrought into its shores. We remember with reverence the spirit of adventure

Rev. Mr. Robbins: which brought hither its explorers, and enabled them to look upon Christendom a continent of beginnings, a land unburdened of tyranny and untroubled by regret. We remember with reverence the war of freedom which was waged about its borders; the war whose happy issue welded it into a Nation, beginning to be great and federal tasks. Give unto us, O God, strength to endure, and wisdom to fulfill the tasks of democratic government. Help us to close the widening chasm between the strong and weak, the rich and poor. Enable us to ease therein all pride and prejudice, luxury and covetousness, the influence of riches with the rapacity of poverty, that we may fill it full and make a highway for thy King to pass over, and for all the people to walk in together. And so may we establish the Republic, now built in America the Holy City, foretold by all the prophets since the world began.

"Father of Heaven, look with favor upon Thy people, and receive our thanksgiving. Thou didst put into the hearts of faithful men and women the desire to preserve from human ravages the towering cliff and gracious shore and flower-sprinkled wilderness. By gifts of patience and of public spirit, Thou didst prosper their endeavor, and bring the same to good effect. Receive from them, O God, unspoiled and consecrated, the loveliness which they have revered. Protect it through all coming generations, and send it to the people's use. And let the beauty of the Lord our God be upon us, and establish Thou the work of our hands upon us; yea, the work of our hands, establish Thou it. Amen."

Chair-
man
Stevens

CHAIRMAN STEVENS: "We will now hear the report of the Commissioners of the Palisades Interstate Park of the States of New York and New Jersey, from Mr. George W. Perkins, who is President of the New York Commission. I have the pleasure of introducing Mr. Perkins."

President
Perkins

HON. GEORGE W. PERKINS: "As President of the New York Commission it became my duty and pleasure on this occasion to report to the Governors of the States of New York and New Jersey on behalf of the Palisades Interstate Park Commission, that the Commission has completed the task entrusted to it, viz., that of saving the Palisades from Fort Lee, New Jersey, on the South, to Piermont, New York, on the North, and, further, of acquiring the face of the Palisades and the land between them and the Hudson,

and the outstanding riparian rights adjacent thereto, along this fourteen-mile strip of territory for the purpose of an Interstate Park. ^{President Perkins}

"The first tangible plan towards protecting the Palisades was a proposal in 1875 to induce the National Government to secure them for military purposes. A Commission was appointed for this purpose but the scheme fell through. The outlook for preservation after this failure seemed most discouraging. At this juncture the women of New Jersey took up the work, and with great zeal and intelligence the New Jersey State Federation of Women's Clubs began an active campaign, resulting in the passage of a bill in 1899 by the New Jersey State Legislature, empowering the Governor to appoint a committee of five to investigate and report. Governor Voorhees signed this bill and named as members of the Commission, Elizabeth B. Verouillye, Corliss Gates Holland, Franklin W. Hopkins, William A. Linn and S. Wood McBrye.

"The New York Legislature passed a similar bill, and Governor Roosevelt, at the suggestion of Andrew H. Green, appointed as the New York Committee, Frederick W. Devoe, Frederick S. Vandy, George F. Kunz, Meredith G. Mills and Edward Payson Core.

"Among the ardent supporters and most effective workers connected with the movement at that time were Dr. George F. Kunz, now President of the American Scenic and Historic Preservation Society, and the late Wm. E. Dodge.

"Conferences covering nearly a year followed, with the result that the Committee reported to the respective Legislatures the passage of acts constituting a permanent Interstate Park Commission to serve without compensation and with power to acquire and hold whatever territory was necessary along the Palisades for an Interstate Park and thereby preserve the scenery of the Palisades. Legislation to this end was passed by the New York Legislature and approved by Governor Roosevelt March 12, 1900. In the New Jersey Legislature the bill met with considerable hostility, but the friends of the proposed measure kept up an unrelenting fight, the work of the women of New Jersey being particularly effective, and the bill was finally passed and signed.

"Governor Voorhees appointed as New Jersey's Commissioners Abram S. Hewitt, Edwin A. Stevens, Franklin W. Hopkins, William A. Linn and Abram De Ronde.

President "Governor Roosevelt's appointees were George W. Perkins, J. Perkins
Fertius DuBois White, Ralph Trautman, D. McNulty St. John, and Nathan F. Barrett.

"With the exception of the vacancies caused by the lamented death of Messrs. Abram S. Hewitt and Ralph Trautman, all the places were filled by William B. Dana and Willard D. Parker, the personnel of the Commission has remained unchanged through the nine intervening years.

"When the Commission began its labors in the summer of 1890, it had on hand appropriation of \$50,000 from the State of New Jersey and \$75,000 from the State of New York, for expenses.

"The Commission found that legally organized companies were engaged in blasting the cliff on land that the said companies had bought, and had a right, under the law, to quarry.

"A survey of the Pellisade was at once made when and New Jersey's appropriation was devoted to this purpose. The Comdals were surprised to find that in place of the Pellisade, presenting a perpendicular face, it was the common belief, there was about 500 feet of land with the face for Rock purposes at the foot of the cliff, in a strip from Point Line to Plemonore and that there were about a dozen places at the foot of the cliff which bore themselves very easily as landing places from which the 500 acres could be reached.

"In a general way the Commission came to the conclusion that if it could in some way stop the blasting and acquire the quarry, it might be possible to acquire all the rest of the face of the cliff and the riparian rights between Point Line and Plemonore for something like \$500,000. The difficult problem, of course, was how to stop the blasting and acquire title to the quarry, which were valuable going concerns. After prolonged negotiations with the quarrymen, the Commission found that it could acquire title to the active quarries for \$1,000,000.

"The Comdals had no money for expenses. Any of the friends which the State of New York had voted in. Its office had been 'under its hand' to spend and it had incurred no in-laid expenses. At this point it decided on the following plan:

"First To raise the money of expense money and pay it on a contract to purchase the quarry properties for \$1,350,000 — all the money to stop until the following spring.

"Second: To attempt to raise the remaining \$125,000 by private subscription, with an understanding with the subscribers that they were not to contribute the money unless the Legislatures of New York and New Jersey, during the winter session, contributed respectively \$400,000 and \$300,000 for the purpose of acquiring such land along the face of the cliffs where blasting was not going on but might be started at any time.

"The State was paid to the quarrymen, and all blasting on the Palisades stopped on October 15, 1901. Mr. J. Pierpont Morgan offered to contribute the \$125,000 needed to finish the purchase of the quarry properties under the plan contemplated. The Legislatures of New York and New Jersey were approached with this plan during the winter, and New York appropriated the \$600,000 asked of it, and New Jersey appropriated \$750,000.

"Since then the work of acquiring the property has steadily progressed, and the Commission is able to report the acquisition of the entire face of the cliffs from Fort Lee to Platteau, with the exception of a few small ridges which are in the course of acquisition. This has been accomplished without asking either State for any further appropriation for the purchase of land or riparian rights than the sum originally asked for and appropriated nine years ago.

"In the foregoing nine years, New York has appropriated \$200,000 for acquisition, and New Jersey has appropriated \$175,000. This money has been used for surveying, and for acquiring easements, for improving and building a foot path on the face of the cliffs from Fort Lee to Platteau—a distance of about seven miles—for protecting the property and land along the grounds, for collecting and securing titles, for conducting pole-line, for legal services, printing, clerical and stenographic work. The personal expenses of the Commissioners during this seven period have amounted to \$157,000.

"The Commissioners have acquired about 175 parcels of land in all, including not only lands or residences which are still occupied for a nondescript use. Good landing places exist at Fort Lee dock, Carpenter's quarry dock, Fairview dock, Van Wagoner's dock, Lufkin & Randall dock, Brown & Fleming's quarry dock, Huyler's Landing, M'Clure, Pearsall's dock, Jordan's dock, Riverside Grove, Forest View dock and Twombly's dock, and there several landings are scattered along through the 500 acres of land embraced in the

President Park district. In fact when the Commission took up its work nine years ago the Palisades were practically unknown and rarely, if ever, visited by anyone.

"As the blasting ceased and the cliffs were made somewhat accessible the people of New York and New Jersey began to enjoy this wonderful region. During the summer of 1905 the Commission issued 25 permits to people to camp on the Palisades. In 1906, 211 permits were issued. In 1907, 305 permits were issued. In 1908, 700 permits were issued, and during the season just closed 1,000 permits were issued. Under these permits during the past summer, approximately 35,000 campers have enjoyed the shores of the Palisades during their holidays and on Sundays. This is in addition to many hundreds of picnickers who have visited the district for a few hours at a time.

"In commemoration of the work for Palisades preservation accomplished by the Federation of Women's Clubs of New Jersey, the Commission has established a reservation on a commanding bluff, on which a suitable monument is to be erected from funds contributed by their friends; \$3,000 raised by the women of New York and New Jersey has already been placed in this fund in honor of the public-spirited men and women of both States, who labored in the cause of Palisades preservation at the beginning of the movement.

"The Commission acknowledges with grateful thanks gifts of land and money as follows: Mrs. Lydia G. Lawrence, of Palisades, New York, land and right of way to the value of about \$3,500; Cleveland H. Dodge, of New York City, land and riparian rights to the value of about \$16,000, and a member of the Commission, \$17,500.

"Two other gifts to the Commission stand out as conspicuously valuable in the work that has been accomplished. That of Mr. Morgan at a critical moment in the beginning of the Commission's career, and a donation made last week by Mr. and Mrs. Hamilton Mott. Exceedingly 6 acres of land and 3,000 feet of riparian rights, which, including docks and improvements, is valued at \$125,000. It is this latter gift that makes it possible for the Commission to announce at this time the completion of the task of saving the Palisades and acquiring the entire frontage of same, with the outstanding riparian rights, for park purposes.

"The parcel of land presented by Mr. and Mrs. Twombly has been owned by them for a number of years and during the past thirty years they have maintained a dock and comfortable recreation grounds, and excursions have been run from the City for people who could not afford the outing themselves. During the past thirteen years 365,000 people from the City have enjoyed the benefits of a ride up the Hudson River, a few hours at this charming landing, and a ride back to New York. In accepting this handsome gift the Commission has agreed to maintain this landing and permit all worthy institutions and all accredited individuals to use the property for the same worthy purposes for which Mr. and Mrs. Twombly used it in the past.

"Up to date the Commission has had but one sole object—to preserve and acquire the face of the Palisades. This has now been accomplished and the Commission's forecast of nine years ago to the people who have helped it and to the State of New York and New Jersey, have been realized.

"In the development of the work the Commission has come to appreciate the value of its tract not access to the millions of people living in such close proximity to this absolutely unique piece of territory, and now that the task of saving and acquiring the Palisades has been accomplished the Commission is inclined to devote their efforts, with the permission of their respective States and the public, to a fuller development of the park. There are now driveways down the cliffs at Englewood and Alpine. There should be a driveway the entire length of the base of the cliffs, from Fort Lee to Piermont. This would make the park accessible from all points for all classes, and would make the most natural and perfect outlet from the City of New York to the good roads that are being laid out in the State of New York.

"Last winter Senator Edward J. W. Vandevelde, always a consistent friend and worker in the cause of Palisades preservation, introduced a bill in New Jersey favoring such a driveway, and the bill was passed. A similar bill was introduced in New York by Senator Howard R. Bayne, but did not pass. Such a driveway would not be as expensive as might be supposed, as it could be built in part with the material at hand along the base of the cliffs.

"The surveys and sketches which the Commission has made in

President this, comparison show that a driveway of this kind could be built
 Perkins that, for picturesque, could scarcely be equaled anywhere in
 the world.

"Here, within actual sight of our great throbbing City, is a little world of almost virgin nature, which has been rescued for the people and now stands as a permanent monument to the discovery of the Hudson River. I leave for others to tell of what Nature has done for this unique strip of land. Man can do no more than preserve its natural grandeur and make the park accessible to one and all. And to this end the Commission respectfully asks the support of the public and the Governors of the respective States, who are our honored guests at the dedication of this park to-day."

THE CHAIRMAN: "I now have the very great pleasure of presenting one who needs no introduction to this audience, the Honorable Governor of the State of New York, Honorable Charles E. Hughes."

Governor Hughes: "HONORABLE CHARLES E. HUGHES: "We are here today a Celebration of human energy, of daring enterprise and inventive skill, of the progress of civilization in this early seeded and most populous part of the new world. The discovery is noble because this river has been the scene of the rugged endeavors of the pioneer and colonist, of military exploit and heroic deeds, of the fruitful labors of industry, because it is the highway of a commerce which created a Commonwealth and largely contributed to the development of the Nation. About this river cluster the memories of our heroes of war and peace, and this beautiful valley is forever invigorated with the charm of the story of the vicissitudes of early settlements, of the struggle by which liberty was won, and of the marvelously expanding life of a free people."

"It is fitting that at the outset we should turn from the historical association to the river itself. This Celebration should not only prove a stimulus to endeavor by its commemoration of distinguished achievements, but it should also quicken our appreciation of the natural conditions which made these achievements possible, and direct our attention to the conservation of this priceless gift of Nature."

"We ascend beyond the tidal sweep to the silent forest where the river takes its source. There at the headwaters of the Hudson and its principal tributaries, we learn the necessity of future preservation. If we would preserve the source of industrial power, if we would

secure and maintain proper regulation of the flow of our streams and make them agencies of progress rather than devastating forces, we must conserve the forests of the country. It is only within a few years that we have appreciated the importance of this policy. For a long period, content with the lavishness of Nature, we were unmindful of reckless and reckless spoliation. The people have not awakened to reason.

"In the State of New York during the past few years, large areas of forest tract have been acquired by the State, and under the amendment to the Constitution adopted fifteen years ago, all lands so acquired are to be kept in public use. It is to be hoped that these purchases will largely be extended and our forest tracts put beyond danger of devastation. The State, however, should have sufficient liberty of action to enable it to prosecute the methods of scientific forestry so that it may intelligently care for its property and secure the returns which are possible, while doing conservation. Dedicated forest lands should be reforested.

"Provision should also be made for the improvement and development of this stream as a source of industrial power. It is not only as a certain vital highway that its importance should be emphasized. We should be mindful of the increase in water power which may easily be realized to the great advantage of industry. The State of New York by carrying out comprehensive plans of water-power development can largely augment an important source of our prosperity, and by reserving a large State control, make it more productive of benefits to our people.

"The river should be kept, so far as possible, free from pollution. We must maintain a noble stream, pure, whole, untrivial and not polluted by the meaner uses. This is a problem of great difficulty because of the enormous and of the demands of established industries upon it, which the prosperity of many of our communities depends. There are diversities of conditions which do have intelligent appreciation, but we must not be indifferent to the necessity of protecting the health of the people and to the importance of keeping our streams pure. This Celebration should give an impetus to the movement to this end which too long has languished because of public inattention.

"But it is not simply with commerce or with industrial power or

Governor
Hughes with public health that we are concerned. Health, the development of industry, the prosperity that is due to the variety and facility of commercial exchanges are the conditions of wholesome living. But we need still further resources for the enrichment of our life. On what avail would be the material benefits of gainful occupations; what would be the promise of prosperous communities with wealth of products and freedom of exchange, were it not for the opportunity to cultivate the love of the beautiful?

"This river has been a gateway for the conquest of a continent. The inward rush of the sea and the linking of its waters to those of the Great Lakes have invited to this favored spot the commerce of the world. But the richest blessing of the Hudson River itself is beauty, with its unobscured nobility to the spirit of man. The wealth of the world concentrated in our metropolis would not pay the coming generation for the destruction of the rare charm which is the free gift of Nature, and which no wealth could create. The greater our prosperity, the more diffused our opportunities for beautiful and well paid labor, the more important will be the preservation of beautiful scenery and of those places where life is lifted out of dullness and Nature in the happy days of relaxation gives in her bounty to the appreciative soul the finest compensations for days of toil.

"The preservation of the scenery of the Hudson is the highest duty with respect to this river imposed upon the people who are the trustees of its manifold bequest. It is fortunate that men have already been taken to prove the preservation of the Hudson River is one of its most striking and beautiful features. They have already joined in measures for the preservation of the only the beginning of efforts which may jointly be made by these two Commissions to safeguard the Highlands and waters in which both game birds supply themselves. The entire watershed which lies to the north should be conserved, and a policy should be instituted for such future control as would secure adequate protection.

"It is gratifying to note that during the present year legislation has been enacted in New York creating a forest reservation in the Highlands of the Hudson. This reserve contains about 350,000 acres and within its boundaries the State is authorized to acquire tracts of land and to maintain regulation for suitable conservation.

"Within a short distance of the great metropolis, within easy

reach of its teeming population, lies this extensive area of natural beauty, making with its fascinating story a special appeal to the passionate American heart. Easily accessible, it should be a place of recreation and inspiration for the toiling multitudes. Here should be the people's countryside for the common recreation. The Highlands of the Hudson and these Palisades, the glory not simply of our State, but of the entire country, must be put beyond the reach of the devastating hand and conserved for the general good, and on future centennial anniversaries the measures taken to that end, and for the preservation of the forest sources of this stream and to secure its undiminished and unimpeded flow, may well be regarded as one of the important contributions to the welfare of the succeeding generation."

THE CHAIRMAN: "I greatly regret that Gen. Stewart L. Woodford, the President of the Hudson-Pulmon Celebration Commission, is unable to be with us to speak on the subject of the Palisades Interstate Park as a permanent memorial of the discovery of the Hudson River. We are fortunate, however, in the presence of Dr. George F. Kunz, a Trustee of the Commission, who has consented to speak on behalf of the Commission, and who, as President of the American Scenic and Historic Preservation Society, is thoroughly familiar with the movement for the preservation of the Palisades. I take pleasure in presenting Dr. Kunz."

DR. GEORGE FREDERICK KUNZ: "Mr. President of the Celebration Commission, Ladies and Gentlemen: With a task so well completed as is this Interstate Park, there is little more for the American Scenic and Historic Preservation Society to say, the object of this organization being to do pioneer work in calling the attention of the public and the State to those regions and places and objects which need preservation."

"In the absence of the President of the Hudson-Pulmon Commission, General Stewart L. Woodford, the Hon. George W. Perkins has asked me to speak in behalf of the Commission. We have listened with great interest to the address of Mr. Perkins and to that of his Excellency, Governor Hughes, and I am sure that we are all in perfect sympathy with the sentiments they have so eloquently expressed."

"The subject on which Mr. Perkins has called me to speak to-day — that of preservation of the Palisades — is a subject that has been

Lecture
Room

of the greatest interest to me for the past twenty years. It was my pleasure when Treasurer of the American Scenic and Historic Preservation Society to have suggested to the first President of that Society, the Hon. Andrew H. Green, that it take some action with regard to the preservation of the Palisades. But Green, with that wonderful foresight and quickness of action which were among his strongest characteristics, immediately said, 'Why not make this a mission at the next meeting?' This was done. The Hon. Andrew H. Green then enlisted the cooperation of the Hon. Gherardi D'Adda to enter the bill at Albany.

"To all public movements there is always some opposition. There was none in this. For that reason Governor Roosevelt, after the bill was passed, decided not to put any one connected either with the Scenic Society or with the opposition parties on the Commission, so as to insure harmony of action. No Commission could have done better than the one which was appointed.

"Where have we now a great city as together it is the Hudson? Hence of all the rivers that have been chosen for park purposes, none can rival this beautiful stretch of country, overlooking the noble River itself. Every day here we see the greatest and most potent that human eyes have ever beheld. Five millions of people lined the shores of the bay and the banks of the Hudson, from Fort Hamilton to Spuyten Duyck Creek, to witness the passage of seventy warships and seven hundred merchant vessels. And yet no great and broad river other than the Hudson seemed magnificent, making one realize that there was room for ten times that number of ships, and that several times as many spectators could view the pageant from the majestic Hudson's bank.

"However, in our admiration of the beauties of the Hudson, we must not forget the practical problem that often arises in the case of a river that receives the drainage of a great city. The immense population dwelling in New York City and its vicinity are pouring into the Hudson two million tons of refuse material annually. This means that an enormous amount of valuable fertilizing material, derived from the products of the farms of the country, is irreparably lost to the soil, leaving the fish, polluting the water, and possibly threatening the city with a pestilence. If this two million tons of material annually wasted could be taken to some vacant

land on Long Island, this would mean a great saving for the people, ^{Doctor} and would stop the drain upon the richness of the land. ^{Kunz}

Parks and reservations in the city limits or in its immediate vicinity have increased in value enormously within a few decades that we have time to appreciate the foresight of those who were instrumental in condemning ground and laying out the parks while this task could be accomplished at a reasonable cost. Central Park cost about four million dollars when condemned by the city, more than fifty years ago. At five per cent compound interest this sum would now amount to about forty million dollars; but conservative appraisers estimate the present value of the park to from six to eight hundred million dollars. The Bleecker park cost, about a decade ago, twenty-two million dollars; to-day the land is worth ten times that amount.

Regarded simply as an investment, there probably never has been one so profitable as to look down as this historic Palisades Park. For the sum of about one-half million dollars the Commission has purchased more than thirty-five thousand feet of frontage—more than twice as great as that of the Central Park. The acreage is about the same, but all the acreage is not to be measured in New York acres, but in 'Scotch' ones. You probably have heard the story of the Scotchman and the Englishman who had many arguments regarding the greater of their two countries. At last, the Scotchman having refused every point, the Englishman said: 'England is a large country, isn't it?' 'Nay, nay,' the Scotchman said, 'if you flat it out the little Scotland would be larger than England.' So it is with these acres; they are piled high, they are double the size of the New York acre.

This park has come so little up to the present time that countries from now its price will seem as ridiculous by small as does that of Blackwell's Island, which sold for forty-seven thousand dollars. A single lot on Broadway and Wall street has sold for a greater sum than the whole cost of the Palisades Park, and this fortunate circumstance is largely due to the wonderful care and judgment exercised by the Palisades Commission.

'The Japanese spend days and weeks and months in erecting small mazes of boulders and small hills. What would it cost to erect a single cliff such as you see here? In Japan, a land of legends,

Doctor
Kuntz

they have a beautiful and quaint legend according to which the greening of the trees on windy nights is the meaning of the spirits that are captured within these trees, the spirits of those who in their lifetime had sold their souls for lumber or had cut down trees in public places. What would the originators of these legends say about those enterprising persons who have blasted off the magnificent promontories that we had on this river?

"Where so much has changed it is interesting to note that some of the aspects of Nature are exactly as they were when Christopher Columbus first came to these shores. Were Henry Hudson to return in spirit, and sail up the river at night, casting anchor off Spuyten Duyck, the early morning light would reveal to him the same outlook to the westward, the same Palisades upon which his eye rested when he first sailed up the great river which now bears his name. With the exception of the occasional mill house, the Palisades remain virtually unchanged. This is a pity, for he would have gazed upon the site of the greatest city of a great continent, a city destined to be the greatest in the world, a city whose growth is so rapid that twenty years from now the population will be three times as dense as it is now where we are standing as it is today this point.

"It is scarcely necessary to insist upon the great and basic benefits derived by the inhabitants of a vast city from the use of public parks. They afford the single and indispensable opportunity to enjoy a breath of fresh pure air for those who are forced to live in crowded quarters. We are fighting at present a disease that is killing every year, from fifteen per cent of our population. It seems impossible to completely stamp out this disease under present conditions. The basis of tuberculosis was discovered by a great German scientist, but it was old, and among them Americans, who first found that fresh air was the great cure-all for the white plague. Let the poor people of New York, who have almost no daylight, who have almost no good air, be given every facility to visit this park especially on Sundays and holidays, to fill their lungs with the unobstructed air of this beautiful tract, and I believe you can lower the death rate of New York from the white plague probably from ten to twenty-five per cent.

"The smiling, natural beauty of this park will be enhanced by a proper conservation of the forest land and by the judicious planting

of new trees. A great School of Agriculture and Forestry is about ^{Dozier} to be founded in Columbia University. This school could work ^{Kunz} jointly with the Palisades Commission. The park would then enjoy the advice and help of skilled foresters, and we would have a natural forest, looked after by the care of experts, not simply a myriad of horizontally cut branches, jutting out against the sky like amputated limbs.

"In French cities, especially Paris, it is customary that families go out into the country on Sunday mornings. They rally food from the city, provided with baskets full of refreshments, and go to some neighboring country place. Here, while the parents sit down on some grassy bank, the children play around and gather ferns and flowers. All accumulate a store of health, by drinking in the good air. They learn to know the forms of flowers, the shapes of leaves, and they absorb, quite unconsciously, all the manifold beauty of Nature. The result is that to-day the French are lovers of the beauties of the world, because the people have become familiar with Nature. They never think of destroying a tree or a plant; they are brought up to respect them from early infancy. The reason so much vandalism occurs here is that the inhabitants of our cities are but rarely brought into contact with Nature.

"Every man, woman and child in the United States should be made to understand that they are the proper owners of this great park. Recently a few thefts occurred in certain of the great French museums, and at that time a journalist conversed with one of the French papers, in order to illustrate the ease with which objects could be removed and something so remarkably true, a large French museum. The matter was brought to the attention of the French authorities, and the report administered to the public was that, 'these security museums in France belong to the people; every man, woman and child in France owns the whole of each museum; hence, who would be mean enough, or foolish enough, to steal any part of his own property?' So I may say here that if every man, woman and child would act as a guardian of this great park, to preserve it and watch over it, and to see that others do not injure it, this would be well. The best that is done to this great natural wonder the better. Let it remain as much as possible in its natural beauty. Let us have a great driveway along this magnificent river; let us have a driveway

Doctor
Kunz

for the rich and the poor; and for that middle class, frequently more neglected than either the rich or the poor.

The name 'Morgan Boulevard' was proposed by the *Spencer* of the *North American Review* for September, 1902, as a designation for the main driveway. Mr. Morgan took the initiative in saving the Palisades by his munificent gift of \$125,000, and the Legislature of both New York and New Jersey will certainly sustain the Joint Commission in applying his name to the driveway. We must all thank the Hon. George W. Perkins for having, at a crucial moment, represented the necessities of the situation to that greatest of Americans, who has never failed us in an emergency: advancing the money for purchasing Fort Island at the time of the yellow fever epidemic, purchasing the P. Rodges and stopping the Harding there, and stepping in the breach at the time of our great financial panic. Let this driveway then be known as Morgan P. Boulevard; let these leading 'land bluff' and 'hill' be named after some of the pioneers—the late Gen. William B. Dodge, the late Mr. J. J. Craig, of the first Commission; the Hon. H. McMillan, and Gen. James Douglas, the two Presidents of the Commissions, all of whom have done good work and have given—as the survivors will continue to give—either money or their best thought and able.

"One word in regard to the matter of the reforestation of the Adirondacks. I had the pleasure of being invited by some members of the Water Commission to examine the watershed of the Hudson River recently, from the standpoint of a conservator of scenic beauty. There is one lake that by private enterprise has been made a scene of absolute destruction because of unwise administration resulting from private ownership. Tens of thousands of acres in this region have been sold to the State because they had absolutely no value to anybody else. Such land might be left to lie in the stone which the builder had rejected. But by a wise foresight we obtained thousands of thousands of acres, and that may be the means, with proper attention to scenic beauty, of giving us the greatest and most picturesque watershed of any State in the eastern part of our Continent, where the population is most dense. This can be accomplished by a wise co-operation between the Water Board and your State Forestry Department, and with the wise and able administration of a Governor such as we have at present, who can bring these bodies together, and

not have them working independently. It must be borne in mind ^{Doctor} that without your forests you would have no lakes, and for twenty ^{Kunz} or thirty years and we have before us our hills, we will not have the proper water for this river. If our Forestry Commission and Water Commission could co-operate to preserve the scenic beauty of the tract, the salmonids can be brought back to their original state, and nowhere will there be so grand and beautiful a region. At the same time, by proper administration, this State will eventually realize an annual income considerably in excess of what the entire outlay will be.

"I thank you for your attention."

THE CHIEFMAN: "We have with us a very distinguished ^{Chair-} visitor from our sister-State of New Jersey, the Hon. J. Franklin ^{man} Fort, Governor ^{Stevens} of the State of New Jersey, who will now deliver an address, accepting the park on behalf of the State of New Jersey, and a dedicatory address."

HON. J. FRANKLIN FORT: "New Jersey's interest in the ^{Governor} preservation of the Palisades of the Hudson should be even greater ^{Fort} than New York's. The longer stretch of them is in our State. The work of the Commission which has led up to this day and enabled these dedicatory exercises to take place has been very great. Only praise can be given for the splendid service and public spirit of the Commission. It does not mean that all disinterested effort for the public good is now yet done. For had not such disinterested interest the Palisades, with all their natural beauty, would have been gone in a very few years. The hand of the vandal destroyer in the strife for gain, which so often marred the splendor of our age, would have caused such destruction."

"It is doubtful if ever so valuable a piece of property was ever purchased at such a reasonable price. The work of the Forestry Commission and city or town or village, for municipal park projects. No other seven hundred acres adjacent to New York or elsewhere surpass them in location or beauty. Historically these Palisades are of the greatest interest. Altars and monuments shall be erected throughout their length and immediately adjacent to them, as they should be, to mark all the spots of concern in our advancing civilization, and all the places of revolutionary renown,

Governor: the entire park will become one great object lesson in patriotism to our people.

"The geologist can study of the formation of the earth for centuries in these cliffs. It is said by geologists that their perpendicular rock formations are of the Jurassic Period, and were forced up through a line of fire in the earth's crust, during that period. They say this occurred over thirty million years ago. As to the accuracy of this time limit, I am unable to speak, but no doubt their guess would be better than mine. But, whatever the period of their existence or cause of their formation, the fact remains that these beautiful cliffs, formed by Nature are here and worthy of preservation on every account.

"On these rocks stood the majestic Indian in the days when no white man had set foot on this shore. His monument should be kept to typify the first of men — the first American, now gone forever.

"Here should be found tablets of granite upon which should be carved in relief the 'Half Moon' from which, three centuries ago, Hudson first beheld this beauty. Another such tablet should stand at each old fort with proper carvings to portray the fort as it was in revolutionary times; a monument to historic old Fort Mifflin; a tablet to mark the place of coming of Lord Cornwallis; a statue of Washington at the point where he stood looking out the sad sight of the fall of Fort Mifflin.

"We already have a suitable monument marking Fort Lee. Through the park erect statues of Major Anthony Wayne of Mifflin; General Green of General Hugh Mercer, who constructed Fort Lee; of General Putnam of Red Bank; of Robert Magaw, who made such a brave fight to hold Fort Mifflin; just across the river, of Captain George, who carried a message across the river from Washington to the commander of Fort Mifflin in the midst of the battle; a great relic of the fall of Fort Mifflin.

"These illustrations will suffice to show of what historic interest this park can be made, a place for object study, for the youth of New York and New Jersey in the history of their country, which centers about these historic rocks.

"Through all this thirteen miles of beauty and historic interest must run the proposed Hudson driveway. Thus the Commission should be authorized to build, as they have planned, and let us hope,

the States will furnish the necessary funds. What an attractive, ^{Governor}delightful driveway it will be. It will surpass in beauty that from ^{Post}Cave to Arnold and transfer the most attractive drive of the world from the Midwestern to the banks of the Hudson, in the States of New Jersey and New York. This is a great interstate enterprise and will compensate many fold for the expenditure.

"The ceremonies of dedicating this great public enterprise and pleasure park would be incomplete were I to forget to commend the private benefactors which assisted to make the State aid adequate to accomplish it. J. Pierpont Morgan, always generous in gifts of art treasures and the like, by a donation of \$125,000 made possible the first successful beginning of this superb, natural park, and at the final accomplishment of the completion of the great Palisades Park, Mr. H. McKim Twombly has donated land of a value of not less than \$75,000.

"These two gifts far exceed all that New Jersey has appropriated or expended, and equal fully one-half of all that the great and prosperous State of New York has done. Tablets in recognition of the munificence of these Palisades benefactors should also stand within these attractive grounds. The future generation should know, by a proper object lesson, what these men did to make this park possible.

"To the Commission, also, much praise is due. To Mr. Perkins, President of the Commission, in particular, we owe much, not only for his disinterested work, which is equally a debt we owe all the Commission, but for his personal advances which have run into many thousands of dollars. To all the Commission we are greatly indebted for the time and labor and personal attention given. It should be said, to their lasting credit, that the entire expense of the whole Commission for all these years does not reach \$450. It is indeed gratifying to find men of affairs ready to serve the State so faithfully from motives of public spirit only. Both States owe them gratitude much, and we are glad to recognize the obligation in this public way.

"As we stand in this old Cornvells home, well preserved, unique, historic, we feel a thrill of patriotic purpose that the surroundings impart. Our fathers did much here in the days of the birth of the Republic. We, their descendants, honor them, and benefit ourselves

reservoir in preserving this park and these old buildings with their beautiful
Fort surroundings and historic memories.

"For all time this Palisades reservation is to be maintained, improved and preserved for the many millions of people all about it as a pleasure ground, for recreation, and as a place of natural beauty unsurpassed in any State or climate."

The proceedings concluded with the raising of the flag, a salute by the United States warships lying in the river, music by the band and the Benediction.

The presence of a group of Hoquesis Indians, who performed a ceremonial dance, was a picturesque feature of the occasion.

CHAPTER XXV

DEDICATION OF THE HUDSON MONUMENT

THE corner stone of the Hudson monument on Spuyten Duyvil Hill in the City of New York was laid on Monday, September 27, 1899, with ceremonies beginning at 2 p. m. The arrangements for the exercises were made by the Hudson Monument Committee of which Dr. James Douglas is Chairman, with the cooperation of the Federalists' Central Committee of the Bronx Club and Committee consisting of Mr. Frank D. Wilsey, Chairman, and Messrs. John Ross Delafield, Archibald Douglas, Joseph A. G. Allen, Adolph C. Horrensch, Moses M. Johnson, William W. Klein, Henry Kroger, John Jay McKelvey, William C. Muschenheim, Charles E. Reid and Henry Ruhl.

The site of the monument is on the summit of Spuyten Duyvil Hill, as the river approaches the projected Hudson Memorial Bridge. This Hill at the time of Hudson's arrival on the Hudson river was occupied by an important fortified village of the local aboriginal Indian known as the West-quunks-keeks. The exact position of this village, which was called Nip-nich-soo, has not been determined accurately, but numerous indications are visible upon the hill showing considerable and long-continued occupancy by the aborigines, some of which have been found recently in the immediate vicinity of the site of the monument, upon the property of Mr. William C. Muschenheim. The native residents were probably part of the same clan or tribe, indications of whose residence around the Dyckman meadows and on Inwood Hill, upon the Island of Manhattan, are still to be seen in the form of extensive shell heaps. It is probable that on the arrival of Hudson at the mouth of the Spuyten Duyvil Creek, then known as Schor-

History
of Site

kap-kol, a considerable population was on hand to witness the arrival of the strange sea-monster upon the broad waters of the Mah-lan-stah. The story recorded in the log of the Half Moon makes it clear that on the arrival of that vessel she lay at some point of the shore of Upper Manhattan, the object of the wondering gaze of the Nip-nich-sen natives, and upon her return, on the 1st of October, 1609, while anchored at the mouth of the creek immediately below Spuyten Duyvil Hill, she was visited by canoes filled with armed men, and a conflict took place in which a number of Indians were killed. The site of this unfortunate affair, therefore, forms a deeply interesting connection between the first visit of Hudson and the dedication of the monument on the commanding height then occupied by the native owners of the Greater City.

The height is not without additional historical interest, for it was selected in the year 1776 as the site of three fortifications, forming the most northerly defenses of the Island of Manhattan, and known as Forts Nos. 1, 2 and 3, occupied in turn by the Americans, British and German forces, as the tide of war swept back and forth over the debatable ground of Westchester County. One final scene of commanding interest took place on this spot, on the eve of the combined American and French armies, in 1781, when Washington and Rochambeau together surveyed the defenses of Manhattan Island, the observation of which led to the decision to direct the course of military operations to their conclusive strategic operation against Yorktown.

Description
of
Monu-
ment

The Hudson monument was first proposed by Mr. William C. Mendenhall, through whose efforts a citizens movement was organized to carry the proposal into effect. Therefore, although the monument is being erected with the official recognition of the Hudson-Fulton Celebration Commission, the funds have been raised by private subscription. The design for the monument includes a fluted Doric column, standing upon a

cubical plinth relieved with appropriate mouldings and will be surmounted by a statue of Henry Hudson. The monument stands on an elevation of 200 feet, suggesting the number of years which elapsed between Hudson's arrival and the invention of steam navigation; and the top of the column, which will be 100 feet above the ground and therefore at an elevation of 300 feet, suggests the tricentenary of Hudson's advent. The statue to be placed on the monument will be 20 feet high. The column was designed by Mr. Walter Cook, the tablet on the base by Mr. Henry M. Shady and the statue by Mr. Carl Bitter. It is estimated that the monument will cost \$100,000 when completed.

Ground was broken for the monument on July 3, 1909, with appropriate ceremonies, including an invocation by the Rev. David Baird, D.D., addresses by Hon. Leonard A. Glavin, Hon. Joseph A. Goulden, and Dr. Edward Hageman Hall, and a benediction by Rev. M. J. Murray. During the ceremony, four little girls, Miss Hope Johnson, Dorothy Rutley, Helena Cox and Jane McKelvey, with silver spoons turned four sods, each in the name of Henry Hudson and one of the four peoples who successively occupied the soil — the Indian who bade him welcome, the Dutch under whose auspices he sailed, the English from whom he sprang, and the American people who erected upon the spot fortifications in their brave struggle for national independence. After the exercises, a reception and luncheon party were given in honor of the guests by Mr. Moschenhofer.

Although the weather on September 27 was inclement, there was a large attendance at the laying of the cornerstone and the scene was very picturesque. In the enclosure in front of the official stand was a group of real Iroquois Indians, men, women and children, in native costumes, vividly recalling the days when the Iroquois held in subjection the aboriginal inhabitants of Spuyten Duyvil Hill. Nearby was stationed the First Battery

laying
Corner
Stone

Laying
Corner
Stone

of the First Battalion of Field Artillery, N. G. N. Y., Captain John F. O'Ryan in command, to fire a salute; while in the distance on the river lay the great international war fleet and the replicas of the Half Moon and Clermont.

Mr. Cleveland H. Dodge presided. After an address by the band, the opening prayer was offered by the Rev. Ira S. Dodd, pastor of the Riverdale Presbyterian Church. The speaking then proceeded as follows, music by the band and by the New York Temple Quartette being interspersed between the speeches:

Mr. C. H.
Dodge

CHAIRMAN DODGE: "I have been asked to welcome our distinguished guests this afternoon, and I consider it a great honor for this neighborhood that we have so many distinguished men here today. I suppose this fully included most of New York City has never been so grandly gathered as we have here now. It is a great pleasure and privilege to welcome the Governor of the State of New York, Mayor Graham and Frederick D. Grant, Mr. Pendleton representing the Mayor who is unfortunately deceased, and Judge Huebner, the Chairman of the Declaration Commission, and Archbishop Farley, that venerable head of the great Church which has done so much for New York City and one of whose pastorates has been such a blessing and beneficence to this neighborhood.

"It is very fitting that we should be here today. There is no more fitting place in the City of New York for a monument to him whose celebration this is, here as it was here that the Half Moon first anchored and Henry Hudson had his first meeting with the fathers of this distinguished land which we see here this afternoon.

"In a certain way Henry Hudson discovered this spot, but it has not really been discovered until this afternoon; the majority of the people of New York City do not know of its existence. The one reason for that was the great exploit of him who gave the name to this spot. Those of you who know Irving's 'Goldthrock's History' will recall the incident of the famous Anthony van Corlaer. We really ought to have a tribute to Anthony van Corlaer. His fame is perpetuated in the Highlands by Anthony's Nose, and his fame is perpetuated here by the name of this place. You remember that he came hattering down in a very bibulous condition from Albany;

and when he reached the neighboring creek and could get nobody ^{Mr. C. H. Dodge} to ferry him across, He swore that he would swim 'in spite of the Devil' and plunged into the stream. And then you remember the conclusion, how he got to the rubble and how an arm came out of the water in the shape of a marsh bunter and Anthony van Colen went to a solitary grave. And since then very few people have tried to cross Spuyten Duyvil Creek. This place has remained so quiet and secluded that very few people have known of it; but when yonder beautiful hill of Inwood is connected with this hill of Spuyten Duyvil by one of the most beautiful bridges in the country, this monument which we are about to dedicate will stand at the point of approach, a most fitting place for a permanent monument to Henry Hudson. It is appropriate that this hill should be surmounted by the heroic figure of the explorer looking down upon the river which bears his name. It will stand for all time as a perpetual record of his great career and discovery, and when this little quiet nook will be found by the people of New York, and the greatest boulevard of the world and country and the park system of the Bronx will approach this beautiful monument. So that it is not a hidden and solitary; it will be the perpetual monument to Henry Hudson by the people and citizens of New York.

"I regret very much that General Woodford, the President of the Hudson-Pulson Celebration Commission, has been detained by illness. I therefore will take his place and introduce the speakers, the first of whom will be Mr. George W. Perkins, the Treasurer of the Committee which has in charge this monument, who will make a statement on behalf of the Committee, declaring the public nature of the project and planning its speedy completion, to the City of New York. I present Mr. George W. Perkins."

HON. GEORGE W. PERKINS: "Mr. Chairman, Ladies, Gentlemen: I do not know of any way to be more certain of ^{C. W. Perkins} pleasing you in my remarks on this occasion, and therefore enlisting your interest in them, than by making my remarks, in view of the weather conditions in which we are here to-day, very brief.

"This monument was undertaken some time ago by some people resident in this part of the City who have been interested somewhat

Hon.
G. W.
Perkins

in preserving the Palisades across the river from here, and in preserving the beauties of the particular neighborhood. And they have their work pretty well under way with a view to preserving a park here in all its natural beauty as it now exists on this side of the Hudson L. I.

"There is comparatively little land left on Manhattan Island, or rather, above Muddugan Island, on the Hudson River in this vicinity, that can be preserved in all its natural beauty for future generations. The City of New York presented Grant's Monument, as you all know, to Riverside Drive, and that Boulevard has been extended, as you know, first to 125th street and more recently to Dyckman street. It eventually will be extended across the Hudson and Harlem River, or rather, Spuyten Duyvil Creek, to this beautiful place.

"This will be the beginning of a park in this immediate neighborhood, and will connect what is known as Inland Hill with this park, which has a goodly number of acres of a few hundred acres, that is in almost its original state of preservation. In time the Rapid Transit Committee will no doubt connect with this the Boulevard System of the Bronx and Pelham Bay.

"The Hudson Monument Committee has undertaken by the contributions of individuals the erection of a commemorative monument at this spot, and it is the intention to complete it from public subscription, and to present the completed monument to the City of New York. Already several hundred subscriptions have been made to the fund from all parts of the City, and you will be interested and pleased to know that the large number of our school children have contributed a few cents apiece toward this contribution.

"As Treasurer of the Committee I believe I am the only person here to-day who is not going to enjoy the privilege of being blessed by giving. I am to be the only exception, and am to be reserved so that you will all have the privilege and the pleasure of giving to this enterprise. The financial state of the project is now quite satisfactory, the Committee only recently having solicited subscriptions from the public in general. We feel it probably will take only a year or so at the most to complete the enterprise, and, as I say, when completed, it will be presented to the City as one of the decorative features

of the viaduct which the City is about to build connecting the City of New York with the mainland on this side of the Bronx.

CHAIRMAN DODGE: "We all regret that the multiplicity of his other duties has prevented the Mayor from being with us this afternoon, but he sent a very good representative to reply to Mr. Perkin's speech, in the person of Hon. Frank Pendleton, Corporation Counsel."

CORPORATION COUNSEL FRANK PENDLETON: "Mr. ^{Hon.} Chairman, Your Excellency, the Governor, Gentlemen of the Hudson Memorial Committee, Ladies and Gentlemen: In doing to accept on behalf of the City this proposed monument dedicated to the memory of the man who, first of civilized men, tamed the river which bears his name, I am impressed with the realization that this occasion commemorates much in the history of our country. Not only is it dedicated to the memory of the great and fearless searcher of untamed lands, but we stand on ground which marks what I may designate as the two first memorable periods in the country's development.

"Here the river saw the first conflict between Man and the Indians, illustrative of the period represented by the conflict which won this continent for civilization. Among these surroundings were enacted the struggles of the Revolutionary War which represents the second great period in the country's progress, that by which the young and struggling Colonies became a mighty nation.

"It is well that we, in the full realization of what has been accomplished, should not fail to recall the trials and tribulations of those that have gone before us, and find in the memory of their deeds the inspiration to meet the question with which we are confronted with the same spirit, the same determination and the same courage. It is for the purpose of cultivating such inspiration, courage and spirit that dedications or monuments such as this find their true reason and significance, and that in serving to recall the memory of those to whom they are dedicated they inspire the desire and determination to emulate the spirit which made their accomplishments possible.

"It is in this spirit and hope that I have the honor to accept, in the name of the Mayor on behalf of the City of New York, this monument now here dedicated by you."

CHAIRMAN DODGE: "We will now go to the proceeding of laying the corner-stone. Dr. James Douglas, the Chairman of the Hudson Monument Committee, will now read a list of the documents to be deposited in the corner-stone box, after which the box will be sealed and placed in the corner-stone. I take pleasure in presenting Dr. James Douglas."

Doctor
James
Douglas

DR. JAMES DOUGLAS: "I here call a meeting of the Hudson Monument Committee. We have to perform a rather dolorous ceremony because it implies that sooner or later the monument, although built of granite, will be demolished, and that the memorials which we lay in this box to-day will by some distant generation be opened, and indicate to them the exact date and certain conditions which existed at the time of the laying of the corner-stone."

"It has been 300 years since the event we commemorate to-day occurred. Let us hope it will be many hundred years before the monument will be demolished. On this we can be assured, that whereas to-day the monument is being erected on the outskirts of what we call Greater New York, ere it be demolished it will stand on the southern outskirts of the still greater New York of the future."

"Now, I call upon the Secretary to hand me the various memorials that are to be buried in this box within the corner-stone."

Mr. John
Jay McElvey

MR. JOHN JAY McELVEY: "Mr. Chairman and Ladies and Gentlemen: By direction of the Hudson Monument Committee, and on behalf of the contributors who have made this monument possible, I now deliver to you, Mr. Chairman, for deposit in the corner-stone box, there to remain until time and changed conditions shall bring them to light again, the following articles:

"That from my copy book of the general which gave rise to this dedication, I deliver to you for deposit the official publication of the Hudson-Fulton Celebration Commission."

"That posterity may not forget the danger which threatens these beautiful Palisades which first met the gaze of Henry Hudson when he anchored off this spot in the river; and that it may be remembered with what splendid generosity the private citizens of two States combined to preserve these Palisades, I now hand to you the official publication of the Palisades Commission."

"That our children's children, even unto a remote generation,

may know what sort of a spot this was in the present day, I now hand to you a collection of photographs of the spot and of the views therefrom. Mr. John Jay McElroy

"That in the far-distant future there may be some evidence of the state of the medallie art, I hand to you for deposit in the corner-stone box, a sample or specimen of coinage from the smallest coin we have, up to the recent five-dollar gold piece, recently designed by St. Gaudens.

"And that future generations may know of the enlightened press of the present day, I hand to you a copy of every morning newspaper and one of the afternoon newspapers, one of which is enclosed, and the others are already in the box.

"And that our children may know of the cooperation of some of the societies with this Hudson-Eaton Celebration Commission, I now hand you, Mr. Chairman, the precious keys of the Celebration, Committed to the American Museum of Natural History and the Zoological Society.

"And that, ladies and gentlemen, completes the articles for deposit within this box."

CHAIRMAN DODGE: "The articles will now be read by all the members of the Committee and Mr. Frank D. Wilsey, Chairman of the Dedication Committee of the Bronx. Mr. C. M. Dodge

"Governor Charles E. Hughes will now, by the corner-stone and make us an address. We are greatly honored by having the Governor here to-day, and we appreciate it the more as he has so many claims upon his attention. We will now have the great pleasure of listening to an address by Governor Hughes."

GOVERNOR CHARLES E. HUGHES: "Mr. Chairman and Governor Nelson: It is my happy privilege to dedicate the corner-stone of this monument, to be well and truly laid. I shall not detain you under these weather conditions with extended remarks. Hughes

"It is a matter of congratulation that in connection with a celebration commemorating so much that is noteworthy in our history, we should inaugurate this project of erecting a suitable memorial to a great man. This is indeed a belated testimonial to one who in the qualities of his character represents to us those virtues of daring, of unflinching courage, of persistence, of loyalty and of truth,

Governor which are essential to the maintenance of our institutions. It is to Hughes be regretted that we know so little of the great discoverer. We first learn of him when he already had an extended reputation by virtue of work which has not been brought down to us. We know him at a time when he was regarded as best equipped for great undertakings; a man of experience, of action and of wisdom. He first emerges upon the historical scene in the prime of life. Efforts have been made to show that he was connected with men of importance and that his family was one of some distinction. We do not know whether we can regard him as the grandson of a man distinguished for his connection with the company which had done much in the direction of the advance of trade; we do not know that he had inherited an already honored name. We know that he was trusted, and from the subsequent career of the man, with which we are familiar, we know that his early life was such that he must have given undeniable evidence of the courage and faculty which were so marked in his later and well-known voyages. I regard it as a happy thing that we are not signifying this Celebration by a monument which would be taken to be exclusively in recognition of our own progress.

"The history of this valley is more wonderful than fiction. The veritable occurrences in connection with the early settlement, and with the great struggle for independence are more extraordinary than any work of romance. Our development as a free people, and particularly the progress of the last quarter of a century, are beyond the dreams or fancy of our fathers.

"We are, in connection with the celebration of the discovery, recognizing the great advance that has been made in the utilization of Nature's forces, and the extraordinary progress that has marked the last century in connection with transportation facilities, but back of all this, of course, lies the work of the generation of men with by fidelity to the light they had, in constant search for truth, have made this progress possible.

"Henry Hudson was the first in these waters in the long line of heroes, the study of whose lives must be the inspiration of the men and women of the future, and to-day we honor the memory of Henry Hudson not simply because of his relation in connection with this valley and this river, to commercial progress and our extraordinary prosperity, but because we find in him a man embodying the quali-

ties which we revere and in which we find a vindication of humanity Governor
Hughes
itself.

"When I looked at the little *Half Moon* which lies at anchor not far from us, I marvelled at the intrepidity of the men who dared the perils of the North Atlantic in such a vessel. My amazement is increased when I recall that he chose such means to find a path through the frozen North to the Golden East, and that in such a vessel he set out to face the dangers of the Arctic Sea, knowing no limit to the daring which must pursue and must conquer and must see that the uttermost parts of the earth are drawn together.

"It does not detract from his just fame that he failed in the object of his quest. It does not derogate from his courage that he was unsuccessful in the venture which he essayed. He found what was far better, and here we commemorate his loyalty to the mission of his life as he won, knowing that is the way to progress, and in our own sphere, may we find for our children those lands of happiness and paths of peace which may not be hid in our direct line.

"I cannot think of the great discoverer in the Northern Sea that bears his name, left alone, shamefully abandoned to death by a malicious crew. There is no other figure that can be brought before us than that of the great discoverer, abandoned in an inland sea of the North to the most horrible of fates—the man of dreams, of fancy and imagination, but in the frozen North because those upon whom he had a right to depend would no longer grant him the use of his own vessel.

"How poetic it is to think of this man, summoned by the Charter of Amsterdam to bid them in discovering the passage by the North to the East, which they feared might form a route of rival trade, and of his setting out upon such a mission and finding this land, destined to be the land of liberty, which in the truest degree would emphasize the ideals of those Dutchmen who had just succeeded in laying the foundation of the Republic of the Netherlands.

We find him only to lose him. While he is with us, he is a man who knows no terror, who counts no difficulty too great, and we see him with the same courage going to his fate after the discoveries which have made his name immortal.

"I have been asked whether we have men to-day capable of the physical courage exemplified by the one who went on the voyage

Governor of discovery in the little Half Moon; but when I think of those attempting the conquest of the air, and when I think further that there is no venturesome undertaking which promises good to the human race but there are men willing to embrace all the dangers it may involve; and when I reflect that after three hundred years of history in this valley we are still as tenacious of the principles of truth and justice as our fathers were, and on a grand scale are endeavoring to apply these principles under free institutions, then I am sure you may say, with truth, that as the ages pass humanity does not lose its utility; does not lose its fundamental soundness of morality; but, blessed by progress, endowed with the riches of experience, enjoying an extraordinary heritage of the devotion of the great men of the past, we face a future still richer in blessing; and in this fair land, we shall find constantly increased the opportunities of those who enjoy freedom, prize the advantages of education, and above all love their fellow-men and their God."

CHAIRMAN BODGE: "We have now the dedication of the Monument by the Hon. Warren Higley, Chairman of the Dedication Committee of the Hudson-Pulton Celebration Commission."

Judge
Warren
Higley

HON. WARREN HIGLEY: "Mr. Chairman, Ladies and Gentlemen: The events in the life of a nation are justly measured by their far-reaching results. The discovery of America by Columbus in 1492, the settlement of Jamestown by the English in 1607, the founding of Quebec by the French in 1608, and the discovery of the noble river that lies before us by Henry Pulton three hundred years ago, are among the most important events and fraught with the most wonderful results in all history. We know but little of the life of Henry Pulton, unfortunately, but we know enough of his life to estimate him as we ought, as being one of the great and noted navigators of those days. That he was a bold and successful navigator, a skillful navigator, is evidenced by the fact that in 1657, 1668 and again in 1670 he was employed by the English Muscovy Company, the greatest commercial company of England in that day, and that again in the spring of 1667 he entered the service of the Dutch East India Company for the purpose of discovering a short and better route to the East Indies by way of the Arctic; and thereby was selected by the representative commercial bodies of the world to

lead in a great discovery that would be of a special benefit and advantage, especially in his engagement to the State of Holland.

Judge
Warren
Higley

"The little ship was built and prepared for him, which was named the *Half Moon*. It was only about of eighty tons burden, a little less than seventy-five feet in length over all; and in this little vessel, on the 9th of April, 1609, Henry Hudson sailed forth to discover a route through the northern ocean to China, and thence to India. Failing to find this route through the northern passage, he turned his vessel westward and then southward, and on September 2, 1609, sailed into the mouth of this noble river that bears his name.

"He then explored it as far as Albany in the hope of finding a waterway whereby he could reach the western or Pacific Ocean, and thence find a shorter route to India; but he found himself at the head of navigation, where he could go no further; and after making many soundings he reluctantly returned to the mouth of the river and proceeded to Holland.

"There, from the notes of his voyage, he made a carefully prepared report of his discoveries of this river, which soon after became known to the world. Immediately the Dutch traders came and settled here upon the banks of the river, and they were soon after followed by permanent settlement along the shores.

"Thus did Henry Hudson, sailing the *Half Moon* under the Dutch flag, become the real discoverer of this noble river that flows at 600 feet.

"In recognition of this important event, from which has grown the most wonderful civilization of this or of any other race, and in honor of the men who have achieved it, you have to-day laid the corner-stone and the broad foundation upon which shall soon rise the towering shaft to be crowned with the glory and name of the great navigator. Most of the men, brave, courageous, and industrious, the work that was given him to do, faithful to duty even unto death, great discoverer, benefactor of mankind, in the name of the Hudson-Tulsen Celebration Commission, and in the name of the Hudson Monument Citizens' Committee, through whose patriotism and generosity this noble shaft is about to rise to completion, I have the distinguished honor to dedicate this noble monument to the lasting memory and eternal fame of the hero, the navigator, the martyr — Henry Hudson."

CHAIRMAN DODGE: "The benediction will be pronounced by the Rev. Archbishop Farley, whom the whole of New York, regardless of creed, love and revere."

Arch-
bishop
Farley

MOST REV. ARCHBISHOP FARLEY: "May the blessings of Almighty God descend upon the monumental act that has been performed here to-day and upon all here assembled and abide with them forever, in the name of the Father and of the Son and of the Holy Ghost, Amen."

CHAIRMAN DODGE: "The guests invited to the reception will pass down in the direction of the historic Johnson Homestead."

Recep-
tion

The reception at the Johnson homestead was in charge of the following Ladies Committee: Mrs. Isaac B. Johnson, Chairman, Mrs. Thomas C. Buckner, Mrs. John Carse, Mr. Walter Cox, Mrs. Cleveland P. Dodge, Mrs. Archibald Douglas, Mrs. Arthur G. Johnson, Mrs. James W. Johnson, Mrs. Darwin T. Kingsley, Mrs. John Jay McKelvey, Miss Giulio Morisio, Mr. George W. Perkins, Mrs. Emma Radley, Mrs. Wyatt Taylor.

CHAPTER XXVI

DEDICATION OF FORT AMSTERDAM TABLET

THE tablet on the United States Custom House at the foot of Bowling Green, New York City, marking the site of old Fort Amsterdam and its successors under various names from 1626 to 1795, was erected by the New York Society of the Order of the Founders and Patriots of America and was dedicated under the auspices of the Commission on Wednesday, September 29, 11 A. M. The officers of the Society at the time of the dedication, were as follows:

Governor, Col. C. C. Tamm, LL.D.

President, Col. John C. Schuyler, LL.D.

Graphic Artist, Edward Davis, U. S. A.

Secretary, Mr. C. B. Tilton, Esq.

Treasurer, Mr. Theodore Gibson.

State Attorney, Mr. John C. Coleman.

Recorder, Mr. Charles Edgar Beardsley.

Guard, Mr. John J. Smith, Esq.

Historian, William Howard Fish, M. D.

Counselors: Col. George L. Dawey, Mr. Theodore Tuck, Major General L. B. Conant, U. S. A., Mr. J. P. Green, U. S. A., L. H. D., Col. E. J. Felt, Paul Fiske, Mr. Richard Holland Feltner, Mr. Edgar Wall Tunnell, Mr. Charles M. Wilkinson, and General Stewart L. Woodford.

Commission on Tablet, Mr. Theodore Tuck, Chairman, George Clinton Backus, M. D., Major-General Frederick D. Grant, U. S. A., Mr. J. H. Bryan Bell, U. S. D., Col. Ralph E. Burpee, Colonel Steven L. Woodford.

Site Commission on Location of Tablet, Arthur Leonard Lusk, M. D., Chairman, Mr. George F. Jones, Esq., and Mr. Charles M. Wilkinson.

The site marked by this tablet possesses the unique distinction of being the Cradle of the Metropolis. When Peter Minuit, the first Director-General of New Netherland, arrived in 1626 and planted the first permanent colony on Manhattan Island, the first concern of the Dutch pioneers was to stake out a fort, under the direction of Jeyn Frederick, an engineer sent along for this purpose. This fort — probably the first permanent structure raised on the Island — was originally a block-

History of Site

History
of Site

house surrounded by palisades. It was located within the area bounded by Bowling Green, State Bridge and Whitehall streets, and was named Fort Amsterdam. At that time it stood on the water front, the original water line coming down the west side of the Island approximately along the line of Greenwich street, then bending southerlyward across the corner of Bridge and State streets, and thence following the southern and eastern sides of the Island along the line of Pearl street. Battery Park, therefore, is all reede land, or "gedempte," as the Dutch would say.

In 1633 Director-General Wouter Van Twiller began a new fort on a larger scale. It was about 350 feet long by 250 feet wide, required two years to construct, and cost 4,172 guilders. It was four-square, with a bastion at each corner. In 1640 replacing two-sided stone church was built within the fort. For many years the fort was the seat of government, the harbor of refuge and the place of worship, and the history of New Netherland and of Colonial New York could be written very fully from the events connected with this site.

With almost every change of dynasty the fort took a new name. When the English captured it in 1664 it was named Fort James. When the Dutch recaptured it in 1673 it was named Fort William Henry. In 1674 with the English again in possession, it was called Fort James again. In 1689, when James fled the throne and William and Mary ascended it, the colonists, with delightful adaptability to circumstances and loyalty to their reigning monarch, promptly named it Fort William. In 1702, when good Queen Anne mounted the throne, the colonists zealously declared their loyalty to her by giving it the name of Fort Anne. So it remained until the Queen died in 1713 and George I was proclaimed King, whereupon the fort was promptly rechristened Fort George. During the reigns of the three successive Georges, the name of the fort remained unchanged.

Meanwhile the fort had been strengthened and reinforced by a battery extending in a semi-circle along the water from what is now the corner of Greenwich street and Battery Place to about the corner of Whitehall and Water streets. The full complement of the fort and battery was 120 guns. Battery
of Site

For many years the fort was the seat of government over a wide region. In the days of New Netherland its jurisdiction reached from the Connecticut River on the east to the Delaware River on the west and south. In the days of Colonial New York its jurisdiction, overleaping intermediate New England, extended as far as Pemaquid, Maine, where there was a fort maintained from Fort George as a base.

For over 150 years the fort, under its various names, was the ceremonial center of the Colony. Here the Indians gathered in all their Indian splendor to negotiate treaties with the white men. When the Governors of New Netherland and New York were imposed and not native born, this was their formal reception place and residence, and here one ceremony followed another, increasing in grandeur and splendor as the colony grew and the ornaments of government increased. Hither yearly upon the King's birthday the city officials "in their formalities" and the leading citizens repaired to drink the King's health amid salvo of artillery; and at other times, when the colonists were less cordially disposed toward the government, some of the most exciting incidents in the city's history were enacted under the frowning walls of the old fort. At last when the British evacuated the city in 1783, Wash. gto. reviewed the triumphal American procession from the fort's dilapidated walls.

In 1790 the fort was demolished to make room for a Government House, which was intended for a Presidential Mansion. The removal of the National Capital from New York, however, relegated the structure to the uses of a Governorial residence; and when New York lost the honor of being the State Capital,

the building was used as a Custom House. Between that Custom House and the present Custom House one or two generations of commercial buildings have intervened.

The
Tablet
De-
scribed

The memorial is a handsome bronze tablet, $2\frac{1}{2}$ by $4\frac{1}{2}$ feet in size made by Messrs. J. & R. Lamb and is erected in the vestibule on the northern side of the building. The upper part of the tablet contains an accurate outline of the fort in 1773 as explained in the first part of the inscription. In the lower left hand basin is the seal of the Society and in the lower right hand corner a compass showing the bearing as taken from the original survey. The inscription reads as follows:

The outline of the fort is made
on a scale of 125 feet to an
inch. "A plan of Fort Mifflin
in the City of New York
in 1773 at the request of the
Hon. Mr. John Craighead,
and the rest of the committee
of the Society for building a
Great Stone House in the
City of New York in the
12th April 1774 by Gerard Ford Esq."

Hoquais
Indians

A picturesque feature of the ceremonies was the presence of a company of real Hoquais Indians who gave some of their

ceremonial dances and songs, within ear shot of Bowling Green, where Iroquois chiefs had sat in the early days of New York to make treaties with the Governor of the Colony.

Dr. Batcheller, Governor of the New York Society of Founders and Patriots, presided. Following is a report of the addresses:

GEORGE CLINTON BATCHELLER, LL.D.: "Ladies and ^{George C.} Doctor
Gentlemen: The longer I live, the more I am convinced that history is simply and only and always his-story — the story of a man, a man ^{Batch-}
who knew how to do things — and did them.

"In passing through this city, within the last few days, I stood by Grant's Tomb on the Hudson, so that Hudson and Grant are now inseparable in my thought. I saw the thirteen trees that Alexander Hamilton planted, and his tomb in Trinity Churchyard. I looked on statues of George Washington and Lafayette, of Sevier and Lincoln, of Franklin and Frieson, and many others that grace our parks and open places. In front of St. Paul's I saw the marble slab that tells the story of Montgomery, and, just across the way, a tablet that records the birth of the first white child on this island. Turning the dusty pages of the yesterday of life, we read that a few old guns gave the name of Battery to the lower end of Broadway. Before us, on a place still called Bowling Green, the dusty Dutchmen played ten pins. Golf and tennis, baseball and cricket are our recreations to-day. A fence running from old Trinity to the East River was built to keep the negroes in and the Indians out, and we call it Wall street to this day.

"The population of our entire country, in those olden times, did not equal one-fourth the number of people in New York State to-day — and who will dare prophesy the future of our country one hundred years from now. This building, massive and magnificent as it is, may not be here, but this tablet will remain to tell the wholesome and heroic story of Henry Hudson's life. We are the heirs of all the ages, and all the ages, yet unborn, are to be our heirs. God buries His worn men, but the work goes on.

"Three hundred years ago, and we are living in the days of Good Queen Bess, of Shakespeare, Rare Ben Jonson, Milton and Bacon.

"Another hundred years, and the century finds us shaking hands

Doctor with old Ben Franklin, John Wesley, Thomas Jefferson, and George
George C. Washington.
Batch

eller "The hundred years just come and gone have been eventful in that we have become a great nation, and the century is full of Tennyson and Carlyle, of Emerson and Cooper, of Macaulay and Motley, of Dickens and *The Idler*, and Longfellow.

"All that the dead about us bring,

And the long silence seem dead."

"I grow remiscient, and reluctantly relinquish memory, but the program defines my position and limits my time. Before I proceed further I would say that I trust you will all agree with me in my regrets due to the great burden and various functions that press so heavily upon General Stewart L. Woodford, President of the Hudson-Fulton Celebration Commission, it will be impossible for him to be with us and take part in the exercises this morning. General Woodford desires that I express for him his regret, and his highly honored and precious duty I have to perform in presenting to you Dr. Edward Hagaman Hall, formerly Governor of this Society, my friend and predecessor, who will now address to you a few remarks on the exploration of the Hudson River by Hendrick Hudson, in September 1609, and the founding of New Amsterdam, May 4, 1624."

Doctor
E. H.
Hall

EDWARD HAGAMAN HALL, LL.D.: "Mr. Governor and Ladies and Gentlemen: We meet here to-day to commemorate, by this enduring bronze, three important events in the history of our City, State and Nation: the first exploration of our great river by Henry Hudson; the founding of our imperial city by the Dutch; and the achievement of our nation's independence. Of the first two events I may pleasantly say briefly to speak.

"In these days of conflicting claims by rival explorers it is to say not be amiss on this occasion to say a word concerning Hudson's title to fame as the first European explorer of the river which bears his name. A few days ago ground was broken in Battery Park for a monument to Verrazzano who entered our harbor in 1492. We should feel indebted to our French and Italian citizens for their enterprise in erecting that monument, for it serves to emphasize the wide difference between the achievement of the Italian navigator who sailed under French auspices, and that of the English navigator

who sailed under the Dutch. Verrazzano entered New York harbor but did not explore the river, and no beneficial results ensued from his brief stay. Henry Hudson explored the river to the head of navigation, made its resources known to the world, opened it up to civilization, and made his knowledge useful to mankind.

"Among the many proofs that Hudson was the first European thoroughly to explore the river, there is one convincing fact which may be stated in a few words. The declared object of the great navigator's voyage of 1609 was to find a passage to the Orient by the north-east or the north-west. When baffled by the Arctic ice, he deliberately turned his prow westward to seek a passage to the western sea which was believed to exist in the latitude of 40 degrees, and he entered our river in the firm belief based on guesswork maps of the period and the hearsay advice of Captain John Smith, that it led to the western sea.

"Not only English but sailors of all the English colony companies, and with them a group of famous geographers who made Amsterdam at that time the center of geographical knowledge, Hudson was conversant with all the discoveries of English and Continental navigators prior to that time. If, therefore, any European had previously explored the river, Hudson would have known that it did not lead to the Orient, and he never would have entered it. The very fact that Hudson explored our river under the circumstances is indubitable proof of the priority of his exploration, to which might be added other evidence—too numerous to mention in this occasion.

"We honor Hudson's memory to-day for two reasons: First, he has given us a noble example of courage of conviction which is the basis of all right living. He had no earthly physical courage, no brave great and unknown dangers, but he had also the moral courage to maintain his convictions even in the face of death. No soldier upon the battle field, no martyr at the stake, has ever been glorified by a more heroic end than that of the great navigator, who, because he would not yield his beliefs and convictions to a mutinous crew, was sacrificed to the dreary waste of Hudson's Bay, to perish by the slow tortures of freezing or starvation. Our first debt to Hudson then is for his example.

"Our second debt is a material one. He is a benefactor of his race who makes the lives of his fellow man more worth living. Hudson

Doctor
E. H.
Hall

opened up to civilization a land of which he said: 'It is as pleasant a land as one need tread upon.' 'The land is the finest for cultivation that I ever in my life set foot upon.' 'This land has since become a land of peaceful industry and happy homes. A great and prosperous people now inhabits it, and the world is happier and better for the civilization that has grown up within these once savage borders. Truly, Henry Hudson was a benefactor. Truly we owe his memory a great debt of gratitude.'

"Our tablet commemorates next the founding of New Amsterdam. When Rome and Athens were busy with age, when London tower was moss-grown and Helen-covered, and when the origins of the capitals of the Old World were lost in the myths of mythology, New York was yet unborn and the islands which gem our waters were yet in their native beauty in the day of Creation. The industrious beaver built his dam in the neighborhood brook now covered by the dirty pavements of Broadway. The marauding Indian drew up their canoes on the banks of the Hudson, then came the English working voyage of Hudson, and then after him the industrious but transient traders; and then, less than 300 years ago, came that little band of Dutch pioneers who erected the first permanent structure on Manhattan Island—Fort Amsterdam. Within the four walls of that little fort the Metropolis of the West was born. We stand therefore at the cradle of our beloved city. We stand at a sacred place. The little prince is born here of the free blood of the Dutch Republic; has grown to be the Queen of the West. She sits on her throne. She opens her shining gates to the rising Sun. The angels of the world bow their treasures to her feet. The people of all nations gather within the borders of her benignant hospitality. Her domain has become the crowning Crow, whose monarchs are princes, whose monarchs are the hereditary of the world."

"O, City of our home, as we stand here at the place of the nativity in this great festival of our happiness, and reverently dedicate this tablet in memory of thy birth, we dedicate ourselves to thee in loving and loyal devotion."

"O, City of our home, as we stand here at the place of the nativity"

O, City of our home, as we stand here at the place of the nativity"

O, City of our home, as we stand here at the place of the nativity"

Are all with thee--are all with thee--"

PRESIDENT BATCHELLER: "It gives me great pleasure to have the honor to introduce to you the Hon. Theodore Fitch, former Governor of this Society, who will address you on the subject of American Independence, 1775 to 1783.

MR. THEODORE FITCH: "Mr. Chairman and Ladies and ^{Mr. Theo. Fitch} Gentlemen: On the 9th of July, 1776, New York received news that Congress had adopted the Declaration of Independence by the vote of twelve of the Colonies, New York not voting as her delegates had not received instructions. On the evening of the same day by order of Washington, it was read before every brigade of his army then stationed in New York. The news was received with enthusiasm and the lead in one of George III, which stood directly in front of this spot only a few feet distant, was pulled down.

"In a general order issued the next day Washington condemned the act as riotous, but overthrew the statue was down, and some of the fragments were forwarded in leaden balls as for the patriots to use against the British.

"The Convention of New York in session at White Plains on the 19th ratified the Declaration of Independence and instructed their delegates in Congress to vote for it. The Thirteen Colonies were now a unit in the struggle for independence.

"In the Summer of 1776 Fort George witnessed a sad spectacle. It looked on Staten Island on which Gen. Howe's army of 25,000 men was encamped. It saw Lord Howe's powerful fleet in the harbor. It saw 20,000 British troops carried across the Bay and landed at Gravesend on their march to capture Washington's army. It looked on Brooklyn Heights where Washington was entrenched with 8,000 men while Stirling and Sullivan with 3,000 new recruits made farther down earth felt the attack of Howe's veterans.

"It was the 23rd of August, 1776. Howe had routed Stirling and Sullivan after desperate fighting. The disastrous battle of Long Island had been fought.

"Howe moved up his army to besiege Washington at Brooklyn Heights, confident, with his superior force and command of the water, that Washington with his army then of 15,000 men, there entrenched, could not escape.

"On the night of the 23rd by a most masterly retreat in the darkness and fog, without alarming the enemy, Washington brought his entire

Mr. Theo. army safely across the river, and foiled Howe's plan to capture his army, which, if successful, would doubtless have ended the war then and there.

Fort George, which was garrisoned by British troops, from September 15, 1776, when Gen. Howe took possession of New York City, until the 25th of November, 1783, witnessed other momentous scenes. On the latter day it witnessed the evacuation of British troops from the City of New York and the end of British dominion over the Thirteen Colonies.

"Before leaving, the British soldiers nailed their colors to the wall in the fort, knocked off the cleat, and greased the pole to prevent the unfurling of the American flag. But the attempt was futile. John Van Arsdale, nailed on the chains, sanded the greased pole, ascended the flag-staff, tore down the British colors and raised the Stars and Stripes which floated from the Pole before the British could leave the lower bay.

"The American army took possession and from Fort George Washington reviewed his troops on the same day.

"Only a short distance from the Fort at Frances's Tavern on the 4th of December, 1783, Washington delivered his farewell to his officers, walked to Vintichall and took a barge to Paulus Hook, on his way to Annapolis to surrender his commission to the Continental Congress.

"The brief period assigned for my remarks prevents any extended history of the American Revolution.

"From the battle of Lexington, on the 10th of April, 1775, when untrained Minute Men defeated British veterans and drove them in panic to the shelter of their fortifications, to the surrender of Cornwallis at Yorktown, on the 19th of October, 1781, the story of American valor is written in living letters. What memories of heroic courage are associated with the names Bunker Hill, Fort Mifflin, Trenton, Princeton, Red Bank, Red Bank, Brandywine, Germantown, Monmouth, Stony Point, King's Mountain, Cowpens, Guilford, Furaw Springs! What recollections of privations are evoked by the mention of Valley Forge, and of suffering and martyrdom by the name of the prison ship Jersey anchored in the Wallabout just across the river, and the Provost Prison in the City Hall Park under the jailer Cunningham!

"Among the generals who contributed much to the establishment ^{Brit. Tro.} of American Independence, and whose names on 'Fame's eternal' ^{Fitch} lead roll are worthy to be filed, I will mention merely Greene, Lafayette, Stueben, Sirling, Sullivan, Schuyler, Montgomery, M'gan, Putnam, Herkimer, Marion, Sumter, Kosciuszko and the first admiral of our navy, the heroic John Paul Jones.

"We honor the private soldiers who fought the battles of the Revolution, actuated by the purest patriotism. They were without adequate pay, poorly fed, insufficiently clothed and equipped, but they were patriots who fought for liberty and country.

"But the man of all others who was instrumental in establishing American Independence was Washington. His patriotism was unselfish. His military ability and generalship were of the highest order. He was superior to the petty jealousies and intrigues of Lee, Gates, M'Lean, Dickinson and Conway. He patiently defied the odors of a fraudulent and venal Congress and finally prevailed upon it to adopt his policy. He quelled the murmurs of an ill-fed and poorly equipped army, headed the discussions and bickerings of a militia which had all the jealousies and independence of a strain which excluded the reasons from which they came, prevailed on them to renounce selfish interests of enlisted, sustained their courage in defeat, and welded untrained militia men into an army of seasoned veterans. With an inferior force, he was always confronted with the problem of how to outwit, evade and capture a superior army. He succeeded in defeating the various plans of campaign of the enemy, such as that for the capture of his army before his retreat from Long Island to White Plains, from New Jersey and to the entrenchments at Monmouth, also the plans to separate New England from New York and the other Colonies, and the invasion of the Hudson and the Mohawk Valleys, and the capture and deportation of the Southern Colonies. Especially do we honor him for the skillful plan arranged with Rochambeau, and the wonderful strategy with which he completely deceived Clinton and left him unsuspecting at New York until too late, while he swiftly marched his army from Westchester County four hundred miles to join the French fleet and army awaiting him at Yorktown, and capture Cornwallis and his army of 8,000 men, and end the war.

"DeGrasse, Rochambeau and Lafayette did their part well, and

Mr. Theo. Cornwallis, unable to defend himself longer, sent his flag of truce to propose capitulation on the 17th of October, 1781, exactly four years to a day from the surrender of Burgoyne at Saratoga, which is named by Creasy among the fifteen decisive battles of the world. The surrender of Cornwallis was on the 19th of October, 1781, and there was practically no more fighting between the regular forces.

"When the patriots fired their muskets at Lexington it was not for separation from England, although it was aimed rebellion. Very few then thought of anything but the redress of grievances and the remedy the abuses to which the Colonies had been subjected by George III. Their efforts were to establish a policy of colonization and proper protection of their interests and recognition of their rights as English subjects. No taxation without representation was their chief demand. But events moved rapidly, and the people soon became convinced that independence was necessary to preserve their life, liberty, and the Declaration of Independence followed. Thenceforward the war was fought for independence. Rebellion had become revolution, and the revolution was justified by success. After independence had been won, the Thirteen Colonies under the Article of Confederation were a league of independent States bound together with a rope of sand, without national power or authority, and it was not until the adoption of the Constitution in 1789 that the United States became in reality a nation strong and powerful as well as independent.

"To-day we welcome all the nations represented at the Hudson-Fulton Celebration. Among them we greet the Netherlands which sent the Half Moon, the first European vessel which established on Manhattan Island Dutch and English liberty and toleration.

"We welcome Germany which came to aid us in the Revolution that made possible the nation of freemen who to-day stand ever ready in service in drilling our new recruits and making our army fit to cope with the veterans opposed to it.

"We welcome France, our ally in the Revolution, whose fleet and army cooperated at Mifflin in the surrender of Cornwallis, a necessity, and whose friendships, fully named Justice, Truth, and Liberty, have now come to do us honor.

"But especially, now that the resentment and bitterness of the Revolutionary struggle have faded away, do we welcome England

to our Celebration, and her fleet again in our harbor with the Inflexible ^{Mr. Theobald} commanded by Admiral Seymour leading her powerful battleships. ^{Rich} and coming not as our foe but our friend and honored guest.

"As Founders and Patriots, most of our Order descend from the original English Colonists, and we are proud of English institutions and English laws, of her language and literature, which are our common heritage. All of the glorious history of England before her Colonists settled in this country is ours, and as Americans of English descent we glory in all of it that an Englishman can glory in.

"The standards of our Order are two — one is the American Flag, the other is the Cross of St. George, the red cross on the white ground, surmounted, however, by thirteen blue stars, and both command our admiration and regard. We wear with pride as the insignia of our Order the button which represents the Cross of St. George.

"England's glory, with all that it represents, is ours, and as American citizens we rejoice that we are kinsmen whose sympathies and aspirations are in accord, and that the destinies of the United States and of England appear now to be linked together to enhance the welfare and happiness of millions of the English-speaking people, and for the benefit of the entire Anglo-Saxon race, and the advance of civilization."

PRESIDENT BATCHELLER: "Ladies and Gentlemen: We have here a unique assemblage of aborigines, natives of this State. Dr. Hall will tell us what their ceremony consists of. He is well versed in the history of the Indians."

DR. EDWARD HAGAMAN HALL: "Mr. Governor, Ladies and ^{Dr. E. H. Hall} Gentlemen: The Indians who are here with us are real Indians; they are not white people painted up for this occasion. They represent the real 'first families of New York.' They are the descendants of the Iroquois Indians, or the Five Nations, sometimes called the Six Nations when there were six nations. They are now going to give you one of their ceremonial songs and one of their ceremonial dances; and I wish to say to you, so you may appreciate what they are doing, that this is not a show. They have been brought here by Mr. Moore for the Hudson Fulton Celebration Commission, with the idea that we are celebrating a great ceremony in honor of the birth of this City. They have therefore come here, not as a side-show, but in a religious spirit to a great and wholesome celebration. They have

been brought here to live part of their lives over again. Their ancestors were the controllers of the Indians who lived on these Islands. Their ancestors gathered here before the Fort, and were in the Fort to make treaties. As I have said, they are here, not as an exhibition or as a show, but to repeat some of their ceremonies which have been handed down to the present. They are going to give a song called 'The Prairie Song' and a ceremonial dance called the 'Feather Dance.'

After the ceremonies by the Indians, Dr. Hall continued:

"That dance has never been given outside of the reservation on which these Indians live. The oldest Indian here is William Crow, who is 89 years old, whom I have the honor now of introducing to you."

William
Crow

Following is an interpretation of what the Indian said:

WILLIAM CROW: (The Indian): Ladies and Gentlemen: I am glad to be here with you on this occasion. I am glad to see so many people here to see us, this small band of Indians left here to be in this Celebration. We leave it all to the Great Spirit, to our Great Father, that we should live happily henceforth together. That is all we have to say; and I thank the gathering for your kind attention."

PRESIDENT BATCHELLE: "Late yesterday afternoon I received a despatch from Major-General Frederick D. Grant, of the United States Army, that he had been called unexpectedly to Washington, D. C., and expressing his regret that he could not be present to present this tablet to the United States. But I am happy to say we have with us this morning a veteran, a founder of this Order, a man who is always ready at a moment's call, our Past-Governor, and Past-Governor-General. I take pleasure in introducing to you Col. Ralph Earl Prime."

Colonel
Ralph E.
Prime

COL. RALPH EARL PRIME: "Mr. Chairman, Associates, Ladies and Gentlemen: We are met here to-day to unveil a tablet which shall last when we, like all our ancestors, have passed away, and which shall tell to future generations and the children that shall succeed us in our places, the story of these events referred to to-day."

"It has occurred to me that it is exceedingly fit that this part of the function should be at the hands of the Society whom we represent, a Society which, alone of all the American Patriotic Societies, takes up all of these events which relate to the history of our city and our

country; as all of our associates claim their eligibility through descent from men who have participated in all of it.

Colonel
Ralph B.
Prine

"In the midst of these festivities, it has seemed to me fit also that we should not forget the Providence that has run through all of the events which are celebrated here to-day, and which are memorialized in this tablet. They do not go back any of them to the beginning of America. Columbus far outreached in his exploration and discovery the settlement of the City of New York, and the discovery of the Hudson River, but there marched along our shores a Greater Sentinel than ever guarded camp. The Almighty kept off the discoverer from these shores until He had prepared a people for it, whose descendants have since garrisoned it and made it what it is; until the Puritans of England, the Huguenots of France, the Walloons of Flanders and the Dutch of Holland, had been educated in the furnace of the adversity which came upon them, to make hardy men and women, who should found this land for us, their descendants. We are gathered, I say, to unveil this tablet. And now, Mr. Governor, as representing the New York Society of the Order of the Founders and Patriots of America, and in your name, we commit to the keeping of the Government of our great country this bronze tablet which shall endure when we have passed away."

PRESIDENT BATTLELLER: "Associates, Gentlemen and Ladies: Our next speaker is a gentleman too well known for me to elaborate my remarks. He is known throughout our land. You will now hear from New York's Collector of the Port, and I have the distinguished honor of introducing to you, Hon. William Loeb, Jr."

HON. WILLIAM LOEB, JR. (Collector of the Port of New York): "Governor Batcheller, Members of the Order of the Founders and Patriots of America: As Custodian of this building which is so intimately connected with the commerce of the country, and for the development of which Hudson, by his exploration, and Fulton, by his invention, so largely contributed, I take pleasure on behalf of the Government, in accepting the custody of this tablet, and I congratulate the members of the Order of the Founders and Patriots of America upon the important work which you are doing for the country and posterity in marking historic sites such as this upon which we are assembled, and in commemorating events such as these we are now celebrating."

Wm.
Loeb, Jr.

PRESIDENT BATCHELLER: "The closing exercise will be a benediction pronounced by the Rev. Edward Payson Johnson, D.D., the Chaplain of this Society."

Rev. Dr.
Edward
P. John-
son

RLV. EDWARD PAYSON JOHNSON, D.D.: "God of our fathers, Who brought them safely across vast unknown seas, and delivered them from great perils and savage foes; Who established them graciously in this goodly land, and in the time of oppression, invasion and treachery raised up for them faithful friends, and gave them victory and national freedom; surely Thou hadst a favor, a merciful favor, unto our fathers, O Mighty King of Heaven and Earth! We therefore glorify Thee, and give thanks to Thee, for Thy wondrous and long-continued grace to them; and also for their changeless faith in Thy guardianship and guidance; for their devout reverence for Thy Holy word and Thy Holy Son; and for their sincere endeavor always to do the right. We glorify Thee for their sturdy virtues and abilities. We rejoice that we are the sons of such ones."

"Yet, O God Most Holy! Strengthen us that we may not merely glory in our ancestry and our inheritance; but may also conscientiously and continually honor them! Deliver us utterly from the curse of the intolerant spirit. Preserve us wholly from the worldliness that mistakes man's value by his earthly goods, and contends that one's life doth consist in the things he possesseth."

"Increase in us more and more the self-control and calm fearlessness, the gracious goodness and gentle humanities which we so unaffectedly admire in Thy Dear Son Jesus. Help us, O God, to be persistently eager and passionately loyal in following after the things which are true, and honest and of good report. Strengthen us steadfastly to loyally labor for nothing less than bringing to all our Land, and all the earth, the Golden Age of Heaven, with its brightness and joy, its peace and purity. Bless us, O Holy God, in making us each one a blessing to all mankind. And to Thy name, Father, Son and Holy Spirit, we will ascribe the honor, the glory, the praise and the power, world without end. Amen."

PRESIDENT BATCHELLER: "There will be another ceremonial dance by the Indians before we separate."

After the ceremonial dance by the Indians the assembly dispersed.

CHAPTER XXVII

DEDICATION OF THE FORT TRYON TABLET

THE monumental tablet erected on the site of Fort Tryon in New York City by the American Scenic and Historic Preservation Society, through the generosity of Mr. Cornelius K. G. Billings, and with the cooperation of Mr. William C. Muschenheim, was dedicated under the auspices of the Commission on Wednesday, September 29, 1914 P. M.

The tablet is erected upon the face of the living rock on the ^{Fort} west side of Fort Washington Avenue, six-tenths of a mile ^{of Rock} north of the Fort Washington Monument. The latter is in the line of 183d Street if projected. The fortification of this commanding height was undertaken by the American forces in the summer of 1776, and the earthworks which crowned the summit of this part of Mount Washington, locally known as Fort on Hill, formed the northerly outwork of Fort Washington. The character of the hill and the nature of its natural defenses, which were supplemented by abatis of felled trees, made this position exceedingly strong from a military point of view, had it been adequately provided with artillery. It was, however, equipped with only three small six-pounder cannon, and on the occasion of its defense on the 16th of November, 1776, it was manned by a battalion of Virginia and Maryland soldiers, about six hundred in number, the survivors of the two Southern regiments which took part in the Battle of Brooklyn, commanded by Colonel Moses Rudlings. The attack which was made upon the fort was conducted by Baron Wilhelm von Mynphausen, leading personally, with much gallantry, the Hessian division of about four thousand six hundred men, with a battery of howitzers. This force advanced across the Dyckman meadows

* For the historical data in this paragraph we are indebted to Mr. Reginald Pelham Bolton.

History
of Site

and directly assaulted the fort, making three successive charges at the point of the bayonet. The accurate and incessant firing of the Southerners, ensconced behind rocks and trees deflected two of these attacks and stayed the advance of the entire operations against Fort Washington until the fort was taken in flank on the Hudson side by a detachment from the Hessian forces under the redoubtable Colonel Rall, just at the time when the commander of the fort, as well as his major, Otho Holland Williams, fell wounded. The final charge of the Grenadiers of the von Koehler Battalion, under Colonel Rall's personal leadership, resulted in a breach of the garrison by the bayonets of the Hessian soldiery, which was witnessed by Washington himself, who stood on the brink of the Palisades anxiously watching the progress of this part of the defence of Fort Washington. The Hessians as well as the Americans suffered severe losses, particularly among their officers, of whom several of high rank were killed, and were buried, with many private soldiers, around the neighborhood of the fort. After its capture, the Fort was renamed Fort Tryon, in honor of the last British Governor of the Province of New York. The fort was strengthened and enlarged into a six-gun battery, and the earthworks, of which a few remains may still be seen, are probably the remaining evidence of this work which was largely carried out by men of the Hessian Royal Body Guard and of the von Donop regiment. The memorial at Fort Tryon commemorates, in particular, the heroism of the first woman who took an active part in actual warfare in defense of American liberties. Margaret or Margery Corbin was the wife of John Corbin, a private soldier of York County, Pennsylvania. He was probably of Scotch-Irish descent. She accompanied her husband in 1776 and shared with him the privations of his life as an artilleryman. On the occasion of the assault and defense of the northern outwork of Fort Washington, she was aiding her husband in the loading and cleaning of one of the guns,

when at the most critical part of one of the assaults John ^{History of Site} Corbin was killed. Margaret immediately took charge of the cannon and loaded and fired it herself, with conspicuous "skill and vigor," until she in turn was also wounded by grape-shot from the Hessian battery. She was afterwards specially mentioned by Congress. She recovered and lived as a pensioner of the United States until about the end of the century.

The Fort Tyron tablet, which was designed by Mr. Charles ^{Description of Tablet} R. Lamb and erected by J. & R. Lamb of New York, cost \$5,000. It is about 9 feet wide and 12 feet high, and is built of Hesh, polished granite from Maine, embellished with bronze work and an inlaid cannon. The latter is a real piece of ordnance, known as a French gun, which was obtained from the United States arsenal at Watervliet. The tablet bears the following inscription:

1776 - Battle of Fort Mifflin - Celebration Commenced - 1970

Program of Society

Through the Generosity of

C. R. G. 1776

The tablet was dedicated with impressive ceremonies on ^{Program of} Wednesday, September 29, 1970. The scene was rendered ^{Exercise} picturesque by the presence of a group of Iroquois Indians,

who gave their ceremonial "Feather Dance." The program of exercises was as follows:

George F. Kunz, Ph.D., S.D., President of the American Scenic and Historic Preservation Society, Presiding.

Invocation: Rev. Frank Oliver Hall, D.D., Chaplain-General, National Society, Sons of the American Revolution.

Address: "Purpose of the Tablet." Dr. George F. Kunz, President, American Scenic and Historic Preservation Society.

Address: Presentation of the Tablet on behalf of the Donor. Col. Daniel Appleton.

Unveiling of the Tablet: Miss Blanche Pauline Billings, escorted by Mr. Albert M. Billings Bullock.

Salute by a detachment of the First Battery Field Artillery, N. G., N. Y.

Address: "The History of Fort Ticonderoga." Mr. Reginald Pelham Bohrer.

Address: "Margaret Corbin, the Heroine," Mrs. William Cunningham Story, Chairman of the Hudson-Hulton Committee, Daughters of the American Revolution.

Address: "The American Woman in Peace and War." Miss Helen Varick Root, National Federation of Women's Clubs.

Song: "America." The Audience.

Benediction: Rev. Milo D. Gates, Chaplain Washington Heights Chapter D. A. R.

Dr. Geo.
F. Kunz

Dr. Kunz, in opening the proceedings, spoke as follows:

DR. GEORGE FREDERICK KUNZ: "Ladies and Gentlemen: On this quiet spot, which has changed but little from the time when the white man first landed on Manhattan Island, we are assembled to-day to give honor to those who, one hundred and thirty-three years ago, stood shoulder to shoulder in defense of the liberty of their native land. This tablet, erected through the generosity of Mr. Cornelius H. G. Killings, will take its place among the other memorials dedicated to the heroes of the past.

"There is a deep-rooted sentiment in the human heart which urges us to honor those who have done noble deeds of valor or generosity, and this is both right and fitting, for the spirit of a good deed lives on in the memory of after generations and inspires them to higher and ever higher efforts.

"Although none of us here present may ever be called upon to take up arms in defense of our country as did the heroes of the Revolution

and those of our other wars, nevertheless we all have to fight the battle of life, to combat error and wickedness and to strive for truth and goodness, and this battle is often the hardest to fight. Dr. Geo.
F. Kuoz

"In Russia, on the spot where a human life is lost, a small cross is erected and all who pass by, even thieves and other criminals, cross themselves devoutly. This tribute of the living to the dead is just and proper; but are not far deeper feelings aroused when we stand on the spot where brave men, whose example is an inspiration for ages, have laid down their lives, willingly and gladly, for the success of a great and pure cause? Such a spot is hallowed ground, and we feel as though the spirits of those who have gone still linger here, for nowhere else is the reality of their sacrifice brought home to us so vividly.

"The defense of Fort Tyron was signalized by an act of bravery that should especially appeal to the progressive American woman of our day. When Margaret Corbin stood by the gun alongside of which her husband was shot down and took his place in the ranks of the defenders, to be wounded herself, she was unconsciously setting an example for the women of a later time. For though oratory and argument are the weapons used in the political arena, the same quality of dramatic courage is requisite to gain the day, and perhaps some of our sisters who are standing fearlessly by argumentative guns may in time be considered as heroic in their own way as was Margaret Corbin.

"This memorial has a firm foundation, for it rests upon the geologically oldest ridge of the world. Manhattan Island, now the heart and center of the second largest city in the world, has natural advantages peculiarly fitting it for its proud destiny. Washed on all sides by tide-water, surrounded by such great and beautiful rivers, the primitive rock covered by a sandy soil, the geological conditions are most favorable for the health, the well-being and the commercial prosperity of the inhabitants. Hence it need not surprise us that, quiet and peaceful as is still this northern end of the island, to the south and across the East river there is a population of three and a half million, while the whole great territory of our city embraces a population of upwards of four millions.

"Was there ever a more beautiful island than this, as Henry Hudson first saw it? Its sloping shores, its low and pleasing hills,

Dr. Geo. F. Kunz its ponds and streams, all combined to make an ideal picture of tranquil beauty. But how the hand of man has changed it! The hills have been leveled, the water courses and depressions have been filled in, and hundreds of miles of streets have been laid out with geometrical precision. Not only, a century ago, even in the wildest flight of his imagination, could have dared to predict that so mighty a city, with its great structures and its unrivalled facilities for transit, would develop on this island and its vicinity.

"Last Saturday fully four, and perhaps five million citizens and visitors saw the greatest naval pageant that has ever taken place on a river near a great city. But in gazing on the imposing array of seventy warships, seven hundred merchant vessels and many hundred smaller craft, we realized that there was room for ten times as many, without risk of confusion or congestion, and we realized more fully than ever before that our majestic river will afford ample room even for the phenomenal growth of another century.

"Tablets like this and everything that helps to stimulate civic virtue and encourage high ideals in our immense population are of inestimable value, and nothing is better calculated to accomplish this than memorial of the heroism and self-sacrifice of our ancestors.

"May those assembled here to pay tribute to the gallant defenders of Fort Mifflin also learn the noble example set by those heroes, and may the boys and girls, the hope of the future, also draw a lesson from the past that will make them both happier and better.

"The deed is done, the victory won, and while paying due tribute to those who helped to free our land, let us hope that the memorials of our own and later days will celebrate the triumphs of art, industry and commerce, and that this tablet and all other memorials of bloody strife will be an assurance to our children that the era of war is past and that Peace must reign even to the uttermost parts of the earth, even if it is maintained by great fleets and navies, and better still by international arbitration; but better war than permanent oppression."

Colonel
Daniel
Appleton

Colonel Daniel Appleton, N. G. N. Y. spoke as follows:

COL. DANIEL APPLETON: "Ladies and Gentlemen, Soldiers and Sailors: It affords me the greatest pleasure to present this beautiful and artistic tablet to the American Scenic and Historic Preservation

Society at the request of Mr. Billings, the donor. I should like to tell you some of the many unobtrusive patriotic and generous acts of Mr. Billings that I know of and that you do not, but Mr. Billings is present, and knowing his innate modesty and how much he shrinks from publicity, I will refrain, for I value very highly his personal friendship. I will, therefore, confine myself to trying to draw a lesson from the past to help us in the future.

"This tablet appeals to Mr. Billings and myself very forcibly, because it not only records the bravery of our ancestors at the dark period of the Revolution, but it gives us an opportunity of calling your attention to the importance of preparedness for war.

"No place in the world are more patriotic, more brave, more impatient for success than Americans. We are to-day, in war times, as patriotic as were our ancestors at Fort Tyron in 1776, and is there any incident in history more sublime, more heroic, more patriotic than that of Margaret Corbin, the wife of a Pennsylvania private, who, here on this spot, in the thickest of the fight when men were falling around her, her husband dead at her feet, took a man's part — loaded and aimed a gun herself with vigor and skill, until she too fell.

"Fellow citizens! We need that same innate spirit of enthusiasm to animate us to-day. We want you to show your patriotism now in time of peace. We want you to encourage your brothers, your husbands, and your sons to go in for military training, for rifle shooting, and for learning the art of war.

"Parents! We want you to teach your children to respect and honor the army and navy. Archbishop Ireland says: 'It is a bad sign when the army and navy are not generally honored and revered. It is a bad sign for any country when the uniform of the soldier does not secure him honor for the victor.'

"Whether we will it or not, we must look a probable war in the face. Just as long as commercial rivalry exists, nations will appeal to arms, Hague conference notwithstanding.

"Our school histories describe the battles we have fought and won, but do they describe the danger, the dangers that have prolonged these wars? Let us avoid the mistakes of the past. Let us be prepared for any and every emergency. We are no longer isolated, we are a world power. We have not only our own coast to guard, but overseas lands to protect.

Colonel Daniel Appleton "It will hardly be denied that the happiness and welfare of a people depend to a large extent on a full and abiding sense of security from any possible attack.

"Of the great nations of Europe, there is only one, the Empire of Germany, in which the feeling of confidence prevails. The young German knows that he need have no foe — need fear no invasion from all his comrades are strong men armed.

"The young American, though potentially a strong man, is yet a man unarmed. We are strong in the sense that we have many men and that those men are brave. In a military sense we are weak because a very small proportion of the men know anything of military service. We are weak in many of our wonderful resources. We have no transportation for moving an army. We have no merchant marine. Our coasts are inadequately defended. Our military resources may be innumerable but they are as yet undeveloped. We want an army and navy so efficient and strong in numbers and organization that no enemy opponent would contemplate invasion. The army, of course to-day, includes the organized militia.

"Let our National Guard be a strong right arm for National defense, and for the ranks be always filled.

"Our unpreparedness is our danger. It is an incentive to foreign nations to make adequate preparations to invade us. Paradoxical as it may seem, if our preparations were to become adequate, the risk of their ever being used would disappear.

"*'In Peace prepare for War'*. These five words have done far more to avoid war than all the books and articles that have been written since the world began.

"Let us not neglect to improve, so obvious a degree of preparation for war. Then if we were called upon to meet the enemy, on land or sea, or perhaps in the air, we shall be sure of a quick, short and decisive victory.

"Time permits me only to lightly touch upon this National problem, only to draw your attention to it.

"Friends, there may be diversity of opinion regarding preparedness for war, but I am sure that you will all join in heart with me, in expressing our gratitude to Mr. Billings and our appreciation of his beautiful gift to the city.

"This tablet is a work of art, of beauty and of patriotism. It

honors the dead, and inspires the living. It points the way to duty, to patriotism and to preparedness for war, even to the giving of our lives."

Mr. Reginald Pelham Bolton spoke as follows:

Mr. R. P.
Bolton

MR. REGINALD PELHAM BOLTON: "Mr. President and Ladies and Gentlemen: In the regrettable absence of our venerable historian, General James Grant Wilson, I am asked to speak of the historical associations which cluster around this scene. It is no small privilege for a great community to find among its members some of those, who, like the donor of this memorial, are the possessors and guardians of some historic place or structure in the possession of which they take a pride and exhibit an interest.

"And surely, among the places fragrant with memories of the deeds of those who fought to win for us our cherished institutions none exists in which the historical interest is more fully blended with the scenic interest than in Fort Tyron.

"Before us we see not merely the site of an event of national interest, but also the very rocks and hills upon which the struggle took place which made of this end of Mount Washington an American Thermopylae centered between the hills of Fort Denham, of Spouton Day and the precipices of the Pellandies, and between the placid waters of the Harlem and the broad estuary of the Hudson, no place within the bound of the greater city can exhibit a more picturesque setting added to the rugged character of the eminence on which we stand.

"Such may well have been the thoughts of some of the British and Hessian soldiery when in November the dawn of the first year of Independence, they came in sight of the hill, in their advance upon Fort Washington.

"The hill no doubt presented a strange and formidable appearance from a military point of view, for the trees were felled to form the abatis behind which lay the Southern boys of the Maryland and Virginia battalions armed with their turkey rifles. And as the Hessian division, under the personal command of Baron von Phaulsen, moved over the Deckman vale below us, the rifle rang out the first notes of the defiant defense, in answer to the pounding of the guns of the frigates Pearl, tacking to and fro in the harbor off this point.

"As the Hessians swarmed up this hillside, climbing over trees

Sir R. B. and rocks, led in person by their gallant commander, their artillery opened fire with grape-shot upon the little fort which crowned the spot where we stand, and the fierce fight which lasted for three hours began, watched with anxious solicitude by the great leader of the American cause, from the Palisades yonder. The overwhelming forces of attack were supplemented by a military manoeuvre by which the Grenadier battalion of von Koehler, led by that picturesque character Pall, was brought around the margin of the Hudson to the flank of the fort. Twice the advance of the main Hessian body was rolled back, but the ammunition was falling, and the weapons of many of the defenders were too bad to fire. Upon the final charge on from and flank the little garrison was overwhelmed and the sight of the succeeding slaughter of many by the bayonets of the enraged Hessians brought unaccustomed tears to the eyes of Washington.

"Such very briefly is the story of the gallant defense of the north outwork of Fort Washington by the Southern boys of which this noble monument will visibly remind the passerby for all time.

"Among the various events which this great Celebration has brought prominently into view, none appeals more directly to the spirit of patriotism which it is so necessary to foster, and none evidences a greater degree of the noble spirit of self-sacrifice, than the heroism and action of these young Southern men, fighting on a northern soil for the benefit of the nation.

"It is by the widening interest in the motives and causes of historical events that we have reason to believe in the perpetuation of the American spirit of liberty and equality, and surely the Hudson-Fulton Celebration, covered as it does by this and other memorials, events of historic interest far beyond the scope indicated by its title, is achieving a work of vast future import.

"While we thus unite in acclaiming the work and sacrifices of the heroes of the past and in acknowledging the value of the results of their labors and achievements, let us not forget that in all their doings, as in all the results flowing therefrom, the strong hand of the Almighty has been powerfully visible to the advantage of our land and its people, and let us ascribe to the Highest Source the results which this great Celebration is commemorating, as I venture here to do in the following form:

THE ASCRPTION
Hudson-Fulton Celebration

Mr. R. P.
Bolton

"Not unto us, O Lord, not unto us
But unto Thy Name give Glory."

God of the Marathon!
O, how fierce last Thy hand smote the savage nation,
"Twas ever thus,
Thine the training World; Thine was the Power, O Lord
Not unto us, O God,
Not unto us.

God of the Flood-ways,
Thine was the Hand to stern, through mud and water drear,
And ever thus,
Thine the watch and ward, to thee the living Lord,
Not unto us, O God,
Not unto us.

God of the Patriot's
O, how sternly, to the world's eyes, thou didst reveal,
"Twas ever thus,
Thine hand up a hissing torch to the Glee, Lord,
Not unto us, O God,
Not unto us.

God of the Patriot's
O, how his purpose clear, and his intent more true,
"Twas ever thus,
Thine the chosen people, Thine the chosen gain, O Lord,
Not unto us, O God,
Not unto us.

God of our Fatherland,
O, how in the past, Thy power and Thy love revealed,
"Twas ever thus,
Be Thou our Guide, O Lord, through the great reward,
Not unto us, O God,
Not unto us.

Mrs. W.
C. Story

MRS. WILLIAM CUMMING STORY: "Mr. President and
Ladies and Gentlemen: In representing the Daughters of the Ameri-

*The Marathon.

*Hudson River.

*The Revolution.

*Short Patriotic.

Mrs. W.
C. Story

can Revolution I am sensible of the honor that you have conferred upon me in asking me to speak on this important and interesting occasion. I realize that our organization stands for high ideals and a great purpose, and, unless we can in our day serve worthily the community in which we live, we will fall short in the responsibility that rests upon us as descendants of the noble men and women who sacrificed life, liberty and happiness that our Republic might live.

"It is well, therefore, that we should recall the heroism of the past and I am happy in having assigned as my topic one of the brave and true women who served our country and on this spot proved her devotion, Margaret Corbin.

"Margaret, daughter of Robert Cochran, was born in what is now Franklin County, Penn., November 12, 1751. During the Indian raid of 1756, her father was killed and her mother taken prisoner. The mother was never heard from again, though seen in 1758, one hundred miles west of the Ohio, and the children, Margaret and her brother John, remained under the care of their maternal uncle.

"About 1772, Margaret married John Corbin, a Virginian by birth, and when, at the beginning of the Revolution, he enlisted as a matross, in Capt. Proctor's First Company, Pennsylvania Artillery, she, having no children to demand her care at home, accompanied her husband, giving woman's care to him and his comrades in the army.

"At the attack on Fort Mifflin, a shot from the enemy killed John Corbin, and as there was no one to take his place at the gun, the officer in command ordered it withdrawn. Here, Margaret Corbin showed what manner of woman she was. Unhesitatingly she took her husband's place, quickly and bravely she held his post, performing his duties, with skill and courage, until seriously wounded.

"The officers of the army warmly appreciated her services, and the State of Pennsylvania made prompt provision for her, but inadequate to her needs, and the case being brought to the consideration of the Board of War, Congress, in July, 1779, resolved:—

"That Margaret Corbin, wounded and disabled at the battle of Fort Mifflin, while she heroically filled the post of her husband, who was killed by her side, serving a piece of artillery, do receive during her natural life, or continuance of said disability, one-half the monthly pay drawn by a soldier in the service of these States; and that

she now receive out of the public stores, one suit of clothes, or the value thereof in money.' Mrs. W.
C. Story

"On the rolls of the Invalid Regiment in Pennsylvania, commanded by Col. Lewis Nicola, as it was discharged in April, 1783, is found the name of Margaret Corbin. She was pensioned by her native State, at the close of the war, and until her death, which was caused by the wounds received in battle.

"She resided in Westmoreland County, beloved, honored, and respected by every one. She died about 1800, the precise date not being obtainable. De Lancey, writing of the capitulation of Fort Washington, wrote: 'The deed of the Maid of Zaragoza was not nobler, finer, braver, than that of Margaret Corbin, of Pennsylvania.'"

Miss Helen Varick Boswell spoke as follows:

Miss H. V.
Boswell

Mrs. HELEN VARICK BOSWELL: "Mr. President and Ladies and Gentlemen: I always like to talk about the American woman, in whatever connection her name may appear.

"When I found myself scheduled to discuss her 'in peace and in war,' I saw before this beautiful tablet which is inscribed with the name of a woman so worthy of the reverent appreciation of every patriot in America, I thought of that other woman whose presence at the great fete of the Hudson-River Celebration Commission in the Metropolitan Opera House a few evenings since was in itself a glowing exposition of the true American woman such as no word picture of mine, however eloquent, can create. She was a little woman, frail and bent, but the majesty of her womanhood made her the greatest among all that distinguished company.

"Years ago, when the heart of our beloved Republic was throbbing with the agony of its Civil War, she gave the slogan of liberty to the Union in her 'Liberty Hymn.' Through all the years that lie between us of to-day and that period so pregnant with possibilities of progress to our nation, that same little woman has stood before us in many a bloody campaign in behalf of our country's honor — always, the same matchless heroine, the same typical American woman — Mrs. Julia Ward Howe!

"As my beloved friend and leader, Mrs. Story, was speaking of the illustrious deed which has inscribed the name of Margaret Corbin, not only upon this bronze memorial behind me, but upon the yet

Mrs U.V.
Boswell

more enduring tablet of the hearts of the American people, I thought of the many thousands of women who are to day standing side by side in the industrial world, as truly heroines as she who long ago shared in the gallant defense of this historic ground. These household women are almost as numerous as the men who are filling the ranks of wage and salary careers, and they are cheerfully, courageously, bravely, and successfully, most of them maintaining their loved ones. Fathers and mothers, children and alas, too often — husbands, are dependent upon the fortitude which never fails of these thousands and tens of thousands of women who are crowding the ranks of the industrial world. It is indeed the 'women's invasion' in time of peace, but she fills her role with credit to her own energy, her own ability, and with honor to the country whose flag and the deathless principles it stands for have made her emancipation a reality.

"The sun is setting and as he descends his splendor illumines the warship — of a nation of women they lie amicably side by side within the borders of our own fair land — here upon the bosom of the broad Hudson flow at our feet. The ships are manned by sailors from other lands than ours, and yet as dear to them as ours to us. To each his own flag, his own soil, are the dearest on earth, for

"'Be it far from us a wife to be sold

Who lives to himself but not to God

"Thinking on a nation's life!"

"Of all that multitude, gathered here in a common brotherhood from 'all the nations of the earth,' there are few who have not come from some place in this wide world where a woman is waiting for them, praying for them, working to keep their home, heaven's humble, full of comfort and peace for their returning loved ones. They are all heroes — for I like to use the generic term irrespective of sex — these women of every nation, who so faithfully fill their places 'in that nation in life' to which it has pleased God to call them, and I know how ready is the tongue of my masculine hearers to the true word, abound of all the world.

"Yet, I dare to believe that most of you are a little more ready to yield your allegiance to the American woman, and I dare to promise for her that she will hold up your hands, in peace as in war, and send you forth to do battle for the right, wherever the battle is to be fought."

CHAPTER XXVIII

DEDICATION OF THE STONY POINT ARCH

On Saturday, October 2, 1909, at 12 o'clock noon, the Memorial Arch erected by the Daughters of the Revolution of the State of New York on the Stony Point Battlefield State Reservation on the Hudson River was dedicated, under the auspices of the Hudson-Pulmon Celebration Commission, by the American Scenic and Historic Preservation Society (co-owners of the Reservation) and the New York State Daughters of the Revolution.

The Stony Point Committee of the Hudson-Pulmon Celebration Commission consisted of Mr. Gordon H. Peck, Chairman, Mr. Henry K. Bush-Brown, Hon. Thomas H. Lee, and George Fredrick Kung, Ph.D., Sec.D. Stony
Point
Com-
mittee

The Stony Point Committee of the American Scenic and Historic Preservation Society consisted of Mr. Gordon H. Peck, Chairman; Mr. Henry K. Bush-Brown, Edward Haggaman Hall, L. H. D., Mr. Francis Whiting Halsey, and Hon. Thomas H. Lee.

The Patriotic Committee of the Daughters of the Revolution consisted of Mrs. John H. Abeel, Chairman; Mrs. Zeb Mayhew, ex-officio, Mrs. Richard J. Davidson, Miss Josephine Vandell, Mrs. Joseph J. Coey, Mrs. Henry W. Helfer, Mrs. Ashbel P. Fitch, Mrs. Wm. H. Hotchkiss, Mrs. S. A. Goldschmidt, Miss K. J. C. Carville, Mrs. Clarence L. Fleckley, Mrs. Charles F. Van Inwegen, Mrs. Albert R. Ginet, Mrs. Arthur A. Hebert, Mrs. Leverett F. Cramb, Mrs. Wilbur F. Waldenon, Secretary.

The arch, designed by Mr. H. K. Bush-Brown of Newburgh, N. Y., and built out of rough native rock of Stony Point with the exception of some of the granite trimmings, stands at the entrance to the bridge which leads across the West Shore De-
scrip-
tion of
Arch

De-crip-
tion of
Arch

Railroad cut to the Reservation. The masonry measures thirty-two feet in width, twelve feet in depth, and twenty-three feet in height, and the archway is twelve feet wide, twelve feet deep, and fifteen feet high. On the western front over the archway is the inscription "Stony Point State Park," and the cry of the Americans as they captured the work: "The Fort Our Own." On the same front, on either side of the archway, is a tablet. The northern tablet bears the following inscription:

(Sonic Society Set.)

STONY POINT,
A BRIDGE OF THE
COMMANDER THE FIRST CORPSE
NEW YORK AND THE
JULY 11, 1779,
BY THE LORDS OF THE INDEPENDENT
COMMISSIONER
ANTHONY J. J. J.
PRESIDENT OF THE
OFFICE OF THE STATE OF NEW YORK,
1779.
THE AMERICAN SOLDIER AND HIS
OFFICER.

The southern tablet bears the following inscription:

(D. R. S. S.)

THE SOCIETY
OF THE
OF THE STATE OF NEW YORK
OFFICE
THIS GATEWAY,
GIVEN BY THE
OFFICE OF THE
OFFICE OF THE
AND
OFFICE OF THE
AT THIS PLACE
OFFICE OF THE
OFFICE OF THE

Rep-
tion of His Excellency, the Hon. Charles L. Hughes, Governor of
Governor the State of New York, arrived from Newburgh on the flag-

ship of the Naval Militia a little before noon and was received with appropriate honors upon landing at the steamboat wharf. He then made a tour around the reservation and was accompanied to the speakers' stand immediately west of the Memorial Arch by the following escort:

Marched, Mr. William Benson,
 Glassing's Military Band of Haverstraw;
 Company N, 32d Regiment, N. G., N. Y., Alexander L. Mander, Captain,
 Haverstraw Cadets;
 Fox's Military Band of Haverstraw;
 Edward P. Post, G. A. R., of Haverstraw;
 Detachment of Edward P. Post, G. A. R., in Confidential Uniform, Edward
 Wilson, Captain, as Guard to the Governor;
 Companies of militia;
 His Excellency, The Governor of the State of New York,
 The Governor's Staff,
 The Speakers,
 The Stony Point Committee.

A battery of two guns from the United States Military Academy at West Point fired salutes to the Governor upon his arrival and departure and upon the unveiling of the arch.

The assembly was called to order by the Hon. Thomas H. Borah, who introduced as the presiding officer of the day, the ^{F. M.} Hon. Frederick W. Seward, ex-Assistant Secretary of State and ^{Seward} ex-Acrling Secretary of State of the United States under President Lincoln. Secretary Seward is the last surviving member of President Lincoln's cabinet, having acted in such in place of his father, William H. Seward, who was ill just prior to the President's assassination. Mr. Seward conducted the exercises in the following order:

Liturgical and Collect for the Day after the Revolution, Rev. Edgar Tilton, Jr., D. D., Chaplain D. R. State of New York.

Musical Contribution, Glee of the "O. and O."

Greeting and Presentation of Memorial Arch, Mrs. Zeb Mayhew, Regent D. R., State of New York.

Unveiling of Memorial Arch, Mrs. John H. Aber, Chairman, Patriotic Committee, D. R., State of New York.

Music:—"The Star Spangled Banner," Junior Sons and Daughters and School Children of Stony Point and Haverstraw.

Oration and Dedication of Memorial Arch, His Excellency, Hon. Charles E. Hughes, Governor of the State of New York.

Acceptance of Memorial Arch, Mr. Francis Whiting Halsey, Trustee of the American Seacoast and Historic Preservation Society.

Music—"America."

Patricide of Times, Mrs. Frank L. Eise, President-General D. R.

Address, "Art and the History of America," H. K. Bush-Brown.

Benediction, Rev. Edgar Tilton, Jr., D. D.

The invocation, address and benediction were as follows:

Rev. Dr.
Tilton

REV. EDGAR TILTON, JR., D.D.: "Let us invoke the Divine Presence. Mighty and ever-living God, Creator, Ruler and Preserver of the world and of mankind; Father of our Lord and Saviour Jesus Christ, the living God, and Saviour of all men, hear us to-day as we invoke Thy Presence. We thank Thee, O God, for the spirit of brave adventure to which this Nation owed its birth. We thank Thee for the Nation's history and the Nation's progress. We thank Thee, O God, that when the rains descended and the floods came and the winds blow and beat upon her, she fell not, for she was founded upon a rock. O God, as Thou has preserved the Nation in the past, so preserve her in the future; and as Thou hast in the past given to her wise rulers and statesmen, so in the days to come, may we have wise men to rule over us, men after Thine own heart; and may this Nation be governed according to the principles which we find in Thy Holy Word. O God, we pray that peace may reign here and abroad, and that all the Nations of the world may recognize Thee as the only ruler, as Jesus Christ, and recognize Jesus Christ as the Prince of Peace. Let Thy richest blessing rest upon us this day through this service. Be near to those who shall speak; and may all the services of the hour redound to Thy honor and glory.

"O Thou who turnest the hearts of the children to the fathers, and hast declared that the righteous shall be had in everlasting remembrance, we thank Thee for the inspiration which called into existence the Society of the Daughters of the Revolution; and the blessing

which has hitherto attended it. And we pray *Thou* to continue to aid our Society in this and succeeding generations, in the pious work of perpetuating the memory of the sacrifices and sufferings, and valor of our fathers, through which our priceless heritage was won.

"And finally, when we also shall have served *Thine* in our generation, may we be gathered unto our fathers, having the testimony of a good conscience; in favor with *Thine* our God, and in perfect charity with the World.

"All of which we ask through Jesus Christ our Lord. Amen."

HON. FREDERICK W. SEWARD: "Fellow Citizens: We are ^{Hon.} met to-day to dedicate this Memorial Arch created by the patriotic ^{U. W.} zeal of the Daughters of the Revolution, to the memory of those who ^{Seward} fought on this battlefield during the War of Independence.

"Stony Point is still a monument, and a witness of three great events of American history. Stony Point looked down upon that little ship of Henry Hudson on her voyage of discovery, when she lay at anchor in yonder cove. Stony Point looked down upon Robert Fulton's *Clermont* when she came up the river to open the era of steam navigation; and Stony Point was the battlefield where was fought the decisive struggle which secured to the Americans the control of the main line of communication between the Colonies throughout the whole Revolutionary War. That naval pageant that went up the river yesterday, symbolized all three of these great events, for the *Half Moon* came up again flying her old flag, commanded by a Dutch crew; the *Clermont* came up again bearing descendants and kindred of Robert Fulton, and both escorted by an immense fleet of merchant marine and naval vessels, all vying to do honor to that flag which was first hoisted here at Stony Point.

"It was wise and pious in the Daughters of the Revolution to see the connection between all these events, and to link their dedication with the celebration of those other great achievements which have so largely contributed to the advancement and the welfare of our country and of the world.

"And now I have the pleasure of introducing to you the Regent of the Daughters of the Revolution, Mrs. Zeb Mayhew."

MRS. ZEB MAYHEW: "Mr. Chairman, Governor Hughes, ^{Mayhew} Mrs. Douglass of the Revolution and Friends: To perpetuate the patriotic spirit of the men and women who achieved American independence;

Mrs. Zeb to commemorate important events connected with the war of the Revolution; those are the objects of our society as set forth in our Constitution, which we have endeavored to accomplish in this Memorial Arch.

"It is said that anticipation is greater than realization. We, the descendants of those men and women who achieved American independence, are gathered here to-day to do them honor and to share in the joy of realization which far exceeds our fondest hopes. We are eighty years old - celebrating birthdays, and as a State Society this is our 'coming-out' party. Hereofore, we have had doll parties, comparatively speaking, and have placed many handsome tablets to commemorate that past; we have also placed a stained glass window on Harlem Hill, but this is our first big party on our own account and we thrill with pride and enthusiasm to know our efforts recognized, and we are greatly honored in having with us the Chief Executive and first citizen of the State, the Hon. Charles D. Hughes, and his other prominent gentlemen well known to you all.

"The idea of placing a memorial here among the hills and vales which witnessed the birth throes of a nation, budded in the mind of Mrs. Roger J. Davidson, of Rockland County. We all responded to her call for what more inspiring place could be found than Story Point, this natural monument to suffer her iron, ground made classic by the history of the country. The building of this Arch by a small body of women in these busy days called upon our time, punning, a touch labor and sacrifice. As I look at its huge figure looming there in veiled grandeur, veiled in a Nation's emblem of peace, love, justice and freedom, and to think how we have all worked and sold and even played bridge in its behalf, I am reminded of the good old praying patriarch of the church who was suddenly stricken with nearly all the ailments. He had rheumatism and arthritis and osteoarthritis of the spine and was finally struck with paralysis and after several months suffering finally got better, and one evening he held a prayer meeting, and he went to the prayer meeting. The old preacher arose and said: 'Brethren, I want us all to have a good time to-night; I want every one of you to get up and tell what the good Lord has done for you.' Now, Brother Jones has been severely afflicted, and has not been with us for many months.

Brother Jones, get up and tell us all the good Lord has done for you.' Mrs. Zeb
Brother Jones arose and hobbled up into the aisle, and after a long ^{Mayhew} pause, said, 'Well he has about ruined me.' I think the Daughters will agree that to get this memorial ready for this Celebration has about ruined us.

The story of the man who made Stony Point immortal is too well known to need more than passing comment; how on the early morning of July 16, 1779, Anthony Wayne and a small corps of troops surprised the well-fortified English and with unloaded muskets picked their way behind the parapets, climbing over stones and fighting only with bayonet, charged the camp. To the surprised and terrorized British the rocks had become suddenly an active volcano which was pouring forth. Onward and upward they climbed, cutting and hacking and slashing, and plunging into an inferno of grape-shot, shrapnel and shell, unheeding they tore their way through, cut away the pickets, mounted the parapet, entered the fort at the point of the bayonet, shouting 'The fort's our own.' And there they placed Old Glory, then wonderful thing — at its feet only a piece of painted hunting cloth, worn and ragged, stained and torn, stained by sands, riddled by shot and shell, but the very soul and inspiration of a Nation's love, for which these forefathers of ours flung their lives and in the face of fearful odds, and as they hacked and cut and pushed their way to the front line of battle, as they fell, they turned, and with their last breath on this earth, breathed out a cheer for the flag — our flag. So that flag in its imperishable glory rests with us immortal, so that future generations may read the story of that dearly bought emblem, and know as we know, that so long as American bones and American patriotism stand guard beneath it, in this whole wide world, there is not an arm strong enough nor a heart brave enough to pull that flag down.

'Last winter I found it necessary to be far away for several months. 'Why, how can you go at such a time? What will become of the arch?' asked my friends. But I assured them that I had no worries on that score. I felt as good deal like Rufus, who, on going on a fishing excursion, was addressed by a gentleman who thought it a good time to reprove him for his laziness. He said, 'Rufus, do you think it right to leave your wife at the wash tub while you pass your time in fishing?' 'Oh, yes, it's all right. My wife don't need no watching;

Mrs. Zeb
Maybes she will wish just as hard as if I was there.' And I was right. They all worked and accomplished just as much as if I were here. But at their head, leading them on, was a very able general in the patriotic work, our ex-General and Regent, Mrs. John Howard Abbel. Her untiring zeal and devotion to this work, which was started while she was at the head of the Society, make it eminently fit that her loving hands should be the ones to draw the veil aside and reveal in all its glory our labor of love.

"Your Excellency, it is my great pleasure and privilege, on behalf of the Daughters of the Revolution of the State of New York, to present this arch, erected to commemorate the deed and date of General Anthony Wayne and his brave men who took this stronghold from the British one hundred and thirty years ago. To the State of New York, through you, its Governor, do we present this Memorial, trusting it may long stand as a testimonial of our love of country, so that it may be read by all men."

CHARLES M. WARD: "The next thing in order will be the unveiling of the Arch, by Mrs. John Howard Abbel."

The flags which draped the arch were then removed.

CHARLES M. WARD: "I have the honor to present to you your Guest of Honor for the day, Hon. Charles L. Hughes, Governor of the State of New York."

Gov. or
Hill - HON. CHARLES L. HUGHES: "Mr. Chairman, Madam Regent, Daughters of the Revolution, Ladies and Gentlemen: Despite the announcement of the program, I am sure you will understand that it would be utterly impossible for me to attempt a formal address. As the functions of this Celebration, day by day, make their demand upon time and strength, I am thoroughly convinced that if I put even appearances on all the occasions at which I am expected, I shall be doing very well, even if no remarks are made. But of all the functions connected with these commemorative exercises, there is none at which I should feel a greater pleasure in being present than at this function, so significant in the character of its testimonial. I am always glad of the opportunity to hear the Daughters of Ulster recite the praise of their Revolutionary fathers."

"We have had an inspiring tribute from the Regent of the Society, under whose auspices this dedication is held, and I congratulate all

who have had the rare pleasure of listening to the beautiful and eloquent words of the address of your Regent.

Governor
Hughes

"Had there been no settlement made in this Valley, and had it never been the scene of struggle, its discovery and the exploration of the most beautiful of rivers would have been events worthy of commemoration by all the world.

"When, however, we reflect upon the progress of the past three hundred years, to so large a degree made possible by the discovery and the invention which we are celebrating, we find the charm of Nature heightened by the fascination of the history of human achievement. This is a celebration in which the daring of the explorer and the patient work of the inventor are alike commemorated, both being the most significant of all in what they typify, connected with the progress of humanity. We have along this Valley many industries, vast commerce, prosperous communities, and at the wonderful harbor to the south the metropolis of a Continent. If we were unworthy of our ancestors, this would be a celebration simply of wealth and material gain. For here, perhaps, as nowhere else in the world, are signs of the progress of man in making Nature contribute to his happiness, and in utilizing the increasing facilities for the interchange of the products of industry. Here is wealth beyond the dreams of the early times to which our attention is directed. Here, to-day, are the signs that point unfailingly to a future still more prosperous than the past which we celebrate. But it is because we are worthy of our ancestors, and cherish the treasure which they have bequeathed to our trust, that we turn aside from the indications of material gain, such as we possess them, to pay our sincere tribute of respect to sacrifice, to courage, to loyalty, and intense love of freedom, which are commemorated in that beautiful Arch.

"It is well that this dedication should bring us to this historic spot. All along the Valley are the scenes of most romantic story, and of many legends in the historical struggle for independence, but here we feel particularly emphasized the importance of this great river in the war of the Revolution, and the necessity of maintaining its character of control, in order that the Colonies might successfully cooperate against their common foe.

"The Hudson has been and is the highway of commerce; it links us to the vast West; it is the avenue by which products of the

Governor Clinton: United States are transported to all the Nations of the earth.
Hughes

Precisely because of the facts which made it and will always make it an avenue of commerce, it was the point of greatest importance, so far as control and strategy were concerned, in the War of Independence. The control of this river lost, the Colonies were hopelessly divided. This river Washington must hold, and his great military genius he devoted to securing it. Again and again the effort was made to break permanently the line of communication -- to sever the Colonies, to destroy all possibility of confederation in struggle, and thus to put an end to the great War for Independence. Here on this spot was one of the rare exploits in which strategy and bravery both reached the highest level of attainment. Strongly fortified, deemed impregnable, the British stood here, apparently secure in their control of the entrance to the Highlands, and efforts based upon that supposed security were made for the purpose of distracting, surmounting and annihilating on either side the force of the confederation.

"We must pause as we stand here to pay a tribute to the eminent forerunners who contributed so greatly to the success of the Revolutionary struggle. I refer to Baron Steuben. Our great historian, John Fiske, in one of those illuminative paragraphs with which his work abounds, shows to what degree the success of the storming of Stony Point was due to the organization and drill which the coming of Baron Steuben made possible. Here were those who were trained in a severe school and had learned a lesson of discipline, which enabled them to put their matchless bravery to the best uses, at a time of crisis in the war. And so, when the great leader determined to secure this important means of communication, he resolved, if it were possible, to subdue this supposedly impregnable fortress. It was possible for the same reason that independence was declared, and the Union saved in the Civil War, and for the same reason that we had a Washington, and a Lincoln, and a Grant, and are to-day a united people. It was possible because there was a Wayne, and men worthy of a Wayne to follow him; and because, despite his difficulties in keeping an army in the field and despite the regrettable desertions of so many that served in the Revolutionary War, Washington did not look in vain -- and the country has never looked in vain -- for men who were willing to sacrifice their all at a time of crisis that the destiny of this people might be realized.

"They called him 'Mal' Anthony Wayne.' It is the madness that Governor makes histories and empires; it is the madness that has given us the ^{Hughes} American Republic, and will cause it to endure.

"In a materialistic age it might well seem madness. It would indeed seem madness to a man who will exchange honor and loyalty and life for gold. It was not madness to Wayne. It was simply duty; it was simply the performance of the task assigned him by the great Commander to whom he was loyal. It was simply the expression of his faith in fidelity in a time of supreme courage, which we honor because of its unconsciousness of self. It is the madness that must permeate the American people and rescue them from their own weakness and selfishness, if our children are to have, in their country, the institutions which 'Mal' Anthony Wayne' helped to found.

"The story, as Mrs. Mayhew says, has often been told. She gave it with beautiful words and rare facts. It is one thing to make a charge, it is another thing if necessity requires you cavalry; it is another thing to make a charge with an unloaded musket. That was a charge into madness. It is one thing with the sounding of drums and with the glory of war and with all the bling out the order and the courage which most men have, to lead a charge upon the field of battle. It is another thing, in the dead of night, in silence, against overwhelming odds, with nothing to cheer, with everything to depress, urged on only by common sense, the highest sense of duty, to group you impregnable hill, in a land of isolation, in his stronghold.

"No longer tales of bravery have been given to the world. We have learned that we know the necessity of strategy. This means the knowledge of the first importance. We admire a state leader of power and prestige, and we know the necessity for the council of the council and the wisdom of every move in its proper place, bringing about the achievement of importance; but, after all, it is fortunate that we are endowed with something better than memories of strategy. It is fortunate that we have a richer heritage than simply the memories of men who were brave. We had men who supplemented astuteness and strategy by fearlessness not surpassed upon the field of battle, and here we come again to an exploit worthy to be classed with any deed of daring inspired by high impulse, that the world has ever known.

Governor Hughes "Now that was done for our country. We would honor humanity exhibiting itself in such an endeavor anywhere in the world. We would pay our tribute to any hero of any Nation who, in a time of stress, proved that of which humanity in its finest moments is capable. But we are thankful to-day — after all, we are thankful to-day — that we are not paying simply the just meed of praise to the great man and great leader and brave hero, but to one who worked for us, that this country might be free, and that we might enjoy the privileges of this favored age.

"When we reflect upon that, we are mindful that the calls of patriotism are just as important to-day as they ever have been. We are not to charge up Stony Point, or capture fortresses of earth and stone; but do not forget that all the fortresses that need to be taken have been reduced. Our patriotism is not worth the expenditure of the time and money of which Mr. Mayhew spoke if it simply exhibited itself in memorials of a sacrifice that is past, or in a recognition of a patriotic will and love of country, of which no illustrations could be found in our present life. We must always, upon these occasions, reflect upon what our country means. Patriotism here does not mean simply devotion to the flag as a symbol of power, although we are glad our Nation is so powerful and need fear naught. It is not simply devotion to the flag as a symbol of prosperity — we rejoice in the prosperity of this land so favored by Nature — it is devotion to the flag as a symbol of freedom, of equality in which every man and woman has a right to share.

"We rise to the demand of these periodic occasions if we have more earnest desire in our hearts to share with our brother man the advantages of this great Republic we love, the benefits of these great occasions. If we regard them as the exclusive property of any. The obligation may be more binding upon the students, but privilege is not confined in this country. We are all together — the descendants of the men who fought for the new constitution — with the favored sons and daughters of worthy sires, who's grandfathers were, we are all together, trying ourselves out before the leaders of the earth, successfully, the great expenditure of the nation, recognising equality before the law and before we hoist our beautiful flag and sing the inspiring strains of the 'Star Spangled Banner,' let us go forth resolved each in our own sphere to the full extent of our ability, to enlarge the

area of opportunity and of advantage, so that in our day and generation the fortresses of avarice and of selfishness and of covetousness may be taken, and we may realize to a larger degree the great ideal of Human Brotherhood."

Governor
Hughes

CHAIRMAN Seward: "In the absence of Dr. Kunz, President of the American Scenic and Historic Preservation Society, the custody of the Arch will now be accepted, in their name and behalf, by Mr. Francis Whiting Halsey, Trustee of the American Scenic and Historic Preservation Society."

MR. FRANCIS WHITING HALSEY: "Mr. Chairman, Governor Hughes, Madam Regent and Daughters of the Revolution, Ladies and Gentlemen: I hope no one has been overlooked, for I sincerely wish to commendate you all on the absence of Dr. Kunz, who was here one year ago and made a speech for the Society. All who heard it or have since read it will recall how well that speech was made. The Society has done their utmost of not being able to summon her, today one of its vice-presidents. Mr. Devoe is quite infirm. Dr. Folsom is on the water, bound home from Europe, and is now somewhere on his ranchet. Colonel Sackett is Secretary of the Hudson-Yulcan Commission, and then tells its own story. Then we have Dr. Edward Higman Hall, Secretary of the American Scenic and Historic Preservation Society. He is here, ladies and gentlemen, and last year he made a speech at the laying of the corner-stone of this glorious Arch. You all naturally will ask why he is not reading the speech to-day. It is not because he could not make two speeches with this Arch for his inspiring subject, but because he believes that I, as a member of the Stony Point Committee of the Scenic Society, should begin to do some work."

Mr. F. W.
Halsey

"I cannot better render thanks to those who are responsible for calling me here than by quoting the words of the men who had long been ill, and on becoming convalescent, received from the wife of one of his friends a jar of peaches, of that kind which wise and thoughtful ladies sometimes reinforce with Brandy. Writing to express his thanks, he said he was extremely fond of peaches, but in this instance, what he expected. That was the *spirit* in which they were sent."

"Now it is not mere personal thanks that should be returned here to-day, but the thanks of this Society as representing the State -- the

Mr. F. W. Halsey Society being custodian of State property — thanks for this glorious Arch. And we all cannot fail to see the extreme fitness which has marked the selection of the material for that Arch, which was chosen from these very grounds: stone which has been here longer perhaps than stone anywhere else on this Continent — the stone of these Highlands of the Hudson. It is well known to geologists that while our country is sometimes called the New World, in a geological sense it is the old world. It is far older than most parts of Europe, and these lands about the Highlands north the oldest part. And hence, it is not the hill at Athens which is crowned by the Acropolis, nor the Seven Hills on which Rome reared her city, nor the arches erected to Constantine and Alexander or Severus, nor the arch erected by Napoleon, looking down on the Champs Elysees but here we have in this hood of ours, the oldest stone, geologists tell us, that exists on this continent.

“But permit me to say a few words as to the preminent historical interest of our own State and particularly of the Hudson Valley. After all that may be recalled of Plymouth and Boston, of Jamestown and Philadelphia, it is to New York City and to New York State that the chief distinction in American history belongs. Henry Hudson sailed up the river that bears his name many years before the Pilgrim fathers landed at Plymouth.

“Hudson made friends with the Indians, and in that act prepared the way for a friendship which was to be of momentous consequences in the great conflict for Anglo-Saxon rule in America more than a century afterward. The French from Canada made war on the Indians; the English of New York constantly cultivated their friendship, and, under Sir William Johnson, maintained an alliance which, as most historians believe, really turned the scale in favor of English rule.

“The scenes of that war embrace a large territory. Beginning with an obscure engagement on the northern borders of Pennsylvania, at a place called Great Meadows, where, in the death of Jumonville, as the result of orders given by George Washington, the shot was fired which, as Parham says, ‘set the world on fire’ — it goes forward to Braddock’s defeat and to operations in Canada; but here in New York were many vital engagements throughout the whole ensuing conflict that closed at last on the Plains of Abraham.

"For the part which the Indians of New York took in saving this continent for Anglo-Saxon rule, we cannot well accord them too much honor, and we should here remember that, in the efficient work they did, much was due to the federal idea in their government through which they had been raised to their wonderful efficiency in war. That federal idea was conceived and wrought out on New York soil in the upper Hudson Valley.

Mr. F. W.
Halsey

"In the brains of those red men of the forest, and not in the brains of Washington, Madison or Jay, the beginnings of federalism on the American continent are found. Those Indians for more than three centuries held the component parts of their organization together. Long before the white man had made our lands his own, before he had built his highways, his towns and cities, and had planted in New York a population of eight millions of souls, this dusky warrior race had needed out our territory as a kind of empire.

"But their chief contribution to our civilization was in the help they gave in the war with France. Surely I need not remind this company what that victory of England has meant for your land and mine. I need not say that in place of Roman law it has given us all that we owe to Magna Charta, to the Bill of Rights, and to trial by jury; that instead of the Inquisition we have had religious liberty; instead of centralization of power and tyranny in office, the town meeting; instead of an ignorant populace such as darkens every hamlet in Spain, the little red schoolhouse; instead of a Louis XV, Thomas Jefferson; instead of a Duke of Alva, that finest type of an American citizen, that man who was born in a cabin scarcely better than the cabin of an Lequios Indian, and yet who rose to be the second Saviour of his country, Abraham Lincoln.

"When we approach the Revolution, the prominence of New York strikes us still more, simply because that is a more familiar theme. Historians, however, are coming into agreement as to the greater importance of the French War in its bearing on the future of North America. Independence must have come sooner or later, but had France secured control of North America, it seems unlikely that she would have lost it afterwards.

"The Revolution had its first battle-field near Boston; its closing strife took place far to the south, but the battles fought in the Middle States, in New York, Pennsylvania and New Jersey, form the most

principle would have to be applied to great disfranchised towns like Mr. F. W.
Halkey
Birmingham and Leeds.

"George Washington fought not only the battles of America, but the battles of the English people. Not in one world alone did he become the founder of free States, but in two lands and in two worlds. We have erected to his memory on the banks of the Potomac the tallest shaft in all our territory. A monument equally imposing might well be set up in everlasting honor of him on the banks of the Thames in London.

"I need not further enumerate here the Revolutionary events for which New York supplied the scene, chief among them all the Burgoyne campaign, from which we must date the turning of the tide, with the loan we got from France and the soldiers France sent us. Nor need I enumerate those minor events that we call the Border Wars, those wars of arson, massacre, and ambush-fighting, which laid desolate a vast territory along the Mohawk and Susquehanna, reducing it to a land of complete desolation where the principal population that remained at the end of the war consisted of 300 widows and 200 orphans. As it was in the battle of Golden Hill that the first blood of the Revolution was shed, so here in New York nearly fourteen years afterward, the last scene of the war took place when the redcoats sailed from the Battery on that late November day we still celebrate as Evacuation Day.

"New York throughout the conflict had maintained a loyalty and an devotion in war severely exacted in importance by the territory she supplied for the scenes of conflict. From first to last she held to her old place—parade, imperial New York. Thus, very largely on her soil, from prehistoric times when the idea of federation first was suggested by the New York Indians, down through the war with France and the struggle with England, were laid the foundations of that new and grander empire of democracy of which New York now forms so conspicuous a part—a that empire reaching from the stormy sea that divides our land from Europe to the placid waters that lave our Western shore, from the great unsalted seas of the north to the tropic Gulf.

"In conclusion, I accept the custody of the Memorial Arch in the name of the American Scenic and Historic Preservation Society, custodians of the Stony Point Battlefield State Reservation for the

people of the State of New York, promising, in its behalf, to cherish and guard it as a worthy memorial of those who so bravely fought here for the independence of our Republic."

CHAIRMAN ST. WAPO. "The next in order is an address by Mrs. Frank E. Fitz, President-General of the Daughters of the Revolution."

Mrs. F. E. FITZ. "Mr. Chairman, Distinguished Guests, Madam State Regent and Daughters of the Revolution: The pulse of every true daughter beats with pride to-day as she sees accomplished this noble achievement of one of her sisters. It is my privilege to be present and present for them their heartfelt congratulations. Every act of ours commemorating the spirit of the Revolution serves to perpetuate the principles for which the colonists fought. Our tributes serve a two-fold purpose: they honor the man who did, and they silently but effectively urge their descendants to deeds of greater patriotism for this and future generations.

"The history of the civilized world has been perpetuated in monument, tablets, busts and medals. Public memorial have become the shrine where is offered the adoration of an appreciative people. Magnificent statues and splendid architecture represented the ideal of ancient Greece and Rome, and to-day we dedicate a memorial to the deeds and ideals of one who shared in the founding of a new Nation. Men without ideals and ideals without men never achieve any true greatness. The distinguishing trait in the struggles of our forefathers is found in the sacrifice for the sake of principle. It was not for the lost and glamor of arms that they yielded life and property. The American Revolution was an achievement for freedom, manhood and self respect. The highest privilege entrusted to our Society is that of in lividly commemorating the heroes of our own State.

"In 1787 the people of Concord, Massachusetts, erected a granite shaft to the valor of the men of their own town who died in the first struggle for liberty. This was the first public memorial in American soil to the Revolution. One hundred and twenty years later a thankful people are establishing another memorial. May the spirit never cease until America has fulfilled its destiny.

"Distinguished men and women are sharing in the homage of to-day. Their presence and the part they take in these ceremonies

proves the value of the work of these women, whose endeavors are crystallized in yonder stone structure. The work begun here is before the whole people. As visitors come here from all parts of the Nation, may they bear away with them inspiration for greater personal patriotism, and so contribute to this memorial result in blessings throughout our lands. May it be an altar of worship for a free man in a free land."

CHAIRMAN SEWARD: "The next and the last speaker will be Mr. Henry W. Bush-Brown, the designer of the Arch."

MR. H. W. BUSH-BROWN: "Mr. Chairman, Your Excellency, ^{Rev. Mr. Madison} ^{Evangelist} ^{and} ^{Commissioner} ^{My} ^{topic} ^{here} ^{suggests} ^a ^{long} ^{address,} ^{but} ^I ^{will} ^{not} ^{keep} ^{you} ^{more} ^{than} ^a ^{moment.} ^I ^{wish} ^{merely} ^{to} ^{state} ^{that} ^{it} ^{is} ^{my} ^{function,} ^{as} ^{one} ^{of} ^{the} ^{artists} ^{of} ^{the} ^{country,} ^{to} ^{perpetuate} ⁱⁿ ^{some} ^{enduring} ^{form} ^{that} ^{kind} ^{of} ^{art} ^{which} ^{our} ^{Country} ^{has} ^{created,} ^{that} ^{goes} ^{to} ^{make} ^{the} ^{thrillants,} ^{the} ^{thrillants} [—] ^{those} ^{who} ^{work} ^{not} ^{for} ^{self,} ^{not} ^{for} ^{their} ^{own} ^{grand} ^{dignities,} ^{not} ^{for} ^{the} ^{accumulation} ^{of} ^{wealth,} ^{but} ^{for} ^{others,} ^{that} ^{the} ^{world} ⁱⁿ ^{which} ^{they} ^{live} ^{and} ^{those} ^{who} ^{may} ^{follow} ^{after} ^{them} ^{may} ^{have} ^a ^{freer} ^{and} ^a ^{nobler} ^{and} ^a ^{higher} ^{life.} ^{We} ^{erect} ^{this} ^{memorial} ^{here} ^{to} ^{one} ^{of} ^{the} ^{highest} ^{thrillants} ^{that} ^{this} ^{country} ^{has} ^{ever} ^{seen} [—] ^{Anthony} ^{Wayne.} ^{Long} ^{may} ^{we} ^{have} ^{such} ^{men.} ^I ^{will} ^{not} ^{call} ^{them} ^{noble,} ^{because} ^{they} ^{are} ^{the} ^{thrillants} ^{who} ^{help} ^{us} ^{hold} ^{ourselves} ^{up} ^{to} ^a ^{standard} ^{of} ^{life} ^{to} ^{which} ^{all} ^{and} ^{everyone} ^{should} ^{aspire.}

"I thank you for your attention."

CHAIRMAN SEWARD: "The audience will arise for the benediction."

REV. DOUGLAS TILTON, JR., D. D.: "Now, may the peace of ^{Rev. Dr.} ^{Tilton} God, which passeth all understanding, keep your hearts and minds in the knowledge and love of God, the Father, of His Son Jesus Christ our Lord, and the blessing of God Almighty, the Father, the Son and Holy Spirit, be and remain with you always. Amen."

CHAPTER XXIX

DEDICATION OF VERRAZZANO MONUMENT

ON Wednesday, October 6, 1909, at 4 P. M., a monument was dedicated in Battery Park, New York City, to Giovanni da Verrazzano, the Italian navigator, who, under the auspices of the King of France, entered New York Harbor in 1524.

The monument was erected by *Il Progresso Indo-Americano*, Mr. Carlo Barsotti, editor, and was dedicated with great enthusiasm by the Italian colony of the city, with the official recognition of the Hudson-Fulton Celebration Commission.

De-
scrip-
tion of
Monu-
ment

The monument, which was designed by Mr. Ulton Nimmo, consists of a bronze bust of Verrazzano two meters high, mounted upon a granite pedestal three meters high. In front of the pedestal stands a draped figure on bronze, three meters high, representing "Right" holding in her left hand a torch and in her right hand a sword. At her feet on the right-hand side is an open book. Upon Verrazzano's breast place is the fleur-de-lys of France. Upon the pages of the open book are the dates "MDXXIV" and "MCMIX." On the front of the base is the name "Giovanni da Verrazzano." On one side of the pedestal is the inscription: "Per la verità, l'ecumenismo, per la giustizia, della storia, questo monumento rivendicatore cresce *Il Progresso Indo-Americano*, Carlo Barsotti, editore, la colonia italiana concorde, il VI Ottobre MCMIX." On the opposite side is the quotation: "There can be no doubt whatever as to Verrazzano's entering New York Harbor in 1524.—John Fiske." On the back of the pedestal is the following: "Anno 1909. America e Italia ricordano Giovanni da Verrazzano Fiorentino, che primo Europeo percorrendo altro più fortunato del quale ebbe il nome navigò questo

acque le cui terre erano destinate per una delle città capitali del mondo."

The Verazzano Monument Committee under whose auspices the monument was erected and dedicated consisted of an Honorary Committee and an Executive Committee, as follows:

Honors y Comités

Parties: His Excellency Baron Edmondo Mayor des Planches, Ambassador Extraordinary and Minister Plenipotentiary of Italy; and His Excellency Jean J. Jusserand, Ambassador Extraordinary and Plenipotentiary of France.

Supreme Honorary Presidents: Comm. Europe Nimmens, Gen. Stewart L. Woodford, Mr. Herman Kilder, Col. Henry W. Sackett, and Comm. J. P. Morgan.

[illegible]

Divergence Composites

$$\{C_{1,1}^{\pm}, \dots, C_{1,n}^{\pm}, C_{2,1}^{\pm}, \dots, C_{2,n}^{\pm}\} \text{ r.o.i.}$$

Vincenzo Bellini, Gioacchino Rossini, Antonio Quomodo, Salvatore Pappalardo, Domenico Bonanno, Antonio Franchi, Nicola de Martino, Agostino Pappalardo, T. Palmieri, Vito Ruffino, Cav. D. del Papa Bartolomeo del, Enrico D. Cambria, Carmelo C. Martino.

Secretaries: Luigi Baccin & Mario Piccini, Nadia J. di Paola.
Treasurer: William Becken Roach.

At 11 a. m. a procession which included about 100 different ^{THE PRO-} ~~organiza-~~ ^{cession} formed in the street east of Broadway in the vicinity of Madison Square, and under the Grand Marshalship

of Mr. James E. March proceeded down Broadway to Battery Park. The sailors from the Italian ships *Etna* and *Etruria*, commanded by Capt. D'Angelo, elicited particular applause. Enormous crowds of spectators gathered at the places of assembly, along the line of march, and in Battery Park. At the latter place, there was a distinguished company upon the official platform. The marines from the *Etna* and *Etruria* were stationed on either side of the monument as a guard of honor.

The exercises were opened by the venerable Monsignor Lavelle, who represented the Archbishop of New York and who pronounced a benediction.

General Calman. Then a little blond, blonde-haired girl, Genevieve Gehrmann, unveiled the monument, saying, in English:

"I am proud to unveil on this day with my little hand a monument which ought to be a cause of gratefulness for all New Yorkers, for it was Giovanni da Verrazzano who discovered these waters of the North River. All you who are present know what history says; but children like myself do not know it. I would like that all the children of New York should know that it was an Italian who discovered the island of Manhattan. I would like that all children should repeat in this moment with me: Hurrah for Verrazzano! Hurrah for Italy! Hurrah for America!"

The hurrahs of the child were taken up and repeated by the crowd with enthusiasm.

General Borsoti then spoke in the Italian language substantially as follows:

"If the *Piagnolo* law is ever fully fulfilled, after a few months from the day on which it proper, of the idea, its expressed vow and its happy day. In the name of the Italian, it gives to the City of New York the monument to Giovanni da Verrazzano, the first navigator who saw the estuary of the excellent river which later became the mirror of this cyclone metropolis."

"This monument due to the genial and artistic mind of Ettore Ximenes and sculptured by his master hand, will stand here near the waters of the Bay which is already one of the great commercial centers

of the world, an imperishable sign of that ardent love which the
 Italians entertain for the memory of their great men, and shows that
 if the Americans have known how to create an immense city, growing
 year by year to enormous power, coordinating all the energy of her
 diverse population — the Indians, to whom such purpose of greatness
 and prosperity are not strange, practicing the nobility of labor, have
 however the stupendous possibility of giving thought and work to
 the marvelous accomplishment of the ideal.

Mr.
Charles
Barsotti

"The monument to Giovanni da Verrazzano is not only an expression of gratitude but a most deserved vindication. It was the Florentine navigator who first, in 1492, after many days of navigation — and not by chance, for on 11th of April from Dieppe with the charge from Francis I of France 'to discover unknown lands' — discovered a land under 32 degrees of north latitude, now North Carolina; and after going further up entered a river and saw the Island which the natives called Manhattan and having cast anchor he explored the land of Manhattan which he called New France and only for lack of victuals, after reaching 32 degrees of latitude, was it decided to return. The ship Dauphine, which had on board the courageous explorer, returned to France to the south port of Dieppe, from which he sailed, the 8th of June, 1492, after having sailed 1,200 leagues from the Island of Madeira toward the west and 700 miles with his prow toward the north.

"The audacious enterprise which history has registered in her indelible pages — and which to-day receives the applause of a people through the initiative of Il Progresso and the cooperation of our colony — becomes immortalized with the divinization of art.

"It is hence so precious that at this festival — which is the glorification of Italianism — our fathers are present, the youth of Italy which always aspires to the fast honors of the fatherland and the hope of a bright destiny. While the plaudits resound about the figure of the ancient navigator, they are able to see that the crowds of our workmen, populating the offices and workshops of this vast city of the world, have a work not less dignified and not less noble than their country that far from being an ornamental and useless crowd, they are animated by a dream of better and that of this dream, the monument to Verrazzano — like those of Garibaldi, Columbus, and Verdi — is a fervid attestation.

Mr. Charles Barsotti. "Appropriately to the splendid and profound moral significance of to-day's event, the chivalrous people of France are found fraternally with ours, to the end that the epithet of Verrazzano might be also an index of the indestructible vitality and latent force of the Mediterranean spirit. Once again, in effect, and around the monument of a distinguished Italian cosmographer who was a courageous captain of Frenchmen, our sons of the sea upon which Ulysses sailed conserve, in a foreign land, the intangible heredity of greatness which comes from Greece, from Rome and from the Renaissance."

After a tribute to the patriotism of the Italian colony, the speaker addressed the acting Mayor in English as follows:

"And now, honorable representative of the Mayor of New York, the Italian colony has the honor to give, through me, the monument which under the auspices of *Il Progresso Italiano-Americano* has been erected to the glory of Giovanni da Verrazzano. This new work of art symbolizes the nobility, the force and the acumen of another Italian. May it be a pledge of the high promise which the Italians here make; may it inspire them to the virtue of their great men, and to labor peacefully and fruitfully for the greatness of the city which receives them as sons."

Mr. P. H. McGowan. The Hon. Patrick F. McGowan, President of the Board of Aldermen, replied, saying it was a singular honor which the Italians of New York conferred upon him to accept this great monument in the name of the City of New York. He said that the City of New York was great and beautiful because the Italian citizens with their ideals of art and beauty, of their native land, had contributed generously to make it great. He accepted the monument which, he said, would perpetuate the name of the navigator who first saw the water of New York harbor.

Admiral Braccioli. Admiral Braccioli of the Italian navy then addressed the assemblage in Italian. He said that Verrazzano was entitled to a post of honor with Columbus, Vesputius and Cabot. He then reviewed the circumstances of Verrazzano's voyage, saying that the King of France was induced to promote the enterprise

because he believed there was a passage from the Atlantic to the Pacific north of that found by Magellan. Verrazzano therefore searched the coast for such passage from Florida northward. This voyage would have remained enveloped in complete obscurity, he said, if it had not been for a letter which Verrazzano wrote from Dieppe to the King of France dated July 8, 1524. He cited publications containing copies of this letter, and then recalled the principal points of the voyage. In closing, he said that the Italian residents had performed a patriotic work in erecting at the mouth of the Hudson this monument to the memory of their brave navigator. He paid a tribute of appreciation to Mr. Barsotti, chairman of the committee, and to Mr. Nimenes for this ideal product of his art and concluded:

"We ought to be particularly grateful to this hospitable country, to the municipal authorities, and to the government of the United States, which, consenting to translate our thought into act, has efficiently contributed to affirm the fact and to preserve the record for future generations."

The Marquis Montagliani, Italian Ambassador, then spoke. ^{Ferruccio}
He paid a tribute to the art of Mr. Nimenes, and then said that ^{Monta-}
nobody could deny that Verrazzano first discovered the majestic ^{gliani}
river which was named after Hudson a century later. But, he said, the monument was not alone a vindication of Verrazzano. It was also a tribute to the sublime Italian genius, the grand Latin genius which led its sons to conquests of science not less than of letters and art. He acknowledged the different qualities of the Anglo-Saxon, and paid his tribute to Hudson who explored the river beyond the bay which Verrazzano entered, who sounded the course of the river and who entered into relations with the Indians. The union of the two races — the Latin and the Anglo-Saxon — in what he called "this noble American land," formed a race more complete and more per-

fect, which promised to advance more and more in the high road of civilization. The Italian immigrants, he said, brought to this country not only the strength of their arms and the activity of their labor, but they also brought the Italian genius, their noble ideals, their artistic sense, their living intellectual life and the sublime contributions to the sum total of human thought. In this grand republic of America, the Italians had a glorious opportunity to use their talents, and he said it was their duty to require this by industriously laboring assiduously with all their talents and with all their intelligence. He concluded by saying that he brought to the Indians of New York the salutation of their mother country.

Mr. Lewis
St. Clair. The Italian Ambassador was followed by Mr. Louis Steckler, representing the Executive Committee of the monument organization. He said in part:

"We have gathered here to day to pay tribute and our debt of gratitude so far as lies in our power, to the memory of one of the greatest men in his chosen calling that ever lived—to a man who, when navigation of the high seas was fraught with the greatest perils, and when only the most daring went in quest of the unknown and untraveled portions of the great ocean, was probably the greatest navigator of his day and age. It is to honor the great name of that gallant and brave follower of the sea, Captain John da Verrazzano, that we come here to dedicate this monument.

"For nearly two weeks millions of our own people, thousands of distinguished guests, representatives of the great nations of the world have in an extraordinary and magnificent manner been engaged in honoring the great deeds and memory of Hudson, the first European navigator of the river that bears his name, and of Fulton, whose boat, the *Clermont*, was the first to navigate that river by steam.

"We all delighted to join in honoring the justly earned and undying fame of these distinguished pioneers in their respective achievements, and it is with hearts aching with memory of what they did in their respective times that we assemble here to-day to dedicate this monument to the everlasting fame of Verrazzano, in order that his great achievements as the discoverer of New York Bay and the grand river

that empties into it may be ever recalled to the mind of the general-
tion to come as they gaze upon this great work of one of the greatest Mr. Louis
Steckler
sculptors of today.

"It is gratifying to see so many here to do tribute to the memory of Verrazzano, the so far as we can learn was the first European to enter New York Bay, and who was the first white man to gaze upon the river that now bears the name of the man who navigated it some eighty-five years later. There can be no doubt but that Verrazzano was the discoverer of the Hudson, and that Hudson was the first European to navigate it.

"While it is not our intention or desire to belittle or in any way minimize the gallant act of Henry Hudson in navigating that great river in his staunch little ship the Half Moon in which he braved the perils of the sea, and the replica of which probably all of you have seen in the naval park, or at anchor, we do assert in pride and confidence that it is to the great Italian navigator Verrazzano that is due the honor, credit and glory of being acclaimed for all time as the discoverer of this magnificent bay and the beautiful Hudson River. He was the one European who found the way to this shore and gave to the world in records preserved to the present day the news that he had found this magnificent gateway to this section of this great continent, and in his report to the King of France, under whose flag he then sailed, he makes mention of the river that now bears the honored name of Hudson.

"It was Verrazzano who showed the way to other European navigators to this bay and river. Can any man say that Hudson had not heard of the discovery of Verrazzano, made some eighty-five years before he, Hudson, sailed up and navigated the river? We do not know, but we do know that it was Hudson who first navigated that glorious river, and we honor him and his gallant followers for their deed. But is it not possible that had Francis I of France followed up the discovery of Verrazzano as did Holland, under whose flag Hudson sailed, it might have been the French and not the Dutch who first settled this section of the country?

"That we are not here claiming too much when we acclaim da Verrazzano as the discoverer of the Hudson River is clearly established by records and is accorded by historians of the highest repute. In connection with his discovery, Fiske, the historian, says: 'There

"But more than all, let me congratulate you, Mr. President of the Committee, and you who have collaborated with him, and you Italian citizens of New York, for what you have done — for what you have done for the country of your origin and for the country of your adoption."

Mr. H. W. Warren Higley, Chairman of the Dedications Committee of the Hudson-Fulton Celebration Commission, spoke ^{for} Warren Higley, as follows:

"I have now come to deliver a discourse. I have come only to offer you my congratulations upon this splendid triumph. A few days ago, in my official capacity, I attended the laying of the first stone of the monument to Hudson; now, in my official capacity, I come to the completion of your work and the work of the Hudson-Fulton Celebration Commission, saluting the memory of him who discovered this bay and first touched the shores of the Hudson River.

"This celebration does not conflict with the Celebration of Hudson. It gives it dignity and unity. The great Celebration would not have been complete if you had not erected this monument and your work would not have been complete if the Hudson-Fulton Celebration Commission had not come to give you its salutation and its approval.

"Men do not forget what happens, and those who have achieved have no need to forget it solely because their achievements have not been remembered by the clamor of their contemporaries. But it is the duty of posterity to record them and to honor them for their greatness."

"I am sure that you faithful to your grand tradition, will help to make our country better and stronger. I am glad to be able to say that one of the reasons for this faith in the future of the country is that I believe in you and in your work."

CHAPTER XXX

AERONAUTICAL EXHIBITIONS

THE extraordinary advance in the science of aerial locomotion during the year 1927 and the early part of 1928, foreboding still greater achievements in that field in the near future, led to the suggestion by the Hon. William Bord in April, 1928, that a demonstration of the capabilities of flying machines be a feature of the Celebration. This suggestion was especially appropriate to the two fundamental ideas underlying the Celebration, and there was something peculiarly fitting, even dramatic, in the thought that in a commemoration which recalled the days when the Hudson River was navigated only by canoes, and which celebrated the advent of Hudson's sailing vessel and Fulton's steamboat, the climax of three centuries of progress should be marked by the navigation of the river -- or a part of it -- by air-ships.* The suggestion for a demonstration of aerial locomotion was therefore adopted, and on April 22, 1928, Mr. Bord was appointed Chairman of a Committee on Aeronautics. Owing to his multifarious duties on other committees, however, Mr. Bord was relieved of the Chairmanship and on November 30, 1928, the Hon. James M. Beck was made Chairman.

On May 26, 1929, the Committee recommended to the Trustees the employment of Mr. William J. Hammer, a Consulting Electrical Engineer, prominently identified with aeronautical matters, a Secretary and expert to the Committee, the Chairman stating that for some time previously Mr. Hammer had very kindly been assisting the Committee gratuitously and had mapped out a plan for an aeronautical display. Soon after this recommendation, Mr. Hammer was retained professionally

* This idea is also featured on the back cover of the front cover of the Report.

by the Committee and assisted it in arranging and carrying out its plans.

Various features for an aeronautical display were proposed and considered, but proved impracticable for one reason or another. The suggestion that a Zeppelin air-ship from Germany be secured was met by the statement of Count Zeppelin that owing to the enormous size of his dirigibles and the difficulty of transportation, it was impracticable to send one to America. It was also proposed that a Perseval dirigible and a Clermont-Bayard dirigible be obtained, but it was found upon investigation that while the expense of securing the two dirigibles from abroad would be only \$12,000 each or a total of \$20,000, the expense of a double balloon-house, gas generators, gas pipe, according to the requirements of the foreign companies, would fall far short of \$100,000, and this did not include any arrangement for housing the air-ships at Albany in case it was decided to enter them in the proposed flight from New York to Albany for the \$10,000 prize offered by the New York World. Brigadier-General James Allen, Chief Signal Officer of the United States Army, stated that the aeronautical plant at Fort Omaha had cost \$74,924.20. The engagement of foreign dirigibles was therefore out of the question on account of the attendant expense. It also proved to be impracticable to secure certain American dirigibles including the one recently bought by the Federal Government from Captain Baldwin, because of the lack of appropriations and the shortness of the time for preparation.

An International Aeronautical Congress, an International Aeronautical Exposition, and an Aeronautical float in the Historical Parade were also proposed, but were not feasible for lack of time and money. The Committee therefore decided to confine its attention to illustrating the status of the science of flying by means of heavier-than-air machines.

In connection with this phase of the subject, the Chairman

unavailable
Features

Unavail-
able
Features

of the Aeronautics Committee, Mr. Beck, went to Europe for about six weeks, and interviewed various aviators and their representatives with a view to securing their participation in an International Aviation Meet. After considerable personal outlay of time and money, for which Mr. Beck waived any claim for reimbursement, he learned that it was impracticable to secure the attendance of the leading foreign aviators, such as Farman, Blériot, de la Grouge, Count de Lambert, Latham, and others, owing to the exorbitant sums which these gentlemen demanded; to the fact that a dozen or more important aviation meets were to be held during the next few months at Spa, Frankford, Berlin, Brussels, Rheims, Paris, Vichy, Dunkirk, Platschina, Odessa and elsewhere; and to the large prizes offered in various parts of Europe for special flights, such as across the English Channel, from London to Manchester, etc.

Wright
and
Curtis
Engaged

Finally, the Committee concentrated its efforts on securing exhibitions by Mr. Wilbur Wright and Mr. Glenn H. Curtis, with both of whom exclusive contracts were made.

The contract with Mr. Wright provided that between September 25 and October 9, 1909, to the extent of his ability and so far as weather and other conditions permitted, he would give at New York a full illustration of the possibilities of flight through the air by his aeroplane; that he should be under no obligation to make any flight if, in his judgment, the conditions were unreasonably hazardous; that if under such conditions he should be unable to make any one flight exceeding ten miles in distance or of one hour's duration during the Celebration, he should receive \$5,000 to cover his time and expenses; but if he should make one or more flights exceeding either ten miles in distance or one hour in duration, he should receive \$15,000.

The contract with Mr. Curtis provided that he should attempt to make a flight in his aeroplane from Governor's Island up the Hudson River, around a buoy or other mark near Grant's Tomb (a distance of ten miles) and return to Gover-

nor's Island; or, in the event that such a flight should prove impracticable, to attempt flights across the Hudson River from a place near Grant's Tomb to the Palisades on the New Jersey shore and return, for the successful execution of either of which alternative attempts he was to receive \$5,000. He was also to be permitted to enter any competitions held under the auspices of the Commission.

Through the courtesy of Major-General Leonard Wood, Governor's U. S. A., commanding the Department of the East, the Commission secured the use of an area of 96 acres on Governor's Island for the starting place. This was an ideal site, being a sandy plain forming an artificial extension of the island made by filling in material dredged from the adjacent channel. The field was further adapted to the use of the aeroplanes by the removal of certain telegraph poles, telephone poles, and brush hedges, the leveling of some rough stretches of surface, and the erection of two aeroplane sheds. Each shed had four doors, opening in pairs and sliding past one another on an overhang, thus leaving the entire broad-side of the shed open for the ingress and egress of the machines.*

Through the courtesy of Major-General Wood, Major Samuel Robert, U. S. A., Chief Signal Officer of the Department of the East, was inclined to assist the Secretary of the Commission in arranging and carrying out a system of signalling from Governor's Island by means of which the public might be notified of the flight. These signals were transmitted visually from Governor's Island to a central station in the tower of the Singer Building at No. 149 Broadway, whence they were similarly transmitted to the towers of the Metropolitan Life Insurance Building at No. 1 Madison Avenue, the New York Times Building, the Brooklyn Eagle Building, the Williamsburg Bridge, and the Queensborough Bridge. In

* The sheds were erected and fitted out by the Commission at Albany, New York, on May 25, 1910, and at Fort Schuyler, New York, on July 1, 1910. *Engineering News-Record*, July 1, 1910.

addition to a code of flag signals operated at each of these points by members of the United States Army Signal Corps, signal bombs were exploded. Arrangements were also made to communicate signals by wireless telegraph to the international fleet in the Hudson River in order that they might hoist signal flags, and the newspaper and ticker services arranged to bulletin the flights upon receipt of telephone messages sent out by special operators detailed for this purpose.

Flights
by
Wright

The flights by Mr. Wright were very gratifying and met the most sanguine expectations of the Commission. He had his machine -- a new one -- at Governor's Island on Saturday, September 23, and before the day was done the aeroplane had been "tuned up," the engine propeller had been tested, and everything was ready for trying at the first favorable opportunity. Sunday is *his* day with Mr. Wright, and he will not fly on that day from principle. Monday was rainy and Tuesday was windy and threatening.

On Wednesday, September 29, the weather conditions were ideal, with a soft steady wind from the west. Mr. Wright arrived at the Island shortly before 9 A. M. The machine was promptly taken from the shed to the sand lot, placed on the monorail facing due west over the harbor, and the propeller was started. Mr. Wright, after listening to the rhythm of the propeller for a moment with apparent satisfaction, walked forward and took his seat in his machine. At 9.15 he gave the starting signal and with an easy glide left the ground. After making two circles over the aviation ground, he swung eastward to the Buzemilk Channel, followed it to the northern end of Governor's Island, turned westward, and returned to the starting point, having completely encircled the Island. He was in the air seven minutes and ten seconds and covered a distance of about two miles, his height varying from 40 to 100 feet. During the flight he was loudly saluted by the whistle of the tugs, steamboats and factories from which he was seen.

At 10.18 A. M. he began a second flight. Upon leaving the monorail, he steered straight for the Statue of Liberty on Bedloe's Island, a mile and a quarter to the westward. As the aeroplane appeared in the air, it was again saluted with a din of steam whistles which almost drowned out the sounds of cheering human voices. Among the saluting vessels was the great ocean liner *Lusitania*, just starting for Liverpool, whose timely passage gave contrast to the scene. Her decks were fringed with passengers enthusiastically waving their handkerchiefs. As the aeroplane with its whirring propellers flew out over the harbor, a sea gull, apparently bewildered by the sight and sound of the strange aerial vision, fluttered back and forth and finally settled down on the water. Continuing his course, Mr. Wright encircled the Statue of Liberty and returned at once to the Island, having been in the air less than five minutes.

If the favorable weather had continued, Mr. Wright would have made another flight about 4 P. M., but by that time a strong wind had arisen creating unsatisfactory conditions. At 5.19 P. M., however, he ascended again and remained aloft twelve minutes.

These flights by Mr. Wright were the first ones over American water, and at that time the only ones over water anywhere except those by Blériot who crossed the English Channel and Latham who nearly crossed the Channel.

On Monday, October 4, Mr. Wright made his fourth and most spectacular flight from Governor's Island to a point about 1,000 feet south of Grant's Tomb and return. The aerial conditions were again almost ideal, the wind blowing at the rate of only about ten miles an hour. Mr. Wright reached the Island at 8.30 A. M., and his machine was promptly taken out and made ready. Two American flags were suspended from the front rudder and a tiny flag fluttered from the corner of his air tight canopy. A life preserver was placed on the machine near his feet.

Flights
by
Walter
Wright

The aeronaut left the ground at 9:53 A. M. and steered straight for the water. Passing west of Castle Williams and about 25 feet higher than that structure but not over it, he started directly up the great river which Hudson had navigated 350 years before in the slow going Half Moon. The conflicting air currents at the Battery made the aeroplane waver a little in its course, but did not cause Mr. Wright to waver in his purpose to reach Grant's Tomb. The chorus of steamy birds now acclaimed the flight and crowds of people rushed to points of vantage to see the man-bird making his historic flight. Speeding like an all star over the river and above the sluggish water craft of all descriptions below, he soon reached the southern end of the great international war fleet stretched for ten miles north of 42d street. From these death-dealing machines, any one of which he could have destroyed, the daring aviator was gazed at in wonder and admiration by the men-of-war-men who saluted him with waving colors and blasts of their steam whistles.

Reaching Grant's Tomb at 10:13:30 the aviator rose 20 or 25 feet higher to make the turn, and when about 1,000 feet north of the mausoleum he made a semicircle toward the New Jersey shore. In doing this, he passed nearly over the middle of the British war ship Drake. The turn, which occupied about three-quarters of a minute, was executed at a height of from 100 to 150 feet.

On the return trip the aviator had the wind in his favor and made better time, reaching Governor's Island at 10:26:25, and having been in the air 33 minutes and 33 seconds.

The air-line distance from the starting point to Grant's Tomb is reckoned officially at 9.3 miles. The total distance traveled, therefore, in one of the most perilous air-flights made up to that time, was about 20 miles. The flight northward was made in 20 minutes and 30 seconds in the face of the wind, and the southward trip in 13 minutes and 3 seconds, an average

of about 36 miles an hour for the round trip. The wind velocities on October 4, as observed at Fort Wood, New York Harbor, and at the Weather Bureau, New York City, were as follows:

HOUR	FORT WOOD	WEATHER BUREAU	Wind Oct. 4 1909
7.00 A. M.	5 miles	9 miles	
7.30 A. M.	5 "	10 "	
8.00 A. M.	4 "	10 "

5.30 P. M.	4 "	6 "	
6.00 P. M.	4 "	5 "	

As far as the observer could judge, his view of height was about 200 feet. He could see over the Palisades but was not so high as the Metropolitan Life Insurance Building tower. He said that the air currents distorted by the skyscraper buildings were bothersome, and particularly a puff which he experienced at 23d street.

In the afternoon of the same day Mr. Wright intended to fifth make another flight of far greater difficulty and interest, but an unfortunate accident precluded further air-voyages. It would

was his intention, as he confidentially stated to Chairman Beck, to rise from Governor's Island, go up the East River, crossing over the bridges, return to Governor's Island, manoeuvre around the Battery and the Statue of Liberty and then go up the North River. Further than this, he did not disclose his purpose, but as he had taken sufficient fuel to make possible a journey of five hours and as he had previously expressed his intention, if the conditions were favorable, to make a complete circuit of Manhattan Island, there is reason to believe that it was Mr. Wright's intention to terminate his part in the Celebration by a spectacular circuit of Manhattan Island. On that afternoon, the largest crowd of the exhibition gathered on the Island. About 3.30 the machine was brought out to the starting point and at 3.50 an attempt was made to start the motor, but the machine, which had made such a beautiful flight in the morning, seemed to be in a less responsive mood. After nine ineffectual attempts to start the propeller, there was an explosion, and a cylinder head blew out and sank into the sand. Mr. Wright, disappointed but imperious, spread out his hands and said: "No more flights in New York." But he had already vindicated the confidence reposed in him by the Commission. Mr. Beck subsequently said:

Estimate
of
Wright's
Flights

"I believe I voice the sentiment of all the members of the Aeronautics Committee in expressing our satisfaction with the manner in which Mr. Wright has fulfilled his contract. Mr. Wright agreed to bring his aeroplane to New York and to remain here at least from September 25 until October 3. The details of the flights and the question whether they could safely be made under prevailing weather conditions were left entirely to his discretion. He came to New York some days in advance of September 25 and was met during the first week of the Celebration with unfavorable weather conditions with the exception of Wednesday, when he made his first flights. He remained after October 3d and on the 4th made double the

ten miles in distance required by the contract. He was then ^{destinate} under no obligation to make other flights, but he fully ^{of} intended to make a flight Monday afternoon which would ^{Wright's} have surpassed his great achievement of that morning, and was only prevented by the unfortunate accident to his motor, which made other flights impossible. Mr. Wright, by making his noteworthy flight around the Statue of Liberty and his even more remarkable flight to Grant's Tomb and return, fully met the most sanguine expectations of the Aeronautics Committee. "No aviator, in my judgment, has made flights under more difficult or dangerous conditions. His achievement has written a new chapter in the history of aviation and has given the Celebration a unique feature of extraordinary interest."

The spirit which prompted Mr. Wright to take part in the Celebration was not less creditable than his achievements. Until he signed his contract with the Hudson-Fulton Celebration Commission he had steadily refused to make any flights merely for spectacular purposes. The only flights which he had made elsewhere were given as demonstrations in connection with the sale of his machine to our own Government and foreign Governments. After his successful flights in France and Germany, he had received offers from various parts of the world to give flights for exhibition purposes, and there is reason to believe that many were offered him largely in excess of that which this Commission gave him for his part in the Celebration. Both Mr. Beck and Mr. Hammer, who made the contract with Mr. Wright, were satisfied that Mr. Wright consented to take part in the Celebration because it was public and patriotic in character, and in hazarding his life by his journey through the air up the Hudson, Mr. Wright consciously or unconsciously gave to the Celebration a certain historic continuity, adding to the historic trip of Hudson in his sailing ship and the historic trip of Fulton in his new steamboat an even more remarkable feat in making the same journey by an air-

Estimate
of
Wright's
flights

ship, which, weighing more than half a ton, not only defied the laws of gravitation, but, propelled by its own motive power, made the journey from the Battery to Grant's Tomb and return in faster time than any other existing method of transportation between these points. While Wright's historic flight up the Hudson has unquestionably been far exceeded, both in length and difficulty, since it was made, and while, with the rapid development of the aeroplane, it is evident that far greater triumphs await the aviator, yet the future achievements of the aeroplane will no more diminish the historic significance of his flight than the later trip of the *Lesitania* up the Hudson diminishes the historic interest of the Clermont's journey.

Clean
Currier
Week

The Commission's experience with Mr. Curtiss was less satisfactory. His machine arrived on Sunday, September 26, but he himself did not arrive until Tuesday, the 28th. While the mechanics were trying to put his aeroplane — a new one — in working order, his old and tried machine, in which he made his successful flights abroad, was on exhibition in a department store in New York City. On the ideal Wednesday, September 29, when Mr. Wright made three flights — one of them around the Statue of Liberty — Mr. Curtiss, before 7 A. M. achieved a flight of 26 seconds covering a distance of about 300 yards. Only a personal friend and an officer at the Island saw this venture. Thursday, Friday and Saturday slipped by, and Mr. Curtiss accomplished nothing more. On Sunday, October 3, toward sunset, in a fitful wind, he made another and more successful attempt to fly. As his craft, resting on its three wheels, started along the ground and mounted into the air, the spectators gave a cheer. He reached an altitude of from 60 to 100 feet and had reached the edge of the Island, apparently headed for the Statue of Liberty, when the aeroplane swerved and careened as if it were about to fall. A moment later, the aviator, evidently aware of traveling over the water, turned his vertical plane, and sailed around in a graceful semicircle over

the Island. Then the motor stopped and the aeroplane returned to terre firma, having covered about a quarter of a mile in about 45 seconds. This was not an official flight and the representatives of the Commission were not present to observe it. Early in the next morning, Mr. Curtiss' machine was packed up, and while Mr. Wright was making his triumphant flight over the Hudson River, Mr. Curtiss' machine was being crated along the road in boxes for shipment to St. Louis where Mr. Curtiss had another contract to fly.

CHAPTER XXXI

GENERAL COMMEMORATIVE EXERCISES

WEDNESDAY, September 29, 1909, was set apart in the plan of the Celebration for General Commemorative Exercises throughout the State, and a Committee on General Commemorative Exercises was appointed with Jacob Gould Schurman, Sc.D., LL.D., President of Cornell University, as Chairman. The duty laid upon this Committee was to request and to assist by pamphlets, correspondence and other means, universities, colleges, public schools, historical and patriotic societies, and institutions of learning generally throughout the State, to hold exercises commemorative of the events celebrated. By a mutual understanding with the Committee on Children's Festivals, the latter committee was given charge of the field in New York City, and arranged for the children's festival and the public lectures described in the next two chapters.

Historical
Pamphlet

The first work of the General Commemorative Exercises Committee was the issuing in February, 1909, of a 74-page pamphlet entitled "Hudson and Fulton." This brochure contained a brief history of Henry Hudson and the exploration of the Hudson River, with the historical background necessary for an understanding of the voyage of 1609; a condensed biography of Robert Fulton and description of the invention of steam navigation; a short sketch of the physical history of the river; a summary of the general plan of the Celebration; suggestions to municipal authorities, learned and patriotic societies, and educational institutions concerning forms of commemorative exercises; titles of appropriate songs; subjects for debates, essays and tableaux; suggestions for children's festivals; and a list of books bearing on the events commemorated. It contained a reproduction of John Collier's famous painting of

"Hudson's Last Voyage," a reproduction of Benjamin West's portrait of Robert Fulton, drawings of the Half Moon and Clermont, and an original map showing the routes of Hudson's four recorded voyages. Forty-one thousand copies of this pamphlet were printed and distributed gratuitously throughout the State. A little later, the Department of Education of the State of New York issued a handsome pamphlet of 64 pages entitled "Hudson-Fulton Celebration, 1609-1897-1899." This pamphlet contained numerous short articles on the Celebration, the events commemorated, the Hudson River, Henry Hudson and Robert Fulton; poems, suggestions for essays, debate, bibliography, constructive work, and reading; and portraits of prominent Americans, etc. It was profusely illustrated with pictures of famous persons and buildings, facsimiles of documents, and a folding map of the Hudson Valley. The front cover and the front piece were printed in several colors, and the whole pamphlet was a fine specimen of the printer's art. The circulation of 75,000 copies of this pamphlet by the Department of Education, and the greater copies of the Comptroller's pamphlet was of inestimable value in giving an intelligent conception of the significance of the great events celebrated.

The circulation of the pamphlets was followed by direct ^{Direct} personal appeal to the mayors of cities, presidents of villages, ^{Appeals} and the heads of educational institutions throughout the State to participate in the Celebration with vigor and zeal. The municipal authorities were requested to display the national colors upon municipal buildings. The universities, colleges, public schools, and historical societies were invited to hold exhibitions and literary exercises. And the citizens were appealed to generally to recognize the anniversaries in the manner most convenient. In some towns, the heads of the municipalities referred the communications to the school boards, by whom appropriate exercises were arranged. The principal universities and colleges, among them New York University, Colum-

CHAPTER XXXII

CHILDREN'S FESTIVALS

SATURDAY, October 2, 1899, was designated particularly as the day for observance by the children, and the exercises in New York City were under the direction of the Children's Festivals Committee, of which the Hon. Samuel Parsons, Landscape Architect of the Parks and formerly President of the Park Commission, is Chairman. For the following account of the children's observance we are indebted to Mr. Parsons:

On Saturday, October 2, approximately 35,000 children of the public, parochial and private schools and public institutions of the City filled all the available parks in Manhattan, Brooklyn, Bronx, Staten Island and other parts within the corporate limits and joined in ceremonies and exercises appropriate to the general celebration. The result was a memorable demonstration surpassing anything of its kind in the history of New York.

The City was divided into about fifty precinct districts, and each section was organized to contribute its share to the general celebration. With the cooperation of the public school authorities, a public school building was selected in each of the districts to form a rallying place for the children of that section under the jurisdiction of their teachers or other persons previously appointed.

The time for starting was fixed for 1.30 o'clock in the afternoon, and the exercise consisted of a short march to the nearest park or other suitable public place, where a representative program was carried out under the supervision of the local committee in charge of the ceremonies.

The Committee on Children's Festivals started diligently working the latter part of July by renting rooms in the St.

General
Arrangements

James Building, 1133 Broadway, and organizing an executive force, with workers in every precinct district, qualified, as far as the Chairman could determine, to arrange for bringing the parents, schools and societies into line with the projected plan—the idea being to give the children of the city a general holiday and enable them to bear as important a share of participation in the history-teaching event as any other class of the population. The task increased in difficulty as the plan developed, and the Committee encountered untold obstacles. It provided means, as far as possible, to enable the local committee formed in each district to assume the children, to get authority for the use of the parks, provide bands, form the little ones into bodies, drill them, devise or approve suitable programs and see that no casualties should occur as the result of possible negligence.

Court of
Honor
Scene

The affair was projected on a scale of magnitude never before attempted, and its success was due largely to the invaluable cooperation of the public school and police authorities, the assistance rendered by the executive staff of the Children's Festival Committee and the earnest work of the majority of the district workers and local committees. The festival assumed an extremely comprehensive and diversified character from the widespread participation of the children of all nationalities represented in Greater New York, and citizens of German, Dutch, Italian, Bohemian, Russian and Irish birth joined with those of native origin in their efforts to make Children's Day a never-to-be-forgotten event.

In the limited space of this chapter it is impossible to refer to every section in detail; therefore a general reference to some of the prominent features of the Celebration must suffice.

Court
of Honor

The Court of Honor in Fifth Avenue, between Fortieth and Forty-second streets, formed the rendezvous of one of the largest parades, including the pupils of six public schools, with whom were combined children from various church associa-

tions, settlement houses, the Association of Catholic Charities and uniformed members of the Lincoln Cadets and the St. Bartholomew Cadets. The costumed boys and girls of the church schools danced an Indian Snake Dance first, then a Dutch Dance and a minuet in colonial costumes. There were about ten dances, including a Japanese Dance by the colored girls of the Abyssinian Baptist Church Sunday School and a Peace Dance by little girls in white robes trimmed with blue. The last dance was Hungarian by girls in Hungarian costumes.

Thousands of children gathered in Mulberry Bend and pledged their loyalty to the American flag with impressive ceremonies. And there many thousands of children, scarcely without exception, were of parents who have within comparatively recent years emigrated to this country from nearly every other corner of the globe. From the schools of the lower East Side came children of many nationalities, Indian and Hebrew in the majority, with others from Syria, China, Japan, Turkey, Hungary, Spain, Greece, Portugal and so on through the nationalities of the earth.

The children of the Washington Heights schools went to Inwood Field, where they had woods, hills and the Hudson River as a setting for all sports of historical reproduction. There was a Half Moon on the river, manned by children in Dutch costumes, and more children, dressed as Indians, who attacked it with bows and arrows. Other reenacted Continental and English soldiers contending for the old stone house of the Revolutionary period, and the British flag was hauled down and the stars and stripes hoisted in its place.

In the Battery Park district, the Little Mothers' Aid Association, whose officers had drilled the children, started the day's ceremonies with a parade down Broadway from Chambers street to the Park, where the little ones, made up to represent Indians, Dutch settlers, Colonial dames, British redcoats and American soldiers, etc., marched around and around to the

applause of thousands. Then they represented the Landing of Columbus, the Landing of Henry Hudson and his meeting with the Indians, and other striking events of our history. The first New Amsterdam Dutch village was shown, the purchase of the Island by Peter Minuit was reenacted by the children, and on the greenward George and Martha Washington served tea. These scenes were varied by dances by little Syrian girls and whirling Dervish dances by Russian children.

Washington
Square

More than 500 children took active part in the program in Washington Square, where the Protestant Episcopal Mission Society enacted more than 200 children, who were formed on Blooming street and, headed by a brass band, marched into the Park and formed a wide circle to enact their exercises. Headed by another brass band, 300 gaily dressed children, carrying floats of their own make, took possession of another side of the square. The ceremonies were similar to those already described, the older boys presenting "Porchinello," an Italian farce. Athletic events were enacted on the center walk of the park. Some 5,000 persons witnessed the exercises.

DeWitt
Clinton
Park

An elaborate and highly interesting program was carried out in DeWitt Clinton Park, where Mrs. Henry Parsons distinguished herself by her energy and untiring zeal in promoting one of the most memorable features of the day. The ceremonies here followed the general character of those already outlined. Mrs. Russell Sage watched the parade and the wax with great interest, and as the children marched past the white-haired woman, thousands of voices cheered the benefactress. The Board of Education supplied 1,500 children from the public schools in the 11th and 14th school districts, the parochial schools provided 1,500 children each from the upper and lower ends of the district, and the churches furnished several hundred children from their Sunday schools. The political organizations formed in line all children not included in the public, parochial or Sunday school groups.

bringing up the rear, thus insuring every child in the district a part in the joyous Celebration. The line of march formed at public schools centrally located in each section, political headquarters and churches; the lower half marching west through 47th street, the upper half west through 57th street, to 12th avenue, meeting at DeWitt Clinton Park. Six thousand children were seated on the grass slope of the Park facing the Hudson River, and on benches on the asphalt walk just above the ground. There under the political organizations and the costumed children who were to dance, were accommodated on the sand piles on the water front, adding much to the picturesqueness of the scene. Six hundred children took part in the dances, three hundred dressed in Colonial costumes which had been made by the parents of the neighborhood meeting in DeWitt Clinton Park. One hundred peace angels and one hundred boys, carrying flags of all nationalities which they dipped at the feet of the peace angels, came from the parochial schools. The Mother Superior trained these children herself in order that there might be no mistake. In fact, to ensure success in every line, the heads of schools, churches, etc., all attended to these details themselves.

In Central Park the exercises were equally interesting and the interest quite as general. Some 8,000 happy, cheering children, keeping step to two brass bands and waving Hudson-Tulsa flags supplied by the Committee, marched in at the eastern gate at 72d street to take possession of the grounds. Flags soon waved over a living circle of every color of the rainbow. An American flag of tremendous proportion was composed of boys and girls of the Bohemian Free School, dressed in red, white and blue gymnasium suits. Among the attractive features were floats drawn by real horses. One of these, representing a huge Dutch windmill, was so high that it would not go under the Second avenue elevated tracks and had to be taken into the park by a roundabout course.

Prospect
Park

In Prospect Park, Brooklyn, the program included the ceremony of surrender of Lord Cornwallis to Gen. Washington. Around the square formed about these central figures, some 3,400 school children were straining against the ropes. Above them fluttered the orange, white and blue tri-color of the Hudson-Fulton Celebration, and beyond the school children, in almost every direction, the small hills were crowded with other children and their parents and friends, not costumed for the occasion as those within the roped square, but nevertheless flaunting as many flags and showing as great a diversity of colors. All made up a gathering estimated as high as 10,000. With the surrender of his sword by Lord Cornwallis, a band hidden somewhere in the crowd struck up "America" and all removed their hats and joined in the song.

Some 4,000 children of the Flatbush schools marched all the way from Erasmus Hall High School to the Prospect Park Parade Grounds with four floats, one with a representation of the first Dutch church built in Brooklyn, and the majority of the children in costumes typifying historical characters and their followers. The regular program was in the main followed in the exercises.

Bush-
wick

More than 15,000 children participated in the ceremonies in the Bushwick section, and Bushwick avenue, from Decatur to Hart streets, was one riot of color in all the lanes of the rainbow. The program was carried out in Seneca Field.

Fort
Greene
Park

Fort Greene Park had two celebrations. Some 4,000 children were on the plaza in front of the Martyrs Monument, representing the public and parochial schools, settlements and clubs of the Second Assembly district. On the south side of the Park, near Cumberland street and De Kalb avenue, was another group of children from the Heights and Carroll Park sections. Norwegian children furnished one of the floats representing Leif Eriksen and his Viking crew discovering America in 1000 A. D.

Every public school in Sheepshead Bay, the Gravesend ^{Sheepshead Bay} Reformed Dutch Church school, the Parkville Congregational Church school and drum corps and St. Paul's Lutheran Church from Coney Island joined in observing the day at Sheepshead Bay.

Fully 5,000 children were present at the ceremonies in High-^{Park}land Park, where an excellent program was carried out.

The residents of Fort Hamilton celebrated the event in ^{Park}McKinley McKinley Park and the festival proved that they were able to compete with any section of Brooklyn in doing honors to the heroic heroes of the occasion. Everything moved smoothly and without any disorder and at least 5,000 persons were in attendance to witness the imposing ceremonies, dances and tableaux.

The upper Williamsburg and Greenpoint sections were loyal with-ⁱⁿ to Children's Day in their impressive ceremonies and excellent program of exercises. The largest assembly of school ^{Green-}children on record passed through all the principal streets ^{point} about 12,000 children in costumes or armed with flags turning out in the parade.

The school festivals in Richmond Borough were unquestion-^{Rich-}ably one of the best features of the great commemorative event, ^{mond} and approximately 10,000 children participated in the exercises, ^{Borough} which had no precedent for brilliancy and sumptuousness.

One of the most notable celebrations took place at Stony ^{Brook} Brook on Amboy Road, New Dorp, and the boys and girls of that part of Staten Island are not likely to forget the Hudson-Fulton Celebration and what it signified.

The Celebration at Concord and associate divisions was marked by many splendid and novel features, which were noteworthy all through, and many beautiful floats and tableaux were displayed of great range and variety.

The pupils of Public School Nos. 8, 12, 16, 32 and 34 held ^{Bronx} a grand parade in Bronx Park. Public School 32 was requested ^{Park}

Bronx
Park

to organize the pageant by costuming its pupils to represent typical historic periods from the time of the discovery of the Hudson to the present time. The costuming, arrangements and other lesser matters were attended to by the teachers of the school in cooperation with the parents of the children, and great care was exercised properly to portray each period. In this parade there were 3,300 children, divided into five regiments. Regiment No. 1 consisted of 900 pupils from Public School 32. The remaining regiments numbered about 600 each. Each child carried a Hudson-Fulton flag. At about 11:30 A. M. two special trains on the elevated railroad carried Regiment No. 1 to Bronx Park through which they marched to Moshole Parkway and Briggs avenue where the final formation of all regiments occurred. Thence the children marched through Bronx Park to the selected rendezvous—a beautiful natural amphitheatre before the picturesque Boerhaave Museum Building. On all sides of the imposing assemblage were countless numbers of spectators while in the background were many automobiles. Here, amidst the autumnal beauty of the surrounding trees appropriate exercises were held. A pageant, consisting of five parts in pantomime, presented by pupils of Public School 32, portrayed the following scenes: First, *New Amsterdam in Dutch days*. Second, *the Surrender of New Amsterdam to the English under Colonel Nicolls*. Third, *Reception—The English Rule*. Fourth, *Life in Fulton's Time*. Fifth, *New York—The Gateway of the Nation*. The singing of *America* and *The Star Spangled Banner* followed and as a grand finale came the salute to the flag by the assembled multitude. Each regiment was then taken back to the school from which it had started and there disbanded.

Crotona
Park

In no part of Greater New York was displayed interest greater than that of the children of the 25th school district who held exercises in Crotona Park, in the Bronx. These exercises

were commemorative of the discovery of the Hudson River and its subsequent history. This beautiful playground, with its long Indian Pond, formed a splendid natural setting for the dramatic enactment of the story of the river. The children, teachers, and principals from Public Schools 2, 4, 6, 11, 23, and 28, marched to Washington and Wendover avenues, where over five pupils of Public School 42, costumed to represent various periods in American History, from the old Dutch and Colonial times down to the present, fell into line. The procession marched through Crotona Park South, to Prospect avenue, where it was joined by the pupils of Public School 40. This army of school children then proceeded to the lake, where at least five of the friends and parents had already gathered. Grouped on the slopes around the lake, the children formed a picturesque sight. The "Revolt" announced the beginning of the "Story of the Hudson," which was to be depicted by a number of allegorical scenes, arranged by the marchers, and presented by the boys and girls of Public School 40. In the opening scene, the spirit of truth, a messenger of the all-seeing from our first Colonial who appeared before the first Dutch landing in his youth and vigor, and the pure vision of truth, full of compassion, appeared to her daughter in all her glory and strength, to rescue her less fortunate sister. This she does by sending discoverers, explorers, and settlers to build up the country. Seated upon the banks of the Hudson River, the Algonquin Indians beheld the approach of the Dutch, come with its crew of white men. The Dutch Dance Council, and the Pipe of Peace was offered to Hudson and his crew. Ariel next called the spirits of Peter Minuin and the great Chief Mahamais, and the sale of Manhattan Island for twenty-four dollars worth of cloth, knives, and trinkets was shown. Following this, Fort Amsterdam was surrendered to the British, the Dutch Council defying their

CROTONA
PARK

governor, Peter Stuyvesant. A lapar of one hundred and fifty years brought the story to the beginning of the 19th century, when Ariel's wand caused Robert Fulton and his Clermont to appear in his epoch-making voyage to Albany. The page included with it a list of the great Columbians: Peter Knickerbocker and Uncle Sam of the discoverers from Leif Ericson to balloon, and of the inventors from Fulton to the Wright Brothers. The uniforms then appeared, bearing tribute to Columbia. All joined in the salute to the Stars and Stripes, and in the singing of the National Hymn.
